New Readers' Guide to the World Almanac

Every important subject covered in the World Almanac is listed in the comprehensive General Index, where it is cross-indexed under a number of headings, making it possible for a reader to quickly find the desired information.

The following hints are intended for the student or new reader so that he may use the General Index to best advantage.

When seeking any information, the reader would do well to check first the Quick Reference Index, which lists general subjects that experience has shown are popular topics often referred to by readers.

If the subject on which the reader is seeking information is not listed in the Quick Reference Index, he should ask the following questions of himself before consulting the General Index:

1. Is the subject famous? A noted personality, place, historical event etc.?

If so, chances are excellent it is specifically listed in the General Index and the reader will need to look no further. Such subjects as Babe Ruth, World War I, the Pentagon, the Alamo and hundreds of others, would fall into this category.

But if the information sought is not sufficiently noteworthy to have its own listing in the General Index, the reader should then ask himself:

2. Into what general category does the information sought fall?

If the reader was seeking information about a lesser known home run hitter

than Babe Ruth, such as Al Kaline, he would not find a separate listing for Rosen, but under the listing "Baseball" would be guided to home run leaders of all time, including Kaline.

In the same way, if the Pentagon did not have its own listing, the reader could locate it in the book under "Washington, D. C.," where he would find a sub-head "public buildings" which would lead him to the pages covering the Pentagon and other public buildings in the Capital. A check under "Buildings, office, world's largest," would also locate the information desired.

All of the subjects cited in these examples could be located by using the Quick Reference Index. Ruth's and Rosen's records come under "Sports Records" in the Quick Reference Index. The Pentagon's Quick Reference Index general listing is "Washington, the Nation's Capital." Information about the Alamo can be located under the Quick Reference Index heading of "Memorable Dates."

But if the Quick Reference Index should fail to turn up the information, a simple rule for using the General Index is:

Work from the specific subject to the more general subject.

Categorize the information wanted, historically, geographically or into any other logical subject heading to which it might reasonably belong.

Electoral Votes for President, 1952-68

The Constitution, Article 2, Section 1 (consult index), provides for the appointment of electors, the counting of the electoral ballots and the procedure in the event of a tie. (See *Electoral College*, page 914.)

The chief reason why the Constitution provided for a census of the population every 10 years was to give a basis for apportionment of Representatives among the states. This apportionment is of added importance because it largely determines how many electoral votes are allotted to each state in Presidential elections. See *Electoral College*.

The number of Representatives of each state in Congress is determined by the state's population, except that each state is entitled to one Representative regardless of population. A Congressional apportionment has been made after each decennial census except that of 1920.

Under provisions of a law that became effective Nov. 15, 1941, apportionment of Representatives is made by the method of equal proportions. In the

application of this method, the apportionment is made so that the average population per Representative has the least possible variation between one state and any other. The first House of Representatives, in 1790, had 65 members, or one Representative for each 30,000 of the estimated population, as provided by the Constitution. As the population grew, the number of Representatives was increased but the total membership has been fixed at 435 since 1912 by action of Congress. On the basis of the 1960 census, with 435 Representatives, there was one for each 410,481 persons.

With the admission of Alaska and Hawaii to the Union, the total number of Representatives rose to 437 temporarily. It reverted to 435 with the new apportionment after the 1960 census.

The World Almanac

and Book of Facts for 1969

The 193rd anniversary of the adoption of the Declaration of Independence, 1776, falls on July 4, 1969. The 182nd anniversary of the signing of the Constitution of the United States, 1787, falls on September 17, 1969. The Government declared the Constitution in effect March 4, 1789.

The first edition of the WORLD ALMANAC, a 120-page hand-set volume containing 12 pages of advertisements, was published by the New York World 101 years ago, in 1868. Annual publication was suspended in 1876. Joseph Pulitzer, publisher of the New York World, revived the WORLD ALMANAC in 1886 with the goal of making it a "compendium of universal knowledge." It has been published annually since. In 1931 it was acquired by Scripps-Howard; until 1951 it bore the imprint of the New York World-Telegram, thereafter until 1967 that of the New York World-Telegram and Sun. It is now published in paper and cloth-bound editions by Newspaper Enterprise Association, Inc.

President-elect Richard M. Nixon, commenting Nov. 6, 1968, upon his election, said: "I saw many signs in this campaign. Some of them were not friendly and some were very friendly. But the one that touched me most was one that I saw in Deshler, Ohio, at the end of a long day of whistle-stopping, a little town, I suppose five times the population was there in the dark, almost impossible to see—but a teen-ager held up a sign, 'Bring Us Together.' And that will be the great objective of this Administration at the outset, to bring the American people together."

The Editor acknowledges with thanks the many letters, whether of helpful comment or criticism, that attest the usefulness of the WORLD ALMANAC, and invites suggestions for improvement of its services to readers. Address: 230 Park Avenue, New York, N.Y. 10017.

The WORLD ALMANAC does not decide wagers.

1968—THE YEAR THAT WAS

As the World Almanac enters its second century with this 101st Anniversary Edition, it chronicles the events and developments of a year that was second to none in this long span for surprises, both pleasant and unpleasant, and for shocks, some of which shook not only America but the entire civilized world.

What distinguished 1968 from any of the 100 other years since the establishment of the World Almanac? Here are some of the landmark events, not necessarily in exact order of chronology or importance, which are covered in more detail elsewhere in this edition:

U.S.S. Pueblo—First seizure of a U. S. warship on the high seas in 150 years (captured by North Korea).

Scorpion—U. S. nuclear submarine lost with 99 men aboard.

Dr. Benjamin Spock—Indictment and conviction of famed pediatrician for conspiring to abet draft violations.

Gov. George Romney—Surprise withdrawal of Michigan leader from race for Republican Presidential nomination.

Sen. Eugene McCarthy—Unprecedentedly successful challenge (on a peace platform) to an incumbent President for the White House nomination by a leader of his own party.

Assassinations—The entire world was horrified by the senseless slayings of the Rev. Dr. Martin Luther King, Negro civil rights leader, and Sen. Robert F. Kennedy, brother of the assassinated President John F. Kennedy.

Student Protests—A student rebellion that closed Columbia University in New York City was perhaps the most notable in a wave of college disruptions stemming from racial unrest, anti-war sentiment, and revolt against administrative authority.

Peace Prospects—Hopes for an end to the war in Vietnam were raised by the opening of preliminary talks in Paris and increased significantly after President Johnson announced the cessation of U. S. bombing of North Vietnam.

Johnson Withdrawal—Biggest political bombshell in many years was President Johnson's announcement that he would not seek or accept his party's nomination for another term in the White House.

Biafra Horror—The sympathy and outrage of the world were aroused by the plight of the children of Biafra, starving by the hundreds of thousands because of the revolt of that province against parent Nigeria.

Birth Control—An encyclical by Pope Paul VI against modern methods of contraception caused widespread controversy and threatened a revolt within the Roman Catholic Church.

Presidential Election—The Presidential election year was featured by unprecedented violence in the streets during the Democratic National Convention in Chicago and by the victory of Republican nominee Richard M. Nixon by a razor-thin margin.

Czechoslovakia Invaded—The world trembled when the Soviet Union and its Warsaw Pact puppets invaded Czechoslovakia to snuff out a liberalist movement in that country.

Man to the Moon—Man's drive to land on the lunar surface received fresh impetus from space achievements by the Soviet Union and the United States. The USSR sent two unmanned vehicles around the moon and back to earth and sent a single-manned vehicle into experimental flight. The United States sent a 3-manned Apollo craft into earth orbit for 11 days and announced plans for another 3-man Apollo to orbit the moon before the end of 1968.

PRESIDENTIAL ELECTION, 1968

Republican Richard M. Nixon Victorious in Cliff-Hanger

In one of the most dramatic and suspenseful elections in this century, former Vice President Richard Milhous Nixon was elected the 37th President of the United States Nov. 5, 1968. In his second Presidential bid, the Republican nominee and his Vice Presidential running mate, Maryland's Gov. Spiro T. Agnew, carried 32 states in a 3-way race, garnering 302 of the 538 electoral votes and about 43.4% of the popular vote.

Nixon's proportion of the popular vote was the lowest received by any victorious Presidential candidate since Woodrow Wilson won with 41.9% in a 3-way race in 1912. While the estimated total of 72,000,000 votes in 1968 set a record, analysis of national totals indicated that only about 60% of the 120,000,000 Americans of voting age cast ballots. This was the lowest proportion since 1956, when 60.5% voted as President Eisenhower was chosen for his second term.

The 1968 Election Night vigil was tense as Nixon ran neck-and-neck with his Democratic opponent, Vice President Hubert H. Humphrey. The suspense was intensified by the breakdown of a computer system assembling the nationwide results for major news media. With 270 electoral votes required for a majority, it was not until the following day that Illinois' 26 were assured to Nixon, putting him over the top. Ironically, it was Illinois that had swung the 1960 election from Nixon to John F. Kennedy when Cook County gave the Democrat a 9,000-vote statewide margin.

In the 3-way 1968 election, Nixon received over 31,000,000 votes—3,000,000 fewer than he did in his two-way contest with Kennedy 8 years earlier.

Despite Nixon's very slight lead over Humphrey in the popular vote, the Republican nominee came in a winner by gaining pluralities in several key states where Kennedy had edged him out in 1960. These included the prize electoral plums of California, Illinois, Indiana, New Jersey and Ohio. Yet, Nixon did not carry one major city in the nation.

Humphrey, Muskie Win 191 Electoral Votes

Humphrey and the Democratic Vice Presidential candidate, Maine's Sen. Edmund S. Muskie, received slightly over 43% of the popular vote and won 191 electoral votes from 13 states and the District of Columbia.

Opinion polls had indicated early in the campaign that the 3d party vote might bar an electoral majority to either of the two other candidates. But this threat was dispelled as George C. Wallace won only 5 states and their 45 electoral votes, all in the South—Alabama, Arkansas, Georgia, Louisiana and Mississippi.

Wallace and his Vice Presidential running mate, Gen. Curtis E. LeMay, got over 9,500,000 votes, some 13.5% of the popular total. While somewhat less than had been predicted, the Wallace ticket got the highest 3d party popular vote percentage since Robert M. La Follette received almost 17% in 1924. The Wallace popular vote was the largest in history for a 3d party candidate.

There were varying assessments of the effect of the Wallace candidacy on the results achieved by Nixon and Humphrey. But there was general agreement that the Wallace strength faded toward the end of the campaign. This was attributed in some measure to the "don't waste your vote" theme of both major parties and to union campaigns for Humphrey. Much of Humphrey's homestretch surge, which threatened Nixon's early-start advantage, was held due to President Johnson's halting of the bombing of North Vietnam

shortly before the election.

Although Humphrey and Muskie won their home states—Minnesota and Maine—Nixon and Agnew lost theirs—New York and Maryland. This was contrary to two political traditions—that no Republican can be elected President without carrying New York and that Minnesota always votes with the winner.

Democrats Keep Congressional Control

The Democrats kept control of Congress: the House 243 to 192 and the Senate 58 to 42. This made Nixon the first President to begin his first term confronted by the problem of opposition party control of both houses of Congress since Zachary Taylor faced the same situation in 1848. In 1968 the voters cut the Democratic margin in the Senate from 26 seats to 16 seats, and in the House from 58 to 41.

One of the more notable Senate races was in New York, where Republican Sen. Jacob Javits won a 3d term by over 1,000,000 votes, the biggest margin of his career, while Nixon was losing the state to Humphrey by nearly 400,000. Arizona's former Sen. Barry Goldwater, 1964 GOP Presidential candidate, beat Roy Elson for the seat vacated by retiring Democratic Sen. Carl Hayden. Four-term Sen. Wayne Morse of Oregon, who ran behind Republican State Rep. Robert W. Packwood, demanded a recount.

GOP Scores Gubernatorial Gains

With 21 governorships on the line, the GOP gained 5 in early and decisive gubernatorial results, taking 7 states from the Democrats and losing two. This gave the Republicans 31 governors, the most they had had since the total of 34 they reached in the 1920 Warren G. Harding landslide. Moreover, after the 1968 votes were counted, the GOP had governorships in 6 of the most populous states—California, Illinois, Michigan, New York, Ohio, and Pennsylvania.

The only one of these important gubernatorial posts contested in 1968 was that of Illinois, where Richard Ogilvie, 45, Cook County Board president and former Federal prosecutor, won a key GOP prize by defeating Democratic incumbent Gov. Samuel Shapiro.

But the Republican cause was jolted when two well known GOP governors lost to unknown Democrats: the casualties were Rhode Island's John Chafee, running for his 4th term, and Montana's Tim Babcock, seeking his 3d.

Vermont and Iowa returned to the traditional Republican column, with Deane C. Davis winning over Vermont Lt. Gov. John J. Daley, and Robert D. Ray victorious over Iowa State Treasurer Paul Franzenburg.

Ticket splitting was the order of 1968 Election Day, and this was evidenced right down to the statehouse level as voters resisted predictable patterns. While Humphrey easily carried New York, for example, Republicans regained control of the State Assembly, which they had lost in 1964. The GOP captured control of the California State Assembly for the first time in a decade, but lost control of the Pennsylvania State House of Representatives and Michigan's lower house.

Major Nominating Conventions of 1968

Republican Convention Designates Nixon and Agnew

The Republican National Convention in Miami Beach, Fla., named former Vice President Richard M. Nixon, 54, its Presidential nominee on the first ballot, early Aug. 8, 1968, and later that day ratified his choice of Maryland Gov. Spiro T. Agnew, 49, for Vice President.

The acknowledged front runner in the final weeks before the convention, Nixon defeated New York Gov. Nelson A. Rockefeller and California Gov. Ronald Reagan. Reagan announced his candidacy two days before the balloting, amid speculation of increasing support for him among Southern delegates. Both had worked hard to block a 1st-ballot win for Nixon, with Rockefeller putting strong stock in public opinion polls to boost his image of voter popularity.

Agnew, who made the nomination speech for Nixon, had been one of 3 favorite-son candidates, but had withdrawn in Nixon's favor. No serious threats to Nixon's candidacy were posed by the two others, Michigan's Gov. George W. Romney and Ohio's Gov. James A. Rhodes.

Nixon's choice of Agnew came as a surprise and was attributed to a rumored deal with Sen. Strom Thurmond (S. C.), who was credited largely with winning the Southern delegates for Nixon. Despite a brief liberal Republican flareup of dissent at Agnew's selection, New York Mayor John V. Lindsay of the liberal wing seconded Agnew's nomination, made by Rep. Rogers C. B. Morton (Md.). Both Romney's and Lindsay's names had been placed in nomination—Romney got 186 votes, Lindsay 10—but Romney asked that the nomination be made unanimous, and it was. Agnew received 1,128 votes.

Seconding speeches for Nixon were made by Sens. Howard H. Baker, Jr. (Tenn.) and Mark O. Hatfield (Ore.); Richard Ogilvie, GOP candidate for governor of Illinois, and Gov. John A. Volpe

(Mass.). Nixon's 1st ballot victory came at 1:50 a.m. Aug. 8, when he received all 30 Wisconsin votes which he had won in a primary, giving him more than the 667 votes needed for the nomination. Before switches the 1st ballot total for Nixon was 692; Rockefeller, 277, and Reagan, 182. Nixon's tally went up to 1,238 at the end of the ballot. Reagan, appealing for party unity after Nixon's victory, asked the convention to make it unanimous, but the motion did not come up for a vote. Rockefeller pledged his support to Nixon at an Aug. 8 press conference. Altogether, 12 names were put in nomination.

Ray C. Bliss, chairman of the Republican National Committee, opened the parley at 10 a.m., EST, Aug. 5. The 1,333 delegates heard speeches by ex-Sen. Barry Goldwater (Ariz.), the party's 1964 standard bearer, who called for Republican unity; Sen. Edward Brooke (Mass.), leading GOP Negro spokesman; former President Dwight D. Eisenhower, speaking on closed circuit TV from Walter Reed Army Medical Center in Washington, D. C., where he was recuperating from a 5th heart attack. Mr. Eisenhower, who suffered his 6th attack early the next morning, warned of the dangers of Communism, describing it as "a formidable foe—an expansionist tyranny which respects only toughness and strength."

The keynote address by Washington Gov. Daniel J. Evans reflected the moderate tone of the proposed GOP platform. Blaming the Democratic administration for the frustrations of Vietnam and the urban crisis, he urged that Republicans "unite to rally a great party in the cause of a great nation."

Delegates adopted the platform without controversy. Differences, mostly over the Vietnam plank, on which Nixon and Rockefeller forces compromised, were settled by the committee, headed by Senate GOP leader Everett Dirksen (Ill.).

Democrats Name Humphrey-Muskie Ticket

In one of the most turbulent parleys in U. S. convention history, the Democrats, meeting in the Chicago International Amphitheater Aug. 26-29, 1968, nominated Vice President Hubert H. Humphrey, 57, for the Presidency shortly before midnight Aug. 28 and Maine Sen. Edmund Sextus Muskie, 54, for the Vice Presidency on Aug. 29.

Violence erupted intermittently in the streets as police clashed with anti-war demonstrators, and charges of police brutality and "Gestapo tactics" were leveled from the convention floor at the host city's Mayor, Richard J. Daley, whose security precautions had virtually turned the convention hall into a fortress. In a welcoming address, Mayor Daley, who had bolstered the city's police force with National Guardsmen and regular Army troops, defended his action as a requisite to "law and order" in the face of threatened violence, strikes and some 100,000 expected anti-war demonstrators. Actually, some 10,000-15,000 showed up.

Near pandemonium often threatened to end the convention itself and dramatized the deep party split on the Vietnam issue. One of the wildest sessions came when the convention, after an unprecedented 3-hour debate Aug. 28, rejected an anti-war plank fashioned by followers

of Sens. Eugene J. McCarthy (Minn.) and George S. McGovern (S. D.), the two major losing Presidential candidates, in favor of one endorsing President Johnson's policy.

A record number of challenges over seating of delegates came up. Most claimed bias and inadequate Negro representation. Fifteen challenges involving 13 states were settled at the start of the convention, but those of 4 states—Texas, Georgia, Alabama and North Carolina—ran beyond Credentials Committee hearings and through a stormy first convention, which did not break up until 2:40 a.m. Aug. 27. Pandemonium broke out after defeat of a move to seat Negro challenger Julian Bond, Georgia state Representative, and his group with all his state's votes. Bond had challenged regular delegates picked by Gov. Lester G. Maddox and state party chairman James H. Gray. At the second session, the convention approved a split-vote compromise suggested by Gov. Richard J. Hughes (N. J.), co-chairman of the Credentials Committee.

John M. Bailey, Democratic party chairman, opened the convention. Hawaii Sen. Daniel K. Inouye, delivering the keynote address, stressed that the party was one of change and challenge which could

deal with problems of America; he lauded the Administration's work in civil rights, disarmament, health and education.

Humphrey's name was put in nomination by San Francisco Mayor Joseph L. Alioto, who described him as a "decisive leader." Gov. Terry Sanford of North Carolina and Cleveland Mayor Carl Stokes seconded the nomination.

There were boos which continued throughout the night when Rep. Carl Albert (Okla.), convention chairman, ordered the roll call for nominations over protests by delegates who wanted to recess the session because of the violence in the streets. More jeers accompanied the ye vote taken by Albert

at 12:03 a.m. Aug. 29, when the Illinois delegation asked that Humphrey's nomination be made unanimous. Humphrey's 1st ballot total was 1,761½; he attained the required 1,312 votes at 11:47 p.m., when Pennsylvania cast 103½ for him.

Sen. McCarthy got 601 1st ballot votes and Sen. McGovern 146½. Two other candidates were placed in nomination—the Rev. Channing E. Phillips, of Washington, D. C., the 1st Negro favorite-son for any major party, with 67½ votes, and North Carolina Gov. Dan K. Moore who withdrew before the end of the 1st ballot, with 17½ votes. Sen. Edward M. Kennedy (Mass.) received 12¾ votes though he had opposed a Kennedy draft.

Biographies of Principal Candidates in 1968 Campaign

Republican

Richard Milhous Nixon, 55, Republican nominee for President, was elected Vice President in the Eisenhower landslides of 1952 and 1956. Born in Yorba Linda, Calif., Jan. 9, 1913, the son of Francis Anthony and Hannah Milhous Nixon, he attended Whittier College and Duke University Law School, where he finished 3rd in his class. He joined the Navy in 1942; served in the Pacific and was discharged as lieutenant commander. He was elected to the House of Representatives in 1946 and 1948. In 1950 he moved to the Senate after defeating Helen Gahagan Douglas in a bitter campaign in which he accused her of being "soft on communism." Co-author of the Mundt-Nixon Communist-control bill, in 1948 he achieved prominence as the House Un-American Activities Committee member who forced the showdown that resulted in the Alger Hiss perjury conviction. He lost his bid for the Presidency in 1960, trailing John F. Kennedy by 118,550 popular votes. Beaten for California governor by Edmund G. Brown in 1962, he retired to private life and law practice and, in 1963, moved to New York where he became senior partner in the law firm of Nixon, Mudge, Rose, Guthrie, Alexander & Mitchell. Speaking for party unity, he campaigned for Goldwater in 1964 and for Republican Congressional candidates in 1966. He took to the "long hard road of the primaries" to erase his reputation as a "loser," remaining moderately conservative in government spending and internationalist in foreign policy. A more serene and confident figure than he had been in the two previous campaigns, he stressed the need for "black economic power" and eased his hawkish stand on Vietnam. He and his wife, the former Thelma Catherine Patricia Ryan, have two daughters, Patricia, 22, and Julie, 20.

Republican

Spiro Theodore Agnew, 50, candidate for Vice President, elected governor of Maryland in 1966, began his career as county executive of Baltimore County in 1962 after several years of local activities as a member of the zoning board, president of a junior high school PTA and the Kiwanis. The son of a Greek immigrant whose name was Anagnostopolous, he was little known outside Maryland, conceded that his name "is not a household word." Born Nov. 9, 1913, in Maryland, he attended Johns Hopkins University and worked his way through the University of Baltimore law school, graduating in 1947, after serving 4 years in the Army during World War II. He was recalled for a year during the Korean action. Considered a liberal Republican and reformer at the time of his election, Gov. Agnew pushed through progressive legislation, including the 1st local public accommodation law south of the Mason-Dixon line. He disappointed his moderate supporters with criticism of the Kerner report on urban riots, student sit-ins and Resurrection

City. He is married to the former Elinor Isabel Judefind. They have a son, James, 22, serving with the Navy in Vietnam, and 3 daughters.

Democratic

Vice President Hubert Horatio Humphrey, Jr., 57, was born in Wallace, S. D., May 27, 1911 above his father's drug store. He interrupted his education at the University of Minnesota after two years to return home during the depression of 1931 to help run the family drug store in Huron, S. D. He received a pharmacy degree from the Denver College of Pharmacy in 1933, a bachelor's degree in political science from the University of Minnesota in 1939 and a master's degree from Louisiana State Univ. in 1940. After teaching stints at Minnesota U. and Macalester College, St. Paul, and serving on the regional War Manpower Commission in the early stages of World War II following his rejection by the Army due to a hernia, he was elected Mayor of Minneapolis in 1945 and 1947. He closed gambling houses and brothels, and got enactment of the first municipal Fair Employment Practices law in the country. Elected senator from Minnesota in 1948 and reelected twice, he was considered an overly voluble and intransigent liberal by his colleagues. His eloquence put over the civil rights plank in the 1948 Democratic platform. He was elected majority whip in 1961, after campaigning for the Presidential nomination in 1960 and losing to John F. Kennedy. He became a power in the Senate establishment as his views became gradually more moderate. Chosen by Lyndon B. Johnson to be his running mate in the 1964 election, his support of Johnson's Vietnam policy cost him the loss of much of his former liberal support. He authored two books, "The Cause is Mankind: A Liberal Program for Modern America" and "Moral Crisis: The Case for Civil Rights" in 1964. A member of the United Church of Christ, he is married to the former Muriel Fay Buck and is the father of 4 children.

Democratic

Edmund Sixtus Muskie, 54, Democratic candidate for the Vice Presidency, in 1958 became the first popularly elected Democratic Senator in Maine history. Born Mar. 28, 1914, in Rumford, Me., son of a Polish Catholic tailor whose last name was changed from Marciszewski to Muskie by immigration officials, he worked his way through Bates College, received a law degree from Cornell Law School and was a Navy officer during World War II. He was elected to the Maine House of Representatives in 1946. Before entering the U. S. Senate, he had achieved another record in 1954, when he was the first Democrat to be elected Governor of his state in 20 years, serving two terms. Deemed an expert on urban problems in the Senate, to which he was reelected in 1964, he pushed hard for air and water pollution curbs. He and his wife, the former Jane F. Gray, have 5 children.

Third Party

George Corley Wallace, 49, former Democratic Governor of Alabama, announced his candidacy Feb. 8, 1968, as a 3d party Presidential candidate, pledging he would quell riots with troops and bayonets and work for a change in the "so-called guidelines" on desegregation. A pro-

ponent of states' rights and thought to have mostly sectional and segregationist appeal at first, he drew large audiences of ardent supporters as well as hecklers as he campaigned vigorously throughout the country. This resulted in speculation that he might pull needed votes from

the two major party candidates. On May 7, a slate of Alabama elector candidates won over token opposition to make Wallace the regular Democratic candidate from that state. In 1964, he surprised political observers with the support he drew as Presidential candidate in Democratic state primaries outside his state. Born in Clio, Ala., Aug. 25, 1919, he was state bantamweight champion in high school and boxed professionally to help pay his way through U. of Alabama law school. He served in the Air Force after graduating in 1942. Elected Governor in 1962, he could not succeed himself according to Alabama law. When his wife, Lurleen Burns Wallace, mother of his 4 children, was elected to succeed him in 1966, it was with the understanding that she would be Governor in name only and he would continue to make policies and decisions. She died May 7 while he was on the campaign trail.

Curtis Emerson LeMay, 61, retired Air Force Chief of Staff, was named by George C. Wallace Oct. 3, 1968 to be his Vice Presidential running mate. LeMay, father of the Strategic Air Command, had advocated use of atomic weapons against North Vietnam. Before retiring

in 1965, Gen. LeMay carved out an outstanding career in 35 years in uniform that included running the Berlin blockade airlift and designing the devastating stacked-plane formation that wrought massive destruction on the enemy in Europe and Japan in World War II. Blunt and gruff, known by the military nickname of "Old Ironpants," he was often the man in the lead plane. Daring as a pilot and thorough as a mechanic, he attained the rank of Major General by the end of the war and became a full general in 1951. He was named Air Force Chief of Staff in 1961. Born in Columbus, Ohio, on Nov. 15, 1906, the son of an ironworker of French-Canadian descent, he attended Ohio State U., enrolled in the ROTC program there and gained a reserve commission in the National Guard. He became a flying cadet at California's March Field in 1928. He married Helen Estelle Maitland of Cleveland in 1938; they have a daughter, Patricia. Gen. LeMay, of Los Angeles, is a former board chairman of Networks Electronics Corp. He has written two books, "Mission with LeMay: My Story" and "America Is in Danger," released shortly before announcement of his candidacy.

1968 Platforms of Major Parties

A strong similarity marked the platforms adopted in 1968 by the Democrats and Republicans, especially on 3 key issues—the Vietnam war, the urban crisis, and law and order. Except for GOP criticism and Democratic praise of the Johnson Administration, the parties followed parallel middle-of-the-road paths. Highlights follow:

Democratic—Plank indorsing Johnson Administration policy, adopted Aug. 28, declares: "Our most urgent task in Southeast Asia is to end the war in Vietnam by an honorable and lasting settlement which respects the rights of all the people of Vietnam." Proposes end to bombing of North Vietnam "when this action would not endanger the lives of our troops in the field" and depending on "the response from Hanoi;" a ceasefire for withdrawal of U. S. and Hanoi troops; "fair and safeguarded elections" to form a post-war government, and stepped-up training of South Vietnamese army to allow U. S. military cutbacks.

Republican—Platform adopted Aug. 7 proposes "a progressive de-Americanization" of war. Pledges development of a "clear and purposeful negotiating position" in its "program for peace in Vietnam—neither peace at any price nor a camouflaged surrender of legitimate United States or Allied interests—but a positive program that will offer a fair and equitable settlement to all, based on the principle of self-determination, our national interests, and the cause of long-range world peace."

LAW AND ORDER

Democratic—Reasserts dedication to "principle that equal justice under law shall remain the American creed." Pledges "a vigorous and sustained campaign against lawlessness in all its forms," combined with an attack on the root causes of crime and disorder." Will "implement" recommendations of the President's National Advisory Commission on Civil Disorders "to wipe out, once and for all, the stain of racial and other discrimination from our national life."

Republican—Pledges "all-out" crusade against crime and "vigorous and even-handed administration of justice and enforcement of the law," adding: "We must reestablish the principle that men are accountable for what they do, that criminals are responsible for their crimes." Urges decisive action to suppress civil disorders but advocates measures "to alleviate and remove the frustrations that contribute to riots."

URBAN CRISIS

Democratic—In the framework of Model Cities program will continue attack on poverty in large city slums via "economic development, the rehabilitation or replacement of dilapidated and unsafe housing, job training and placement, and

the improvement of education, health, recreation, crime control, welfare and other public services." Steady extension of Model Cities program. Will marshal private enterprise in "attack on slums and poverty." Pledges new Federal banking structure "to provide capital and investment guarantees for urban projects planned and implemented through local initiative."

Republican—Cites critical need to stem crisis of decaying urban centers. Terms "deepening misery and limited opportunity" of slum residents "intolerable." Prescribes "new mix of private responsibility and public participation." Will accelerate rural development to stem flow of people from countryside to city. Will revise welfare and poverty programs drastically to "liberate poor from the debilitating dependence which erodes self-respect and discourages family unity and responsibility." Proposes employer tax credits to encourage job training and upgrading for disadvantaged. National Job Opportunity Data Bank to aid unemployed.

ECONOMIC POLICIES

Democratic—"The Democratic economic policies that more than doubled the nation's rate of economic expansion in the past 18 years can double and redouble our national income by the end of this century. Such a rate of economic growth will enable us to win total victory in our wars on ignorance, poverty and the misery of the ghetto." Will continue tax cuts when economy is sluggish and hikes to curb inflation.

Republican—Scores Administration "mismanagement." Asserts "inflation robs our paychecks at a present rate of 4½% per year." Cites "crippling" interest rates, declining purchasing power. Will improve management of national debt, reduce heavy interest, seek price stability and tax reform and simplification. Set up Efficiency Commission for the Executive branch and an Office of Executive Management. Will bar "improper Federal competition with private enterprise."

MILITARY POLICIES

Democratic—Calls Soviet invasion of Czechoslovakia a "shocking reminder that we live in a dangerous age" and stresses need to keep U. S.'s "significant lead" in military strength and technology. Asserts "vigilance calls for twin discipline of defense and arms control."

Republican—Deplores "humiliating episode" of U.S.S. Pueblo seizure by North Korea. Charges Administration "frittered away superior military capabilities, enabling the Soviets to narrow their defense gap, in some areas to outstrip us." Calls for reinvigorated National Security Council, improved ocean deterrent capability, simplification of "overcentralized" Defense Department.

The War in Vietnam

Peace Prospects Brighten; Chronology of Conflict

Hopes for an early peace in Vietnam soared with President Johnson's announcement Oct. 31 that he had ordered all air, naval and artillery bombardment of North Vietnam to cease at 8 a.m. Washington time Nov. 1, 1968. At the same time he said broadened peace talks would begin in Paris Nov. 6, with representatives of the South Vietnam National Liberation Front (Vietcong) participating and those of the South Vietnamese Government "free to participate."

Of the presence of Vietcong representatives, the President emphasized that "their attendance in no way involves recognition of the National Liberation Front in any form." But South Vietnamese President Nguyen Van Thieu said his government would not engage in the Paris talks under the conditions, and the talks were postponed indefinitely. Then Thieu proposed that the talks should be conducted principally between South and North Vietnam, with the U.S. and the National Liberation Front in subsidiary roles. U.S. authorities were hopeful that South Vietnam would join the conference soon.

Meanwhile, the undeclared war in Vietnam became on June 23 the longest ever fought by the United States. It had lasted 6 years, 6 months and one day since the death of the first American service man killed by the Vietcong, Dec. 22, 1961. The American Revolution is generally considered to have lasted 6 years and 6 months, ending with Cornwallis' surrender at Yorktown Oct. 19, 1781.

The present war is a sequel to an earlier war between the French and the forces of Ho Chi Minh (the present leader of North Vietnam). At the end of World War II, Vietnamese nationalist and Communist groups were determined to achieve independence, but the French attempted to re-establish colonial rule over the Indo-Chinese states (Cambodia, Laos and Vietnam). The strongest of the Vietnamese nationalist groups was Ho Chi Minh's Communist-led Vietminh (abbreviated name of the League for the Independence of Vietnam). On Sept. 2, 1945, Ho declared Vietnam independent and announced the creation of the Democratic Republic of Vietnam (DRVN). The French recognized the DRVN Mar. 6, 1946, "as a free state within the French union." However, a series of blunders and misunderstandings by both sides led to armed conflict and the beginning of the French-Vietminh war Dec. 19, 1946.

As the war progressed, the French sought to enlist non-Communist support by turning to ex-Emperor of Vietnam Bao Dai as a rallying-point for the Vietnamese. With French approval, he formed on July 1, 1949, the State of Vietnam with its capital in Saigon.

The U. S. recognized the new state Feb. 7, 1950, and to assist it, President Truman announced June 27 that the U.S. was sending a 35-man Military Assistance Advisory Group (MAAG) to Indo-China to advise the troops there in the use of American weapons. Other assistance measures soon followed. On Dec. 23 the U. S. signed a Mutual Defense Assistance Agreement with Vietnam and on Sept. 7, 1951, the U. S. agreed to provide direct economic assistance to the Saigon government.

The following is a chronological listing of major developments thereafter:

May 8 to July 21, 1954—Geneva Conference on Indo-China attended by France, Britain, Russia, U. S., Democratic Republic of Vietnam, State of Vietnam, Laos, Cambodia and Communist China. France and North Vietnam agreed: to partition of Vietnam along 17th parallel, ban on new troops or bases, scheduling of reunification elections in July 1956, creation of International Control Commission composed of India, Canada and Poland to supervise implementation of the agreement. U. S. and South Vietnam do not sign agreement.

May 8, 1954—French stronghold of Dien Bien Phu in North Vietnam falls to Communist forces.

Oct. 24, 1954—President Eisenhower offers South Vietnam economic aid.

Feb. 12, 1955—U. S. agrees to train South Vietnamese army.

Feb. 19, 1955—SEATO protocol extended to offer protective cover of organization to Vietnam.

Oct. 23, 1955—South Vietnamese national referendum deposes Bao Dai, creates republic with Ngo Dinh Diem as first president. Diem says reunification elections as specified by Geneva Conference impossible because of intimidation by North Vietnam. Reunification elections never held.

Oct. 22, 1957—First injuries of U. S. advisers in Vietnam reported.

July 8, 1959—First U. S. troops killed in combat.

May 5, 1960—Upon request of South Vietnam, U. S. increases number of military advisers from 327 to 685.

Oct. 26, 1960—President Eisenhower pledges continued assistance to South Vietnam.

Dec. 1960—North Vietnam announces formation of the National Liberation Front of South Vietnam. Acts of terrorism in the South increase.

Apr. 3, 1961—Kennedy Administration signs Treaty of Amity and Economic Relations with South Vietnam.

Dec. 14, 1961—President Kennedy declares U. S. prepared to help Republic of South Vietnam "preserve its independence."

June 2, 1962—Majority report of International Control Commission says evidence shows North Vietnam to be supporting, organizing and carrying out hostile acts in South Vietnam.

Dec. 1962—U. S. force in Vietnam stands at 4,000 men.

Nov. 1, 1963—President Diem assassinated. Series of coups follows.

Dec., 1963—U. S. force in Vietnam numbers 15,000.

Aug. 2-4, 1964—U. S. destroyers Maddox and C. Turner Joy attacked by North Vietnamese torpedo boats in Gulf of Tonkin. President Johnson orders immediate retaliatory attacks.

Aug. 7, 1964—Congress approves Gulf of Tonkin Resolution giving President power to "take all necessary measures to repel any armed attack against the forces of the United States and to prevent further aggression."

Dec. 1964—U. S. force in Vietnam numbers 23,000.

Feb. 1965—Continuous U. S. bombing raids over North Vietnam started in effort to force Communists to conference table. Hanoi says negotiations will not be considered until U. S. forces withdraw.

Apr. 17, 1965—President Johnson in speech at Johns Hopkins University offers billion dollar aid program to SE Asia as soon as peace is achieved.

May 13-19, 1965—U. S. halts air raids against North Vietnam. No response from Hanoi.

June 8, 1965—U. S. commanders authorized to send American troops into combat.

July, 1965—President Johnson authorizes increase of U. S. force from 75,000 men to 125,000.

Dec. 24, 1965-Jan. 31, 1966—U. S. again suspends bombing of North Vietnam in hope of bringing foe to conference table. Hanoi rejects all peace feelers.

Feb. 6-7, 1966—President Johnson and South Vietnamese Premier Nguyen Ky meet in Honolulu. "Declaration of Honolulu" issued at end of meeting, declaring the two countries will continue to resist aggression.

June 29, 1966—U. S. bombs major installations near Hanoi and Haiphong for first time.

July 30, 1966—U. S. bombs 6-mile-wide demilitarized zone between North and South Vietnam.

Nov. 1966—U. S. forces in Vietnam number 358,000 men, with 33,000 more stationed in Thailand.

Nov. 12, 1966—U. S. dead killed in action in Vietnam from Jan 1, 1961 to date—4,904.

Dec. 2, 1966—UN Secy. Gen. U Thant pledges new effort to end war.

Dec. 30, 1966—Britain proposes peace conference. Hanoi rejects suggestion Jan. 4, 1967.

Dec. 31, 1966-Jan. 2, 1967—New Year's truce.

Jan. 5, 1967—Defense Dept. announces total U. S. casualties since Jan. 1, 1961 are 6,664 dead, 37,738 wounded.

Feb. 8-12—U. S. suspends air raids during Lunar New Year truce and two days beyond. No response from Hanoi.

Mar. 2, 1967—Sen. Robert F. Kennedy proposes Administration halt bombing as part of 3-point peace plan. Secy. Rusk

says there is nothing new in the Kennedy proposals and that Hanoi has already rejected similar peace overtures.

Mar. 20-21, 1967—President Johnson confers with South Vietnamese leaders on Guam. War and election of civilian government in South Vietnam discussed.

Mar. 21, 1967—Ho Chi Minh rejects previously undisclosed proposal by President Johnson in February for peace talks.

Mar. 28, 1967—Peace plan proposal by U Thant calling for stand-still truce, preliminary talks and reconvening of Geneva Conference revealed. Accepted by U. S. and South Vietnam with reservations. Rejected by Hanoi.

Mar. 1967—Total U. S. force in Vietnam stands at 427,000.

Apr. 1, 1967—South Vietnamese constitution goes into effect.

May 2, 1967—U. S. commander in Vietnam, Gen. William C. Westmoreland, urges further buildup of American forces. Domestic debate over war intensifies.

May 11, 1967—U Thant expresses fear Vietnamese war is "initial phase of World War III."

June 23 and 25, 1967—President Johnson and Soviet Premier Kosygin meet in Glassboro, N. J. Discuss Vietnam as well as Mideast crisis. No agreement.

Aug. 3, 1967—President Johnson announces U. S. forces in Vietnam will be increased to 525,000 men by June 1968. Asks for 10% income tax surcharge to finance the war.

Aug. 11, 1967—U. S. extends air raids to within 10 miles of Chinese border.

Aug. 23, 1967—President Johnson appoints 20 Americans to observe South Vietnamese elections.

Sept. 3, 1967—Nguyen Van Thieu elected president, Nguyen Cao Ky, vice president.

Sept. 7, 1967—U. S. announces plans for fortified barrier south of demilitarized zone.

Sept. 29, 1967—In a televised address at San Antonio, President Johnson offers again to stop all bombardment of North Vietnam "when this will lead promptly to

*U. S. Military Casualties in Vietnam

Source: Secretary of Defense. As of Nov. 2, 1968

Casualties from hostile forces action Since Jan. 1, 1961					
	Army	Navy ¹	Marine	Air force	Total

¹Sum of lines 1, 2a, 3a and 4a. ²Navy figures include Coast Guard. ³Rep. of Vietnam Armed Forces.

*According to military officials, the total of wounded in Vietnam would be less if judged by the standards of World War II and the Korean War.

productive discussion," and says he will send a trusted representative anywhere in the world to talk with a Hanoi spokesman. North Vietnam rejects the offer.

Nov. 2, 1967—Amb. Arthur Goldberg states unequivocally that the U. S. would be willing to have the Vietcong's political arm, the National Liberation Front, participate directly in a reconvened Geneva conference or be present in any discussion of the Vietnam question before the Security Council of the UN.

Nov. 11, 1967—Defense Dept. announces total U. S. casualties since Jan. 1, 1961 are 14,621 dead, 91,971 wounded.

Nov. 17, 1967—President Johnson warns Hanoi not to rely on the 1968 Presidential elections. "I think that whatever interpretation Hanoi might make that would lead them to believe that Uncle Sam, whoever may be President, is going to pull out and it will be easier for them to make an inside deal with another President than will be the present, they'll make a serious misjudgment."

Nov. 19, 1967—Gen. Westmoreland says: "We are winning a war of attrition" and within two years or less we may be able to "phase down the level of our military effort."

Nov. 30, 1967—U. S. casualties since Jan. 1, 1961, reach 15,058 killed, 109,527 wounded, of which some 50,000 required hospitalization, and 914 missing.

Dec. 20, 1967—U. S. troop strength in Vietnam reaches 474,300 men, 1,500 more than American peak strength in Korea during Korean War.

Dec. 24-25, 1967—Allies observe 24-hour Christmas truce.

Jan. 17, 1968—President Johnson, in his State-of-the-Union message, estimates the cost of the war to the U. S. at \$25 billion a year.

Jan. 30, 1968—Viet Cong and North Vietnamese attack 30 provincial capitals

in South Vietnam in Tet offensive. Record casualties were suffered on both sides, but a few days later President Johnson calls the offensive "a complete failure."

Feb. 24, 1968—UN Secy. Gen. U Thant says after visiting Asia and Europe that if bombing of North Vietnam is halted "meaningful talks . . . will take place much earlier than generally supposed."

Mar. 31, 1968—President Johnson announces the unilateral halting of the bombing of 90% of the territory of North Vietnam as a step toward peace and asks for a response from Hanoi.

Apr. 5, 1968—Some 50,000 American and South Vietnamese troops, in Operation Pegasus, succeed in lifting the 76-day siege of the U. S. Marine base at Khesahn.

Apr. 11, 1968—Defense Secy. Clark M. Clifford announces the call-up of 24,000 Army, Air Force and Navy reservists for active duty in Vietnam and the setting of a new troop ceiling of 549,000 for U. S. strength in Vietnam.

May 5, 1968—Communists launch Round II of their Tet offensive with attacks on Saigon and other cities; less serious than original.

May 10, 1968—Preliminary peace talks between U. S. and North Vietnam open in Paris.

June 10, 1968—Gen. Creighton Abrams takes over command of U. S. forces in Vietnam from Gen. William C. Westmoreland, who becomes Army Chief of Staff.

Aug. 29, 1968—U. S. casualties in Vietnam since Jan. 1, 1961, rise to 27,508 killed and 171,809 wounded.

Sept. 30, 1968—U. S. battleship New Jersey, released from mothball fleet, shells enemy targets in the DMZ.

Oct. 31, 1968—President Johnson orders cessation of U. S. aerial, naval and artillery bombardment of North Vietnam the following day, and plans for broadened peace talks in Paris.

Hawaii Song Now Official, Thanks to Peggy and the Almanac

Ways in which the World Almanac can prove useful are endless and often surprising. Recently the World Almanac found itself involved in an action by the State Legislature of Hawaii.

Peggy Cooper, pretty, blonde-haired, 12-year-old daughter of Mr. and Mrs. Robert E. Cooper of Kaneohe, Hawaii, had a 5th grade homework assignment that sent her looking for facts in her World Almanac. There she learned that her state's famous song, Hawaii Pono (My Hawaii), was only the "unofficial state song."

She was upset. She resolved to have Hawaii Pono made the official state song.

"My Daddy and Mommy, who come from Washington and Oregon, were horrified," the Honolulu Advertiser quoted Peggy as saying. "Both their states have official songs."

Peggy's father helped her bring the

problem to the attention of George Toyofuku, a member of the state House of Representatives, who sponsored a bill to make the song the official state anthem. It was enthusiastically approved. The House also passed and presented to Peggy a resolution commending her for her efforts.

In due course, Cornelius D. Downes, Information Officer of the Hawaiian Department of Planning and Economic Development, informed the World Almanac of the new status of Hawaii Pono. Meanwhile, Peggy was quoted in an Advertiser story as saying she started her campaign "to make Hawaii's song official so the next edition of the Almanac could list it along with the others."

In this edition, Peggy and others who are interested will find that Hawaii Pono is now listed as the official state song. (See P. 360.)

Long Holiday Weekends to Begin in 1971

Beginning Jan. 1, 1971, four major holidays will fall on Mondays every year to provide long weekends. A bill signed by President Johnson June 28, 1968, changes the dates for observances of Washington's Birthday, Memorial Day and Veterans Day and gives Columbus Day legal status as a holiday.

The new law applies only to Federal and District of Columbia employees, but most states are expected to go along with the new holiday line-up, which with Labor Day will produce 5 holiday weekends. Under the new law Washington's birthday will fall on the 3d Monday in February; Memorial Day on the last Monday in May; Columbus Day on the 2d Monday in October, and Veterans Day on the 4th Monday in October. (See pages 590 and 591 for 1969 holidays.)

How Degree Days Are Measured

A degree day is a standard measure used by heating engineers to measure the heating season's coldness. The number of degree days in a calendar day is determined by subtracting the day's average

from 65°. If the high on a given day was 60° and the low was 40° the average temperature that day would be 50°. Subtracted from 65°, this would give 15 degree days for that calendar day.

Space 1968: The Comeback Trail to the Moon

From their earliest days in 1961, when cosmonaut Yuri Gagarin and astronaut Alan Shepard flew through space less than a month apart, the United States and Soviet manned space programs have followed remarkably similar paths—even to their treatment at the hands of fate. In 1967, tragedy stunned both countries, as 3 U.S. astronauts died in a launch pad fire, followed, only three months later, by the fatal crash of the USSR's Soyuz 1, which killed its pilot when its reentry parachutes snarled.

Scarcely two weeks separated the two countries' triumphal returns to space in 1968. The first manned Apollo flight followed an exhaustive redesign of the entire spacecraft, as well as a major overturning of space agency officials. The Soviet Union was believed to have had its own design problems, and caution in trying out solutions may have been why only a single cosmonaut was risked in the presumably multi-man Soyuz capsule.

Triumph was far from all-pervading at the National Aeronautics and Space Administration, however. Congressional disenchantment with the huge cost of the U.S. space program resulted in NASA being given its smallest budget in 6 fiscal years. So great became the pressures that agency head James Webb resigned, only 4 days before the first Apollo astronauts blasted off.

Americans to Orbit Moon

Nevertheless, the first manned Apollo flight (Apollo 7) put the U. S. squarely back on the path toward the goal of putting men on the moon before 1970. The success of Apollo 7 impelled NASA to schedule Apollo 8 for the end of 1968—to carry 3 astronauts around the moon. The Apollo 8 plan called for 10 orbits around the moon at an altitude of only 70 miles, although an in-flight decision could choose a less ambitious program. Apollo 8 was to get its lunar push from the mighty Saturn 5 booster, which had been tested twice in unmanned flights (Apollo 7 used a smaller rocket, the Saturn 1B).

Apollo 8, called the most ambitious and riskiest space flight to date, was to be manned by Air Force Col. Frank Borman, commander; Navy Capt. James A. Lovell, Jr., and Air Force Maj. William A. Anders.

One major piece of equipment that did

not make the grade in 1968 was the tricky and troublesome lunar module, the spidery spacecraft with the job of actually transporting the astronauts from an orbit around the moon down to the lunar surface and back again. Troubles with the craft's weight, engines and electrical system pushed its first manned flight all the way into 1969, leaving planners praying that they could get to the moon in the same year.

As the moon race continued, another area of U.S.-Soviet competition showed signs of developing with the USSR announcement of plans for Intersputnik, a communications satellite network seen as a rival to the U.S.-dominated Intelsat system. Though Intelsat has more than 60 member nations and Intersputnik would initially number only 8, the Soviet network would presumably stymie chances of a single, worldwide "satcom" organization.

Outside of the U.S. and USSR, 1968 was a relatively quiet year for space activity, although several countries did conduct limited research with sounding rockets. In 1967, France, England, Italy and Japan launched satellites (all but Japan's were successful), but the only 1968 contender was the European Space Research Organization, a consortium formed to combine the talents and limited resources of several countries. After a failure in 1967, ESRO (whose members include Great Britain, France, West Germany, Italy, the Netherlands, Belgium, Switzerland, Denmark, Sweden and Spain) came back with a pair of space probes, both of which were still working months later at press time.

Back in the U.S., one marked trend was the turning of the vast aerospace industry away from single-minded devotion to space, and toward the growing problems of aircraft. The remarkable X-15 rocket-plane and the giant XB-70 research vehicle were both scheduled for retirement around the end of the year, but overcrowded airports (with poor attendant ground transportation), the supersonic transport, the upcoming generation of giant jets, airbuses to handle a growing volume of flying commuters, and military needs for far-out aircraft of the future provided more than enough problems for the hundreds of thousands of trained scientists and engineers already brought together by the rich promise of space.

1968 Space Calendar

The following are the principal satellites, spacecraft and probes launched in 1968 through Nov. 13. When pertinent and available, initial orbital distances closest to (perigee) and farthest from (apogee) earth are shown in statute miles. The times represent the periods of the orbits. Unsuccessful launches are not listed.

SURVEYOR 7 (U. S.) Jan. 7—Last of the robot moon-landing series, it photographed and analyzed the lunar surface, revealing earth-type basalt and volcanic rock to support the theory that the moon was born either with or from the earth.

GEOS 2 (U. S.) Jan. 11—Second in a series of satellites aimed at more accurately measuring earth's size, shape and gravitational field, using, among other instruments, laser beams bounced off it from the ground. 112.2 minutes, 671-976 miles.

COSMOS 199 (USSR) Jan. 16—This probable sky-spy was the first of some 50 launches this year in the Soviet all-purpose satellite series, which includes everything from weather-watchers to unmanned checkouts of man-intended spaceships. 90.2 minutes, 127-240 miles.

APOLLO 5 (U. S.) Jan. 22—Unmanned

earth-orbiting first flight of the lunar module that will actually set two U. S. astronauts down on the moon and lift them off again. 89.5 minutes, 101-138 miles.

ZOND 4 (USSR) Mar. 2—If it was, as appears likely, intended to visit the moon, it did not make it, though it was successfully launched outward after first parking in orbit around the earth. 89.5 minutes, 131-180 miles.

OGO 5 (U. S.) Mar. 4—With all but one of its two dozen experiments working, the fifth in NASA's most complicated satellite series set out to study a wide range of characteristics of the space surrounding our world. 3,795.9 minutes, 180-91,260 miles.

SOLAR EXPLORER 2 (U. S.) Mar. 5—Designed so that any country listening on the proper frequencies could receive its
(Space continued on page 44)

(Space continued from page 43)

data, this satellite measures X-rays and ultraviolet emissions coming from the sun, though scientists had planned it to end up in a more circular orbit than it did. 98.7 minutes, 324-545 miles.

COSMOS 206 (USSR) Mar. 14—Like many U. S. weather satellites, this Soviet probe gathered cloud-cover photos both by day and (thanks to infrared cameras) by night. 97 minutes, 391-391 miles.

Apollo 6 (U. S.) Apr. 4—The second unmanned test on the huge Saturn 5 booster was considered a success, despite excess vibrations in the first stage, a malfunctioning engine in the second stage and the failure of the third stage to restart in space. 88.2 minutes, 111-226 miles.

OV-1-13, OV-1-14 (U. S.) Apr. 6—Of these two Air Force satellites, launched by the same booster, one failed after only a week, leaving the other alone to measure different types of radiation high above earth's atmosphere. OV-1-13: 199.5 minutes, 341-5,792 miles. OV-1-14: 207.8 minutes, 343-6,193 miles.

LUNA 14 (USSR) Apr. 7—This Soviet probe settled into orbit around the moon, measuring the lunar gravitational field and its relationship with earth.

COSMOS 212, 213 (USSR) Apr. 14, 15—For the second time, a pair of separately launched unmanned Russian satellites met in space, coupled, rode along together and decoupled automatically, demonstrating a maneuvering capability not yet shown by the U. S., although manned U. S. dockings have outstripped the Soviet Union; both spacecraft later landed softly in Soviet territory, a day apart. Orbit while coupled: 89.8 minutes, approximately 123-127 miles.

COSMOS 215 (USSR) Apr. 19—The first optical astronomical observatory to be operated successfully in space, it carried 9 telescopes, stayed aloft some six weeks. 91.1 minutes, 162-265 miles.

MOLNIYA 1-H (USSR) Apr. 21—Eighth satellite in the USSR's Orbita network for domestic communications. 713 minutes, 286-24,668 miles.

COSMOS 218 (USSR) Apr. 25—In orbit for less than one revolution around the earth, this probe was probably a test of the Soviet Fractional Orbital Bombardment System for delivering bombs through space.

ESRO 2B (E. S. R. O.) May 17—The first successful satellite launched by the 10-nation European Space Research Organization carried 7 experiments to monitor solar and cosmic radiation. 98.9 minutes, 265-677 miles.

COSMOS 226 (USSR) June 12—Thirteenth Soviet weather satellite. 96.9 minutes, 375-404 miles.

IDSCS 19-26 (U. S.) June 13—Launched atop a single booster, these 8 satellites added to the Defense Department's Initial Defense Satellite Communications System, largely aimed at keeping the Pentagon in touch with Vietnam and vice versa. Approximate orbits: 1,335 minutes, 20,950-21,150 miles.

RADIO ASTRONOMY EXPLORER (U. S.) July 4—Like a huge letter "X" 1,500 feet long, the RAE listens for radio messages from space. 224.3 minutes, 3,626-3,646 miles.

MOLNIYA 1-I (USSR) July 5—Ninth addition to the Soviet talk-net. 717.7 minutes, 326-24,751 miles.

OV-1-15 (U. S.) July 11—This Air Force research probe carried 9 experiments to study the density of the atmosphere, as well as radiation and other factors which affect it. 95.9 minutes, 91-610 miles. Launched with it was . . .

OV-1-16 (U. S.) July 11—the densest satellite ever launched, this 23-inch sphere weighed some 600 pounds, in order to make it resistant to atmospheric disturbances and currents as it, too, made density measurements. 91.5 minutes, 90-345 miles.

AIR DENSITY EXPLORER C (U. S.) Aug. 8—This 12-foot balloon was lofted to report on atmospheric densities and temperatures over earth's poles, for correlation with seasonal changes and variations in solar activity. 118 minutes, 430-1,554 miles. Aboard the same booster went . . .

INJUN 5 (U. S.) Aug. 8—Designed to study the charged particles in the ionosphere, as well as their effect on low-frequency radio emissions. 118.3 minutes, 423-7,573 miles.

ATS-4 (U. S.) Aug. 10—Though the versatile Applications Technology Satellite, designed to try out new ideas for future development, was working fine, a malfunctioning second-stage booster put it in an undesirable orbit, which made most of its data useless. 88.8 minutes, 106-162 miles.

ESSA 7 (U. S.) Aug. 16—The seventh of the Environmental Science Services Administration's camera-equipped weather satellites was the fifth in the Tiros Operational Satellite System, taking pictures of the entire world every day. 114.9 minutes, 890-917 miles.

RAM C-B (U. S.) Aug. 22—Fired up by one rocket motor and down again by another, this instrumented nose cone was part of the space agency's quest for a way to eliminate the communications blackout that plagues all reentering spacecraft.

ZOND 5 (USSR) Sept. 15—This unmanned Soviet probe became the first spacecraft to loop around the moon and return safely to earth.

OV-2-5, 5-2, 5-4, LES-6 (U. S.) Sept. 26—Half the satellites in this four-in-one Air Force launch were to investigate radiation and solar flares; another studied the effects of low-gravity on the heat transfer of fluids, and the last was an experimental tactical communications satellite. Three of the 4 in synchronous orbits; approximately 1,430 minutes, 22,240-22,240 miles.

ESRO 1 (E. S. R. O.) Oct. 3—A second success for the European Space Research Organization, this time designed to study the northern lights and other phenomena of the ionosphere over the poles. 102.8 minutes, 161-949 miles.

APOLLO 7 (U. S.) Oct. 11—The first manned Apollo flight, and the first U. S. manned flight since Gemini 12 flew 23 months before, carried astronauts Walter M. Schirra, Jr., Don F. Eisele and Walter Cunningham for 163 orbits of the earth. 89.9 minutes, 142-160 miles.

SOYUZ 3 (USSR) Oct. 26—The USSR's first manned flight since cosmonaut Vladimir M. Komarov died in the landing crash of his Soyuz 1 spacecraft on Apr. 24, 1967, it carried only one man, Georgy Beregovoi, in a vessel that presumably can hold several; he twice approached, but did not dock with the unmanned Soyuz 2 capsule launched the day before. 88.3 minutes, 109-127 miles.

PIONEER D (U. S.) Nov. 8—Launched into an orbit around the sun, the fourth in the Pioneer series will provide the most extensive measurements of the solar corona ever made from a satellite.

ZOND 6 (USSR) Nov. 10—Unmanned craft looped around moon and headed back to earth.

HL-10 (U. S.) Nov. 13—The first successful powered flight of NASA's manned "lifting body," a "space plane" designed to provide controlled flight from orbit down to earth.

The Legacy Left by Sen. Robert F. Kennedy

As contained in the eulogy delivered at his funeral services in St. Patrick's Cathedral, New York, June 8, 1968, by his brother, Sen. Edward M. Kennedy.

On behalf of Mrs. Robert Kennedy, her children and the parents and sisters of Robert Kennedy, I want to express what we feel to those who mourn with us today in this cathedral and around the world.

We loved him as a brother and as a father and as a son. From his parents, and from his older brothers and sisters—Joe, Kathleen and Jack—he received an inspiration which he passed on to all of us. He gave us strength in time of trouble, wisdom in time of uncertainty, and sharing in time of happiness. He was always by our side.

Love is not an easy feeling to put into words. Nor is loyalty, or trust or joy. But he was all of these. He loved life completely and lived it intensely.

A few years back, Robert Kennedy wrote some words about his own father and they expressed the way we in his family feel about him. He said of what his father meant to him:

His Father's Love

"What it really all adds up to is love—not love as it is described with such facility in popular magazines, but the kind of love that is affection and respect, order, encouragement, and support. Our awareness of this was an incalculable source of strength, and because real love is something unselfish, and involves sacrifice and giving, we could not help but profit from it.

"Beneath it all, he has tried to engender a social conscience. There were wrongs which needed attention. There were people who were poor and who needed help. And we have a responsibility to them and to this country. Through no virtues and accomplishments of our own, we have been fortunate enough to be born in the United States under the most comfortable conditions. We, therefore, have a responsibility to others who are less well off."

This is what Robert Kennedy was given. What he leaves us in what he said, what he did and what he stood for. A speech he made to the young people of South Africa on their Day of Affirmation in 1966 sums it up the best, and I would read it now:

"There is discrimination in this world and slavery and slaughter and starvation. Governments repress their people; and millions are trapped in poverty while the nation grows rich; and wealth is lavished on armaments everywhere.

"These are differing evils, but they are the common works of man. They reflect the imperfection of human justice, the inadequacy of human compassion, our lack of sensibility toward the sufferings of our fellows.

Human Brotherhood

"But we can perhaps remember—even if only for a time—that those who live with us are our brothers, that they share with us the same short moment of life; that they seek—as we do—nothing but the chance to live out their lives in purpose and happiness, winning what satisfaction and fulfillment they can.

"Surely this bond of common faith, this bond of common goal, can begin to teach us something. Surely we can learn, at least, to look at those around us as fellow men. And surely we can begin to work a little harder to bind up the wounds among us and to become in our own hearts brothers and countrymen once again.

"Our answer is to rely on youth—not a time of life but a state of mind, a temper of the will, a quality of imagination, a predominance of courage over timidity, of the appetite for adventure over the love of ease. The cruelties and obstacles of this swiftly changing planet will not yield to obsolete dogmas and outworn slogans. They cannot be moved by those who cling to a present that is already dying, who prefer the illusion of security to the excitement and danger that come with even the most peaceful progress. It is a revolutionary world we live in; and this generation, at home and around the world, has had thrust upon it a greater burden of responsibility than any generation that has ever lived.

"Some believe there is nothing one man or one woman can do against the enormous array of the world's ills. Yet many of the world's great movements, of thought and action, have flowed from the work of a single man. A young monk began the Protestant Reformation, a young general extended an empire from Macedonia to the borders of the earth, and a young woman reclaimed the territory of France. It was a young Italian explorer who discovered the New World, and the 32-year-old Thomas Jefferson who proclaimed that all men are created equal.

"These moved the world, and so can we all. Few will have the greatness to bend history itself, but each of us can work to change a small portion of events, and in the total of all those acts will be written the history of this generation. It is from numberless diverse acts of courage and belief that human history is shaped.

"Each time a man stands up for an ideal, or acts to improve the lot of others, or strikes out against injustice, he sends forth a tiny ripple of hope, and crossing each other from a million different centers of energy and daring, those ripples build a current that can sweep down the mightiest walls of oppression and resistance.

Moral Courage

"Few are willing to brave the disapproval of their fellows, the censure of their colleagues, the wrath of their society. Moral courage is a rarer commodity than bravery in battle or great intelligence. Yet it is the one essential, vital quality for those who seek to change a world that yields most painfully to change. And I believe that in this generation those with the courage to enter the moral conflict will find themselves with companions in every corner of the globe.

"For the fortunate among us, there is the temptation to follow the easy and familiar paths of personal ambition and financial success so grandly spread before those who enjoy the privilege of education. But that is not the road history has marked out for us.

"Like it or not, we live in times of danger and uncertainty. But they are also more open to the creative energy of men than any other time in history. All of us will ultimately be judged and as the years pass we will surely judge ourselves, on the effort we have contributed to building a new world society and the extent to which our ideals and goals have shaped that effort.

"The future does not belong to those who are content with today, apathetic toward common problems and their fellow man alike, timid and fearful in the face of new ideas and bold projects. Rather it will belong to those who can blend vision, reason and courage in a personal commitment to the ideals and great enterprises of American society.

Shaping the Future

"Our future may lie beyond our vision, but it is not completely beyond our control. It is the shaping impulse of America that neither fate nor nature nor the irresistible tides of history, but the work of our own hands, matched to reason and principle, that will determine our destiny. There is pride in that, even arrogance, but there is also experience and truth. In any event, it is the only way we can live."

This is the way he lived. My brother need not be idealized, or enlarged in death beyond what he was in life, to be remembered simply as a good and decent man, who saw wrong and tried to right it, saw suffering and tried to heal it, saw war and tried to stop it.

Those of us who loved him and who take him to his rest today, pray that what he was to us and what he wished for others will some day come to pass for all the world.

As he said many times, in many parts of this nation, to those he touched and who sought to touch him:

"Some men see things as they are and say why. I dream things that never were and say why not."

The Negro in American History

By Kenneth C. Johnston, of the World Almanac staff

The contributions made by Negroes to the growth of America have been numerous and varied, but many have gone unmentioned or unstressed in history books.

The names of many of these sometimes forgotten men and women of America's past have appeared in previous editions of the World Almanac, scattered in various sections, but were not singled out and labeled Negro or Black or Afro-American.

With growing interest in this field, with students seeking more knowledge of it, and with schools seeking ways to provide such knowledge, the World Almanac has gathered a list of some of these outstanding Americans of African descent and has briefly noted their contributions.

Among sources for the following facts were the New York Public Library, a series of articles produced by Newspaper Enterprise Association, and several publications sponsored by the B'nai B'rith Anti-Defamation League.

Names of many other notable Negroes, such as entertainers and athletes, are not included. They are well known and have appeared elsewhere in this book.

EXPLORERS AND SETTLERS

Pedro Alonso Nino, navigator of the Nina, one of Christopher Columbus' three ships on his first voyage of discovery to the New World, 1492.

Estevanico (also called Esteban) led the first Spanish explorations into the Arizona and New Mexico area, 1539.

Francisco, one of the founders of the town of Bushwick in what is now Brooklyn, N. Y., a landowner who was named by Peter Stuyvesant, with another free Negro, Anton, to a militia company in 1660.

Jean Baptiste Point du Sable, fur trader and first settler of Chicago, 1779.

James P. Beckwourth (1798-c. 1867), western fur-trader, scout, after whom Beckwourth Pass in northern California is named.

York, one of several Negroes in the Lewis & Clark Expedition, 1804-06; a servant, he also served as an interpreter; a "giant" in size, he was admired by Indians for his strength and friendliness.

Matthew A. Henson (1866-1955), with Robert E. Peary and 4 Eskimos, discovered the North Pole, 1909; Henson planted the U. S. flag at the Pole.

SOLDIERS, PATRIOTS

Crispus Attucks, (c. 1723-1770), leader of a group fired on by British soldiers in Boston, Mar. 5, 1770, and one of the 5 slain in that action which became known as the "Boston Massacre."

Peter Salem, one of the defenders at the Battle of Bunker Hill, June 17, 1775, shot and killed Maj. John Pitcairn, one of the British commanders (who earlier that year had ordered his troops to fire on the Minutemen at Lexington).

Salem Poor, commended by the Massachusetts Legislature for performing like "an experienced officer . . . a gallant soldier" at Bunker Hill.

James Lafayette, who served as a soldier and spy for the Marquis de Lafayette during the American Revolution.

(About 5,000 Negroes served in the Continental Army, mostly in integrated units, some in all-Negro combat outfits.)

Harriet Tubman, after escaping from slavery made repeated trips to the South and led more than 300 slaves to freedom as an Underground Railroad conductor; served as nurse and spy for Union Army in the Civil War.

(Some 200,000 Negroes served in the Union Army during the Civil War; 38,000 gave their lives; 22 won the Medal of Honor, the nation's highest award. Thousands of Negroes helped in the winning of the West; serving after the Civil War in two Negro cavalry and two Negro infantry regiments. In the Spanish-American War, 4 Negro regiments fought at San Juan Hill.)

Isalah Dorman (19th Century), U. S. Army interpreter, killed with Col. George Custer at Battle of the Little Big Horn (1876).

Pvt. Henry Johnson of Albany, N. Y., the first American decorated by France in World War I with the Croix de Guerre.

(Of 367,000 Negroes in the Armed Forces in World War I, 100,000 served in France. The all-Negro 8th Illinois Regiment received more combat citations than any other American regiment in France; the all-Negro 369th Regiment was the first Allied combat unit to cross the Rhine.)

Dorie Miller of Waco, Tex., a Navy mess attendant on the battleship Arizona during the Pearl Harbor attack, took over an anti-aircraft gun from a dying white sailor and shot down 4 Japanese bombers, Dec. 7, 1941; awarded the Navy Cross by President Franklin D. Roosevelt.

(More than 1,000,000 Negroes served in the U. S. Armed Forces in World War II; all-Negro fighter and bomber AAF units and infantry divisions gave distinguished service. In 1954 the policy of all-Negro units was finally abolished.)

Brig. Gen. Benjamin O. Davis, Sr., born 1877, first Negro general (1940) in U. S. Army, rose through ranks to inspector general, retired 1948.

Lt. Gen. Benjamin O. Davis, Jr., b. 1912, first Negro West Point graduate in 20th Century (1936), first Negro Air Force general (1954), had distinguished service as pilot and commander in World War II.

Brig. Gen. Frederic E. Davison, b. 1917, 3d Negro to become a general (1968 in Vietnam.)

Commander Samuel L. Gravelly, Jr., first Negro to command a Navy ship since the Civil War, became captain of the destroyer Taussig (1966).

(As of mid-1968, Negroes were 10.5% of the total number of Americans serving in Vietnam; 13.7% of the 25,616 U. S. servicemen killed there between 1961 and June 30, 1968, were Negroes, according to the Defense Department. Further figures show Negroes comprised 14.8% of Army forces in Vietnam, 1961-1965, and suffered 18.3% of Army casualties. Of the total U. S. population, by 1968 Census estimate, 11.1% were Negroes.)

SCIENTISTS, INVENTORS

Benjamin Banneker (1731-c. 1806), author of annual almanacs (1791-1802) containing tide tables, coming eclipses, medical formulas (called the first scientific publication by an American Negro); built what has been called the first American clock of all American parts (1761); served on commission which surveyed and helped lay out the future city of Washington, D. C.

Lewis Temple (1800-1854), invented toggle harpoon for whaling industry (c. 1840).

Henry Blair (19th Century), obtained patent (believed the first issued to a Negro) for a corn-planter (1834) and for a cotton-planter (1836).

Norbert Rillieux (1806-1894), held many patents; invented a vacuum pan evaporator which revolutionized the sugar-refining industry (1846).

Elijah McCoy (1844-c. 1928), held some 75 patents; a pioneer inventor of automatic machinery lubricators; his lubricating cup was in general use for years in locomotives, steamers, factories.

Lewis H. Latimer (1848-1928), associate of Thomas Edison, made drawings for Alexander Graham Bell's first telephone, wrote textbook on the Edison Co. lighting system in New York City; supervised installation of first electric street lighting in New York.

Jan Matzeliger (1852-1889), invented lasting machine which cut shoe industry costs in half and brought higher wages to shoe workers.

Granville T. Woods (1856-1910), held over 50 patents mostly in electric and telegraph fields; one was for "Induction Telegraphy," a system for communicating to and from moving trains.

Dr. Daniel Hale Williams (1856-1931), performed one of first two open-heart operations (1893); founded Provident, Chicago's first Negro hospital; first Negro elected a fellow of the American College of Surgeons.

George Washington Carver (c. 1864-1943), agricultural scientist, philanthropist; brought about an agricultural revolution in the South, finding ways to enrich the soil, adding to its one-crop cotton economy not only emphasis on peanuts, sweet potatoes and soybeans, but discovering some 300 industrial uses for by-products he synthesized from them; created a school-on-wheels to dem-

onstrate soil-fertilization on farms.
Andrew J. Beard (19th Century), invented an automatic coupler for railroad cars (1897).
Dr. William A. Hinton (1883-1959), developed the Hinton and Davies-Hinton tests for detection of syphilis; first Negro professor at Harvard Medical School (1949).
Percy Julian, b. 1898, chemist; extracted sterols from soybeans, cutting cost of the drugs; synthesized physostigmine (1935) used in treatment of glaucoma.
Dr. Charles Richard Drew (1904-1950), pioneer in development of blood banks; director of American Red Cross blood donor project in World War II.

WRITERS, EDUCATORS

Amos Fortune (c. 1710-1801), educator; ex-slave, owned tanning business in Jaffrey, N. H., created a school fund which is still operating.
Jupiter Hammon (c. 1720-1800), a Long Island N. Y. poet, the first Negro American to have his works published.
Phillis Wheatley (c. 1753-1784), poet, second American woman and first Negro woman to have her works published; b. in Senegal, enslaved, taken to Boston, freed 1773.
John B. Russwurm (1799-1851) with Samuel E. Cornish (1793-1858), founded the nation's first Negro newspaper, *Freedom's Journal* (1827) in N. Y. City.
William Wells Brown (1815-1884), b. a slave, first American Negro to publish a novel (*Clotel*), as well as a drama, a travel book, 3 histories.
Frederick Douglass (1817-1895), author, editor, orator, diplomat; a runaway slave (b. Frederick Bailey), edited the abolitionist weekly, *The North Star*, in Rochester, N. Y., before the Civil War; became U. S. Minister and Consul General to Haiti; also was marshal and recorder of deeds for the District of Columbia.
Booker T. Washington (1856-1915), founder and first president of Tuskegee Institute (1881); author of a dozen books including *Up From Slavery*; social reformer.
Charles Waddell Chesnut (1858-1932), novelist; best-known for his short stories including *The Conjure Woman*.
William Edward Burghardt Du Bois (1868-1963), historian, sociologist, a founder of the NAACP (1909) and founding editor of its magazine *The Crisis*; author of *The Souls of Black Folk* (1903) and other books.
James Weldon Johnson (1871-1938), poet, song-lyricist, novelist; first Negro admitted to Florida bar; a U. S. consul in Venezuela and Nicaragua; a founder of the NAACP.
Paul Laurence Dunbar (1872-1906), poet, novelist; won fame with *Lyrics of Lowly Life* (1896).
Langston Hughes (1902-1967), a major American poet; also author of stories and song lyrics.
Countee Cullen (1903-1946), poet, winner of numerous literary prizes.
Richard Wright (1908-1960), best-selling novels; *Native Son* (1940), *Black Boy* (1945), etc.
Willard Motley (1912-1965), novelist; wrote *Knock on Any Door* (1947).
Ralph Ellison, b. 1914, novelist, winner of 1952 National Book Award for *Invisible Man*.
Frank Yerby, b. 1916, most successful of American Negro novelists; some 19 novels with over 20,000,000 copies sold, including *The Foxes of Harrow*, *Vixen*, etc.
Gwendolyn Brooks, b. 1917, poet, novelist; first Negro to win a Pulitzer Prize (1950), for one of her volumes, *Annie Allen*.
James Baldwin, b. 1924, best-seller author, playwright; *Another Country* (1962), *The Fire Next Time* (1963) etc.
Lorraine Hansberry (1930-1965), playwright; won N. Y. Drama Critics Circle award with *Raisin* in the Sun (1959).
LeRoi Jones, b. 1934, poet, author of prize-winning off-Broadway plays.

PUBLIC OFFICIALS

Hiram E. Revels (1822-1901), first Negro U. S. Senator, elected in Mississippi, served 1870-1871.
Blanche Kelso Bruce (1841-1898), elected U. S. Senator from Mississippi, he served 1875-1881.
Dr. Mary McLeod Bethune (1875-1955), adviser to Presidents Franklin D. Roosevelt and Harry Truman; division administrator in National Youth Administration (1935).
Clifton Wharton, b. 1899, U. S. Ambassador to Norway (1961-1964).
James C. Evans, b. 1900, director of President Eisenhower's "People to People" program.

Dr. Ralph Bunche, b. 1904, first American Negro to win the Nobel Peace Prize (1950); became Undersecretary of the United Nations (1950).
Dr. Robert C. Weaver, b. 1907, first Negro member of the U. S. Cabinet; Secretary of the Department of Housing & Urban Development (1966).
Harold A. Stevens, b. 1907, first Negro Presiding Justice of the New York State Supreme Court's Appellate Division (1969, First Department).
Adam Clayton Powell, b. 1908, became first Negro Congressman since 19th Century Reconstruction days to have legislation passed by both houses of Congress (elected to his first term 1944).
Thurgood Marshall, b. 1908, first Negro U. S. Solicitor General (1965); first Negro to be made a Justice of the U. S. Supreme Court (1967); as a lawyer led the legal battery which won the historic decision from the Supreme Court declaring segregation of public schools unconstitutional (1954).
William H. Hastie, b. 1904, first Negro Federal Judge (appointed 1937); Governor of Virgin Islands (1946-1949); became Judge, U. S. Circuit Court of Appeals (1949).
Edward W. Brooke, b. 1919; Attorney General of Massachusetts (1962); first Negro elected to U. S. Senate since 19th Century Reconstruction (1967).
Mrs. Constance Baker Motley, b. 1921; first Negro woman Borough President of Manhattan, N. Y. City (1965); Judge, U. S. District Court (1966).
Carl T. Rowan, b. 1925, prize-winning journalist; public official; director of the U. S. Information Agency (1964), making him the first Negro to sit on the National Security Council; U. S. Ambassador to Finland (1963).
Robert C. Henry, elected Mayor of Springfield, Ohio (1965), first Negro Mayor of a moderate-sized city in the 20th Century.
Carl B. Stokes, b. 1927, elected Mayor of Cleveland (1967).
Richard G. Hatcher, b. 1933, elected Mayor of Gary, Ind. (1967).
Lucius A. Amerson, b. 1934, elected sheriff of Macon County, Ga. (1966).

LABOR, CIVIL RIGHTS LEADERS

Denmark Vesey, b. in 18th Century, organized a slave revolt in 1822 in Charleston, S.C.; it failed and he and 46 others were executed.
Nat Turner (1800-1831), led slave revolt in Virginia in 1831; he and 16 others were hanged.
Marcus Garvey (1887-1940), founded Universal Negro Improvement Assn. (1911), sought to promote a Back to Africa movement.
Willard Townsend (1895-1957), organized (1935) the United Transport Service Employees (redcaps, etc.); Vice President of AFL-CIO.
Elijah Muhammad, b. 1897, founded the Nation of Islam or Black Muslims (1931).
A. Philip Randolph, b. 1889, organized the Brotherhood of Sleeping Car Porters (1925); organizer of 1941 and 1963 March on Washington movements; Vice President of AFL-CIO.
Walter White (1893-1955), Executive Secretary, NAACP, (1931-1955).
Roy Wilkins, b. 1901, became Executive Secretary, NAACP (1955).
Bayard Rustin, b. 1910, an organizer of the 1963 March on Washington; Executive Director of the A. Philip Randolph Institute.
The Rev. Dr. Ralph David Abernathy, b. 1916, an organizer (1957) of the Southern Christian Leadership Conference; its President (1968).
James Farmer, b. 1920, a founder of the Congress of Racial Equality (1942); its National Director (1961-1965).
Whitney M. Young, Jr., b. 1921, Executive Director of the National Urban League (1961); author, lecturer, newspaper columnist.
Floyd McKissick, b. 1922, National Director of CORE (1966).
Malcolm X (1925-1965), founded the Organization of Afro-American Unity (1963).
The Rev. Dr. Martin Luther King, Jr. (1929-1968), led 382-day, Montgomery, Ala., boycott which brought 1956 U. S. Supreme Court decision holding segregation on buses unconstitutional; founder and President of the Southern Christian Leadership Conference (1957); leader of rights marches; won Nobel Peace Prize (1964).
Roy Innis, b. 1934, National Director of CORE (1968).
Stokely Carmichael, b. 1944, National Chairman of the Student Nonviolent Coordinating Committee (1966-1967).
H. Rap Brown, b. 1944, National Chairman of SNCC (1967).

Laws Passed by 90th Congress, 2nd Session (1968)

The Second Session of the 90th Congress convened Jan. 15, 1968, and adjourned Oct. 14, 1968. The First Session had convened Jan. 10, 1967, and adjourned Dec. 15, 1967.

Together, the two Sessions produced notable legislation in the fields of consumer protection, civil rights, crime control, education and conservation.

President Johnson, despite his "lame duck" status during the Second Session, saw most of his proposals enacted, though many were in altered form.

The President's nomination of Associate Supreme Court Justice Abe Fortas to be Chief Justice of the United States was blocked in the Senate, which also put off a vote on the nuclear non-proliferation treaty.

Important legislation passed by the Second Session and signed by the President included:

Tax Surcharge. This was the 10% surcharge on individual and corporate income taxes which had been asked by the President during the First Session. It was finally approved during the Second Session, but Congress coupled the action with a \$6 billion mandatory cut in planned spending for the fiscal year.

Foreign Aid. Congress appropriated only \$1.75 billion, \$1.2 billion less than the Administration requested and the smallest sum in the 21-year history of the program.

Crime Control. This act authorized \$100,000,000 in the fiscal year 1969 and \$300,000,000 in fiscal 1970 in grants to states and municipalities to improve law enforcement agencies. It also granted Federal, state and local law officers broader rights to use wiretapping and eavesdropping in criminal investigations. It further carried provisions designed to counteract, in part, recent Supreme Court decisions on "voluntary" confessions and on legal representation during police "line-ups."

Gun Control. In its crime control bill (above), Congress included bans on the mail order sale of handguns and ammunition to individuals, and over-the-counter sales of handguns to residents of other states and to anyone under 21; it provided for licensing of gun dealers and made it a crime for felons, mental incompetents, illegal aliens, etc., to possess firearms.

In a second gun control act, Congress banned mail order interstate sales of rifles and shotguns and prohibited their sale to persons under 18. But Congress did not act on the President's request for registration of all guns and for licensing of gun owners.

Consumer Protection. The Wholesome Poultry Act gave the states two years to develop inspection systems meeting Federal requirements, and provided financial and technical aid to them.

The Truth-in-Lending Act required that beginning July 1, 1969, consumers be informed of the complete cost of credit,

requiring disclosure of interest rates in department store and catalogue house revolving charge accounts, disclosure of annual interest rates in credit advertising, disclosure of "true" annual interest rates of first mortgages on housing. It banned loan-sharking.

Congress also passed acts for gas pipeline safety and for protection against radiation from color TV and other appliances.

Housing. Congress authorized an ambitious housing program, to spend \$5.3 billion to provide 1,700,000 new or rehabilitated housing units over a 3-year period.

Conservation. Legislation established the 58,000-acre Redwood National Park in California, the North Cascades Park in Washington, a nationwide system of trails and scenic rivers, and authorized \$1.3 billion for the Central Arizona Project to develop a water resource program for the Colorado River basin.

Drug Control. This act set penalties for manufacture, sale or possession of LSD and other drugs. Courts were authorized to suspend sentences of first offenders in possession cases.

Civil Rights. The open-housing measure imposed a Federal ban on discrimination in the sale and renting of about 80% of the nation's housing. It also set up penalties for persons who cross state lines to incite riots.

Education. Congress authorized a \$7.3 billion, 3-year extension of Federal aid to higher education; appropriated a record \$20,900,000 for the teacher corps; authorized a 4-year vocational education program.

Defense. Congress appropriated \$71.8 billion for defense.

Urban Renewal. Congress appropriated \$14.7 billion for Department of Housing and Urban Development programs, making substantial cuts in urban renewal, model cities and rent supplements.

FIRST SESSION LEGISLATION

In the First Session (1967) of the 90th Congress, legislation included:

Air Pollution Control. This authorized a 3-year program, giving HEW the power to shut down factories or immobilize all pollution sources in a city during an emergency; it gave states the initiative in setting clean air standards.

New GI Benefits. Congress increased pensions and education and job-training benefits and raised home loan maximums to \$25,000.

Product Safety. A national commission was created to inform the public of dangerous products.

Educational TV. A corporation was established to help finance educational TV and radio programs.

Changes in U. S. Mission to the UN in 1968

Representatives and Alternates to the 23rd General Assembly, as of Nov. 13, 1968

Arthur J. Goldberg, United States Ambassador to the United Nations since July 20, 1965, resigned that post on April 25, 1968, and was replaced by President Johnson with George W. Ball, former Under Secretary of State. Ambassador Ball resigned Sept. 26, 1968; the President named James Russell Wiggins, editor and executive vice president of the Washington Post, to succeed him.

REPRESENTATIVES

James R. Wiggins, Sen. Stuart Symington, Sen. John Sherman Cooper, William C. Foster, Brewster C. Denny.

ALTERNATES

William B. Bufum, Raymond D. Nasher, Jean Picker, Louis Stulberg, Marvin L. Warner.

PRINCIPAL OFFICERS

Permanent Rep. to the UN—James R. Wiggins.
Senior Advisor—Seymour M. Finger.
International Organization Affairs—Joseph J. Sisco.
Legal Advisor—Leonard C. Meeker.
Security Council—Richard F. Pedersen.
Economic and Social Council—Arthur E. Goldschmidt.
Arms Control and Disarmament Agency—Samuel DePalma.

Major Decisions of the U. S. Supreme Court, 1968

The court affirmed a Federal court ruling that the Texas loyalty oath for teachers and other state employees was an unconstitutional infringement on freedom of association; this was the 6th state loyalty oath law found invalid by the Supreme Court since 1961. (Jan. 15.)

Turned down a 6th appeal by Morton Sobell, convicted as an atom spy in 1951 with Julius and Ethel Rosenberg; Sobell, serving a 30-yr. prison term, contended that the Government had used perjured testimony against him. (Jan. 15.)

Upheld a Federal court decision declaring unconstitutional a 1962 Louisiana law giving state tuition grants for students in private, segregated schools. (Jan. 15.)

Affirmed a lower court ruling upholding the right of the Secy. of Health, Education and Welfare to withhold Federal welfare funds from Alabama because state officials refused to agree to eliminate racial discrimination in the welfare program. (Jan. 15.)

Kindergarten Prayer Unconstitutional

Upheld a lower court decision that declared unconstitutional a verse prayer recited by kindergarten children in DeKalb, Ill., even though the word God had been deleted. (Jan. 22.)

Affirmed a Federal court decision upholding the constitutionality of a New York State law requiring teachers in public schools and tax-exempt private schools to swear to uphold the Federal and state constitutions. (Jan. 22.)

Gambling Stamp Thrown Out

In two related decisions, each by a 7-1 vote with Chief Justice Earl Warren dissenting, declared unconstitutional a Federal law requiring gamblers to buy a \$50 gambling stamp annually and to pay a 10% excise tax on their gross wagers, and struck down a section of the National Firearms Act making it a crime to possess an unregistered firearm. (Jan. 29.)

Refused to review the third appeal by James R. Hoffa, Teamsters president, to reach the court, challenging his jury tampering conviction. (Jan. 29.)

Declined to examine an appeal by a Negro citizen group contending that there was racial discrimination in the routing of an interstate highway section through a Negro district of Nashville, Tenn. (Jan. 29.)

Granted an appeal by 3 Des Moines, Iowa, public school children who had been suspended from school because they wore black armbands in protest against the war in Vietnam. (Mar. 4.)

Upheld unanimously a Federal District Court ruling that Alabama could not segregate jail or prison inmates on the ground that such racial separation was necessary to avoid threatened racial violence. (Mar. 11.)

In an 8-0 ruling interpreting the Civil Rights Act of 1964, held that proprietors of public accommodations found guilty of refusing services to Negroes must pay lawyers' fees of the plaintiffs. (Mar. 18.)

One-Man, One-Vote Extended

In a landmark 5-3 decision, extended its one-man, one-vote doctrine to local governments, holding that if county, city and town governments elect their representatives from single-member districts the districts must be substantially equal in population. (Apr. 1.)

Ruled, 8-0, that the Federal Government must pay more than a century's interest to the Peoria Tribe of Indians of Okla-

homa on \$172,726 it failed to pay to the tribe in 1857 for land ceded by treaty. (Apr. 1.)

In a 6-2 ruling, declared unconstitutional the death penalty provision of the Federal Kidnapping Law, commonly known as the Lindbergh Law. The court held that the law still can be enforced except for the death penalty provision; the law makes it a Federal crime to transport a kidnapped person across a state line. (Apr. 8.)

Upheld a lower court decision holding that the Los Angeles Times' 1964 purchase of 3 San Bernardino newspapers for \$15,000,000 violated antitrust laws and ordered the Times to divest itself of the newspapers. (Apr. 22.)

Rights of Criminals

In a series of decisions broadening the rights of criminal defendants and convicted persons, held: that a state prison inmate serving the first of two consecutive sentences may attack the second conviction in Federal habeas corpus proceedings; that state courts must grant defendants jury trials in criminal cases; that defendants in state criminal contempt cases must be granted jury trials except in petty cases; that in joint Federal trials a confession that incriminates one defendant cannot be admitted in evidence if it also incriminates a co-defendant. (May 20.)

In a 7-1 decision on an appeal by David P. O'Brien, who burned his draft card in 1966, upheld a 1965 law that makes it a crime to burn or otherwise destroy or mutilate a draft card. (May 27.)

Struck a blow at capital punishment by holding, 6-3, that persons cannot constitutionally be sentenced to death by juries from which all persons with conscientious scruples against the death penalty have been eliminated. (June 3.)

In a 7-0 decision, upheld the authority of the Federal Communications Commission to regulate community antenna television systems, known as CATV. (June 10.)

Book Aid to Church Pupils

Upheld, in a 6-3 decision, a 1965 New York State law requiring public school districts to lend textbooks to students in private and parochial schools. (June 10.)

In a 7-2 ruling that prohibits racial discrimination in all sales and rentals of real estate, turned the century-old civil rights law of 1866 into a sweeping fair housing statute. (June 17.)

Over the dissent of Justice William O. Douglas, let stand a lower court ruling that Dallas public schools could constitutionally require long-haired male students to have their hair cut. (Oct. 14.)

Agreed to review a lower court decision that owners of the two daily newspapers in Tucson, Ariz., violated the antitrust laws by sharing a common press and circulation and advertising departments. (Oct. 22.)

Held unconstitutional an Arkansas law that made it a crime to teach the Darwinian theory of evolution in the public schools; the case, the result of the challenge of the law by Mrs. John O. Epperson, a school teacher, was reminiscent of the 1925 Tennessee "monkey trial," in which John T. Scopes was convicted for teaching evolution and which pitted Clarence Darrow against William Jennings Bryan as counsel. (Nov. 12.)

CORPORATIONS AND STOCKS

More Than 24,000,000 Persons Own Shares in U. S. Industries

In 1968, more than 24,000,000 persons in the United States owned shares in American industry, as compared to only 8,630,000 in 1956.

The N. Y. Stock Exchange listed 1,750 issues of 1,274 companies—a total of 12.7 billion shares, valued at \$668 billion.

Trading activity grew. Average daily volume on the N. Y. Exchange was over 12,600,000 shares in 1968, compared to 9,899,000 in 1967.

The American Exchange listed 1,088 is-

sues of 1,013 companies—totaling 2.04 billion shares, which were valued at \$55 billion.

Average daily volume on the American Exchange was over 6,128,000 in 1968; 4,475,000 in 1967.

U. S. corporations boosted their sales volumes. The N. Y. Exchange in 1968 reported 108 of its listed companies had sales or revenues in 1967 of over \$1 billion; last year it listed 99 in its "Billionaires Club" for 1966.

'Yes, Virginia, There Is a Santa Claus'

(Often called the most famous newspaper editorial ever written, this classic first appeared in the New York Sun Sept. 21, 1897,

We take pleasure in answering at once and thus prominently the communication below, expressing at the same time our great gratification that its faithful author is numbered among the friends of The Sun:

"Dear Editor:

I am 8 years old.

Some of my little friends say there is no Santa Claus.

Papa says 'If you see it in The Sun it's so.'

Please tell me the truth, is there a Santa Claus?

Virginia O'Hanlon,
115 West 95th Street"

Virginia, your little friends are wrong. They have been affected by the skepticism of a skeptical age. They do not believe except they see. They think that nothing can be which is not comprehensible by their little minds. All minds, Virginia, whether they be men's or children's, are little. In this great universe of ours man is a mere insect, an ant, in his intellect, as compared with the boundless world about him, as measured by the intelligence capable of grasping the whole of truth and knowledge.

Yes, Virginia, there is a Santa Claus. He exists as certainly as love and generosity and devotion exist, and you know that they abound and give to your life its highest beauty and joy. Alas! how dreary would be the world if there were no Santa Claus! It would be as dreary as if there were no Virginias. There would

be no childlike faith then, no poetry, no romance to make tolerable this existence. We should have no enjoyment, except in sense and sight. The eternal light with which childhood fills the world would be extinguished.

Not believe in Santa Claus! You might as well not believe in fairies! You might get your papa to hire men to watch in all the chimneys on Christmas Eve to catch Santa Claus, but even if they did not see Santa Claus coming down, what would that prove? Nobody sees Santa Claus, but that is no sign that there is no Santa Claus. The most real things in the world are those that neither children nor men can see. Did you ever see fairies dancing on the lawn? Of course not, but that's no proof that they are not there. Nobody can conceive or imagine all the wonders there are unseen and unseeable in the world.

You tear apart the baby's rattle and see what makes the noise inside, but there is a veil covering the unseen world which not the strongest man, nor even the united strength of all the strongest men that ever lived, could tear apart. Only faith, fancy, poetry, love, romance, can push aside that curtain and view and picture the supernal beauty and glory beyond. Is it all real? Ah, Virginia, in all this world there is nothing else real and abiding.

No Santa Claus! Thank God he lives, and he lives forever. A thousand years from now, Virginia, nay ten times ten thousand years from now, he will continue to make glad the heart of childhood.

More About Virginia

Note: Virginia O'Hanlon, the little girl who wrote her famous letter to the New York Sun in 1897, became Mrs. Edward M. Douglas. She retired in 1959 as assistant principal of a public school for physically handicapped children in Brooklyn, N. Y. She had been a teacher and administrator in the New York City public school system for more than 48 years.

The man who answered her letter for the Sun was Francis Pharcellus Church (1839-1906), an editorial writer who, according to contemporary accounts, undertook the assignment with considerable reluctance. But the product of his mellow wisdom and sound craftsmanship has been reproduced in every conceivable form, in every quarter of the globe.

The Sun, in which it first appeared, was merged in 1950 into the New York World-Telegram and Sun, a Scripps-Howard newspaper which also was the publisher of the World Almanac. Now published by Newspaper Enterprise Association, the World Almanac is happy to renew its association with "Yes, Virginia," thus making it available to new generations of children and adults.

 Johnson, Daniel, 53; Premier of Quebec; Manicouagan, Quebec, Sept. 25.
 Jones, Dr. Bob, Sr., 84; evangelist and founder of Bob Jones University; Greenville, S. C., Jan. 16.
 Judd, Lawrence McCully, 81; former Territorial Governor of Hawaii; Honolulu, Oct. 4.

K

Kahanamoku, Duke, 77; Olympic swimming champion; Honolulu, Jan. 22.
 Kanzler, Ernest, 75; industrialist; adviser of Henry Ford 2d; Dearborn, Mich., Dec. 10.
 Keller, Helen, 87; blind and deaf from infancy, overcame handicaps to become accomplished writer and symbol of indomitable human spirit; Westport, Conn., June 1.
 Kelton, Pert, 61; character actress; Ridgewood, N. J., Oct. 30.
 Kennedy, Sen. Robert F., 42; U. S. Senator from New York; Los Angeles, Calif., June 6.
 Klang, Chipping H. C., 59; retired permanent UN delegate for Republic of China; New Rochelle, N. Y., Sept. 9.
 Kimmel, Rear Adm. Husband, 86; commander of Pacific Fleet at time of Pearl Harbor attack; Groton, Conn., May 14.
 Kinder, Ellis, 54; former major league pitcher; Memphis, Tenn., Oct. 16.
 King, Dr. Martin Luther, 39; Nobel Peace Prize winner; Memphis, Apr. 4.
 Knapp, Dr. Arthur Blair, 63; president of Denison University; Granville, Ohio, May 14.
 Kurnitz, Harry, 60; playwright and screen writer; "Requiem Figure," Los Angeles, Mar. 18.

L

Lehr, Bert, 72; comic actor; Cowardly Lion in "The Wizard of Oz," New York, Dec. 4.
 Lambert, Walter D., 89; geodesist; Washington, Oct. 27.

Larrick, George P., 66; Commissioner of Food and Drug Administration, 1954-65; Washington, D. C., Aug. 11.
 Latzo, Pete, 65; beat Mickey Walker for world's welterweight championship in 1926; Atlantic City, N. J., July 7.
 Lawrence, Maj. Robert H. Jr., 31; first U. S. Negro astronaut; Edwards Air Force Base; Calif., Dec. 8.
 Leonard, Robert Z., 78; Hollywood film director; "Strange Interlude"; Beverly Hills, Calif., Aug. 27.
 Lichtenberger, Rt. Rev. Arthur, 68; retired presiding Bishop of the Episcopal Church of U. S.; Bethel, Vt., Sept. 3.
 Lillis, Donald C., 66; stockbroker and president of N. Y. Jets football team; Westbury, R. I., July 23.
 Lindsay, Howard, 78; playwright; "Life With Father," New York, Feb. 11.
 Little, Lawson, 57; golfing champion; Pebble Beach, Calif., Feb. 1.
 Lobert, Hans, 86; major league ball player; manager of Philadelphia Phillies in 1942; Philadelphia, Sept. 14.
 Lohr, Lenox R., 76; president, Chicago's Museum of Science and Industry; manager, World's Fair, 1933-34; Chicago, May 28.
 Lorne, Marion, 82; comic actress; "Gary Moore Show," New York, May 9.
 Lucas, Scott W., 76; former Dem. senator from Illinois; Rocky Mount, N. C., Feb. 22.

M

MacNider, Gen. Hanford, 78; hero of 2 World Wars; Sarasota, Fla., Feb. 17.
 Macrae, Elliot B., 67; publisher; president E. P. Dutton & Co.; New Canaan, Conn., Feb. 13.
 Maney, Richard, 77; theatrical press agent; Norwalk, Conn., June 30.
 Marina, Princess, Duchess of Kent, 61; member of Greek royal family and widow of Prince George, Duke of Kent; London, Aug. 27.
 Marsh, Mae, 72; movie actress; Little Sister in "The Birth of a Nation"; Hermosa Beach, Calif., Feb. 13.
 Martin, Homer, 66; 1st president of U. S. United Auto Workers; Los Angeles, Jan. 22.
 Martin, Joseph, 83; former Republican Speaker of the House from Massachusetts; Hollywood, Fla., Mar. 6.
 Massey, Vincent, 80; former Gov. General of Canada; London, Dec. 30.
 Matthews, Zachariah, 66; Botswana's Ambassador to the U. S.; Washington, May 11.
 Mayo, Dr. Charles W., 70; retired surgeon of Mayo Clinic and son of co-founder; Rochester, Minn., July 28.
 McAndrew, William R., 53; president of NBC News, Bronxville, N. Y., May 30.
 McCord, Jim Nance, 89; twice governor of Tennessee; Nashville, Tenn., Sept. 2.
 Michaux, Solomon Lightfoot, 84; Negro founder of Good Neighbor League; Washington, Oct. 20.
 Meitner, Lise, 89; pioneer in nuclear physics; Cambridge, England, Oct. 25.
 Menke, Capt. Bill, 88; owner of the Goldenrod, last Mississippi River showboat; St. Louis, July 15.
 Mennen, William G., 83; chairman, Mennen Co.; Morristown, N. J., Feb. 17.
 Mercer, Sir Stewart Graham, 78; headed British Secret Intelligence Service, WWII; London, May 30.

Middleton, George, 87; playwright; former head of Dramatists' Guild; Washington, Dec. 23.
 Miller, Rev. Dr. Kenneth Dexter, 81; former president of New York City Mission Society; Livingston, N. J., July 6.
 Miller, Max, 68; author; "I Cover the Waterfront," La Jolla, Calif., Dec. 27.
 Millin, Sarah, Gertrude, 79; So. African novelist and historian; Johannesburg, July 6.
 Molyneux, Robert E., 51; comic art director for Newspaper Enterprise Association; Cleveland, Ohio, Sept. 18.
 Montgomery, Wes, 45; jazz guitarist voted first in 1968 Downbeat poll; Indianapolis, Ind., June 15.
 Morano, Francesco Cardinal, 96; oldest Cardinal in Roman Catholic Church; Rome, July 12.
 Morgan, Dr. Agnes Fay, 84; pioneer in science of nutrition; Berkeley, Calif., July 20.
 Morrow, Doretta, 40; soprano; "Kismet," London, Feb. 28.
 Mulholland, Winbert F. (Bert), 84; trainer of thoroughbred horses; Germantown, Pa., July 12.
 Mullins, Lawrence A. (Moon), 60; star fullback on Knute Rockne teams at Notre Dame University, 1928-30; Chicago, Aug. 10.
 Murch, Walter, 60; painter; noted for his realistic machines; New York, Dec. 11.
 Musmanno, Michael A., 72; Nuremberg trial judge; Justice of Pennsylvania Supreme Court; defended Sacco and Vanzetti; Pittsburgh, Oct. 12.

N

Najmy, Justin, 70; apostolic bishop of Melchite Rite Catholics; Manchester, N. H., June 11.
 Nash, Sir Walter, 86; former prime minister of New Zealand; Auckland, N. Z., June 4.
 Newman, Bernard, 70; author; "Spy," London, Feb. 19.
 Nordhoff, Heinz, 69; head of Volkswagen Co.; Wolfsburg, Germany, Apr. 12.

O

O'Brien, Donough Edward Foster (Baron of Inchiquin), 71; head of Ireland's O'Brien family, descendant of King Brian Borus; Dublin, Oct. 19.
 O'Connor, Edwin, 49; novelist; "The Last Hurrah" Boston, Mar. 23.
 O'Keefe, Dennis, 60; star in 1930s and 1940s; Hollywood, Calif., Aug. 31.
 Oppenheimer, Fritz, 69; international lawyer; Nairobi, Kenya, Feb. 4.

P

Pacini, Alfredo Cardinal, 79; member of Roman Curia; Rome, Dec. 23.
 Parran, Dr. Thomas, 75; U. S. Surgeon General 1936-48; Pittsburgh, Feb. 15.
 Parsons, Adm. Edwin C., 75; last surviving ace of Lafayette Escadrille; Sarasota, Fla., May 2.
 Philippe, Gerald L., 59; chairman of Gen'l Electric Co.; Greenwich, Conn., Oct. 18.
 Phillips, William, 89; former U. S. Ambassador to Italy; Sarasota, Fla., Feb. 23.
 Pickerill, Elmo, 82; held wireless operator license No. 1, learned to fly from the Wright brothers; Mineola, L. I., Jan. 14.
 Pierce, Rear Adm. Maurice R., 80; commanded dirigible Shenandoah; San Diego, Calif., July 22.
 Pike, S. Sidney, 68; introduced skywriting to America in 1922; Wyckoff, N. J., Feb. 23.
 Pillsbury, John, 90; retired head

of Pillsbury Mills, Inc., West Palm Beach, Jan. 31.
 Pitler, Jake, 73; coach for Brooklyn Dodgers; Binghamton, N. Y., Feb. 3.
 Poling, Rev. Dr. Daniel A., 83; leader in American Protestantism; Philadelphia, Pa., Feb. 7.
 Pool, Joe Richard, 57; Representative (D., Tex.); Houston, July 14.
 Power, Sen. Charles G., 80; Canadian legislator for 51 years; Quebec, May 30.
 Price, Ellen, 89; dancer; model for Copenhagen's Little Mermaid statue; Copenhagen, Mar. 6.
 Proctor, Mortimer, 78; former Gov. of Vermont; Proctor, Vt., Apr. 28.

Q

Quasimodo, Salvatore, 66; poet, writer; won 1959 Nobel Prize for literature; Naples, Italy; June 14.
 Queeny, Edgar Monsanto, 70; former head of Monsanto Co.; Ladue, Mo., July 7.

R

Raboy, Mac, 53; drew "Flash Gordon" comic strip; Mount Kisco, N. Y., Dec. 22.
 Rand, James Henry, 81; co-founder, Sperry Rand Corp.; Freeport, Grand Bahama Island, June 3.
 Rand, Christopher T. E., 56; writer, roving reporter for The New Yorker; Mexico City, Sept. 26.
 Read, Sir Herbert, 74; poet and art critic; Malton, England, June 12.
 Reid, Dr. Henry J. E., 72; head of NASA's Langley Research Center; Gloucester, Va., July 30.
 Reis, Ben, 72; dress designer; New York, Oct. 17.
 Reuther, Roy, 58; organizer of United Auto Workers; Detroit, Jan. 10.
 Richter, Conrad, 78; novelist; Pulitzer Prize and National Book Award winner; Pottsville, Pa., Oct. 30.
 Robertson, Norman A., 64; Canada's Ambassador to U. S. 1957-58; Ottawa, July 16.
 Ryan, Ben (Bennett A.), 77; vaudeville entertainer; wrote Inka-Dinka-Do for Jimmy Durante, other songs; Leonia, N. J., July 5.

S

St. Denis, Ruth, 91; pioneer of modern dance; Hollywood, Calif., July 21.
 Sande, Earl, 69; jockey; member of Racing Hall of Fame; Jacksonville, Ore., Aug. 20.
 Schnelria, Dr. Theodore C., 66; curator of Animal Behavior Dept. of American Museum of Natural History; New York; Aug. 20.
 Sanger, Dr. Paul W., 62; heart surgeon; led early work on artificial arteries; Houston, Tex., Sept. 8.
 Savage, John, 88; engineer; designed Hoover and Grand Coulee Dams; Englewood, Colo., Dec. 28.
 Schick, Dr. Bela, 90; pediatrician; developed Schick diphtheria test; New York, Dec. 6.
 Schindler, Dr. Rudolf, 80; gastroenterologist; invented flexible gastroscope; Munich, W. Germany, Sept. 7.
 Schmidt, Gen. Harry, 81; led Marine attack on Iwo Jima in WWII; San Diego, Feb. 10.
 Sears, Eleonora, 87; pioneer sportswoman; Palm Beach, Fla., Mar. 26.
 Serafini, Tullio, 89; opera conductor; Rome, Feb. 2.
 Shipley, Rev. Dr. Guy Emery, 86; Episcopal clergyman; editor of The Churchman; Ar-

cadia, Calif., April 18.
 Silver, Eliezer Rabbi, 87; former pres. of Union of Orthodox Rabbis of the United States and Canada; Cincinnati, Feb. 7.
 Sinnott, Edward, 79; plant geneticist; former dean of Yale University's Graduate School; New Haven, Conn., Jan. 6.
 Smathers, Rev. Dr. Eugene, 60; headed United Presbyterian Church, U.S.A.; Big Lick, Tenn., Aug. 16.
 Smith, Elmo, 58; publisher of Albany Democrat-Herald and former governor of Oregon; Albany, Ore., July 15.
 Smith, Howard, 73; actor; Charley in Broadway's "Death of a Salesman"; Hollywood, Jan. 10.
 Sorensen, Charles E., 86; Henry Ford's production chief helped turn out 80,000,000 cars; built B-24 bomber assembly line plant; Washington, D.C., Aug. 13.
 Spellman, Francis Cardinal, 78; archbishop of New York Archdiocese; New York, Dec. 2.
 Stallings, Laurence, 73; co-author "What Price Glory?"; Pacific Palisades, Feb. 28.
 Stanton, Edwin F., 67; 1st U. S. Ambassador to Thailand; Devon, Conn., Aug. 29.
 Stark, Albert (Dolly), 71; colorful National League umpire of '20s and '30s; New York, Aug. 24.
 Steenbock, Dr. Harry, 81; biochemist; discovered value of Vitamin D; Madison, Wisc., Dec. 25.
 Sydney, Basil, 73; actor; "Strange Interlude"; London, Jan. 10.

T

Talman, William, 51; actor; district attorney in "Perry Mason" TV series; Encino, Calif., Aug. 30.
 Thomas, George A., 57; Chief of Iroquois Indian Confederacy; Syracuse, N. Y., Oct. 22.
 Tone, Franchot, 63; actor played sophisticates on stage and screen; New York, Sept. 18.
 Tooker, John I., 73; New York ship salvage expert; supervised raising of French liner Normandie in 1943; Hialeah, Fla., Sept. 14.
 Tower, Oswald, 84; arbiter of amateur basketball rules; West Caldwell, N. J., May 28.
 Tracy, Lee, 70; actor; played brash, breezy newspaper types; Santa Monica, Calif., Oct. 18.
 Trussell, C. P., 76; N. Y. Times reporter; won 1949 Pulitzer prize for reporting on national affairs; Washington, Oct. 2.
 Tryggvadottir, Nina, 55; Icelandic painter, muralist; New York, June 19.
 Treneer, J. Maurice, 86; developed Alka-Seltzer for Miles Laboratories; Elkhart, Ind., July 2.

U

Upson, Ralph Hazlett, 80; aeronautical engineer; balloon racing champion, 1913-21; Burien, Wash., Aug. 13.
 Usinger, Dr. Robert L., 55; entomologist; led 1964 expedition to Galapagos Islands; San Francisco, Sept. 30.

V

Vall, Virginia, 70; silent screen actress; wife of former film star Charles Farrell; Palm Springs, Calif., Sept. 24.
 Van, Gus, 80; vaudeville star; Van and Schenck; Miami Beach, March 12.
 Vandenberg, Arthur H., Jr., 60; son of late Michigan Senator; Miami, Jan. 18.
 van Paassen, Pierre, 72; author; "Days of Our Years"; New York, Jan. 8.

Van Voorhis, Cornelius Westbrook, 64; narrator of radio and movie documentary "The March of Time"; noted for sonorous sign-off: "Time Marches On"; New Milford, Conn., July 13.
 Vogt, William, 68; former head of Planned Parenthood Federation of America; author of "Road to Survival"; New York, July 11.
 Vovis, Dr. John, 87; co-founder of Save the Children Federation; Duarte, Calif., Jan. 12.

W

Wallace, Lurleen, 41; governor of Alabama; Montgomery, May 7.
 Ward, Marvin (Bud), 54; twice winner of national amateur golf championship; San Mateo, Calif., Jan. 2.
 Waring, J. Waties, 87; ex-Federal judge; opened S. C. polls to Negroes in 1947; New York, Jan. 11.
 Warner, Milo J., 76; former national commander of the American Legion; Toledo, Ohio, Jan. 1.
 Wheeler, Bert, 72; comic of vaudeville, films and theater; New York, Jan. 18.
 Wheeler, Elmer, 62; created sales catch-phrases; Mexico, Oct. 2.
 White, George, 78; Broadway producer of "Scandals"; Hollywood, Calif., Oct. 10.
 Whiteman, Paul, 77; bandleader; "King of Jazz"; Doylestown, Pa., Dec. 29.
 Wilfred, Thomas, 79; artist and inventor; pioneer in use of colored light projections as an art medium; Nyack, N. Y., Aug. 15.
 Wilhelm, Dr. Richard H., 59; head of Princeton University chemical engineering dept.; Center Harbor, N. H., Aug. 6.
 Willan, Dr. Healey, 87; composer; Toronto, Feb. 18.
 Williams, R. Norris, 2nd, 77; former national tennis champion; Bryn Mawr, Pa., June 2.
 Williamson, George, 70; leading scholar on T. S. Eliot and John Donne; Carmel, Calif., Sept. 8.
 Wininger, Bo, 45; professional golfer; Oklahoma City, Dec. 7.
 Winters, Yvor, 87; poet; 1960 Bollingen prize winner; Palo Alto, Calif., Jan. 25.
 Wismer, Harry, 56; sports broadcaster; helped establish American Football League; New York, Dec. 4.
 Wolfst, Sir Donald, 65; actor; "Room at the Top"; London, Feb. 17.
 Wood, Craig, 66; golfer; won Masters and U. S. Open; Palm Beach, Fla., May 8.
 Woolrich, Cornell, (William Irish), 64; writer of mystery stories; New York, Sept. 25.
 Wrubel, Dr. Marshal H., 44; astrophysicist; Boulder, Colo., Oct. 26.
 Wyatt, Commodore Ben H., 74; mapped Alaska by air for Navy; military governor of Marshall Islands during Bikini Atoll atom bomb testing; Coronado, Calif., Sept. 14.

Y, Z

Yashin, Aleksandr, 55; Soviet writer and poet; Moscow, July 11.
 Young, Nedrick, 54; once-blacklisted screenwriter won Academy Award under assumed name; Hollywood, Calif., Sept. 16.
 Zbyszko, Wladek, 75; wrestler in the 1920s and 1930s; Savannah, Mo., June 10.
 Zorach, Marguerite, 80; painter and widow of sculptor William Zorach; B'klyn, N.Y., June 27.

Medical Developments During 1968

A rapid succession of human heart transplants followed the dramatic success on January 2 of Dr. Philip Blaiberg's surgery in Capetown, South Africa. Dr. Christiaan Barnard, initiator of this specific transplant in December 1967 with Louis Washkansky, who died 18 days afterward, explains Blaiberg's survival as partly due to his younger age and healthier condition; also to the use of anti-lymphocyte globulin in preventing a late rejection.

At the time the World Almanac went to press, 80 heart transplants throughout the world had been reported, the largest number in Houston, Tex., by Dr. Denton A. Cooley of Baylor University. Numerous meetings, attended by the leading transplant surgeons, included discussions of the moment of death and moral issues relating to heart donors. Consensus appeared to be that death occurs when the brain ceases functioning and that the heart is no more than a pump that can be replaced at the discretion of the surgeon. Hope for a perfected artificial heart, now being sponsored by the National Heart Institute, Bethesda, Md., is growing, but awaits testing of materials that will not cause clotting, as well as a better power source and control mechanism among other things. Animal hearts also may be used successfully once the rejection problem is solved.

Liver transplants by Dr. Thomas Starzl in Denver, Colo., kept patients alive for a period of months, the longest for 13½ months as of Nov. 15.

A completely synthetic penicillin was achieved by Dr. Ajay K. Bose, professor of chemistry at Stevens Institute of Technology, Hoboken, N. J., who says the new form can be synthesized by a reasonably short process.

Drug for Parkinson's Disease

Response of 28 patients with shaking palsy, or Parkinson's disease, to oral doses of the drug, L-dopa, was reported by Dr. George C. Cotzias and his co-workers at the Brookhaven National Laboratory at Upton, N. Y. The therapeutic effect of the drug is believed related to an increase in the compound dopamine, which is deficient in parkinsonian patients. Dr. Cotzias believes there is a possibility that L-dopa may have a beneficial effect on persons with tremors or rigidity from other causes besides parkinsonism.

Cancer and Chromosomes

An excess of a chromosome called E-16, one of the 46 chromosomes normally found in a cell, was strikingly high in cancer cells studied at Lawrence Radiation Laboratory, Livermore, Calif. Dr. John W. Gofman, who reported the finding, denied that the discovery indicates that cancer can be inherited. Although chromosomes are the mechanism of inheritance, cancer itself could have produced the excess of the E-16 chromosome.

Results of laboratory studies have suggested that venereally transmitted type 2 herpes virus is a prime suspect as a cause of cancer of the cervix, or neck of the womb. The findings confirm evidence that this type of cancer may be fundamentally a venereal disease caused by a virus.

L-asparaginase, an anticancer enzyme that attacks malignant cells while bypassing healthy ones, has been successful in treating some cases of acute leukemia that no longer responded to other drugs. Government support of research brought about increased production of the enzyme, which has been in short supply.

Syphilis Vaccine Foreseen

A vaccine against syphilis may be several years away, but a beginning has been made by Mexican and United States health officials. They have infected chimpanzees in Mexico with the nonvenereal disease pinta, which is caused by *Treponema carateum*. Syphilis is caused by the microorganism *Treponema pallidum*, and patients with pinta appear to have immunity to the venereal infection.

Hong Kong Flu

Eight pharmaceutical companies were put to work on a new influenza vaccine following a flu epidemic in Hong Kong that reached its peak in the summer of 1968. Considering the amount of travel between the Asian city and the U. S., it was to be expected that the new strain would cross the Pacific. The Division of Biologics Standards of the National Institutes of Health provided seed virus of the Hong Kong 1968 Asian flu strain to aid the drug companies in developing the new vaccine.

Pooled Blood Plasma Stopped

The risk of hepatitis from pooled human blood plasma was found to be so great that a committee of the National Research Council recommended discontinuing its use.

Warnings also were issued against individual blood transfusions from former servicemen who had had malaria, which can be transmitted in their blood.

New Anesthetic

A new general anesthetic, ketamine hydrochloride, was recommended as the safest ever developed. It is neither a barbiturate nor a narcotic, and unlike conventional anesthetics, it does not depress all areas of the central nervous system. It leaves the patient with his eyes open but disconnected from his surroundings and unresponsive to pain. It is particularly useful in dental extractions and other types of oral surgery.

Cost of Drugs

Brand-name drugs cost elderly persons an estimated \$41,500,000 more than they would have paid for drugs prescribed by generic name, a Health, Education and Welfare Department task force reported in a study of 175,000,000 prescriptions written for older people in 1966, the last year for which figures were available. Considerable controversy exists on the matter of equivalency, as well as actual cost, however, and the Pharmaceutical Manufacturers Association's officials called the report an illusion without proper documentation. The task force found that 409 drugs were used most frequently by the elderly. Most of these drugs were available from only one supplier and under brand names. The 339-page report, titled *The Drug Users*, pointed out that of the 10 most frequently used drugs, 8 were still under patent and no equivalent was available under its generic name.

Doctors who prescribed so-called diet pills containing digitalis and thyroid hormone were chastised by the American Medical Association after Senate hearings that included testimony on the dangerous effects and possible death resulting from such prescriptions.

Improvements in treatment of the mentally ill focused on modernization of physical plants such as St. Elizabeth's Hospital, the 113-year-old Federally run hospital, the largest in the U. S. devoted to mental illness. The National Institute of Mental Health took St. Elizabeth's from

the Health, Education and Welfare agency's jurisdiction and placed it under a National Center for Mental Health Services, Training and Research. Improved drugs have made it possible to continue treatment of the mentally ill in their homes rather than keep them for long-term custodial care in huge institutions. The cottage system also has been adopted in many hospitals.

Army Reports Developments

The Army Medical Department named 9 areas in which there have been major developments since the start of the Vietnamese war. These achievements include:

Inflatable hospitals, spray adhesive to control internal bleeding, tissue adhesive called cyanoacrylates, that will enable a physician to repair organs without suturing, shock treatment in the management of shock and wounds, an artificial hand run by rechargeable batteries, improved preservation of blood by the addition of adenine, burn treatment by sulfamylon creme that has been life-saving, a malaria preventive called Diformyl DDS (Diaminodiphenyl sulfone), which when given

once a week kept human volunteers from contracting the disease, and an oral vaccine that has been effective in reducing the occurrence of infectious diseases.

The measles eradication program reduced the number of cases from 203,000 in 1966 to 62,000 at the time of last estimate. The rubella vaccine to prevent German measles was tested to the point that it is expected to be licensed with safety. Isolation of the infectious mononucleosis virus raised hopes that a vaccine will be forthcoming. The development of silastic sheath for nerve repair showed great promise. Synthetic corticotropin showed significant results in asthma treatment. The discovery of the amino acid sequence of thyrocalcitonin was expected to have effects on studies of bone resorption in old age. Some persons were saved from blindness by the glueing of plastic contact lenses directly to the cornea. The Boston arm showed control over an artificial arm by signals from the brain. Cross circulation between a patient and baboon at the Medical College of Virginia saved the patient's life.

New Federal Agency Takes Over Narcotics Fight

Federal narcotic and drug control forces were consolidated Apr. 8, 1968, when Reorganization Plan 1 of 1968 created the Bureau of Narcotics and Dangerous Drugs. Transferred to the new bureau were the functions of two previously existing agencies, the Bureau of Narcotics of the Treasury Dept. and the Bureau of Drug Abuse Control of the Dept. of Health, Education and Welfare.

Meanwhile, latest available Government statistics showed the number of active narcotic addicts in the United States at the end of 1967 as 62,045, an increase of 2,325 over the figure of a year earlier. Nearly 80% of them were reported from 4 states, as follows: New York 32,347, California 7,457, Illinois 6,567, and New Jersey 2,834. Ten cities accounted for 75% of the national total, as follows: New York City 30,543, Chicago 6,489, Los Angeles 1,997, Detroit 1,642, Baltimore 1,348, Philadelphia 1,296, Washington, D. C. 1,106, Newark 1,004, San Diego 587, and Buffalo 550.

The Meaning of "One Inch of Rain"

An acre of ground contains 43,560 square feet. Consequently, a rainfall of 1 inch over 1 acre of ground would mean a total of 6,272,640 cubic inches of water. This is equivalent of 3,630 cubic feet.

As a cubic foot of pure water weighs about 62.4 pounds, the exact amount varying with the density, it follows that the weight of a uniform coating of 1 inch of rain over 1 acre of surface would be 226,512 pounds, or 113¼ short tons.

The weight of 1 U. S. gallon of pure water is 8.345 pounds. Consequently a rainfall of 1 inch over 1 acre of ground would mean 27,143 gallons of water.

¹The Angara is the only outlet of Lake Baykal, USSR, and drops 1,140 ft. in 1,150 miles.²The Rio de la Plata is the estuary formed by the Parana and Uruguay Rivers.³The source of the St. Lawrence River is in the State of Minnesota. The St. Lawrence is viewed as a part of the Great Lakes Waterway and its source is considered the head of the St. Louis River which flows into Lake Superior. The St. Louis River rises in Minnesota.

Area (sq. miles) of great river basins—Amazon (2,053,318); Congo (1,339,923); Nile (1,119,652); Mississippi-Missouri (1,243,700); La Plata (1,198,000); Ob-Ittysh (1,132,000); Yenisey (1,004,000); Lena (934,000); Amur (712,000); Mackenzie-Peace (696,700); Yangtze (666,000); St. Lawrence (565,200); Volga (533,000); Huang (288,000); Danube (315,000); Colorado (246,000); Rio Grande (171,890).

1970.....	Osaka World's Fair, Osaka, Japan.

Miss Universe Pageant and Miss U.S.A.

Martha Vasconcellos, of Brazil, was crowned Miss Universe, 1968, at Miami Beach on Saturday, July 13, 1968. She received a \$10,000 cash award; a \$10,000 service contract; a chinchilla jacket valued at \$7,500, plus numerous other prizes.

Dorothy Anstett, of Kirkland, Washington, was elected Miss USA on Saturday, May 18, 1968. She received a \$5,000 cash award; a \$5,000 service contract and numerous other prizes.

First Miss Black America

Saundra Williams, 19, of Philadelphia, a student at Maryland State College, was chosen over 7 other contestants as the first Miss Black America in Atlantic City, N. J., Sept. 8. The contest was held in the Ritz Carlton Hotel, to protest what its sponsors termed "the white stereotype" of the Miss America Pageant, held at the same time in nearby Convention Hall. Miss Williams was awarded a trophy, a one-week vacation in Puerto Rico, and a modeling contract.

Multi-TV Set Homes Double in 6 Years

The number of American households with two or more television sets more than doubled since 1962 as multi-set households reached an estimated 14,700,000 by June 1967, according to the U. S. Department of Commerce.

Sixteen out of 17 homes had television, reaching 96% of the population. Nearly 11,000,000 homes had color sets and more than 23,000,000 had UHF sets. More than one set was most likely to be found in homes with either color or UHF.

Days Between Two Dates

Table covers period of two ordinary years. For leap year, one day must be added after Feb. 28

Example—Days between July 4, 1969, and Dec. 25, 1970, subtract 185 from 724; answer is 539 days.

Day	Mo.	Jan.	Feb.	March	April	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.	Day	Mo.	Jan.	Feb.	Mar.	April	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.

A Guide to Avenue Addresses in N.Y.C.

To find the location of a number on the following Avenues of Manhattan, cancel the last figure of the number, divide the remainder by 2 and add the given key number.

Thus: Where is 596 Seventh Avenue? Divide 59 by 2 -30, plus 12—42nd Street.

Ave. A.....	add	4	Up to 600	add	18	Above 1800.....	add	20	Pt. Wash. Ave.....	add	158
Ave. B.....	add	3	Up to 775	add	20	8th Ave.....	add	9	Lenox Ave.....	add	110
Ave. C.....	add	3	From 775 to 1286			9th Ave.....	add	13	Lexington Ave.....	add	23
Ave. D.....	add	3	see exception below:			10th Ave.....	add	13	Madison Ave.....	add	27
1st Ave.....	add	4	Up to 1500	add	45	11th Ave.....	add	15	Manhattan Ave.....	add	100
2nd Ave.....	add	3	Up to 2000 Mt. Morris Pk.			Amsterdam Ave.....	add	59	Park Ave.....	add	34
3rd Ave.....	add	10	Above 2000.....	add	24	Audubon Ave.....	add	165	Pleasant Ave.....	add	101
4th Ave.....	add	8	Ave. of Americas (6th)			Columbus Ave.....	add	60	St. Nicholas Ave.....	add	110
5th Ave. to 200.....	add	13	subtract 12 or 13			Convent Ave.....	add	127	Wadsworth Ave.....	add	175
Up to 400.....	add	16	7th Ave.....	add	12	Edgecomb Ave.....	add	134	West End Ave.....	add	

EXCEPTIONS

Broadway: Up to 754 below East 8th St.

Above 754, apply above rule but deduct following key numbers:

From 754 to 858 deduct 29.

From 857 to 958 deduct 25.

Above 1000 deduct deduct 31.

Note: From Washington Square North most crosstown streets have 100 numbers to the block. Numbering of these streets starts east and west from Fifth Avenue.

Riverside Drive: Below 567, drop last figure, add 75; do not divide by two.

Above 577, drop last figure, add 78.

Central Park West: Drop last figure, add 60.

5th Avenue: From 775 to 1286, drop last figure and deduct 18 from remainder.

Late News Developments

New York City Teachers End Strike

The New York City school strike, the nation's first major confrontation over the issue of decentralization of a large school system, finally came to an end **Nov. 19**. The United Federation of Teachers voted 6-to-1 to call off the 5-week strike, after the city made new concessions weakening the posture of the experimental local school board and strengthening the protections guaranteed members of the teachers' union. The strike, actually 3 successive strikes, had kept most of the city's 50,000 teachers and 1,100,000 pupils out of classes for 36 of the first 48 days of the fall term.

Nixon, Humphrey Meet in Florida

Vice President Humphrey, enroute to a Virgin Islands vacation **Nov. 8**, stopped over in Miami for an amiable half-hour airport discussion with vacationing President-elect Nixon, in which he pledged his support of the man who had defeated him 3 days before in the race for the Presidency. Humphrey was accompanied by Maine Sen. Edmund S. Muskie, who had been his Vice Presidential running mate.

U. S. Bishops Rule on Pill

In an 11,000-word pastoral letter, **Nov. 15**, U. S. Catholic bishops meeting in Washington said Catholic married couples who decide in good conscience to use contraceptives should not feel cut off from the church and its sacraments. The bishops agreed 180-8 that "circumstances may reduce moral guilt," although they described artificial contraception as an "objective evil."

Greek Plotter Spared

Following worldwide appeals, including one from Pope Paul VI, Greece's army-backed government **Nov. 21** decided to spare the life of Alexandros Panagoulis, the 30-year-old army deserter who tried to kill Premier George Papadopoulos on Aug. 13. He had been sentenced to die **Nov. 17**.

Assassin Misses Ayub

Pres. Mohammed Ayub Khan of Pakistan escaped an apparent assassination attempt **Nov. 10** when a youth's two pistol shots missed him on the platform on which he was sitting.

Nip Plot to Kill Nixon

A Yemini Arab, a naturalized citizen of the U. S., and his two sons were arrested **Nov. 9** in Brooklyn, N. Y., for an alleged Arab plot to assassinate President-elect Richard M. Nixon. The father, Ahmed Rageh Namer, 43, and his sons, Hussein Namer, 20, and Abdo Namer, 18, were all described as shipping clerks.

Warren Firm on Retiring

Chief Justice Earl Warren was firm in his intention to retire, according to reports **Nov. 14**. He was also said by friends to be ready to swear in Richard M. Nixon as 37th President of the United States, and deprecated any talk of ill feeling between him and the President-elect.

10 Meet on Money Crisis

With the international monetary system threatened for the 3d time in a year by waves of speculation, top financial officials of the 10 wealthiest non-Communist countries met in Bonn **Nov. 20** to try to resolve the crisis. The French, German, London and Brussels markets were closed down—Brussels "until further notice." With the French franc foundering, it was expected the others would attempt to remedy the situation with massive loans, but that the franc would have to be devalued.

Ray Trial Delayed

Judge W. Preston Battle **Nov. 12** approved the postponement of James Earl Ray's trial for the murder of the Rev. Dr. Martin Luther King, Jr. until March 3, 1969, to give his new counsel, Perry Foreman of Houston, time to prepare the defense.

Nixon Names 1st Aide

In his 1st choice of staff aides **Nov. 12**, President-elect Nixon named Bryce Nathaniel Harlow, 52, of Oklahoma, to serve as his assistant for legislative and Congressional affairs. Harlow held a similar job in the Eisenhower administration.

UK Train Robbery Suspect Seized

After a 5-year search, Bruce Reynolds, last of the suspects in Britain's great train robbery Aug. 8, 1963, was seized **Nov. 8** in Torquay, a fashionable resort town on the Devon coast. Reynolds was a suspected member of the gang that halted a Glasgow-London mail train and made off with bank notes worth more than \$7,000,000.

Yale Going Coed in 1969

Yale University announced **Nov. 14** it would go coed for the first time in its 267-year history with the admission of 500 undergraduate women in September, 1969 to "enhance its contribution to the generations ahead." Ultimate goal was 1,500 girl students, without reducing male undergraduate enrollment, which is now 4,000.

Gomulka Asks Red Unity

Wladyslaw Gomulka, Poland's Communist chief, **Nov. 11** appealed for unity and urged 37 foreign Red delegations attending the Polish Communist party's 5th congress in Warsaw to openly discuss the "differences existing among us."

DISASTERS

A cyclone in Orissa State, India, **Nov. 1** killed 35 . . . Twenty-two died in a forest fire west of Algiers, Algeria, **Nov. 1** . . . Seven were killed, two injured when a car carrying Boy Scouts to a weekend canoe trip collided with another car near Grand Ledge, Mich., **Nov. 2** . . . More than 100 perished in floods and landslides in northwestern Italy **Nov. 1-3** . . . One died, 10 were injured in a southwest Yugoslav earthquake **Nov. 3** . . . A fuel tank explosion in Iloilo, Philippines, **Nov. 10** killed

13, injured 57 . . . Some 12 tornadoes along West Florida coast **Nov. 9** killed two, injured 24, caused more than \$1,000,000 in damage . . . A bus plunged into a river near Sotik, Kenya, **Nov. 10**, killing 14 . . . Bus-tanker truck crash in Accra, Ghana, **Nov. 12** killed 22 . . . Two French Army helicopters crashed near Dax, France, **Nov. 14**, killing all 5 aboard . . . Brighton, England, hotel fire **Nov. 17** killed 7, injured 4 . . . Coal mine fire trapped 78 of 99 miners in Mannington, W. Va., **Nov. 20**.

Addenda, Changes

AWARDS, MEDALS, PRIZES (PP. 234-244)

Harmon International Aviators Trophy—Major William J. Knight.

Louisa Gross Horwitz Prizes—for research in biochemistry, \$12,500 each: Dr. H. Gobind Khorana and Dr. Marshall W. Nirenberg.

Albert Lasker Medical Research Awards—Dr. William F. Windle, Dr. John H. Gibson, Jr., Sen. Lister Hill (\$10,000 each); Dr. Marshall W. Nirenberg, Dr. H. Gobind Khorana (\$5,000 each).

National Medal for Literature—\$5,000, Marianne Moore, poet.

Nobel Prizes for 1968—**Peace Prize**: Rene Cassin, France. **Physics**: Luis W. Alvarez, United States. **Chemistry**: Lars Onsager, United States. **Medicine and Physiology**: Robert W. Holley, H. Gobind Khorana and Marshall W. Nirenberg, all United States. **Literature**: Yasunari Kawabata, Japan.

BASEBALL (P. 806)

Most Valuable Players—Bob Gibson, St. Louis Cardinals, was selected as the most valuable player in the National League for the 1968 season. The American League most valuable player was Dennis McLain of the Detroit Tigers.

Rookies of the Year—Stan Bahnsen, of the New York Yankees, was chosen rookie of the year in the American League for 1968. The National League rookie of the year was Johnny Bench of the Cincinnati Reds.

CANADIAN TAXES (P. 489)

Prime Minister Trudeau's government presented its first budget Oct. 22, calling for a 2% increase in income tax levies, limited to a maximum of \$120 a year on each taxpayer, taking effect Jan. 1, 1969, and adding new levies on insurance companies.

DEATHS (PP. 65-92)

Philby, Mrs. Eleanor Carolyn Kearns, 54; wife of Harold (Kim) Philby, Soviet spy; Mendocino, Calif., Nov. 14.

Lewanika, Sr Mwanawina, III, 78, leader of Lozi of Barotseland, Zambia; Lusaka, Nov. 13.

Briskin, Samuel, 71; Hollywood producer; Los Angeles, Nov. 6.

Bea, Augustin Cardinal, 87; guided ecumenical decrees; Rome, Nov. 16.

Clapper, Mrs. Olive Ewing, 72; widow of Raymond Clapper, Scripps-Howard political columnist; Washington, Nov. 11.

Wanger, Walter, 74; film producer; \$37,-000,000 "Cleopatra"; New York, Nov. 18.

Corey, Wendell, 54; actor; Hollywood, Nov. 8.

Magnuson, Dr. Paul B., 84; former medical director of Veterans Administration; Washington, Nov. 5.

Munch, Charles, 77; conductor of Boston Symphony, 1949-1962; Richmond, Va., Nov. 6.

Mohr, Gerald, 54; actor; Stockholm, Nov. 10.

Papandreou, George, 80; former Premier of Greece; Athens, Nov. 1.

Gatch, Lee, 66; artist; Trenton, N. J., Nov. 10.

Uihlein, Edwin C., Jr., 22; heir of Schlitz fortune; Milwaukee, Nov. 12.

EQUATORIAL GUINEA (P. 548)

Independence—Equatorial Guinea, a Spanish province, became independent Oct. 12; Francisco Macias Nguema became president.

GREAT CITIES OF NORTH AMERICA

Dayton, Ohio (P. 399)—The new editor of The Journal Herald is Charles T. Alexan-

der; the new managing editor is Ralph Langer.

Los Angeles, Calif. (P. 408)—Telephone number of the Los Angeles Herald-Examiner is 213-748-1212. Circulation daily 667,902; Sunday 687,850.

Regina, Canada (P. 423)—The correct spelling is Mackenzie Art Gallery; the CCF is now known as the New Democratic party.

Tampa, Fla. (P. 433)—The telephone number of The Tampa Tribune and the Tampa Times has been changed to (813) 224-7711.

GREECE (P. 517)

Greek voters approved a new Constitution Sept. 29; it took effect Nov. 10; it cut down powers of the King and Parliament and increased those of the Premier; elections and certain rights were left in abeyance until the regime should decide to restore them.

HEADS OF STATE, PRIME MINISTERS (PP. 576-7)

Congo-Brazzaville—Pres. Alphonse Massamba-Debat was ousted Sept. 4; Alfred Raoul was named interim president.

Italy—Premier Giovanni Leone resigned Nov. 19.

Libya—Wanis el-Gaddafi became premier Sept. 4.

Mali—Pres. Modibo Keita was ousted Nov. 19.

Panama—Pres. Arnulfo Arias was ousted Oct. 11; Col. Jose M. Pinilla was named provisional president.

Peru—Pres. Fernando Belaunde Terry was ousted Oct. 3; Gen. Juan Velasco Alvarado became provisional president.

Portugal—Premier Salazar suffered a brain hemorrhage and resigned; Marcelo Caetano became premier Sept. 27.

Syria—Premier Youssef Zayyin was removed; Chief of State Nureddin al-Attassi took over the post.

HORSE RACING (P. 820)

Beau Brummel won the \$125,000 added Garden State Stakes for two year olds.

MEDAL OF HONOR WINNERS (P. 740)

(*Awarded Posthumously)

Late in 1968 the following additional Medal of Honor winners were announced:

***Pfc. Gary W. Martini**, U. S. Marine Corps, of Charleston, W. Va.

***Capt. James A. Graham**, U. S. Marine Corps, of Forestville, Md.

***First Sgt. Maximo Yabes**, U. S. Army, of Lafayette, Colo.

Capt. Angelo J. Liteky, U. S. Army chaplain, of Washington, D. C.

Sgt. Sammy L. Davis, U. S. Army, of Martinsville, Ind.

Capt. James A. Taylor, U. S. Army, of Arcata, Calif.

Specialist 5 Dwight H. Johnson, U. S. Army, of Detroit, Mich.

Specialist 4 Gary G. Wetzel, U. S. Army, of Oak Creek, Wis.

QUEBEC PREMIER (P. 489)

After the death of Premier Daniel Johnson, a Quebec Legislative Assembly caucus of National Union party members on Oct. 2 chose Jean-Jacques Bertrand, Minister of Justice, to become Premier of the province.

UNITED NATIONS MEMBERS (P. 569)

New Members—The UN roster rose to 126 nations as Swaziland became a member Sept. 24 and Equatorial Africa Nov. 14.

UNITED STATES POPULATION (P. 592)

Total estimated population—As of Oct. 1, 1968, the population of the U. S., including servicemen overseas, was estimated by the Bureau of the Census at 201,750,000.

Chronology of Year's Events

Reported Month by Month in 4 Categories:

National, International, General and Disasters

December 1, 1967, to November 1, 1968

December—1967

NATIONAL

McCarthy Called "Stalking Horse"—Gov. John B. Connally of Texas accused Sen. Eugene McCarthy Dec. 1 of being "a stalking horse" for the Presidential aspirations of Sen. Robert F. Kennedy. Connally said McCarthy's candidacy for the Democratic nomination, which had been announced the previous day, "can't do anything but result in a greater division in the party." In an apparent answer to Connally's charge, McCarthy declared in a speech in Chicago Dec. 2 that there was "no conspiracy, collusion or common plan" between himself and Kennedy.

Draft Demonstrations—Some 585 anti-draft demonstrators were arrested in New York Dec. 5-8 as they unsuccessfully sought to close down the Army's induction center at 39 Whitehall St. by marching and blocking the entrance. Among those arrested were Dr. Benjamin Spock and poet Allen Ginsberg. The New York demonstration was part of a national Stop-The-Draft-Week program initiated by some 40 anti-war groups. Anti-war demonstrators also were arrested in Madison, Wis., Manchester, N. H., Cincinnati, O., and New Haven, Conn.

LBJ Hits House Republicans—In a nationally televised speech before the AFL-CIO convention in Bal Harbour, Fla., Dec. 12, President Johnson accused Republican members of the House of defending the status quo in "vote after vote" like so many "wooden soldiers." The President then ticked off 7 bills that had been opposed by more than a majority of the House Republicans and accused them of voting an enthusiastic "yes" only, "... when they could vote to recommit a good bill, to bury it in a blanket of rhetoric beneath the wave of Republican reaction." The GOP received equal TV time to answer the President Dec. 15 and Senate Republican leader Everett Dirksen (Ill.) said, "... the wooden soldiers have not only been sustaining the commander-in-chief, but we have been sustaining the live soldiers in Vietnam, which is infinitely more important."

McCloskey Wins House Seat—Republican Paul N. McCloskey, Jr., won election to the House of Representatives from California's 11th Congressional District Dec. 12. The previous month, McCloskey had defeated former child screen star Mrs. Shirley Temple Black for the Republican nomination for the seat.

Vietnam Christmas Truce—American and Allied forces in Vietnam observed a 24-hour Christmas truce Dec. 24-25 which they later reported was violated by 108 enemy-initiated incidents. The Viet Cong had declared unilaterally they would observe a 3-day truce Dec. 24-27. At the end of the 24-hour period the U. S. resumed air attacks on North Vietnam and reported destroying 23 trucks in a 150-truck convoy 90 miles south of Hanoi.

INTERNATIONAL

Thailand Guerrillas—Increased Communist guerrilla activity forced the government of Thailand Dec. 1 to declare martial law in 5 provinces. An estimated 2,000 members of the Communist Patriotic Front were believed operating in the country which previously had imposed

martial law in 7 other provinces where the rebels had been particularly active.

U. S.-France Consular Treaty—Secy. of State Dean Rusk and French Ambassador to the U. S. Charles Lucet exchanged texts of a new consular treaty in Washington Dec. 7. The new treaty between the two countries replaced one in effect for the last 100 years.

Cyprus Crisis Settled—The Greek government began removing its troops from the island of Cyprus Dec. 8 in accordance with a pact signed by Greece, Turkey and Cyprus that averted a war between Greece and Turkey. In mid-November clashes between Greek and Turkish Cypriots had brought the two countries to the brink of war, but mediation efforts by special U. S. envoy Cyrus Vance, the UN and NATO succeeded in heading off the conflict and bringing the principals to the negotiation table.

Czechoslovakian Unrest—An unheralded visit to Prague Dec. 8 by Russian Communist Party Gen. Secy. Leonid Brezhnev reportedly saved Czech President and Communist Party boss Antonin Novotny from being ousted by Slovak dissidents in the Presidium. Novotny was reportedly accused of inept economic and party leadership and anti-Slovakian policies in the year 3 writers were kicked out of the party in a crackdown by the Central Committee.

King Flees Greece—In an attempt to oust the military junta that seized control of Greece in April, King Constantine broadcast Dec. 13 an appeal to the Greek people to support him in re-establishing a democratic government. Within hours it was apparent that the King had failed to rally the necessary military power to overcome the junta, and Dec. 14 Constantine fled to exile in Rome with his family and close advisers. In the face of the attempted coup, the junta Dec. 13 named a new cabinet with Col. George Papadopoulos as Premier and appointed a "regent" and "viceroys" to replace the King. The junta said in a broadcast the same day that "adventurers ... misled the King." Subsequent negotiations by the junta for Constantine's peaceful return to Greece failed, and in late December Constantine and his entourage remained in Rome.

New UN Member—By acclamation the UN Assembly admitted to membership the People's Republic of Southern Yemen Dec. 14. Southern Yemen, formerly the British territory of Aden, thus became the 123rd member of the world organization.

Dahomey Coup—In a bloodless coup Dec. 17 a 15-man military junta led by Maj. Maurice Kouandete ousted the Dahomey government of President Christophe Soglo. The coup followed a 5-day general strike that had paralyzed the country the previous week. The junta set up a provisional government Dec. 18 and announced new elections would be held in 6 months.

France Opposes Britain—Opposition by France once again successfully stymied an attempt of Britain to join the European Economic Community or Common Market Dec. 19. Though 5 of France's partners in the Common Market favored negotiating Britain's application for mem-

bership, it became apparent that France would not alter its previous position and the issue was not brought to a vote for fear of provoking a French veto. Britain's membership bid "remained on the agenda," the Council said.

New China A-Test—Communist China conducted its 7th atmospheric nuclear test Dec. 24, the Atomic Energy Commission announced. The test took place in the Lob Nor area of China, the AEC said, and was "in the low yield range." For the first time, the Chinese failed to announce or confirm a nuclear test.

GENERAL

Cardinal Spellman Dies—Francis Cardinal Spellman, archbishop of the New York Archdiocese of the Roman Catholic Church, died in New York Dec. 2. The body of the 78-year-old Cardinal, who had headed the New York Archdiocese since 1939, was placed on view in St. Patrick's Cathedral Dec. 3. Nine Cardinals took part in a requiem mass Dec. 7 which was attended by President Johnson and Vice President Humphrey. Cardinal Spellman was interred in a crypt beneath the high altar of St. Patrick's.

White House Wedding—President Johnson's daughter Lynda, 23, was married to Marine Capt. Charles Robb, 28, in a White House ceremony Dec. 9. It was the first White House marriage of a President's daughter in 53 years.

Harold Holt Drowns—Australian Prime Minister Harold Holt disappeared in the surf while swimming off Cheviot Beach, Portsea, Victoria, Dec. 17. An air and sea search failed to recover the 59-year-old Holt's body and Dec. 19, John McEwen, leader of the Country Party, was sworn in as caretaker prime minister. Funeral services were held in Melbourne Dec. 22, and President Johnson attended the rites. President Johnson then went on to visit Thailand, South Vietnam and the Vatican, where he met with Pope Paul Dec. 23, before returning to Washington Christmas Eve.

First Human Heart Transplant Operations

Shortly before 1 a.m. Dec. 3, Denise Ann Darvall, 24, died at Grote Schuur Hospital in Capetown, South Africa, from injuries received in an auto accident. Within 5½ hours the dead woman's heart was beating in the chest of Louis Washkansky, and the world had witnessed the first successful human heart transplant operation.

Washkansky, a 55-year-old grocer whose own heart was damaged beyond repair, lived for 18 days before dying Dec. 21 from double pneumonia.

The historic operation was performed by a 30-man surgery team led by Prof. Christian N. Barnard, 44. The chief post-operative danger was considered to be rejection of the foreign heart by the body's immunological defense mechanism. To suppress the rejection process, Washkansky was given large doses of steroids to overcome the body's natural defense, a procedure that also seriously weakened his ability to fight off infection.

Dr. Barnard's achievement was hailed by most medical authorities around the world, though some thought the operation upon a human subject to be premature in light of many unanswered questions connected with such an experimental technique.

Nevertheless, Dr. Barnard's pioneering was rapidly followed by an unsuccessful attempt to transplant the heart of an infant who had died of brain damage into a 2½-week-old baby at Maimonides Hospital in Brooklyn Dec. 6. The child, born

Vatican Peace Pleas—Pope Paul VI's Christmas Message, delivered Dec. 23, appealed for peace in the world and in Vietnam. In a speech Dec. 22 the Pontiff called for a halt to the bombing of North Vietnam and seemed to offer his services toward achieving peace. In a message to the heads of government and churches, revealed Dec. 15, the Pope suggested that Jan. 1, 1968, and all future New Year's days be observed as a "Day of Peace."

DISASTERS

Sixty-seven killed Dec. 8 when Faucett Airlines plane crashed near Midway, Peru . . . 9 women trampled to death in Vitoria, Brazil, Dec. 9 in stampede to get free Christmas presents for children . . . Twin-engine plane crashed into Lake Monona, Wis., Dec. 10, killing 7 . . . Earthquake in Koyana Nagar, India, reported Dec. 11 to have killed 172, left 1,000 homeless . . . Collapse of apartment house in Camboriu, Brazil, Dec. 11 killed 6 . . . 18 persons dead, 15 injured in Iwiny, Poland, Dec. 13 when small lake broke its bank and flooded community . . . Navy plane with 14 aboard reported missing Dec. 14 on flight from Alaska to Oak Harbor, Washington . . . 46 killed Dec. 15 in bridge collapse at Point Pleasant, W. Va. . . . Accidental quarry explosion Dec. 16 killed 9 near Schaffhausen, Switzerland . . . 4 men burned to death, 30 injured Dec. 18 when 60,000 pounds of molten metal fell on them in steel mill in Houston, Tex. . . . Tornado killed 4, injured 29 in northern Alabama Dec. 18 . . . RAF plane crashed near Ft. William, Scotland, Dec. 21, killing 13 . . . Father and 4 children burned to death in house fire Dec. 25 at Lake Winnepaug, Conn. . . . Bus overturned and fell in river near Tafi Del Valle, Argentina Dec. 25, killing 16, injuring 20 . . . Apartment house explosion in Moscow Dec. 25 killed 9 . . . 9 children died in house fire Dec. 29 in Mont Laurier, Quebec . . . 9 dead, 30,000 homeless reported in flood in Brazil Dec. 29 . . . Twin-engine Beechcraft crashed into Lake Pontchartrain, La., Dec. 31, killing 6.

with a deformed heart, lived 6½ hours after surgery and Dr. Adrian Kantrowitz, who headed the surgical team, said death was not due to rejection.

On Jan. 2, 1968, Dr. Barnard performed the world's 3rd heart transplant operation. The recipient this time was Dr. Philip Blaiberg, 58, a retired dentist. In a 5-hour operation, Dr. Blaiberg was given the heart of Clive Haupt, 24, who had died of a stroke. Haupt, under South Africa's policy of apartheid, was classified as a "Cape colored." Dr. Blaiberg is white.

It was Mar. 16 when Dr. Blaiberg, accompanied by his wife, Eileen, and Dr. Barnard, stepped through the doors of Grote Schuur Hospital and went home. Other transplant recipients were not as fortunate.

Mike Kasperak, a 54-year-old steel worker, was given Jan. 6 the heart of Virginia Mae White, 43, a housewife who had died of a massive brain hemorrhage. The operation was performed at Stanford University Medical School by a surgical team headed by Dr. Norman Shumway. Kasperak died Jan. 21 from a variety of medical complications.

By the end of August, 1968, a total of 34 human-to-human heart transplants had been performed and 11 of the recipients were still alive. At that time the longest-surviving recipient was Dr. Blaiberg, who had again shown improvement after sharp setbacks in June and July because of hepatitis and lung complications.

January—1968

NATIONAL

Curtail Foreign Investments—In an effort to bring the U. S. balance of international payments into line, President Johnson Jan. 1 placed restrictions upon American investments abroad, and introduced a program to curb American travel to Europe, cut down on government spending in foreign countries and stimulate U. S. export sales. The measures were designed to cut the payments deficit by \$3 billion in 1968. The 1967 payments deficit was between \$3½ and \$4 billion.

Eshkol-LBJ Confer—Israeli Premier Levi Eshkol renewed his country's request that the U. S. sell weapons to Israel when he met with President Johnson Jan. 7-8 at the President's ranch in Texas. In a joint statement Jan. 8 the President agreed to consider the request in light of Soviet military aid given to Arab countries since the Israeli-Arab war of June 1967.

Swedes Give GIs Asylum—Four American sailors who deserted in Japan in 1967 because of their objections to the Vietnam War were given asylum by Sweden Jan. 9 on "humanitarian grounds." Other American servicemen, reportedly deserters from Army camps in West Germany, were also reported seeking political asylum in Sweden.

U. S.—Cambodia—The U. S. and Cambodia agreed Jan. 12 on a policy to keep Cambodia from becoming embroiled in the Vietnam War. Viet Cong and North Vietnamese troops reportedly had been using Cambodia as a sanctuary for raids into Vietnam. In December reports circulated that a policy of "hot pursuit" by American and South Vietnamese forces was being

considered in which the Allied forces would pursue the enemy into Cambodia.

U. S. Aides Slain in Guatemala—Two U. S. embassy military attaches were slain and two others wounded Jan. 16 as part of a terror campaign by the Communist Rebel Armed Forces insurgents. In leaflets distributed in Guatemala City the same day, the Rebel Armed Forces said the shootings were in retaliation for the slaying Jan. 12 of Rogelia Cruz Martinez, Miss Guatemala of 1960, who was suspected of leftist sympathies.

State of The Union—In a televised State-of-the-Union message before a joint session of Congress Jan. 17, President Johnson once again called upon Congress to enact a 10% income tax surcharge to reduce an estimated \$20 billion budget deficit for 1968 to some \$8 billion in 1969. The President also stressed the need for funds to attack the problems of decaying cities, unemployment, poverty and pollution, while continuing to spend \$25 billion a year for the war in Vietnam. He outlined many specific areas where he hoped to see legislation, such as gun control, auto insurance and hazardous radiation. He reported that the fiscal budget for 1969 was \$186 billion.

H-Bomb Plane Crashes—A Strategic Air Command B-52 carrying 4 unarmed hydrogen bombs crashed and exploded Jan. 22 on frozen North Star Bay near Thule, Greenland, while on an alert flight. Radioactive material was spread over a wide area but there was no nuclear explosion. The wreckage burned through the ice and sank to the bottom of the bay. Six of the 7 crewmen survived after bailing out.

Cabinet Resignation—John Gardner, 55, resigned as Secy. of Health, Education

Pueblo and 83-Man Crew Seized

The U. S. Navy electronic intelligence ship Pueblo and its 83-man crew were seized in the Sea of Japan Jan. 23 by 4 North Korean patrol boats and taken prisoner to the port of Wonsan.

An early Defense Department report said 4 crewmen had been injured when the 906-ton vessel, loaded with sophisticated radar and electronic intercept equipment, was ordered to surrender or be fired upon by the North Korean boats and two circling MiG planes.

The North Koreans claimed that the Pueblo had violated the 12-mile limit of its territorial waters, but the U. S., initially, insisted it had been in international waters about 30 miles from shore.

In an atmosphere of mounting crisis the U. S. demanded at a meeting of the Mixed Armistice Commission in Panmunjon Jan. 24 the immediate release of the ship and its crew. This was to be the first of many inconclusive meetings.

The Administration initiated a number of diplomatic and military moves designed to bring pressure on the North Koreans.

Secy. of State Dean Rusk Jan. 24 said the seizure was "in a category of actions to be construed as an act of war."

President Johnson Jan. 25 ordered to active duty 14,787 Navy and Air Force reservists to bolster a build-up of American forces in Korea. In a show of force, the nuclear powered aircraft carrier Enterprise and task force were shifted to positions off the North Korean coast in the Sea of Japan.

At the request of the U. S. the UN Security Council convened Jan. 26 to consider the incident. On Jan. 24 the American ambassador to the Soviet Union

formally requested that the Russians try to persuade North Korea to release the ship and its crew.

Congressional reaction varied, from a demand that the Administration issue an ultimatum to North Korea to warnings against the U. S. taking any rash action.

The war scare crisis peaked Jan. 26 when President Johnson in a nationwide television report castigated North Korea for recent military incidents along the demilitarized zone between North and South Korea and called the Pueblo seizure a "wanton and aggressive act" which "cannot be accepted." But at the same time, he called upon the world community to dissuade North Korea from its aggressive course and return the ship and crew.

For a short time after this speech it was unclear what the Administration's course would be. But as the days passed it became apparent that diplomatic action, further meetings at Panmunjon and persuasion would be pursued.

The North Koreans used the incident to full propaganda advantage, presenting to the world a series of alleged confessions and apologies by the Pueblo's captain, Comdr. Lloyd M. Bucher and members of the crew; calls for admission of guilt by the U. S., and threats to try the crew members as criminals.

Secy. of Defense Robert McNamara said in a TV interview Feb. 4 that it was possible the Pueblo had entered North Korean territorial waters before its capture. McNamara said the intrusion could have occurred during a period of radio silence by the Pueblo Jan. 10-21, but there was no way of knowing for sure until the crew was questioned.

and Welfare **Jan. 25**, denying that his resignation was prompted by dissatisfaction with the Administration's Vietnam policy. President Johnson accepted the resignation, effective **Mar. 1**, "with regret." The White House said Gardner's departure "had nothing to do with Vietnam."

Clifford Defense Secretary—Clark M. Clifford, 61, was unanimously confirmed by the U. S. Senate to the office of Defense Secretary **Jan. 30**. President Johnson **Jan. 19** nominated Clifford to succeed Robert McNamara whose resignation from the post was announced **Nov. 29, 1967**. Clifford had been an adviser to both Presidents Truman and Kennedy.

INTERNATIONAL

Cuba Rations Gas—Cuban Premier Fidel Castro announced **Jan. 2** the imposition of gasoline and fuel oil rationing. Castro said the rationing was necessary because of Cuba's expanding economy and the inability of Russia to supply the growing demand for petroleum. The rationing came upon the 9th anniversary of the Castro regime.

Nigeria Truce Offer—The government of Nigeria offered **Jan. 5** to stop all military action against the break-away state of Biafra if the secessionists agreed to "discuss and negotiate" their differences with the Nigerian federal government. On **Jan. 16** the Biafran government accused Britain of planning to send 1,000 troops to aid the federal government. The British denied the charge the same day.

New Prime Minister—John Grey Gorton, 56, was sworn in **Jan. 10** as prime minister of Australia. Gorton, a member of the Senate, had been elected Liberal Party leader the previous day. The new prime minister succeeded John McEwen, who headed a caretaker government following the drowning of Harold Holt in December.

Papandreou Assails Junta—Andreas Papandreou, freed in a general Christmas amnesty by the ruling Greek military junta, flew to exile in Paris **Jan. 16**. Pap-

andreou, 48, the son of ex-Premier George Papandreou and a former naturalized U. S. citizen, declared in a statement **Jan. 18** that the Greek regime was "oppressive and dictatorial" and said the democratic countries of the world had a moral responsibility to help oust the junta by denying them the weapons from which their power stems.

British Spending Cuts—In a series of moves designed to "make devaluation work," British Prime Minister Harold Wilson announced **Jan. 16** the complete withdrawal of British troops from the Far East and Persian Gulf by 1971; cancellation of 50 F-111 jets ordered from the U. S.; a prescription charge of 30 cents in the National Health Service care program; postponement until 1973 of plans to make school attendance mandatory until age 16 instead of the present age 15, and increased welfare payments to those "most in need" only.

Atom Inspection Pact—A revised draft of a treaty designed to halt the spread of nuclear weapons was submitted to the 18-member UN Disarmament Committee **Jan. 18** by the U. S. and USSR. The new draft of the treaty included an article providing for international inspection and control systems. The first version of the treaty, submitted in August 1967 by the two countries left the question of inspection and control unsettled.

Novotny Ousted—Antonin Novotny was ousted from his post as first secretary of the Czechoslovak Communist Party and replaced by 46-year-old Alexander Dubcek **Jan. 25**. Novotny reportedly lost a power struggle to Dubcek within the 10-member party presidium. The election of Dubcek, a Slovak, was viewed as a victory by the moderates over the Stalinist conservatives. Novotny retained his job as Czech president.

Kosygin Visits India—A state visit was paid to India by Soviet Premier Aleksei N. Kosygin **Jan. 25-31**. Kosygin's trip co-

Viet Cong Hits Cities in Tet Offensive

Viet Cong and North Vietnamese forces believed to number 50,000 struck at 30 provincial capitals in South Vietnam **Jan. 30** on what was supposed to be the first day of a mutually agreed upon Tet or lunar New Year truce.

The ferocious Communist attacks caught Allied forces off guard, and Saigon and Hue became major battlefields with the Communists occupying buildings of the U. S. embassy in Saigon for 6 hours before being wiped out. In Hue, block by block fighting continued until **Feb. 24** when the last North Vietnamese troops holed up in the Imperial Palace were finally destroyed. Other cities also fell into Communist hands for a short time.

The attacks against the cities were launched, North Vietnam said **Jan. 30**, "to punish the American aggressors" for unilaterally canceling the Tet cease-fire agreement **Jan. 29** in South Vietnam's 5 northern provinces.

A clandestine Viet Cong broadcast **Jan. 30** urged the South Vietnamese to overthrow their government, saying "... the revolution we waited and yearned for has broken out ..."

Feb. 2 President Johnson called the enemy offensive "a complete failure" both militarily and psychologically and predicted a new Communist offensive just below the demilitarized zone, particularly at the U. S. Marine base at Khe Sanh, where 5,000 GIs were virtually surrounded by an estimated 20,000 to 40,000 Com-

munist.

U. S. commanders reported **Feb. 8** record American casualties for any single week of the war to date with 416 killed and 2,757 wounded from **Jan. 28** to **Feb. 3**. South Vietnamese casualties for the same period were 784 killed and 2,230 wounded with the Communists losing 15,515 men.

Gen. William C. Westmoreland, commander of American forces in South Vietnam, said **Feb. 25** that the enemy had "suffered a military defeat," but had won "some temporary psychological advantage."

The Tet offensive did fail to make any lasting military head-way or to create a popular uprising against the government. But it did create 350,000 new refugees and put a halt, temporarily, to the pacification program.

In addition, the surprising enemy military capability, in areas often said by American military leaders to be secure from such attacks, had a strong psychological impact on much of the American public, which had been led to believe the U. S. had turned the corner in its fight for South Vietnam.

The Administration's conduct of the war came in for much criticism and President Johnson at a press conference **Feb. 16** stressed his continued confidence in Gen. Westmoreland. But **Mar. 22** President Johnson named Westmoreland Army Chief of Staff, an assignment that would bring him home by July.

incided with the 18th anniversary of India's independence. A joint statement by the Soviet Premier and Indian Prime Minister Indira Gandhi was issued Jan. 31 urging an "unconditional stoppage" of the bombing of North Vietnam. A halt in the bombing would "create conditions for negotiations aimed at a political settlement," the statement said.

GENERAL

Dr. Spock Indicted—Dr. Benjamin Spock, 64, well-known pediatrician and child-care author, was indicted along with four other outspoken critics of the Vietnam war by a Federal grand jury in Boston Jan. 5. The four were accused of conspiring to abet, aid and counsel violations of the Selective Service Act. The four indicted with Dr. Spock were the Rev. William Sloane Coffin Jr., 43, chaplain of Yale University; novelist Mitchell Goodman, 44; Marcus Raskin, 33, of the Institute for Policy Studies; and Michael Ferber, 23, a graduate student at Harvard. After the indictment, Dr. Spock told a press conference that resisting the draft was "a very patriotic endeavor requiring enormous amounts of courage—the most effective way of opposing the war."

Singer Assails Vietnam War—Singer Eartha Kitt at a White House luncheon and meeting of 50 white and Negro women Jan. 18 angrily denounced the war in Vietnam and blamed it for the rioting and juvenile delinquency throughout the country. The luncheon given by Mrs. Lyndon B. Johnson, was for the purpose of discussing the Administration's proposals for combating crime on the streets. Miss Kitt told Mrs. Johnson: "You send the best of this country off to be shot and maimed. They rebel in the streets . . . They don't want to go to school because they're going to be snatched off from their mothers to be shot in Vietnam." Mrs. Johnson, in a trembling voice and with tears in her eyes replied: "Because there is a war on—and I pray that there will be a just and honest peace—that still doesn't give us a free ticket not to try to work for better things such as against crime in the streets, better education and better health for our people."

February—1968

NATIONAL

LBJ's Economic Report—President Johnson submitted to Congress Feb. 1 his Economic Report on the state of the country's economy. The President warned of the dangers of inflation, stressing the need for his proposed 10% tax surcharge and a tighter rein on wages and prices. The President told Congress we must " . . . put our financial affairs in order . . . slow down the wage-price spiral . . . restore equilibrium in our international accounts . . . deal more effectively with our urban problems . . . expand the opportunities available to every citizen—especially our disadvantaged."

LBJ On Education—President Johnson in a special message to Congress Feb. 5 urged passage of a \$3½ billion education program for 1969 to be administered by the Office of Education. The President called his message "The 5th Freedom," which he said was the "freedom from ignorance." Specific bills proposed were an Educational Opportunity Act of 1968 dealing with student loans, scholarship programs and Federal fellowships and a Network for Knowledge Act to spur the pooling of information by colleges through computer networks.

LBJ On Crime—In a message to Congress Feb. 7 President Johnson outlined a series of proposals to deal with crime in the United States and said that \$557,000,000 in Federal expenditures would be needed in this area in fiscal 1969. The President's proposals ranged from passage of the Safe Streets & Crime Control Act proposed Feb. 6, 1967, to effective gun control laws and a Right to Privacy Act. The President made it clear that states and cities had the major responsibility for the control and prevention of crime.

State Visit by Wilson—On an official state visit to the U. S. Feb. 8-9, British Prime Minister Harold Wilson conferred with President Johnson. The two discussed the balance-of-payments deficit, Britain's withdrawal of all its forces from the Far East by 1971, and Wilson's visit to the Soviet Union Jan. 22-24. In Moscow, Wilson had talked with the leaders of the Soviet Union, and in a joint statement Jan. 24 both countries backed a "political settlement" to the Vietnam war.

Vietnam War—UN Secy. Gen. U Thant, following his tour of Asian and European capitals Feb. 7-14, said Feb. 24 that if the U. S. bombing of the North was stopped "meaningful talks . . . will take place much earlier than generally supposed . . ." But in South Vietnam Allied forces continued mopping up operations in Hue, and the Communists sustained military pressure by shelling military posts and cities throughout South Vietnam in a co-ordinated attack Feb. 18. The Communists also continued to tighten the siege of the Marine outpost of Khe Sanh.

Pueblo Meetings—Meetings between U. S. and North Korean officials at Panmunjom to discuss the Pueblo incident were held Feb. 14, 15, 19, 20, and 26. The question of

the release of the Pueblo and its crew was not resolved and other violations and aspects of the Korean armistice were discussed by the negotiators. The U. S. State Department warned North Korea **Feb. 18** not to punish the Pueblo crew as it had threatened to do.

Vance Reports to LBJ—Special envoy Cyrus Vance reported to President Johnson in Washington **Feb. 15** upon his return from South Korea after concluding his special mission there. Before Vance left Seoul **Feb. 15** a joint statement was issued by him and the South Korean government noting the increasing North Korean belligerency. The statement indicated at least a temporary rejection by the U. S. of South Korean demands for major U. S. strikes against any new North Korean aggression.

Payments Deficit—The U. S. balance-of-payments deficit totalled \$1.832 billion in the final 3 months of 1967, the Commerce Department reported **Feb. 15**. The total deficit for 1967 was \$3.572 billion. The last quarter deficit was described by Treasury Secy. Fowler as "the worst . . . since the 3rd quarter of 1950 following the outbreak of the Korean war."

LBJ On War Talks—President Johnson in a press conference **Feb. 16** said he did not think the North Vietnamese were any more ready to negotiate today than they had been over the last 2 years. Recent peace probes by the U. S., the President said, had gone "as far as honorable men could go." The following day, **Feb. 17**, the President visited Pope Air Force Base in N. C., and El Toro (Calif.) Marine Corps Naval Station where he talked with combat troops on their way to Vietnam.

New Commerce Secretary—The Senate confirmed the nomination of Cyrus Rowlett Smith, 68, as Secretary of Commerce **Feb. 29**. Smith, chairman of the board of American Airlines, was designated for the office by the President **Feb. 16**. He succeeded Alexander B. Trowbridge, 37, who resigned for reasons of health. The new secretary took office **Mar. 1**.

Tonkin Attack Hearings—Administration officials and members of the Senate Foreign Relations committee engaged in a hassle **Feb. 20-26** over the facts concerning the attacks on 2 U. S. destroyers by the North Vietnamese in August, 1964,

which led to the passage by Congress of the Gulf of Tonkin resolution. In its hearings into the matter, the Committee heard closed-door testimony by Secy. of Defense Robert McNamara **Feb. 20**. McNamara issued a public statement after his appearance declaring that intelligence reports of a "highly classified and unimpeachable nature" had established that the 2nd Tonkin attack of Aug. 4 had taken place. Sen. J. W. Fulbright (D.-Ark.) **Feb. 21** accused McNamara of "giving only one side of the story."

LBJ Dallas Speech—In a speech in Dallas, Tex., **Feb. 27**, President Johnson declared that the enemy's Tet offensive in Vietnam had failed and told his audience: "There must be no weakening of will that would encourage the enemy and prolong the bloody conflict." The President said U. S. and South Vietnamese forces had "answered aggression's onslaught with one strong voice," declaring, "No retreat." "That must be our answer, too, here at home. No retreat from responsibility of the hour and the day."

McNamara's Medal—The Medal of Freedom was presented to departing Secy. of Defense Robert McNamara by President Johnson in a White House ceremony **Feb. 28**. The President praised the outgoing secretary, named to head the World Bank. McNamara's successor, Clark M. Gifford, was sworn into office at the White House **Mar. 1**.

INTERNATIONAL

Pro-Soviet Cubans Tried—Thirty-five persons were convicted of anti-revolutionary activity in Havana **Feb. 3** and sentenced to terms in jail ranging up to 15 years. The chief defendant was Anibal Escalante, 58, former Cuban Communist Party secretary, who got 15 years for allegedly giving "false information" to Russian, Czechoslovak and East German officials and promulgating "propaganda" unfavorable to Fidel Castro.

Canadian Constitution—The long process of revising the Canadian constitution was begun **Feb. 5-7** when a Federal Provincial Constitutional Conference was held in Ottawa. The conference was attended by Prime Minister Lester Pearson and the 10 provincial premiers. The conference agreed that French and English should both be official Canadian languages, and

Report To The President On Civil Disorders

After 7 months of study the President's National Advisory Commission on Civil Disorders released **Feb. 29** a summary of its 1,400-page report on the summer riots of 1967.

The commission's major findings were:

- The U. S. "is moving toward 2 societies, one black, one white—separate and unequal," but it is still possible to head off this division.

- White racism is the chief cause of the Negro violence and riots.

- To reverse the situation calls for unprecedented levels of "funding and performance" but "there can be no higher priority for national action and no higher claim on the nation's conscience."

The 11-member commission, headed by Gov. Otto Kerner of Illinois, was appointed by President Johnson July 27, 1967, to investigate the nature of the riots, discover their causes and determine how future riots could be avoided.

The commission found that the riots were not organized or part of any conspiracy but happened because of an accumulation of social ills such as unem-

ployment, inadequate housing, discriminatory police practices and various complex social processes.

As to the cause of the riots, the underlying factor was found to be "... the racial attitude and behavior of white Americans toward black Americans."

The commission made more than 150 specific recommendations for removing the causes of racial unrest. Some of the recommendations:

- Creation of 2,000,000 new jobs in the next 3 years.

- Decentralization of city governments to make them more responsive to the needs of their people.

- A national system of income supplements based on need.

- New low and moderate income housing.

The commission report received the backing of most of the civil rights leaders in the country.

But there was much adverse reaction, especially to the central findings of the commission that white racism was the root cause of the riots.

it set up a series of committees to draw up a new constitution.

Israeli-Jordan Fighting—The Jordan River was the scene of clashes between Israeli and Jordanian forces during the 3 weeks ending Feb. 16, with Israeli planes hitting military targets up to 10 miles inside Jordan. Feb. 1 UN Secy. General U Thant said a clash between Israeli and Egyptian forces could permanently stop the clearing of the Suez Canal. An exchange of gunfire across the canal Jan. 30 led to the cancellation of an agreement to clear the southern part of the canal.

Pearson Confidence Vote—Canadian Prime Minister Lester B. Pierson hurried back to Ottawa from a Jamaican vacation Feb. 20 following the defeat in the House of Commons Feb. 19 of a major Liberal tax measure. By Feb. 28 Pearson had whipped up sufficient support to have the House give his Liberal government a 138-119 vote of confidence.

GENERAL

Nixon Enters Race—Former Vice President Richard Nixon Feb. 1 formally declared himself a candidate for the Republican nomination for President. Nixon's candidacy was announced in an open letter to New Hampshire voters as an opening shot in his primary election campaign in that state.

Wallace 3rd Party Candidate—George C. Wallace, former Democratic Governor of Alabama, announced in Washington Feb. 8 his candidacy for the Presidency on a 3rd party ticket. If elected, Wallace said, he would keep peace in the streets if it took "30,000 troops . . . with 2-foot-long bayonets." He also said he would change the "so-called civil rights laws" which are in reality "an attack on property rights . . . free enterprise . . . and local government."

Report On Newark Riot—A 478-page report on the July, 1967, Newark riot was issued by the Governor's Select Commission on Civil Disorder in New Jersey Feb. 10. The report found "excessive and unjustified force" by the National Guard and police and asked for a grand jury probe of charges of corruption in Newark's government. The report contained 100 specific recommendations for change covering the areas of city government, housing, police, municipal courts, welfare, employment, riot procedures and anti-poverty programs.

ADA Backs McCarthy—By a vote of 65-47, the national board of Americans for Democratic Action Feb. 10 endorsed the Presidential candidacy of Sen. Eugene McCarthy (D-Minn.). Within 3 days after the vote several prominent labor leaders and Administration backers resigned from the ADA board. It was the first time in 20 years that the organization did not support an incumbent Democratic president.

Draft Deferments Curtailed—Draft deferments for most graduate students and all occupational deferments were eliminated Feb. 16 by the National Security Council. Deferments would be granted only to graduate students in critical areas in medicine, optometry, dentistry, veterinary medicine, and those students who will have completed 2 or more years of graduate work by June, 1968, the Council said.

Romney Quits Race—In a surprise announcement in Washington Feb. 28, Michigan's Gov. George Romney pulled out of the Republican race for the Presidential nomination. The move came just 12 days before the New Hampshire primary and

Romney said he was withdrawing because he had failed to get the broad-based Republican support he had hoped to achieve. There was speculation that private polls had indicated he would do poorly in New Hampshire. The fact that New York's Gov. Rockefeller, one of his main supporters, had said Feb. 24 that he was himself available for a draft was also thought to be a factor in the decision.

DISASTERS

Boston hotel fire Feb. 4 killed 9, injured 15 . . . British fishing trawler with 19 aboard reported lost off Iceland Feb. 5 . . . 6 killed in head-on crash between pickup truck and tractor trailer near Findlay, Ohio, Feb. 6 . . . Gas tank truck exploded in Mexico City Feb. 26, 8 killed, 70 injured.

March—1968

NATIONAL

Pueblo Letter—An open letter, allegedly from the crew of the Pueblo, was received by President Johnson Mar. 4. The letter told the President the U. S. must admit the Pueblo had violated North Korean waters, apologize for the act and give promises it would not happen again, before the Pueblo crew would be released.

Westmoreland to New Post—Gen. William C. Westmoreland was named by President Johnson Mar. 22 to the post of Army chief of staff. Following confirmation by the Senate, Westmoreland was scheduled to give up his command in Vietnam and take up his new duties in Washington July 2.

Shriver Ambassador to France—R. Sargent Shriver was named ambassador to France by President Johnson Mar. 22. The former head of the Peace Corps and Office of Economic Opportunity succeeded Charles E. Bohlen, who was appointed Deputy State Undersecretary for political affairs in December, 1967.

New HEW Secretary—Wilbur Joseph Cohen, 55, was named by President Johnson Mar. 22 to head the department of Health, Education and Welfare. Cohen succeeded John Gardner, who resigned Mar. 1.

NORAD Extended—The U. S. and Canada agreed Mar. 30 to extend the 10-year North American Air Defense Command (NORAD) treaty another 5 years. The pact, designed for the defense of North America from long-range bombing attack, would not commit Canada to partake in continental defense against missiles, Canadian External Affairs Min. Paul Martin had told a Parliamentary committee Mar. 7.

INTERNATIONAL

Britain Curbs Immigration—A bill drastically restricting the immigration of Asian British citizens to Great Britain became

law Mar. 1 when the House of Lords rejected by a vote of 109-85 a motion to kill the law. The controversial legislation was approved by the House of Commons Feb. 27 by a vote of 372-62. The bill was passed to curb the possible immigration by some 200,000 Asians from Kenya, where non-citizens were being deprived of jobs.

Belgium Government Ousted—The Belgium parliament was dissolved by King Baudouin Mar. 1 in anticipation of new elections after several attempts to form a new government had failed. The administration of Premier Paul Vanden Boeynant resigned Feb. 7 after failing to solve a language problem between the Flemish-speaking and French-speaking students at the Roman Catholic University of Louvain. The Flemish students had demanded the ouster of all French-speaking students.

Nasser Drops War Charge—President Nasser of the United Arab Republic admitted in an interview published Mar. 4 that U. S. planes had not aided Israel in the June 1967 war. In an interview printed in Look magazine, Nasser said that the approach of Israeli planes from the Mediterranean had been misinterpreted, since American aircraft carriers were known to be in the same general area.

Rhodesian Hangings—The Rhodesian government defied Great Britain and hanged 3 black Africans Mar. 6 and two others Mar. 11. Queen Elizabeth had commuted the sentences of the 5 convicted murderers Mar. 2, but Rhodesia's High Court ignored the decree and ordered the executions.

Warsaw Student Riots—Apparently inspired by the liberalizing trend in Czechoslovakia, students at Poland's University of Warsaw Mar. 8-9 clashed with police, shouting: "Down with censorship" and "Long live Czechoslovakia." The student clashes were followed Mar. 11 by protests by office and factory workers who fought police and militia men in downtown Warsaw. The Communist party blamed the riots on Zionists. Polish Communist anti-Semitism had reportedly been on the rise since the Israeli-Arab war of 1967.

Panama Crisis—The National Assembly of Panama Mar. 14 voted to impeach President Marco Robles for interfering in the political campaign for a scheduled May 12 election. The Assembly accused Robles

of dismissing public employees and misusing state funds in behalf of National Liberation Party candidate David Samudio and against opposition leader Dr. Arnulfo Arias. Robles said Mar. 15 he would not recognize the Assembly's action and would wait for a Supreme Court ruling on the move. He ordered the country's only military force, the National Guard, to ignore the Assembly vote. The still defiant Assembly Mar. 24 voted to oust Robles and named Max Delvalle, 57, to succeed him. Robles again refused to recognize the Assembly's action and was backed by the 4,800-man Guard unit. Mar. 24-29 saw numerous clashes between the Guard and populace as the political stalemate continued.

Israeli-Arab Clashes—An Israeli force of 15,000 men crossed into Jordan Mar. 21 and wiped out guerrilla bases used to stage raids into Israel. The action was unanimously condemned by the UN Security Council Mar. 24. A second incident occurred Mar. 29 when Israeli and Jordanian forces fought an 8-hour artillery duel along the Jordan River in which Israel used airplanes. The UN Security Council met Mar. 30-Apr. 4 but was unable to decide upon a course of action.

Novotny Quits—The democratization of Czechoslovakia increased in tempo Mar. 22 when President Antonin Novotny resigned his post. The resignation was forced Mar. 21 by the National Assembly committee, which unanimously recommended that he resign. His ouster was viewed by many as the end of Stalinism in Czechoslovakia.

GENERAL

ACLU Reverses Position—By a vote of 26-20 the national board of the American Civil Liberties Union decided Mar. 2 to defend persons accused of counseling evasion of the draft. The action reversed a previous stand on the subject taken by the board in January.

Bishop Cooke Appointed—The Most Rev. Terence J. Cooke was named auxiliary bishop and vicar general of the New York archdiocese of the Roman Catholic Church by Pope Paul VI, Mar. 8. The 47-year-old successor to the late Cardinal Spellman became auxiliary bishop in 1965 and was appointed episcopal vicar for Manhattan and the Bronx in 1966. Bishop Cooke was selected by the Pontiff

Gold Crisis: Two-Price System Emerges

International gold buying fever on a gigantic scale hit the markets of the world Mar. 1, fed by the fear and belief that the U. S. would be unable to continue to maintain the \$35-an-ounce price of gold.

In just 10 trading days, an estimated 900 tons of gold was sold in the London market, which normally handles 3 to 5 tons daily. By Mar. 15 speculation had pushed the price of gold in the Paris market to an all-time high of \$44.36 an ounce.

At a 2-day meeting in Basel, Switzerland, Mar. 9-10 the U. S. and its 6 European partners in the London Gold Pool stressed their determination to continue to sell gold to all comers at \$35 an ounce. But the declaration failed to stem the speculative tide and when 225 tons of gold were sold in London Mar. 14, Britain closed the London market until Apr. 11 at the request of the U. S. All other European gold markets, with the exception of Paris, also closed down. France had withdrawn from the London Gold Pool in 1967.

The London Gold Pool members met in Washington Mar. 17 to face the crisis of

their rapidly dwindling gold reserves and agreed that all gold transactions between governments would continue to be made at \$35 an ounce, but that they would no longer sell gold to private investors.

The reasons for the crisis, called by many economists the worst threat to the world's economy since the 1930s depression, seemed obvious to many.

The U. S. balance of payments for 1967 chalked up a \$3.572 billion deficit and Congress continued to delay action on President Johnson's proposed tax increases.

Further, speculators had taken off after the U. S. dollar following the devaluation of the British pound Nov. 18, 1967, and even some governments, possibly France, which openly wanted a return to the gold standard, were believed to be behind a large part of the buying.

The new two-price system, many economists believed, was only a temporary answer to the crisis and would have to be followed by U. S. monetary reform and other changes in the international monetary system if a show-down international financial crisis was to be averted.

over many senior prelates, and it was believed he had been singled out by Cardinal Spellman as a possible successor before he died.

Convict Air Force Captain—Air Force Capt. Dale E. Noyd was convicted **Mar. 8** in Clovis, N. M., of disobeying an order to train pilots for Vietnam duty. Noyd, 34, a 12-year veteran, said he conscientiously opposed the war in Vietnam but was not a pacifist. He had attempted to resign his commission but the Air Force refused to accept the resignation. **Mar. 9** he was sentenced to a year at hard labor and dismissed from the Air Force.

DISASTERS

Seven children killed in farmhouse fire **Mar. 1** near Lake City, Mich. . . . Air France Boeing 707 jetliner crashed into mountain **Mar. 5** at Pointe-A-Pitre, Guadeloupe, killing 63 aboard . . . Omaha, Neb., hotel fire **Mar. 26** killed 5 . . . 60 reported drowned **Mar. 28** when boat capsized near Chapra, India . . . Two-car crash killed 8 **Mar. 29** near Unionville, Mich.

April—1968

NATIONAL

Khesanh Siege Lifted—Operation Pegasus, launched **Apr. 1** with a force of 30,000 Americans and South Vietnamese to relieve the U. S. Marine base at Khesanh, succeeded in lifting the siege by **Apr. 5**, 76 harrowing days after what had loomed as another Dienbienphu. Much of the 20,000-man North Vietnamese force which had surrounded the 6,000-man garrison since January was believed to have withdrawn to Laos before the Allied drive had started. A relief column from Calu, 15 miles to the east, met little enemy resistance as it moved along the only overland supply road to the base. Maj. Gen. John J. Tolson, commander of the 1st Cavalry Div. (Airmobile), which supplied most of the troops, headed the operation. Until the main relief column arrived **Apr. 8**, armed helicopters attacked North Vietnamese in forward positions as allied forces advanced and nearly 1,000 U. S. relief troops were flown to the base **Apr. 6**.

Heavy Fighting in Vietnam—Operation Complete Victory, a 5-nation allied force of 100,000 men, **Apr. 8** launched the biggest drive of the war to clean up Communist forces in the 11 provinces around Saigon,

Campaign '68: A Year of Political Surprises

"I shall not seek, and I will not accept, the nomination of my party for another term as your President."

With these 20 words, President Lyndon B. Johnson **Mar. 31** climaxed a series of startling domestic, political developments which already had turned the Presidential campaign year of 1968 into one of the most unusual on record.

The President dropped his political bombshell toward the end of a 40-minute, nationally televised speech dealing with Vietnam in which he also announced the unilateral halting of the bombing of 90% of the territory of North Vietnam. He asked Hanoi to make some movement toward the peace conference table.

After his speech, it was reported that the President had been thinking of not seeking re-election for some time and that he almost had made the withdrawal announcement in his State-of-the-Union message.

But many political observers saw the surprising showing of Minnesota's Sen. Eugene J. McCarthy in the New Hampshire primary election **Mar. 12** and the subsequent entry of Sen. Robert F. Kennedy into the race for the Democratic presidential nomination as possible contributing factors in the President's decision.

Sen. McCarthy, an avowed foe of the Administration's Vietnam policy, polled a surprising 42% of the Democratic vote in New Hampshire against a 48% organized write-in for President Johnson. On the

Republican side, Richard Nixon got 79% of the vote, and Gov. Nelson Rockefeller 11% on a write-in.

The possible political implications of McCarthy's strength apparently were not lost upon Sen. Robert Kennedy, who **Mar. 16** officially announced his candidacy for the Democratic nomination. Many recalled that just a few months earlier Kennedy had been saying he would support President Johnson for re-election and that he couldn't see himself as a candidate under any circumstances.

The President's withdrawal from the race brought one other candidate into the field, Vice President Hubert Humphrey, who officially announced his candidacy **Apr. 27**.

The developments on the Republican side of the campaign were almost as unusual as the turnabout in the Democratic race.

Michigan's Gov. George Romney in a surprise move **Feb. 28** pulled out of the race, leaving the former Vice President Nixon the only avowed Republican seeking the nomination.

New York's Gov. Rockefeller pulled his own surprise **Mar. 21** by declaring he was not an active candidate at a press conference many believed had been called to announce his active candidacy. But President Johnson's decision apparently also had its influence here, and Gov. Rockefeller held another press conference **Apr. 30** and this time did the expected, entering the race.

but failed to make contact with an estimated force of 18,000-20,000 believed to be there. A ground sweep **Apr. 1** to clear the coastal plain from Hue to Quangtri of North Vietnamese believed to be infiltrating the Ashau Valley was backed by heavy B-52 raids **Apr. 8-13** near the Cambodian border. As of **Apr. 13**, the U. S. Command reported 503 of the enemy and 57 Americans killed in the ground action. **Apr. 10**, a U. S. report said the enemy's Tet offensive had cost \$173,633,000 in damage, with 115,276 homes damaged or razed. Operation Delaware in the Ashau Valley, described as one of the enemy's "top logistical support bases," by Gen. Tolson, started **Apr. 19**. Ten U. S. helicopters were reported shot down by enemy antiaircraft, while 20 Americans and 50 North Vietnamese were reported killed the first day. U. S. planes carried out 155 raids over North Vietnam **Apr. 23** and 111 **Apr. 24**.

Reserve Call-Up—A major call-up of reservists to active duty in Vietnam by 3 of the armed forces was announced by Defense Secy. Clark M. Clifford **Apr. 11**. It was to affect 24,000 Army, Air Force and Navy Reservists, of whom about 10,000 would go to the war zone in coming weeks to back up the 11,000 combat troops sent in February after the enemy's Tet offensive. The only previous call during the

war occurred in the wake of the Pueblo incident, when 14,787 Air and Naval Reservists were ordered to active duty (Jan. 5). But these men had not gone overseas by mid-April. A new troop ceiling of 549,000 for U. S. strength in Vietnam was also announced by Clifford.

Johnson Signs Rights Bill—President Johnson **Apr. 11** signed the civil rights bill, banning racial discrimination in the sale or rental of 80% of the nation's housing, a day after the House passed it 250-171, spurred by the assassination of the Rev. Dr. Martin Luther King, Jr. and the widespread riots that followed. The House action was termed "a victory for every American" by the President, having come after "a long, tortuous and difficult road." The measure also made it a Federal crime to harm civil rights workers, to cross a state line to incite a riot or to instruct persons in the use of firearms or Molotov cocktails in riots. It further guaranteed broad rights to American Indians in their dealings with authorities from tribal to state or Federal levels.

North Korean Raids—North Korean soldiers ambushed a U. S. Army truck 1,000 yards below the demilitarized zone **Apr. 14**, killing 2 American and 2 South Korean soldiers and wounding 2 from the U. S. **Apr. 18** the Seoul government report-

Assassin's Bullet Kills Martin Luther King

A sniper's bullet killed the Rev. Dr. Martin Luther King, Jr., 39, Nobel prize winner and leader of the nonviolence civil rights movement, in Memphis, Tenn., **Apr. 4**.

Fear and violence mounted as the shock of the assassination spread across the nation and set off a wave of Negro rioting and looting in U. S. cities.

By **Apr. 14**, at least 46 persons were killed, more than 2,600 were injured and more than 21,270 arrested. In less than 24 hours after King's murder, as rioting spread in Washington, D. C., President Johnson ordered Federal troops to protect the nation's capital. Across the nation, National Guard troops were alerted and the U. S. Army took "precautionary measures." Of the 55,000 troops involved, 21,000 were Federal and 34,000 were National Guardsmen.

Apr. 4-11 saw racial violence in 125 cities in 29 states and the District of Columbia. Baltimore, Chicago, Kansas City, Mo., and Washington, D. C., were hardest hit. More than 2,600 fires were set. Property damage in assured losses alone was more than \$45,000,000.

President Johnson, expressing the nation's grief in a TV address lauding the slain Negro leader, urged "every citizen to reject the blind violence that has struck Dr. King, who lived by nonviolence."

Dr. King, who had returned to Memphis to prepare a 2d march in support of a strike by city garbage collectors, most of whom are Negroes, was shot on the balcony of his motel room. The assassin presumably had fired from a nearby rooming house.

Atty. Gen. Ramsey Clark flew to Memphis **Apr. 5**, where he said the FBI was hunting the assassin, a white man who was reported to have been seen fleeing the area in a late-model car, in several states. Plans for the Memphis march King was to lead were completed by the Rev. Ralph David Abernathy, 42, named to succeed King as president of the Southern Christian Leadership Conference

(SCLC) **Apr. 5**. Mrs. Coretta Scott King, the slain leader's widow, took her husband's place at the head of some 42,000 silent marchers, including thousands of whites, on **Apr. 8**.

On **Apr. 6**, when King's body was put on view at Atlanta's Ebenezer Baptist Church, of which he had been pastor, Mrs. King called for "a creative rather than a destructive way" of solving the racial crisis to fulfill her husband's dream.

The President canceled a Hawaii conference on Vietnam **Apr. 5** and conferred with Negro leaders. He proclaimed Sunday, **Apr. 7**, a day of mourning.

After funeral services at the church **Apr. 9** and memorial services at Morehouse College, dozens of national leaders joined 50,000-100,000 marchers who followed King's coffin on a farm wagon pulled by 2 Georgia mules on its 3½-mile course to South View Cemetery. The American flag was flown at halfstaff at all Federal facilities in the U. S. and abroad until the interment.

The entire nation paused in tribute as television cameras brought the proceedings into homes; memorial services, marches and rallies were held; schools and public facilities as well as businesses and stock exchanges were closed; dockmen and seamen in seaports stopped work; sports events and Hollywood's Oscar awards were postponed, and the Presidential campaign halted. Memorial services also were held abroad.

Shortly after Dr. King's murder, an intensive manhunt was started for Eric Starvo Galt, later revealed to be James Earl Ray, 40, who had escaped from the Missouri State Penitentiary a year earlier after serving 7 years of a 20-yr. term for armed robbery and theft. Ray was arrested at a London airport June 8 under the name of Raymond George Sneyd, an alias he used to get a Canadian passport. He reportedly flew from Toronto to London May 6, on to Lisbon, Portugal, and then back to London. Charged with the slaying of Dr. King, he was extradited and taken to Memphis to await trial.

ed 3 South Korean soldiers missing and presumed dead following an attack **Apr. 17** on an 11-man patrol south of the DMZ by 20 North Koreans. More clashes broke out inside the zone **Apr. 20** and **21**, with one American killed and 3 wounded on the latter day, when a U. S. 2d Infantry Div. patrol was attacked by North Korean troops. A UN Command spokesman said at least 3 North Koreans were killed.

Ball Succeeds Goldberg—President Johnson named George W. Ball to succeed Arthur Goldberg as chief representative to the United Nations **Apr. 25**, when he announced Goldberg's resignation. A coolness marked the exchanges between Johnson and Goldberg at the event. According to reports, Goldberg wanted to play a bigger role in Vietnam policy. Later, Goldberg said he could work better for peace in private life. Ball, 58, was former Undersecretary of State.

INTERNATIONAL

Francophone Military Units—Canada announced a program to boost the use of French in its armed forces **Apr. 2**. At the present time about 16,000 of the 103,000 men speak French. Under the program both French- and English-speaking bases would be set up throughout the country. Ultimate goal is to have at least 20% of each unit made up of men whose parent tongue is the other official language. The only all-French speaking unit now is the Royal 22nd Regiment.

Central African Union—In a move to join economic and defense forces, 3 African states—Congo (Kinshasa), Chad and the Central African Republic—formed the United States of Central Africa **Apr. 2**.

The new, loosely-knit federation, covering 1,637,757 square miles and a population of 21,400,000, changed its name to the Union of Central African States. **Apr. 3**.

SEATO Parley—The 13th annual Ministerial Council meeting of the Southeast Asia Treaty Organization (SEATO) **Apr. 2** and **3** in Wellington, New Zealand, closed with a communique indorsing the limitation of bombing in North Vietnam but warning that Communist aggression in Southeast Asia must be halted.

UN Council Urges Observers—The UN Security Council **Apr. 4** urged the stationing of UN observers on the Israeli-Jordanian cease-fire line to prevent further violence. Jordan opposed UN patrols on its territory on the grounds that it could permanently solidify Israel's hold on Jordan's west bank. The Israeli army reported **Apr. 8** that a few dozen Israeli soldiers in helicopters had crossed 18 miles into Jordan to pursue and kill "about half a dozen" Arab infiltrators. The Israelis also destroyed a house used as a base by the terrorists, described as members of the Egyptian 141st Commando Battalion. A Jordan note to the Council **Apr. 8** accused Israel of "new acts of aggression," while an Israeli note, admitting the incursion, explained it was "in pursuit of saboteurs." Thirteen Arab infiltrators were killed by an Israeli patrol on the occupied west bank **Apr. 28**. Defense Min. Moshe Dayan warned **Apr. 26** that the Jordan Valley would become a battlefield if Jordan did not curb the saboteurs.

Changes in Czechoslovakia—Gen. Ludvik Svoboda, 72, newly elected president of Czechoslovakia, named Oldrich Cernik premier **Apr. 6**. Among Cernik's new cab-

Students Rebel at Columbia U.

A left-wing led student protest at Columbia University **Apr. 23** grew into a major upheaval marked by bloody clashes with police and virtually paralyzed one of the nation's top educational institutions for two weeks.

Some 150 students met at noon **Apr. 23** to protest the proposed construction of a gymnasium in neighboring Morningside Park, which was opposed by Negroes in nearby Harlem, as well as the school's ties with the Institute of Defense Analyses (IDA). Mark Rudd, president of the campus chapter of Students for a Democratic Society (SDS), led the group which included members of the Students' Afro-American Society and some residents of Harlem.

Afterwards, they invaded Hamilton Hall, headquarters of Columbia College, and held 3 officials hostage for 24 hours. The Negro protesters ordered the others out early **Apr. 24**. The white rebels then marched to Low Library, where they took over and ransacked the office of Dr. Grayson Kirk, president of the university. By now the strike had gone beyond its original aims and "Student Power" had become the battle cry. Asserting their right to partake in the "restructuring of the university," the young rebels demanded complete amnesty, which Dr. Kirk refused **Apr. 25**.

The protesters' number had grown to about 700 when they took over a 5th building **Apr. 26**. Classes were canceled the same day and the campus was sealed off after 250 Negro high school students invaded the area shouting "Black Power."

The administration announced suspension of work on the gym **Apr. 26**.

More than 300 anti-protesters, bolstered by several university athletes, were bent

on removing the rebels and, fearing it might touch off intra-mural violence, Dr. King called on city police **Apr. 29** to clear out the buildings.

At 2 a.m. **Apr. 30**, 1,000 New York policemen moved in with nightsticks and in forcibly removing the white protesters, 132 students, 4 faculty members and 12 policemen were injured. The 85 Negro students in Hamilton Hall departed in orderly fashion. **May 8**, according to a university report, 707 persons had been arrested. Of these 524 were registered students, 181 were not Columbia students and 2 were faculty members. Of the students, 239 arrested were from Columbia College, representing 8.79% of the college's total enrollment. Also, 111 Barnard College students were arrested, representing 6.01% of the undergraduate girls' college total enrollment.

In a **May 1** student rally, the demonstrators and police clashed again, with 5 policemen and 6 students hurt.

Other campuses both large and small were also rocked by revolt. At Northwestern U., in Evanston, Ill., **May 3** Negro students seized the business office for 36 hours, demanding separate housing, more scholarships for Negroes, more Negro faculty and more Negro literature and art taught by teachers they had approved. The school agreed. At Stanford U., California, 200 students stormed and occupied a building **May 6** to protest the suspension of 7 who had led a demonstration November 1967 against Central Intelligence recruiting on campus.

Student turmoil also hit Bowie State College, Bowie, Md.; Cornell U.; Duke U.; Trinity College; U. of Oregon; Ohio State U.; Princeton U.; U. of Chicago; Cheyney State College; Roosevelt U., Southern Illinois U., and others.

inet members were Gen. Josef Pavel, interior minister, one of the victims of Stalinist purges in the 1950s. The Communist Party Central Committee **Apr. 4** announced major changes in the makeup of the party presidium, with membership cut from 14 to 11. The CP **Apr. 9** published its long-awaited "action program" for reforming communism in the country, pledging new guarantees of freedom of speech, press, assembly and religious observance.

Trudeau Heads Canada Liberals—Justice Min. Pierre Elliott Trudeau, 48, a French Canadian who opposed the Quebec separatist movement, was elected leader of Canada's Liberal Party **Apr. 6** and succeeded retiring Lester B. Pearson, 70, as prime minister **Apr. 20** in Ottawa. He dissolved Parliament **Apr. 23**, calling for a general election **June 23**. Trudeau **Apr. 30** announced a shift in his 23-member "caretaker" cabinet, sworn in **Apr. 20**, giving decision-making powers to 4 key committees instead of keeping the prior system of 14 standing committees.

Sierra Leone Coup—In a successful coup d'état, non-commissioned Sierra Leone officers replaced the military government of Col. Andrew Juxon-Smith with a 14-member Anti-Corruption Revolutionary Movement **Apr. 18**. Charging that Juxon Smith's National Reform Council had been "more corrupt and selfish" than the civilian regime it had replaced **Mar. 1967**, a Sierra Leone radio broadcast promised restoration of civilian rule. Col. John Bangura, in exile since the 1967 coup, returned to head a 7-man junta **Apr. 19**.

Rightists Gain—West Germany's National Democratic Party (NPD), a neo-Nazi party formed in 1964, won 9.8% of the total votes and 12 of the 127 seats in the Landtag (state assembly) elections in Baden-Württemberg **Apr. 28**. The NPD's share of the vote was higher than in any previous state election contested by the party. Observers viewed the election as a backlash vote after 5 days of student rioting in several major West German cities as well as an indication of NPD's prospects in the general elections of the Bundestag (federal parliament) in 1969. NPD gains hurt the Social Democratic Party (SPD) most.

GENERAL

NYSE Sales Peak—Trading volume on the N. Y. stock exchange hit a record 17,730,000 shares **Apr. 1**, the first of 3 new highs **Apr. 1-10** after President Johnson's announcement of North Vietnam bombing curbs. The 2d record was 19,290,000 shares traded **Apr. 3**. A third record day, with 20,410,000 shares sold, came **Apr. 10**. The 3d record was attributed to continued optimism on peace in Vietnam and backlog orders piled up during the exchange's closing in tribute to Martin Luther King **Apr. 9**. An all-time high record to date was established **June 13**, when 21,350,000 shares were traded.

Wisconsin Primary—Sen. Eugene J. McCarthy (D., Minn.) won the Wisconsin Democratic Presidential primary **Apr. 2** with 57.6% of the vote to President Johnson's 35.4%. He also won 52 of 60 delegates. Former Vice President Richard M. Nixon, with no major opposition, polled 81.3% of the Republican primary votes and all 30 of the state's GOP delegates.

Nationwide Phone Strike Ends—A nationwide telephone strike, started **Apr. 18** by 200,000 members of the AFL-CIO Communications Workers of America, ended **May 5** with a 3-year contract providing

wage and fringe benefit hikes totaling 19.58% over 3 years. The highly-automated phone service was near normal during the strike against American Telephone & Telegraph Co.—affiliated Bell Telephone firms in 15 states and Western Electric Co. in 40 states.

Pennsylvania Primary—Sen. Eugene J. McCarthy (D., Minn.), the only Presidential candidate of either party in the Pennsylvania primaries **Apr. 23**, polled 76½% of his party's vote. Former Vice President Richard M. Nixon won 76.3% of the GOP write-in vote.

Humphrey Enters Race—Vice President Hubert H. Humphrey, 56, entered the Democratic Presidential race **Apr. 27**. Humphrey, who declared his candidacy on a nationally televised program before 1,700 friends and supporters since it was too late to enter the primary races, called for "a new American patriotism." On a TV program **Apr. 28**, Humphrey said he would run on the Administration's record but added that "I am my own man."

Rockefeller Says He'll Run—Gov. Nelson A. Rockefeller (R., N.Y.) entered the race for the Republican Presidential nomination **Apr. 30**, 40 days after he had said he would not be an active candidate. He said he had been urged to participate by people of all political persuasions and had finally been moved to change his position by "the gravity of the crisis we face as a people."

May—1968 NATIONAL

Tariff Aid for U.S.—In a move to aid the U.S. in reducing its balance-of-payments deficit, 16 of its major trading partners

agreed **May 1** to step up the 20% tariff cuts due Jan. 1, 1970, on American exports under the Kennedy Round agreement to Jan. 1, 1969. At the same time, they put off for one year to Jan. 1, 1970, the 20% tariff cut the U.S. was to make Jan. 1, 1969.

Poor March on Washington—Nine poor people's caravans from all parts of the country **May 2-17** converged by mule train, bus, cars, railroad and on foot on Washington, where volunteers put up temporary shelters on a 16-acre site dubbed Resurrection City, U.S.A. in West Potomac Park. Sponsored by the Southern Christian Leadership Conference, the poor people's campaign was planned by the late Martin Luther King to prod the Congress and the Administration into taking action on behalf of more than 29,000,000 Americans. The Rev. Ralph D. Abernathy, King's successor as SCLC president, was march leader.

Preceding the poverty pilgrims with a delegation, Abernathy **Apr. 29** met with Cabinet members and Congressmen to present a long list of legislative demands, including 2,000,000 jobs, massive housing programs, larger welfare payments and a guaranteed minimum income for everyone. As demonstrations got under way **May 21**, an air of bedlam often hovered over the camp, with a lack of organization and disunity in staff leadership. There was a shortage of funds, cooking, bathing and sanitation and heavy rains compounded the problems by turning the grassy area into a bog, forcing many to leave the campsite. On **May 15** the local food committee had been able to raise only a third of the \$90,000 needed to feed the 3,000 campers for 30 days. Most of the demonstrators were Southern Negroes; some Indians, Mexican Americans and Appalachian whites. There was some racial tension and **May 22** 200 Chicago and

Detroit Negro youth gang members were sent home for "beating whites." Sympathetic officials intervened when some of the demonstrators got out of hand, and **May 23** a bipartisan ad hoc committee of Congressmen was formed to help the marchers present their demands.

Agriculture Secy. Orville Freeman **May 23** promised Abernathy and 200-300 demonstrators that he would enlarge the department's food distribution program. Resurrection City closed down **June 23** when the Interior Dept.'s permit for the campsite expired. The campaign ended far from the dramatic goals of the leaders and 124 persons were arrested after they refused to leave **June 24**. Several hundred others, including Abernathy, were arrested for an illegal demonstration on Capitol grounds.

Communists Launch Tet II—Communists launched the expected Round II of their country-wide Tet offensive **May 5**. But it was "a far cry" from the original, a U.S. Command spokesman said. They shelled, mortared and rocketed 122 targets, including 40 cities and towns, 7 air bases and other Allied installations but only about a dozen of the targets struck had ground attacks. Saigon, under heaviest attack through **May 7**, was hit hard only in some areas such as the Chinese Cholon district.

Some 80,000 refugees jammed bridges and streets in flight to safer parts of town as the fight raged fiercely for a week around Saigon's Y bridge and near Tan Son Nhut, where South Vietnam paratroopers fought two days in an old French military cemetery to drive out entrenched troops. Only 5 small portions of the city, with some 2,000 houses and shacks were destroyed. Due to the swift reaction of the city's 500,000 government defenders, civilian dead were a few hundred, less

Student Riots Precipitate Chaos in France

A protest **May 2** by 6 New Left student militants at the University of Nanterre mushroomed into a movement of civil and economic disobedience by some 10,000,000 Frenchmen and threatened to end the 10-year regime of President Charles de Gaulle's 5th Republic in chaos.

Led by Daniel Cohn-Bendit, 23, the youthful militants' protest against "imperialism" caused officials to close the suburban campus of the University of Paris. **May 3** Nanterre shutdown protests by 1,000 students at the 715-year-old Sorbonne, heart of the University of Paris, led to its closing after pitched battles with police and precipitated 10 days of fierce Latin Quarter street fighting, with students behind barricades of burned cars tossing paving stones and gasoline bombs. The bloody fighting won the sympathy of France overnight and thousands of students also took to the streets in provincial cities, fired by the deep discontent permeating the country's overcrowded, inadequate and archaic university system.

Communist and Catholic labor groups staged a nationwide 24-hour sympathy strike **May 1**, while in Paris more than half a million workers, students, teachers and opposition leaders marched for 4 hours, singing the Internationale and giving vent to anti-De Gaulle feelings.

By **May 14**, when students occupied the Sorbonne, an epidemic of wildcat strikes started to sweep the country, halting nearly all of the country's industrial production, commerce and transportation.

When De Gaulle rushed back from a state visit to Romania **May 18**, he found

France in a state of economic paralysis not far removed from civil war.

Premier Pompidou's government survived a parliamentary effort to overthrow it **May 22** with 11 votes to spare after a censure motion was introduced by Francois Mitterand, leader of the Federation of the Democratic and Socialist Left.

More than half of France's 19,000,000 workers were on strike by **May 24** and the rest couldn't get to work. The red flag of rebellion flew over factories, mines and shipyards seized by workers. Even after a De Gaulle radio appeal **May 24** for a return to law and order, the violence and rioting continued to spread, with new student-police clashes **May 23-25**. Farmers in southwest France staged a protest **May 24**, demanding price supports and subsidies, banks closed and even the tax collectors walked out.

In his **May 24** appeal, De Gaulle announced he would submit a program of broad reform to the people through a referendum in June and added he would resign if his "mandate for renewal" should be turned down.

Some 200,000 marchers led by Communists chanted "Adieu De Gaulle" when he left suddenly for his country home **May 29** amid speculation that he was resigning. Ex-Premier Pierre Mendez-France declared the same day he was ready to form a "popular government." But De Gaulle returned in a fighting mood, assured of Army support, and dissolved the National Assembly **May 30**. Blaming the Communists for the chaos, he called for new parliamentary elections **June 23** and **30**.

than one-twentieth of those at Tet. At week's end Communist dead were estimated at 2,500. On **May 13** the U. S. and South Vietnam commands said Allied troops had overcome the enemy's main thrust against Saigon and that 5,270 North Vietnam and Viet Cong had been killed, compared to 154 Americans and 362 South Vietnamese slain.

April Riot Costs—Using Federal troops in the April riots following the assassination of the Rev. Dr. Martin Luther King Jr. cost \$5,375,400, the Defense Dept. reported **May 18**. Altogether, 35,390 soldiers, Marines and National Guardsmen were deployed in Washington, D.C., Baltimore and Chicago, with 22,074 soldiers on standby. Insurance companies would pay \$67,-000,000 for losses incurred, the American Insurance Association estimated **May 15**, with biggest damage payments of \$24,-000,000 going to Washington, D.C.

Nuclear Submarine Lost—The nuclear-powered U.S. submarine Scorpion, two days overdue at Norfolk, Va., after a 3-month training exercise with the 6th Fleet in the Mediterranean, was reported missing **May 29**. The Scorpion, with 99 men aboard, was listed as "presumed lost" **June 5**, after a fruitless search by the Navy.

INTERNATIONAL

Israeli Jerusalem Parade—Israel marked its 20th anniversary **May 2** with an armed forces parade, the biggest in its history, through Jerusalem despite Arab protests and terrorist threats. The parade, featuring equipment captured in the June 1967 war, was scored **May 2** by the UN Security Council which had urged its cancellation **Apr. 27**. Protest demonstrations were held in Damascus, Beirut and Jordan **May 2**. A protest strike by two west-bank Jordan towns was punished **May 5** with Israel travel restrictions for their residents. Eleven Arab women protest marchers in East Jerusalem were detained **Apr. 25** after a clash with police.

Apartheid Measure Approved—A bill to abolish Parliamentary representation for South Africa's colored (mixed-race) population was passed in the House of Assembly **May 3**. The measure, one of 3 designed to reinforce the government's apartheid policy, ended colored representation by 4 white deputies at the end of the current Parliament in 1971.

Israeli-Arab Clashes—Israeli authorities reported **May 3** that their troops had killed

17 Arab guerrillas in 3 separate clashes **Apr. 30-May 2**. One Israeli soldier was killed in the bloodiest encounter **May 2** at the southern end of the Dead Sea when 12 Arab commandos were killed. Later, two Israeli soldiers and a civilian were killed when their jeeps ran over mines apparently planted by the slain commandos.

Biafra Talks Start—After 10 months of fighting between Nigeria and the secessionist government of Biafra, the two sides met in London **May 6** and agreed **May 8** on Kampala, Uganda, as the site for peace negotiations. The civil war had come to an impasse. Fearing genocide at the hands of other tribes if defeated, Biafra's Ibo tribesmen fought on desperately even though Nigeria's well equipped army of 85,000 men had captured all but one of Biafra's major cities, including the capital of Enugu, squeezing the rebel army of about 35,000 into an interior area only a third as large as the 29,000 sq. mi. it originally held. The Federal government had stepped up its bombing, using Russian MiGs and Czechoslovakian Delfin jet planes and bombs, with pilots believed to be Egyptian and Sudanese. Some 200,-000 Ibo refugees had crowded into about 300 camps throughout Biafra, which claimed the bombing raids were aimed at schools and hospitals, killing hundreds of civilians in January and February and about 300 from **Apr. 21-27**. Angered over Britain's alleged military aid to Nigeria, Biafran demonstrators **May 4** burned down 5 British buildings and thousands marched through the streets of 3 towns chanting anti-British slogans. Gabon recognized Biafra **May 8**; Tanzania, the first country to do so, **Apr. 13**, expressed its concern for the slaughter of the Ibos and their struggle for independence.

North Korean Charges Denied—North Korea claimed **May 7** its forces had captured a group of U.S. agents sent to its side of the DMZ to commit murder and subversion. The charge was denied by a UN Command spokesman and at a meeting of the Mixed Armistice Commission in Panmunjom **May 17**, U.S. Maj. Gen. Gilbert H. Woodward, senior UN command delegate, warned North Korea was "approaching another serious miscalculation" in a plan to foment a new war. **Apr. 27** North Korean troops had attacked UN command troops near the demilitarized zone, killing 2 South Korean soldiers and wounding 2 Americans.

Vietnam Preliminary Peace Talks Open in Paris

After a 34-day impasse on selecting a site for preliminary peace negotiations, the U.S. and North Vietnam agreed **May 3** on Paris. Hanoi designated ex-Foreign Min. Xuan Thuy head of its delegation. Hanoi said **May 4** its purpose in the talks was "the unconditional cessation of U.S. bombing raids and other acts of war" against North Vietnam. Secy. of State Dean Rusk declared **May 5** "an honorable peace" in Southeast Asia hinged on a stop to Communist infiltration of South Vietnam and its neighbors.

The parley started **May 10** with Amb.-at-Large Averell Harriman, 76, as U.S. delegation chief and Cyrus R. Vance, 51, his deputy. Thuy, 55, now Min. of State and secretary of the Central Committee of the North Vietnamese Communist party, had as his adviser Col. Ha Van Lau, who had served as liaison officer with the International Control Commission of North Vietnam. After discussing procedure **May 10** and **11**, both sides restated their previous conditions **May 13**. No progress was made at talks **May 15** and **May 18**

as Hanoi still demanded unconditional halt of U.S. bombing and the Americans asked for some military reciprocation in exchange for a halt in raids.

The impasse continued. Amb. Harriman **May 20** denied there was a deadlock, but charged the North Vietnamese had been using the meetings for propaganda purposes. As Thuy continued to press for a halt in U.S. bombing raids **May 22** and **27**, Harriman rejected "the suggestion now urged by you that the only reason for our meetings is to give the hour and date for the cessation of bombing."

Thuy refused to discuss seriously Harriman's suggestion **May 31** that the DMZ be restored as a truly neutral buffer zone although the U.S. diplomat charged the 320th North Vietnam Div. had crossed the DMZ **May 26** to attack the allies at Dongha.

At a press conference **May 29** a Hanoi spokesman berated President Johnson for his charge **May 28** that North Vietnam was obstructing the Paris talks, asserting the Americans were responsible.

UK Bolsters NATO Force—A 40% increase of Britain's share in NATO troop strength, announced **May 10**, was made possible by England's planned withdrawal east of Suez by 1971, Defense Min. Denis Healey said. The UK boost included naval forces and vessels for the allied Mediterranean command.

End of Bombing Urged—UN Secy. Gen. U Thant, urging "an unconditional end of the bombing of North Vietnam," asserted **May 13** it "had only hardened the determination of the North to prosecute the war and not to negotiate under duress."

Jerusalem Merger Opposed—Declaring all Israeli actions in Jerusalem since the capture of the Jordanian area in June, 1967 invalid, the UN Security Council in a resolution **May 21** opposed Israel's administrative unification of the Jordanian and Israeli sectors of the city. Thirteen of the Council's 15 members approved the resolution, while the U.S. and Canada abstained.

UN Rhodesia Travel Ban—In another step to isolate the white minority government of Premier Ian D. Smith, the UN Security Council **May 29** unanimously approved a resolution calling on all members to impose a total embargo on all trade with or travel to Rhodesia.

GENERAL

Rockefeller Launches Campaign—Gov. Nelson A. Rockefeller (R., N.Y.) scored the Administration's foreign policy in a speech kicking off his campaign for the GOP Presidential nomination in Philadelphia **May 1**. He termed U.S. policy in Western Europe "sterile" and said the war in Vietnam should be "de-Americanized." At the University of Iowa **May 2** he urged lowering the voting age to 18 and called for a national lottery to end the "inequitable" draft laws.

Humphrey Starts Campaign—In his first week as Presidential candidate, Vice President Humphrey told 5,000 delegates to the African Methodist Episcopal Church's quadrennial session in Philadelphia **May 2** he would strive for "a new and complete national commitment to human rights." At Kent (Ohio) State University **May 3** and at Bucknell University in Lewisburg, Pa., **May 4** small groups of students walked out on his speeches, but at the latter school some 3,000 in the audience cheered him when he decried "the censorship of walking out." In Washington **May 7** he told the American Meat institute the Federal role in farm policy was "here to stay." The United Steelworkers of America (AFL-CIO) endorsed him on **May 9**. On **May 10** in Baltimore, Maryland's 49-vote delegation agreed to cast a unit vote for him.

Nixon on Campaign Trail—Former Vice President Richard Nixon, the GOP Presidential contender, in a radio address **May 2**, detailed a program for tax incentives and guaranteed loans to bring businesses to urban slums. In Fort Wayne, Ind., **May 3** he stressed the need for a "moratorium" on Vietnam discussion, adding: "Let's not destroy the chance for peace with a mouthful of words from some irresponsible candidate." In a policy paper in New York **May 8**, he asserted the role of poverty as a cause of increased crime "has been grossly exaggerated" and attributed the rise to "the success of the criminals in this country."

AFL-CIO Suspends UAW—The United Autoworkers of America was suspended **May 16** by the AFL-CIO for nonpayment of dues for 3 months. The suspension climaxed a bitter feud between AFL-CIO

president George Meany and UAW president Walter P. Reuther. During the UAW convention in Atlantic City **May 4-10**, delegates on **May 9** approved withholding the dues, which were to be put in escrow pending a special convention sought by the UAW to hear the auto union's demands for reform.

ADA Parley Backs McCarthy—The Americans for Democratic Action in Washington **May 19** endorsed Sen. Eugene J. McCarthy for the Democratic Presidential nomination, upholding the previous approval of ADA's national board. The group praised "his courage in New Hampshire and Wisconsin," adding that his campaign "forced a change in the Administration's Vietnam policy and induced President Johnson's renunciation of further political activity."

Rap Brown Convicted—H. Rap Brown, chairman of the Student Nonviolent Coordinating Committee (SNCC), was convicted in New Orleans Federal Court **May 22** for violating the Federal Firearms Act, sentenced to 5 years in prison and fined \$2,000. A jury of 9 whites and 3 Negroes found him guilty of carrying a .30 caliber carbine on a plane trip from New Orleans to New York Aug. 18, 1967. He was released on \$15,000 bond.

McCarthy Wins in Oregon—Sen. Eugene J. McCarthy (Minn.) defeated Sen. Robert F. Kennedy (N. Y.) in the Oregon Presidential primary **May 28** with 45% of the vote. Kennedy, who had been winner in a pre-primary NBC poll, received 39%. In the GOP primary, Richard M. Nixon won 73% of the vote. Gov. Ronald Reagan (Calif.) received 23% and Gov. Nelson A. Rockefeller (N. Y.) 4% in write-ins.

DISASTERS

Nineteen members of a wedding party were killed **May 1** when a truck plunged into a ravine near Benares, India . . . All 85 aboard perished when a Braniff International 4-engine turboprop Electra crashed **May 3** during a lightning storm near Dawson, Tex. . . . Coal mine explosion in St. Etienne, France, **May 3** killed 6 . . . Seven teenagers died **May 4** when their car hit a gravel truck near Grand Forks, British Columbia . . . An explosion followed by fire **May 6** destroyed 3 tankers in La Plata harbor, Argentina, killing 10 . . . Four of 25 miners died in flooded coal mine near Hominy Falls, W. Va., **May 6** . . . At least 20 persons died of bubonic plague in Lesotho **May 8** . . . Six died and 30 were injured in passenger express and freight train crash in Vijayavada, India, **May 8** . . . drowned **May 26** when 15-foot boat capsized off Wells Beach, Me. . . . Four died in light plane crash on Greenwich, Conn., golf course **May 26** . . . U.S. nuclear submarine Scorpion, with 99 men aboard, lost between Azores and Norfolk, Va., **May 27** . . . Gas explosion at nursery school in Hapeville, Ga., **May 29** killed 7 children and 2 adults.

June—1968

NATIONAL

Battle of Saigon—Communist rockets and snipers continued to punish Saigon **June 3-15**, adding new destruction to the ravages of Tet and making the battle of

Saigon one of the Vietnam war's toughest. The mayor's office **June 11** reported that 117,000 persons had left or lost their homes since **May 5**, when the Reds resumed their assault on the city. In the same period, 433 civilians had been killed and 3,660 wounded, while South Vietnamese troops had killed 2,880 Communists and captured 328. Allied forces, mostly American, had slain 2,436 and captured 105. Of South Vietnamese losses, 261 were killed and 1,032 wounded. Besides homes, other civilian targets like schools and hospitals were hit. **June 7**, 25 civilians perished in such a bombardment. The guerrilla warfare was "cheap" for the enemy, said a

Sen. Robert F. Kennedy Fatally Shot by Assassin

Sen. Robert F. Kennedy, 42, cut down by an assassin's bullet in the Hotel Ambassador, Los Angeles, **June 5** at about 12:16 a.m. PDT, died **June 6** at 1:44 a.m. PDT in Good Samaritan Hospital, where a team of top surgeons had worked for 4 hours to remove bullet fragments from his brain.

His suspected assassin later identified as Sirhan Beshara Sirhan, 24, a slight Jordanian Arab who had lived in the Los Angeles area for 11 years, was seized by members of the Senator's party after a struggle.

The Senator from New York was killed less than 5 years after the assassination of his older brother, President John F. Kennedy, and two months after that of the Rev. Martin Luther King, Jr.

The tragedy, which occurred about 3 minutes after he had left a rally celebrating his victory in the California and South Dakota primaries, brought Presidential campaigning to a standstill. President Johnson, expressing the nation's shocked grief **June 5** ordered Secret Service protection for all Presidential candidates of major parties. Urging "an end to violence," he announced he was creating a commission of distinguished citizens to study the subject. Declaring "our public life is diminished by his loss," the chief Executive **June 6** proclaimed **June 9** a day of mourning and read the **June 5th** statement in which he had called on Congress "in the name of an aroused nation—to give America the gun control law it needs."

An outraged and sad nation kept a close radio and TV vigil during the crucial hours he lay comatose between life and death, with his wife Ethel, expecting their 11th child, at his side. World and national leaders sent condolences to the bereaved Kennedy family, but to grieved Kennedy campaigners who had traveled with him it had not come as a surprise. They had feared for his safety, both from the crush of adoring mobs and from those who hated him, but he had waved the suggestion of extra guards aside, saying: "If anyone wants to kill me it won't be difficult."

It wasn't. As he and a small group of aides passed through a serving kitchen on the way to a press conference, the Senator paused to shake hands when the unobtrusive assassin started shooting a .22 caliber pistol. Of 8 bullets, 3 felled Kennedy, while 5 other persons around him were hit, but not fatally, by the shots. The surgical team, headed by Dr. Henry M. Cuneo of the University of Southern California, found the fatal bullet had entered the cerebellum after penetrating the mastoid bone behind the right ear.

While Kennedy lay on the floor bleeding, his alleged assailant was subdued by 8 men, including Roosevelt Grier, Los Angeles Rams football lineman, and Rafer

Johnson, an Olympic champion. Both the athletes and police protected the assassin from the threatening mobs after officials, fearful of "another Lee Oswald case like in Dallas," demanded he be kept alive.

Mayor Samuel W. Yorty revealed that Sirhan, an unemployed clerk, had entered in a notebook found in his home later **June 5** "the necessity to assassinate Sen. Kennedy before **June 5**," the anniversary of the Arab-Israeli war. Yorty said **June 6** the notebook expressed evidence of "Communist sympathies." The release of such information was scored by the Civil Liberties Union and State Atty. Gen. Thomas Lynch on the ground that it could affect the legality of the evidence and the course of the trial. Sirhan was indicted **June 7** by a Los Angeles County Grand Jury of 1st degree murder and on 5 counts of assault with intent to kill the other 5 persons shot. With the lesson of Dallas in mind, he was held in strict isolation under heavy guard. His trial was scheduled to start Dec. 9.

On **June 6**, a Presidential jet flew the body of Sen. Kennedy back to New York, where it lay in state in St. Patrick's Cathedral from 5:30 a.m. **June 7** until 5 a.m. **June 8**. More than 151,000 persons, according to a police estimate, stood in a line stretching for more than a mile and sometimes for as long as 7 hours, for a glimpse of the mahogany coffin. Standing vigil over the bier, 3 at a time, were some 600 men, ranging from New York Gov. Rockefeller, to the Rev. Ralph Abernathy, leader of the Poor People's March. The requiem mass **June 8** was attended by President Johnson, the major Presidential candidates, members of Congress, the Cabinet and other public figures.

In a reading that was unusual at a Roman Catholic funeral, Sen. Edward Kennedy (D., Mass.) said his brother "should be remembered simply as a good and decent man, who saw wrong and tried to right it, saw suffering and tried to heal it, saw war and tried to stop it."

Thousands lined the street to watch the motorcade bringing the body and the funeral party to a 21-car funeral train in Pennsylvania Station for the trip to Washington. Crowds waiting in stations along the way delayed the train 4½ hours and, in the first nighttime burial at Arlington National Cemetery in memory, Robert F. Kennedy was laid to rest near his brother John.

On **June 15**, the late Senator's mother, Mrs. Rose Kennedy, 77, and his brother, Sen. Kennedy, in a brief TV message taped at the Hyannis Port, Mass., home of ex-Amb. Joseph P. Kennedy, thanked Americans for their expressions of sympathy. With the elder Kennedy sitting in a wheelchair beside them, Mrs. Kennedy pledged the family to "carry out the principles for which Bobby stood."

U. S. military official, since he was doing as much damage as in prior battles but with fewer men. Hanoi's aim officials said, was a city in ruins with homeless, unhappy people ripe for an uprising against the government.

U. S. Hits Saigon Attacks—No progress was made at the 7th and 8th sessions of the Paris peace talks at North Vietnam continued to demand an end of U. S. bombing in the North **June 5** and U. S. Amb.-at-Large W. Averell Harriman charged 40,000 Hanoi troops were fighting in Laos in violation of the 1962 Geneva neutralization accord. Harriman **June 12** held the North Vietnamese military responsible for attacks on Saigon with "no military objective" but "to terrorize people." Xuan Thuy, the Hanoi representative, countered: "If the U. S. pulls out of Saigon, the combat will cease around Saigon." The stalemate continued at the **June 19** and **26** sessions, with each side accusing the other of stepping up the war.

Abrams Succeeds Westmoreland—Gen. William C. Westmoreland turned over command of U. S. armed forces in Vietnam to Gen. Creighton W. Abrams, his former deputy, **June 10**. Westmoreland left for the U. S. the following day to assume his new duties as Army Chief of Staff.

LBJ on Gun Controls—In a message to Congress **June 24**, President Johnson urged registration of every firearm and licensing of every gun owner, with registrations to go into a computer listing at the FBI's National Crime Information Center. Calling for minimal Federal standards, he said licensing should be carried out by the states. However, he added, Federal licensing should be required for states not meeting the standards within two years.

Chief Justice Resigns—President Johnson announced the resignation of Earl Warren as Chief Justice of the U. S. **June 26**. At the same time he nominated Associate Supreme Court Justice Abe Fortas, 58, to head the country's highest tribunal and Judge Homer Thornberry of the 5th Circuit Court of Appeals to replace Fortas. Warren, 77, resigned "solely because of age," after 14 years. Often criticized by conservatives, Warren had written the opinion in 3 milestone decisions: 1954, school desegregation; 1964, "one man, one vote," leading to legislative reapportionment; and 1966, outlining of rules for interrogation of criminal suspects.

De Gaulle Emerges Triumphant Again

As the student and labor revolt which had rocked France in "the days of May" abated and most of the country's 8,000,000-man work force returned to work during the first week of June, there were isolated pockets of resistance. On **June 7**, when the stock exchange reopened, 4,000 striking workers and 200 militant students battled police at the nationalized Renault assembly plant at Flins. The first violent clash between workers and police, it left a dozen injured and was denounced by the Communist-led General Confederation of Labor, which blamed "student agitators."

President De Gaulle jumped the gun **June 7** on the 3-week campaign for the 2-stage national elections, which got under way **June 10**. De Gaulle promised a "society of participation," unlike Communism or Capitalism, which he termed "bad solutions from the human point of view." Premier Georges Pompidou **June 12** opened the government's drive, calling for a clear Gaullist majority to save France from a Communist takeover. Also on **June 12**, as some street fighting continued, 11

U. S. Leaves Khesanh—In a tactical shift to mobility, to cope with increased Communist strength and activity in the DMZ, the U. S. Command **June 27** announced the Marines were withdrawing from the military base of Khesanh.

INTERNATIONAL

Jordan River Clash—Heavy casualties were reported on both sides when Israeli and Jordanian forces fought all day **June 4** along the northern sector of the Jordan River near the Sea of Galilee. The fighting, with Israeli air attacks on Jordan, was termed their most serious encounter since **Mar. 21** by Amman. The UN Security Council convened **June 5** to consider the outbreak but called off debate because of Sen. Robert F. Kennedy's assassination.

Italian Premier Resigns—Premier Aldo Moro and his cabinet resigned **June 5** after the Unified Socialist Party pulled out of Italy's coalition government **June 1**. The party withdrew because it had lost seats in the **May 19** and **20** parliamentary elections, although the other two in the coalition—Moro's Christian Democrats and the reformist Republicans—had scored gains. Many Socialist leaders attributed the losses to such concessions to Moro's more conservative party as delay in reform of the tax and educational systems and governmental organization.

Southeast Asia Defense Parley—At the end of a two-day Kuala Lumpur, Malaysia, parley on defenses needed in Southeast Asia after Britain withdraws from that country and Singapore in 1971, 5 nations **June 11** reaffirmed their pledge to maintain the defense of the area. They include Great Britain, Australia, New Zealand, Singapore and Malaysia.

A-Ban Treaty Signed—After 4 years of intensive negotiations on measures to halt the proliferation of nuclear weapons, the UN General Assembly **June 12** adopted by a 95-4 vote a resolution commending the draft nuclear non-proliferation treaty submitted by the UN 18-nation Disarmament Committee (ENDC) **Mar. 15**. The endorsement fulfilled a UN General Assembly resolution adopted in 1960 and cleared the way for ratification **July 1**, when 62 nations, including the U. S., Soviet Union and Britain signed.

New Belgian Cabinet—Belgium's 132-day political crisis ended **June 17**, when the new premier, Gaston Eyskens, 63, formed a two-party coalition government with a

extremist student groups were dissolved and protests banned during the campaign. Police cleared the Sorbonne of 200 students without incident **June 16**.

In the relative calm of the campaign, opposition leaders denounced De Gaulle's tactics. Francois Mitterand, leader of the Federation of the Democratic Socialist Left, scoffed: "Two months ago, you would have voted anti-Gaullist, and 2 months from now you would vote anti-Gaullist again." However, De Gaulle won with a grand sweep both on **June 23** and in the runoff **June 30**. Gaullists and their allies won 43.73% of the 22,500,000 votes in the first round, their candidates winning 142 constituencies, thus electing them to the Assembly without undergoing a runoff round. **June 30** they won 294 seats in the 487-seat Assembly, making De Gaulle's party the first in some 100 years to win an outright majority there. The Communists and Mitterand's party lost more than half the seats they had held, their combined total being only 90 votes.

cabinet of 16 Social Christians and 13 Socialists. The two parties had agreed **June 12** on a program for the new center-left government, including the passage of constitutional amendments to give formal recognition to the country's two language regions. The crisis had been precipitated by the demands of each ethnic group, the Dutch-speaking Flemings and the French-speaking Walloons, for greater regional autonomy.

Trudeau Wins—With a decisive victory in the House of Commons elections **June 25**, the Liberal Party gave Canada its first majority government since 1962 and assured its leader, Pierre Elliott Trudeau, a solid mandate as prime minister. The Liberals won 155 of the 264 seats in Commons, compared to the 128 they had held. The Conservatives went down from 94 to 72 seats. On **July 5**, Trudeau announced his new 29-man cabinet, including 8 new members, 15 ministers from his interim cabinet who had their portfolios shifted, and 6 key ministers who, like Trudeau, kept their old posts.

GENERAL

Helen Keller Dies—Helen Adams Keller, 87, blind and deaf writer who was an inspiration to others for more than half a century, died **June 1** in Westport, Conn., after a stroke. Miss Keller, born **June 27**, 1880, in Tuscumbia, Ala., lost sight and hearing after serious illness at 19 months. A legend in her lifetime, she corresponded with the poet John Greenleaf Whittier at 9 and was named with Napoleon as one of "the two most interesting characters of the 19th Century" by Mark Twain. Her first book, "The Story of My Life," was published in 1902—two years before she graduated from Radcliffe. Her early years with her teacher, Anne Mansfield Sullivan, who rescued her from what Miss Keller called the "no world," were depicted in a play and film, "The Miracle Worker." A tireless worker for other handicapped people, she traveled extensively to raise money for the American Foundation for the Blind.

Rockefeller Steps Up Drive—Convinced "the tide has turned" in his favor at Milwaukee **June 3**, Gov. Nelson A. Rockefeller (R., N. Y.), launched a full-speed-ahead campaign for the GOP Presidential nomination **June 10**, after a campaign moratorium following Sen. Robert F. Kennedy's assassination. At Allegheny College in Meadville, Pa., that day he stressed the need for education for the poor. Later, after a Presidential candidate briefing at the White House, he said candidates must not be deterred by the danger of assassination and must "go to the people." Speaking at the National Press Club in Washington **June 11**, he said "a profoundly new mood" would emerge in America after the assassination, calling for "nothing short of a new government, a new party in power and a new leader at the head of the party." He visited the Watts district in Los Angeles **June 11**, challenged Richard Nixon to a debate **June 13**. Pennsylvania Gov. Raymond P. Shafer **June 15** gave up his favorite-son status to back Rockefeller.

California Primaries—Sen. Robert F. Kennedy won California's Democratic Presidential primary and the state's 172 Democratic National Convention delegate votes **June 4**, prior to his assassination. His 46% of the total Democratic vote topped Sen. Eugene J. McCarthy's 42%. State Atty. Gen. Thomas C. Lynch, who headed a 3d slate including supporters of both Senators and Vice President Humphrey, drew 12%. In the GOP primary, unopposed Gov.

Ronald Reagan won as favorite son Presidential candidate.

McCarthy Challenges Humphrey—Asserting the "issues remain essentially the same," Sen. Eugene J. McCarthy **June 12** said in resuming his campaigning after Senator Kennedy's assassination that he would find it difficult to support Vice President Humphrey because of Humphrey's "wholehearted" backing of the Administration's Vietnam policy. Denying he would lead a new party, he said he intended to "work this out within the Democratic party." Addressing Idaho Democratic women at the party's state convention **June 14**, McCarthy accused Humphrey of "not dealing with the issues," adding that "our party should take the most difficult issues to the people, even if it destroys the party." He urged **June 15** that the national convention should "withhold final judgment" until the candidates appeared before it to present their views.

Dr. Spock Convicted—Dr. Benjamin Spock, 65, noted baby doctor, was found guilty **June 14** in Boston Federal District Court with 3 others of conspiring to counsel young men to evade the draft. Convicted with Dr. Spock were the Rev. William Sloane Coffin, Jr., 43, Yale University chaplain; Michael Ferber, 23, Harvard University graduate student; and Mitchell Goodman, 44, author from Temple, Me. A 5th defendant, Marcus Raskin, 34, of Washington, D. C., was found not guilty. The government indictment had cited 10 "overt acts" it contended one or more of the defendants had committed in the conspiracy. The defendants contended they were concerned over the legality of the Vietnam war and the constitutionality of the draft. After the verdict, asserting he would "press my case," Dr. Spock said: "My main defense was I believed a citizen must work against a war he considers contrary to international law." The 4 were sentenced **July 10** to two years in Federal prison by Judge Francis J. W. Ford, who presided over the case. However, execution of the sentences was waived pending steps for appeal.

N. Y. Theater Strike—A 4-day strike, which shut down 19 Broadway shows and 10 touring companies **June 17-20**, ended with a 3-year contract **June 20**. The strike, called by the 15,935-member Actors Equity Association against the League of N. Y. Theaters, idled some 800 performers and several thousand members of other theatrical unions. The new pact called for an increase in weekly pay to \$155 over 3 years and banned replacing anyone with a foreign performer.

New York Primaries—Sen. Eugene J. McCarthy (D., Minn.) won at least 52 of New York's 123 elected delegates in the state's Democratic primary **June 18**, besting delegates supporting Vice President Humphrey and the late Sen. Robert F. Kennedy for the Presidency. Gov. Nelson A. Rockefeller, GOP contender for the Presidency, won 77 of 82 delegates, the remaining 5 going to Richard M. Nixon.

End "Fight, Talk"; Humphrey—Urging an end to "fight and talk," Vice President Humphrey **June 21** called on North Vietnam to join in an immediate cease-fire in Vietnam. The U. S., he said, was "prepared for a cease-fire any hour of the day." Admitting Hanoi "has shown no such interest," he added hopefully: "It may."

DISASTERS

Four workmen were killed and 4 injured when a 300-ft. crane boom collapsed atop a gas storage tank under construc-

tion in Staten Island, N. Y., **June 5** . . . Three balloonists were killed **June 6**, when their balloon struck an 820-ft. tower in Danube Park, Vienna, Austria . . . Five perished **June 12** in a Hong Kong landslide caused by torrential monsoon rains that buried huts in its wake . . . Tornado killed 7 in Tacy, Minn., **June 13** . . . Twenty perished when landslide **June 17** buried row of slum dwellings under tons of gravel and mud in Salvador, Brazil . . . Seven were killed when their twin-engine plane crashed in a field near Reading, Pa., during a thunderstorm **June 19** . . . A twin-jet Air Force training plane crashed in a dense forest area 24 miles northeast of Alexandria, La., **June 19**, killing the instructor and student . . . Earthquake that rocked a large area of northeast Peru **June 19** left 16 dead and 100 injured . . . A bus carrying students from a girls' school collided with a truck and plunged into a river near Cucuta, Colombia, **June 21**, killing 23 and injuring 25 . . . A stampede of 90,000 fans at a Buenos Aires soccer stadium exit **June 23** killed 71 spectators and injured 130, 40 of them seriously . . . A man fell through the door of a chartered DC-3 airliner carrying 23 passengers when it flew open 8,000 feet over southwest Missouri **June 28**; other passengers and crew of 4 were not injured . . . Four persons were killed and at least 20 injured in the flaming collision of a Greyhound bus and a passenger car 13 miles south of Eugene, Ore., on Interstate 5 **June 28**.

July—1968

Intense Fighting After Lull—U. S. B-52s resumed bombing missions north of the DMZ **July 1** but a lull in ground action **July 1-16**, with most fighting south of the DMZ and around Saigon, was attributed to the Communists' readying of a major new drive on Saigon. Military activity stepped up **July 22-23** when U. S. bases around Danang came under rocket and mortar attack and government administrative centers in Quangnai Province were shelled. In the most widespread concerted bombardments since June, the Communists shelled several cities in the province **July 24**. The Viet Cong carried out a series of attacks on civilians **July 21-26**. U. S. ground and air units anticipating a possible assault on Saigon, **July 25-27** attacked possible infiltration routes to the city. National police **July 16** reported abduction of civilians was up and the Reds were reported to have killed 2,567 civilians, wounded 5,348 and kidnapped 4,241 since Jan. 1. Meanwhile, a sharp reduction in Communist shelling of Marine bases in northern Quangtri Province due to recent U. S. air attacks on enemy artillery in the DMZ was reported **July 18**, when B-52s for the first time dropped bombs on North Vietnamese surface-to-air missile sites a few miles north of the DMZ to bolster previous fighter-bomber raids.

U. S., Soviet A-Talks Due—Talks on limiting and reducing their arsenals of offensive and defensive nuclear missile systems were planned by the U. S. and Soviets "in the nearest future," President Johnson announced **July 1** during White House ceremonies for signing the nuclear non-proliferation treaty.

USSR Frees U. S. Jet—The Soviet Union **July 2** freed a Vietnam-bound U. S. airliner carrying 214 servicemen and a 17-man crew 3 days after two Soviet fighter planes forced it to land on Iturp, one of the Soviet's Kurile Islands north of Japan. The release came after the U. S. acknowl-

edged that the Seaboard World Airlines DC-8 Super 63, chartered by the Military Airlift Command, had inadvertently intruded on Soviet airspace due to a navigational mistake while en route to a Japanese refueling stop before flying on to Camranh Bay, Capt. Joseph Tosoline, the pilot, **July 3** insisted he had not "strayed off course" as conceded by the State Dept. **June 30**. He said he had signed a statement admitting the violation only to release the plane and those on it. According to reports **July 2**, Japanese radar indicated the plane had been over international waters.

Paris Peace Talks—U. S. and North Vietnam peace talks in Paris **July 3, 10 and 17** failed to make any progress as Xuan Thuy, the Hanoi representative, charged that U. S. involvement in Vietnam was contrary to the spirit of the Declaration of Independence and read quotes from U. S. critics of the war, ranging from Black Power advocate Stokely Carmichael to Sen. J. W. Fulbright (D., Ark.), W. Averell Harriman, chief U. S. negotiator, countered that Thuy was distorting American history and should not construe American dissent over the war as a sign of weakness. After talking to both sides in Paris **July 6**, UN Secy. Gen. U. Thant said on his return to the U. S. **July 13** he thought the talks would be "a long process," but reiterated his belief that Hanoi would make a "definite move" towards peace if the U. S. were to stop bombing North Vietnam.

U. S. Viet Deaths Soar—The U. S. command in Saigon reported **July 4** that U. S. combat deaths for 1968 had reached 9,557 on **June 29**, or 138 more than the 9,419 killed in all of 1967. As of **July 6**, the total American deaths since Jan. 1, 1961, were reported at 25,752. U. S. officials announced **July 13** that 47,411 South Vietnamese civilians had been treated in hospitals during the first 5 months of 1968, as compared to 49,037 for all of 1967. Earlier, the South Vietnamese government reported **July 3** that 7,424 civilians had been killed and another 15,434 had been wounded during the Communist Tet offensive in February. During the week ending **June 29**, 129 Americans died in combat, the lowest weekly toll since Jan. 1.

LBJ in Central America—President Johnson assured the people of Central America **July 6** that "we in the U. S. want to help" in promoting economic development and social justice. During a visit to San Salvador, El Salvador, he conferred with the presidents of the 5 countries gathered for the final session of a meeting of the Central American Common Market, the Organization of the States of Central America (ODECA). At the same time he announced he had just approved an additional U. S. contribution of \$30,000,000 to the Central American Bank for Economic Integration for development of regional transport and communication systems, as well as loans totaling \$35,000,000 for distribution among the 5 nations in the market. After touring San Salvador **July 7**, Johnson dropped off the presidents of Nicaragua, Costa Rica, Honduras and Guatemala before returning to Washington **July 8** in his plane.

Clifford in Vietnam—In his first visit to South Vietnam as Secretary of Defense, Clark Clifford **July 14-18** conferred with U. S. and South Vietnamese officials and told reporters in Danang **July 17** he ex-

pected the enemy to launch a major new assault within two months. He termed the easing of ground fighting at the time "a lull before the storm" and tied the enemy's combat plans to "the desire to make an impression" on the Paris conferees, hoping to affect the negotiations with "some spectacular accomplishment."

Senate Unit Quizzes Fortas—The first nominee for Chief Justice of the U. S. ever called upon to do so, Supreme Court Justice Abe Fortas testified before the Senate Judiciary Committee **July 16-19** on his legal philosophy and fitness for confirmation. The longtime friend and adviser of President Johnson admitted he had continued to counsel the President while serving on the court, but cited such precedents as Presidents Washington, Jackson, Lincoln, Hoover and Roosevelt having had advisers on the court. Questioned at length and often harshly by such committee critics of his nomination as Sens. Sam J. Ervin, Jr. (D., N. C.) and Strom Thurmond (R., S. C.), Justice Fortas refused to discuss decisions in which he participated, asserting that to do so would violate the doctrine of separation of judicial and legislative power. The 9-day Fortas hearings were put off **July 23** until after Labor Day and also delayed the President's nomination of Judge Homer Thornberry of the U. S. Court of Appeals as Justice Fortas' successor.

3 U. S. Pilots Freed—Three captured U. S. airmen were freed by Hanoi **July 18** for "humanitarian" reasons. The 3, shot down in raids over North Vietnam, were Maj. James F. Low, 43, of Sausalito, Calif.; Major Fred N. Thompson, 32, of Taylor, S. C., and Capt. Joe V. Carpenter, 37, of Victorville, Calif. Kept in Hanoi until **Aug. 2**, the 3 were flown to Vientiane, Laos, in an International Control Commission plane. From there they arrived in New York **Aug. 4** via commercial airliner.

LBJ, Thieu in Hawaii—Following a 10-hour conference in Honolulu **July 19** with South Vietnamese Pres. Nguyen Van Thieu, President Johnson said he had affirmed that his Administration was "determined" to defend South Vietnam while exploring every avenue to peace. Thieu

said he had no doubts about the commitment of both countries to work closely together in defense of his country and to keep "aggression" from succeeding.

LBJ Addresses Governors—Asserting "we are doing everything we can to get the enemy to meet us halfway," President Johnson at the annual Governors Conference in Cincinnati **July 23** defended the Administration's Vietnam policies. He also stressed the need for Federal and state cooperation in tackling such major domestic problems as crime, unemployment of the disadvantaged, urban blight and inadequate health problems.

INTERNATIONAL

Soviets Pressure Czechs—The Kremlin conducted a 3-prong campaign—military, propaganda and diplomatic—in **July** to pressure the Czechs into backing down on the liberalization program of Alexander Dubcek's regime, starting with a reluctance to remove Soviet troops which should have been out of the country by **July 1** after a month of Warsaw Pact troop army games. The Russian and East bloc press kept up a steady attack on the "counter-revolutionary" forces which were trying to make the "people's democracy" more democratic. After a diplomatic cat-and-mouse game, in which Dubcek, backed solidly by his countrymen, declined a Kremlin summons to a Warsaw meeting **July 14** and **15** and an invitation to come to Moscow, the Russians **July 22** made an unprecedented concession: the 11-member Politburo, which had never left the USSR in a body, would meet with Czech leaders in their country. **July 23** the Kremlin announced it would hold war maneuvers on its western borders up through **Aug. 10**. With troops and a great show of military strength along its 1,000-mi. frontier from the Baltic to North Seas, the meeting was held in Cierna, just inside Slovakia at the Soviet border **July 29-Aug. 1** in strictest secrecy.

Kennedy Round Cuts Start—Tariff cuts stipulated under the year-old Kennedy round agreement to reduce the western world's tariffs by 35% over a 5-year period were started **July 1** by the 18 member nations of GATT (General Agreement on

Hunger Joins War on Secessionist Biafra

After 14 months of cruel and bitter civil war, secessionist Biafra, home of the Ibo tribe, was outmanned and outgunned by Nigeria and driven from rich crop-lands into a landlocked circle of rain forest entirely surrounded by federal troops and almost completely cut off from food supplies.

Malnutrition was killing at least 6,000 a day, or 42,000 a week, of the 8,000,000 Ibos crowded into an area one-fourth the size of Biafra's original territory, according to a July estimate by Dr. Herman Middlekoop, representative of the World Council of Churches in Biafra. Pictures of starving Ibo children touched the conscience of the world but the intransigence of both sides kept food and medicine from reaching noncombatants. A Nigerian official said **July 2** that Biafra was using starvation to win world sympathy.

Tons of food were flown in at great expense and risk by relief agencies since Nigeria **July 5** had warned that unauthorized planes would be shot down and offered to set up land mercy routes, insisting on searches for arms in the shipments. Biafrans, fearing the food was poisoned, refused to touch it.

UN Secy. Gen. U Thant **July 10** urged

Biafran leaders to settle for land routes and "to cooperate more fully, with the international community in its genuine endeavors to ameliorate the miserable plight of the peoples of that region."

Caritas, the international Catholic relief organization, reported **July 15** it had flown 30 plane-loads of food and medicine, about 315 tons, to Biafra since March. The World Council of Churches, which had raised \$3,800,000 since March, **July 15** voted for an additional \$3,000,000 for relief for both Nigeria and Biafra.

Despite reports of food buildups in nearby Spanish and Portuguese islands and in Lagos, Dr. Middlekoop said **July 21** the supply reaching Biafra had actually been declining. He said that since **July 1** some 123 tons of food had been brought in by Caritas, the World Council of Churches and the Red Cross, and this amounted to "less than we got in 3 weeks in April and May."

The U. S. announced **July 12** it was donating \$1,300,000 worth of food, bringing the total of U. S. contributions and supplies to \$2,500,000 and the total from all private and public U. S. sources to \$4,300,000.

Tariffs and Trade). The cut for most of the members constituted 40% of the total planned in the accord. Those participating included the 6 Common Market nations, Britain, Japan, Norway, Sweden, Denmark, Finland, Spain, Brazil, India, Pakistan, Ceylon and Nigeria. At the same time, the Common Market countries dropped all remaining tariffs among themselves and aligned their common external tariff with Kennedy round cuts. France went along with the cuts, but because of her revolt-weakened economy imposed temporary import quotas and export subsidies.

Canadian Medicare—The Canadian Medical Care Insurance Program got under way July 1, in British Columbia and Saskatchewan, with the Federal government sharing equally costs for the free medical service. The 1st year's cost of the program was put at \$82,000,000 by Health Min. Allen J. MacEachen, who predicted all provinces would be participating in the plan by 1970.

Nasser in Moscow—Following conferences with Krenlin leaders during a visit to Moscow July 4-10, UAR President Gamal Abdel Nasser, accompanied by Lt. Gen. Abdel Moneim Riad, UAR chief of staff, joined his hosts in a communique condemning "Israel and the imperial forces supporting it." In the communique

the Soviets pledged continued economic and political support of the UAR and in "strengthening its defense potential."

French Pacific A-Tests—With the explosion of a conventional atomic device one-third of a mile above Mururoa Atoll in the Pacific, France resumed its nuclear testing program July 7. The test, the 13th French atmospheric detonation, was the first since July 2, 1967. Fearing radioactive pollution of the atmosphere, Japan, Peru, New Zealand and the Polynesian Territorial Assembly lodged protests against it. A 14th test over the atoll, second in the series believed to be a prelude to a French hydrogen bomb explosion, followed July 15.

De Gaulle Drops Pompidou—President Charles De Gaulle July 10 named Maurice Jacques Couve de Murville, 61, to succeed Georges Pompidou, 57, as premier of France. The move spurred wide speculation, coming as it did after the Gaulists' popular sweep in the June elections, much of which was credited to Pompidou. The new premier, who had been finance minister, formed a cabinet two days later, composed largely of members of Pompidou's cabinet, including such key members as Michel Debré, kept on as foreign minister; Andre Malraux, as cultural affairs minister; Pierre Messmer, as armed forces minister, and Raymond

Pope Paul VI Issues Birth Control Ban

An encyclical condemning all methods of birth control except rhythm as against the will of God was promulgated by Pope Paul VI July 25. The pronouncement, "Humanae Vitae" (Of Human Life), made public July 29, upheld the doctrine of Pope Pius XI in 1930 proclaiming that "each and every marriage act (of sexual intercourse) must remain open to the transmission of life."

The declaration, coming after a 5-year period in which the Church had indicated it was mulling changes in its traditional stand on contraception, stirred gales of protest from Catholic and non-Catholic clergy and laymen. It rejected the recommendations of the 75-member Commission for the Study of Problems of Population, Family and Birth Control appointed by Pope John XXIII in March 1963 and the Vatican II Ecumenical Council, which had approved the spacing of children by contraception provided a man and wife recognized their obligation to God, to each other and the creation of a family.

Many Catholics declared they would refuse to heed the ban and theologians of other religions joined Catholics in insisting the encyclical was not binding on married Catholics who have reason to practice birth control. Such factors as mutual love and social circumstances should also be considered in guiding the conscience on the morality of contraception, the Dutch hierarchy advised Catholics in refusing to support the encyclical.

Many of the hierarchy were openly disappointed—like Franciscus Cardinal Koenig of Vienna, who tried to keep the Pope from publishing the declaration. Other clerics expressed outrage. "It is incredible that the Pope could even be thinking about issuing such a statement," said the Rev. Charles Curran, vice president of the Catholic Theological Society of America and professor at Catholic U. on July 27. Father Curran and 172 U. S. theologians and other Catholics, including all 6 American lay members of the

pontifical birth control commission, July 30 rejected it as outdated and inadequate and urged couples to decide for themselves, "according to their consciences."

"Rome has spoken," Richard Cardinal Cushing of Boston said July 29 and, according to an old Church proverb, that would have indicated that the case was closed but the protests grew to tidal wave proportions.

At the Lambeth Conference of Anglican bishops July 30, the Rt. Rev. J. R. Moorman, a Church of England observer at Vatican II, called it "ecumenically, a disaster for Christianity."

The encyclical also urged world leaders to prevent the use of birth control methods that "allow the morality of your peoples to be degraded" and warned that "directly willed and procured abortion, even if for therapeutic reasons . . . (was) absolutely excluded as licit means of regulating births," adding that sterilization, whether perpetual or temporary, whether of the man or woman was also prohibited. The impact of the edict on population control programs in such areas as Latin America was of special concern to many. A West Berlin paper, Die Zeit, asked: "How is this Papal decree reconcilable with the command to love thy neighbor, when we already know that between now and 1980 approximately 40,000,000 people will starve to death?" Archbishop Thomas Roberts, a Jesuit pacifist and former Bishop of Bombay, said in London July 29 that the encyclical "flies in the face of reality."

In a message July 31, the National Conference of Catholic Bishops came to the defense of the Pope. Asserting that "we are aware of the difficulty that this teaching lays upon so many of our conscientious married people," the bishops' statement said "we must face the reality that struggling to live out the will of God will often entail sacrifice." Bishop Fulton J. Sheen of Rochester Aug. 4 praised the Pope's "courage to oppose mass demand for the frustration of life."

Marcellin, as interior minister.

Seaway Strike Ends—A pact calling for a 19% wage increase over 3 years **July 14** ended a strike of some 1,250 bridge and lock operators, maintenance men and other workers on the St. Lawrence Seaway. The strike, called by the Canadian Brotherhood of Railway, Transport and General Workers **June 21** tied up 71 ocean-going vessels and about 200 Canadian Lake vessels. It cost shippers, workers and the St. Lawrence Seaway Authority about \$15,000,000.

Geneva Talks Resume—The UN Disarmament Committee, which had been in recess since **Mar. 4**, reconvened in Geneva **July 16**. William C. Foster, chief U. S. delegate and co-chairman of the 18-nation conference, read a message from President Johnson urging the parley to come up with a "workable" plan to bar "weapons of mass destruction" from the sea bed.

Coup in Iraq—A group of Iraq army officers sympathetic with the right wing of the Baath Socialist party toppled the government of Pres. Abdel Rahman Arif **July 17**. The Revolutionary Command Council, with Maj. Gen. Ahmed Hassan al-Bakr, 56, a former premier and defense minister, at its head, called the leftist Arif regime "opportunists, thieves, ignorant, illiterate Zionist spies" and urged liberation of Palestine "now, not tomorrow."

Canada Postal Strike—All postal service in Canada came to a halt for 22 days when some 24,000 letter carriers and postal workers went on strike **July 18** after rejecting the government's **July 17** pre-strike pay offer as inadequate. Negotiators reached an accord **Aug. 6** after more than 30 hours of non-stop bargaining. The strikers **Aug. 8** approved a contract retroactive to **Aug. 1**, 1967, with a pay increase amounting to 15.1% over 26 months on the average hourly wage of \$2.57. They returned to work **Aug. 9**.

Israeli vs. Arab Guerrillas—Clashes along the west bank of the Jordan River **July 17-22** took a heavy toll of Arab guerrillas, bringing to 59 the number killed since early June, according to Israeli army figures. Seven more, identified as members of Al Fatah, were killed **July 26** in a two-hour clash with Israeli army troops near Jericho. Two Israelis were killed and 10 wounded in the earlier clashes, while two Israeli officers were killed in the Jericho engagement.

Arabs Hijack Israeli Plane—Three armed Arab guerrillas **July 23** hijacked an Israeli commercial airliner en route from Rome to Tel Aviv over Italian airspace and forced it to land in Algiers. The 19 non-Israeli passengers were flown to Paris in an Algerian plane later in the day, while 10 Israelis, including 4 women, 3 children and 3 of the plane's hostesses, were released **July 27** and flown to Geneva. However, the Algerian government continued to hold 7 crew members and 5 Israeli passengers, as well as the El Al Boeing 707 jet. Israel **July 23** denounced the act as "airborne hijacking" and **July 28** called on the UN to help negotiate for the release of the plane. Algeria denied being "involved" in the hijacking. The hijackers were members of the Popular Front for the Liberation of Palestine, which claimed **July 23** its members had taken over the plane without any advance knowledge of the Algerian government. **July 24** it said it had asked the International Red Cross to supervise the ex-

change of the Israeli crew and passengers in Algiers for captured Palestinian guerrillas imprisoned in Israel. On **Aug. 31** Algeria freed the 7 crew members and the last 5 passengers, two weeks after the International Federation of Airline Pilots' Association dropped a threatened boycott of Algerian airports on condition that they be released.

GENERAL

Seamen Win Wage Hike—A contract providing a 5% wage hike and 15 more vacation days **July 1** ended the 3-day seamen's strike called by the AFL-CIO Maritime Union against 73 firms bargaining through the Maritime Service Committee and Tanker Service Committee. The strike idled more than 100 freighters and involved some 45,000 seamen.

N. Y.-Moscow Air Link—After 7 years of diplomatic and technical delays, direct airline service between New York and Moscow was launched **July 15**. Commercial jets of the two countries were scheduled to make one round trip a week each between the two cities.

Cleveland Ghetto Riot—A small band of black nationalists the night of **July 23-24** fired rifles pointblank at two policemen in a squad car on the edge of the city's Glenville ghetto district. With snipers shooting from all sides, the outgunned police called for reinforcements and in the 4-hour pitched battle which followed 7 persons were killed—3 black nationalists, 3 white policemen and a Negro who had tried to help the wounded policeman. The eruption ignited a full scale riot and looters and arsonists rampaged through Glenville and nearby Hough, and 3 more Negroes were killed. Damage on insured property was estimated at \$1,500,000. Altogether, 23 persons were wounded—15 in the 1st gunfight. Some 2,700 National Guardsmen brought tenuous order by dawn. Mayor Carl Stokes pointed out that while previous riots had been "a spontaneous reaction to an unresponsive environment," the Glenville conflict had been planned by a few "determined men." Their alleged leader was 37-year-old Fred (Ahmed) Evans, an astrologer in African robe, who had received a summer grant from Stokes' "Cleveland: Now" action group. Evans calmly surrendered to the police, after his gun had jammed. Stokes the 2d night withdrew all white police and National Guard and replaced them with some 100 Negro policemen and about 500 Negro civilian volunteers, most of them militants, who with the aid of heavy rain "cooled it." Some looting continued but the rioting stopped. On the night of **July 25** he brought back the integrated police and some Guards and imposed a 9 p.m.-6 a.m. curfew, having ordered all bars and liquor shops to close. Evans **July 26** was charged with 1st degree murder of the 3 policemen. The 400 Guardsmen were returned to their armories **July 27**.

Ted Kennedy Says No—In a statement **July 26**, Sen. Edward M. (Ted) Kennedy (D., Mass.) said he would not accept the Democratic Vice Presidential nomination if it were offered him. His "final decision," given for "personal reasons," ended speculation that he might be Vice President Humphrey's running mate in the hope that his candidacy would have a unifying effect on the party.

Steel Pact Spurs Price Tiff—The AFL-CIO United Steelworkers of America (USW) and 11 big steel producers reached accord **July 30** on a 3-year contract providing a package hike of about 6%. The

package, covering about 400,000 workers, was valued at about 90 cents an hour per worker over 3 years by the steel giants and well over \$1 billion by USW Pres. I. W. Abel. Bethlehem Steel July 31 announced a 5% across-the-board steel price rise. The same day the steel firm reported a jump in profits for the 2d quarter and 1st half of 1968, attributing it to consumer steel stockpiling as a hedge against a possible strike. President Johnson July 31 resisted the price hike as an "inflationary threat." Bethlehem was adamant and later, July 31 Republic Steel announced 4½% increases and other firms followed suit. The price dispute between the Administration and the industry continued until Aug. 7, when U. S. Steel Corp., the largest producer, posted hikes averaging 2½% and others, including many who had slated higher increases, adjusted to that figure.

DISASTERS

Gas fumes from a sewer line at a Canton, N. C., paper mill killed two July 3, hospitalized 4 . . . Seven persons and 8 horses perished July 3 when a British cargo plane carrying racehorses from France crashed into two parked jet airliners at London airport . . . Five members of a family died in crash of twin-engine plane July 3 in a field near Gasport, N. Y. . . . Torrential rains in Seoul, South Korea, July 4 killed 12 persons . . . Two horses perished but 125 were led to safety July 4 when a fire swept through barns at Charlottetown Driving Park, Prince Edward Island . . . A Clyde Beatty-Cole Bros. Circus tent collapsed during a thunder storm in Auburn, N. Y., July 9, trapping 300 and injuring at least 110 . . . Thousands were left homeless and 66 perished in Pakistan floods July 14 . . . Mexicali, Mexico, heat wave July 12 killed 40 persons, mostly children . . . Torrential rains and floods in 3 states in India swept away hundreds of homes, isolated dozens of villages and left 45 dead July 14 . . . Nine persons were killed and 6 seriously injured when a truck carrying 20 crashed over a bridge parapet near Beni Mellal, Morocco, July 15 . . . Fresh areas of the South Indian state of Kerala were swamped by flood waters July 20, killing 6 and driving thousands from their homes . . . An emerald mine tunnel cave-in near Bogota, Colombia, July 20 killed 8 miners, trapped 7 . . . Fire swept through wing of Sahara Hotel, Las Vegas, Nev., July 20, routing 400 guests and injuring 29 . . . Seven were badly burned July 21 when their 19-foot motorboat exploded and burst into flames in Norwalk, Conn. . . . A train collided with a bus carrying 39 migrant farm workers in Newtonville, N. J., July 23, killing 9 of the laborers and injuring 16 . . . A typhoon cut across southern Japan July 28, leaving 22 victims, most drowned in flood waters . . . About 4,000 refugees fled when Costa Rica's Mt. Arenal volcano erupted for 4 days, July 29-Aug. 1, killing 78, injuring more than 100 and leaving many missing.

August—1968

NATIONAL

U. S. Viet Forces Up—American troops in South Vietnam rose to 541,000, according to a U. S. command announcement Aug. 1.

Vietnam War Intensifies—Allied forces swept the Ashau Valley Aug. 4-6 as Vietnam fighting intensified from the Mekong Delta to the demilitarized zone. Heavy civilian and army casualties resulted from accidental ground and air attacks Aug. 8, 9 and 10. U. S. and enemy casualties

rose as fighting grew more savage Aug. 18-31, especially in the Mekong Delta, the Saigon area and the northern provinces. In the highest weekly combat loss since June 1, 408 Americans died Aug. 25-31. Enemy deaths for the week were put at 4,755, most of them in the attack on a U. S. camp at Duclap in the mountains near Cambodia. At month's end, total U. S. casualties reported since 1961 came to 27,508 killed and 171,809 wounded. As of Aug. 29, 3,000 civilians had been reported killed in terrorist attacks since Jan. 1 and the Viet Cong had kidnapped 4,850.

Paris Peace Talks—There was no progress in Paris peace talks Aug. 7, 14, 21, and 28 as Hanoi representatives continued to press for an unconditional end to U. S. bombing in North Vietnam.

FRB Discount Rates Cut—The Federal Reserve Board (FRB) cut its basic discount lending rate from 5½% to 5¼% Aug. 16. President Johnson hailed the move as a needed stimulus to homebuilding.

'Up to Hanoi Now!' LBJ—The "next move" was up to Hanoi, President Johnson told the Veterans of Foreign Wars at their convention in Detroit Aug. 19. He declared the U. S. would take no further steps to de-escalate in Vietnam until Hanoi indicated it would make a serious move toward peace. "We have made a reasonable offer and we have taken first a major step," he said, referring to the Mar. 31 bombing curtailment and offer to halt bombing in return for "prompt de-escalation" by Hanoi.

Envoy to Guatemala Slain—Terrorists shot and killed John Gordon Mein, 54, U. S. Ambassador to Guatemala, Aug. 28 after stopping his car while he was enroute back to the Embassy after a luncheon. Mein, the first U. S. ambassador murdered at his post, had been in Guatemala since September, 1965. A pro-Communist guerrilla group, the Rebel Armed Forces (FAR) announced Aug. 29 it had planned to kidnap the envoy in retaliation for the government's capture Aug. 24 of a FAR leader.

Eisenhower Rallies—After suffering two heart attacks, his 6th and 7th, Aug. 6 and 16, former President Dwight D. Eisenhower was removed from the critical list Aug. 29. His 6th attack came 10 hours after he had addressed the GOP convention by closed circuit TV from his suite at Walter Reed Army Medical Center in the capital. He suffered continual heart spasms known as ventricular fibrillations and cardiac irritability after his 7th attack. An electronic pacer placed in his heart Aug. 18 was removed later that day as unsuccessful. He suffered new attacks of irritability and spasms Aug. 21 and 24 but improved steadily, and by Sept. 3 the hospital stopped issuing daily bulletins.

INTERNATIONAL

Congo-Brazzaville Coup—Coup leaders reversed themselves and called back Pres. Alphonse Massamba-Debat of the Republic of Congo-Brazzaville Aug. 4, a day after they had ousted him. Capt. Marien Ngouabi, a paratroop commander who reportedly had led the left-wing Army officers' coup, was named army commander by the returned president on Aug. 5.

UN Raps Israeli Raids—The UN Security Council met Aug. 5 to study a new Middle-east flareup after a 3-hour Israeli air raid on Arab guerrilla bases 10 mi. inside Jordan Aug. 4, during which both countries exchanged tank and artillery fire across the Jordan River. Israeli helicopter-borne troops Aug. 6 pursued a band of Arab

guerrillas into Jordan, blew up their jeep and a cave believed to have been their base. On Aug. 16 the Security Council unanimously condemned Israel's Aug. 4 air attack as a "flagrant violation" of the UN Charter and the Council's Mideast resolution.

Tito Visits Prague—Yugoslavia Pres. Tito Aug. 9-11 visited Prague to indicate his support of Communist chief Dubcek. He was followed Aug. 15-17 by Romanian Pres. Nicolae Ceausecu, also a sympathizer with the reformist regime.

Biafra Relief Stalled—Nigeria Aug. 15 rejected a plan of the International Committee of the Red Cross in Geneva to fly food to starving Biafra via a neutral airstrip. The Red Cross deplored the rejection Aug. 17, asserting in a joint statement with other relief organizations that the civil war was its biggest emergency since World War II. Its relief flights, as well as those of other agencies, had been suspended since Nigerians fired on a Red Cross-chartered plane Aug. 8-9. A private U. S. organization, the American Committee to Keep Biafra Alive, focusing on the starving children, demonstrated in front of UN headquarters in New York Aug. 8 and 18 and called for quick international relief. Other U. S. groups, including several church agencies, also raised funds. Meanwhile, new peace talks, which opened in Addis Ababa, Ethiopia Aug. 5, brought neither side closer to agreement on ending the conflict. An Aug. 14 session on getting relief to victims of the civil war came to naught.

French Fusion Bomb—France became the world's 5th thermonuclear nation Aug. 24 with the explosion of a fusion bomb suspended from a balloon one-third of a mile above its Mururoa Atoll test site. The explosion, after 8 years and 15 atmospheric tests of fission devices, released energy equal to that produced by the blast of 2,000,000 tons of TNT, according to a Paris report Aug. 27.

GENERAL

Wolfson Convicted—Louis B. Wolfson, 55, Florida financier, and 3 of his associates

were convicted in New York Aug. 8 of violating the Securities and Exchange Act. They were found guilty by a Federal jury in connection with selling and buying of stock of Merritt-Chapman & Scott Corp., a shipbuilding, construction, chemicals and money-lending firm, currently being liquidated.

Poor People Demonstrate—Describing the demonstrators as "representatives of the 51st State—that of poverty," the Poor People's campaign moved to Miami Beach Aug. 5 to confront the GOP delegates. The Rev. Ralph D. Abernathy, leader of the drive, lauded N. Y. Gov. Nelson A. Rockefeller Aug. 6 as "one of the last chances for the Republican Party to really win back the black vote." Making the rounds of the major candidates' headquarters Aug. 7, the demonstrators were cheered at the Rockefeller hotel, met with a counter-demonstration at Nixon HQ and were barred from a Reagan press conference.

Detroit News Blackout Ends—The 267-day news blackout in Detroit ended Aug. 9 when the city's two daily papers, shut by labor disputes, resumed publication after an agreement on new pacts calling for a \$33-a-week pay raise over 34½ months. A strike by the Teamsters Union against the Detroit News had started the shutdown Nov. 15, 1967. Two days later, the Detroit Free Press closed.

McGovern in Presidential Race—Sen. George S. McGovern (S. D.), 46, announced his entry in the Democratic Presidential race Aug. 10, asserting he was committed to the "twin goals for which Robert Kennedy gave his life—an end to the war in Vietnam and a passionate commitment to heal the divisions in our lives here at home."

Pope Visits Colombia—In the first Papal visit to South America, Pope Paul VI went to Bogota, Colombia, Aug. 22-24 for the 39th International Eucharistic Congress of the Roman Catholic Church. Warning against the use of "violence and revolution" as being "contrary to the Christian spirit," he called for social and economic reform on the continent. Welcomed by cheering crowds everywhere,

Soviet Union Invades Czechoslovakia

More than 200,000 Soviet troops, augmented by token forces from loyal Warsaw Pact puppets, invaded Czechoslovakia Aug. 20-21.

The outraged populace staged a stunning nonviolent campaign since physical resistance was useless as Soviet tanks and paratroops took over Prague and other key areas. Their force rose to 650,000 in a week. Throngs of unarmed Czechs gathered, proclaiming their loyalty to Communist Party First Secretary Alexander Dubcek, who with 6 other liberal Czech Communists, had been taken to an unknown destination.

As the invaders solidified their position, 1,200 delegates to the Czech Communist party Aug. 21-22 held a clandestine meeting and elected a new and liberal presidium which told the Russians to get out or face a general strike. The strike lasted one hour as 20,000 peaceful demonstrators marched in Prague's Wenceslas Square in front of Soviet tanks and soldiers, shouting, "Russian murderers go home."

The world outcry against the invasion included protests from some major Red parties. The U. S. and 6 other nations took the issue to the UN Security Council, demanding condemnation of the invasion. The action met with the Soviet Union's 105th veto after it was approved 10-2 Aug.

23; only Hungary voted with the Kremlin.

Concern centered on the fate of Dubcek and there were unconfirmed rumors he had been killed. Vowing he would not bow to a Moscow-imposed puppet regime, Czech Pres. Ludvik Svoboda left for the Kremlin Aug. 23 to attempt to resolve the crisis.

Dubcek and Svoboda returned to Prague Aug. 27 and urged their people to remain calm in the face of Soviet demands for reversal of the regime's liberalization of Communism. The people cried betrayal at first, when the price they would have to pay was announced Aug. 29: They would have to settle for loss of some of their most precious recent reforms—liberalization of the press and the right to form non-Communist political organizations.

Moscow agreed in turn to send some troops home and to withdraw eventually, but there were no guarantees for that "other than our own wisdom," Natl. Assembly Pres. Josef Smrkovsky said Aug. 29. A new 21-member ruling presidium superseding the one chosen at the secret Aug. 23 meeting was elected Sept. 1. The new presidium, again headed by Dubcek, was chosen after a two-day Prague meeting in which plans to reshuffle the government to suit the Soviets were made.

he denounced "the unjust economic inequalities between rich and poor, and abuses of authority and administration against you and the community" in addressing 35,000 peasants Aug. 23.

DISASTERS

At least 307 perished in Manila earthquake Aug. 2 . . . Seven died in British freighter fire 800 mi. off New Zealand coast Aug. 5 . . . Mine shaft explosion near Greenville, Ky., Aug. 7 killed 9 . . . Interstate bus plunged over precipice near Rio De Janiero, Brazil, Aug. 9, killing 6, injuring 14 . . . British airliner crash north of Munich Aug. 9 left 48 dead . . . Thirty-five of 37 aboard died in Piedmont Airlines plane crash Aug. 10 just short of Charleston, W. Va., airport . . . At least 200 died and 500 disappeared in series of earthquakes and tidal waves starting in Celebes islands, Indonesia, Aug. 10 and ending with sinking of Tuguan island Aug. 15 . . . Italian oil tanker explosion off Sicily coast Aug. 11 killed 7, injured 7 . . . Los Angeles Airways helicopter crash in Compton, Calif., Aug. 14, on way to Disneyland, killed all 21 aboard . . . Overflowing dam flooded 3 villages in northeastern Nicaragua Aug. 14, leaving 2,000 homeless, 19 missing . . . Floods in GurGujarat and Rajasthan, India, claimed more than 1,000 lives in 7 days, according to Bombay reports Aug. 14 . . . At least 21 were killed when a factory making explosives for toy pistols blew up Aug. 16 in Ibi, Spain . . . All 40 aboard perished in Egyptian airliner plunge into Mediterranean north of Port Said Aug. 18 . . . At least 102 women and children were killed when two sight-seeing buses were swept into typhoon-rain swollen river during Honshu, Japan, landslide Aug. 18 . . . Earthquake in Donggala city, Celebes, Indonesia, killed 200 Aug. 20 . . . All 10 aboard a bus died in collision with a truck near Tarragona, Spain, Aug. 20 . . . Eight were killed, 3 injured while fighting brush fire in Glendora, Calif., Aug. 24.

September—1968

NATIONAL

Paris Talks Stalemate—U. S.-North Vietnam talks in Paris Sept. 11, 17 and 25 continued at a stalemate, with both sides airing conflicting battlefield claims.

Savage Vietnam Battle—A savage battle Sept. 11-16 in and around Tay Ninh, a major invasion route to Saigon, cost the Communists at least 500 men killed. The Allied toll was more than 200 killed or wounded. In one of the longest sustained U. S. thrusts inside the southern half of the DMZ, 2,000 Marines were airlifted to the southern half Sept. 17 to prevent an expected drive south by two Hanoi Divs. and to neutralize enemy pressure on Allied outposts along the 40-mi. stretch. They were bolstered by 4,000 more Sept. 27. The New Jersey, the world's only active battleship, which had arrived from the U. S. after its release from the mothball fleet, shelled enemy targets in the DMZ Sept. 30.

Ball Leaves UN Post—George W. Ball, chief U. S. representative to the UN, resigned Sept. 26 to join Vice President Humphrey's Presidential campaign staff as top foreign policy adviser. His resignation after 5 months at the UN was announced by President Johnson, who designated James Russell Wiggins, 64, editor and executive vice president of the Washington Post, as Ball's successor.

INTERNATIONAL

Massamba-Debat Ousted—Congo-Brazzaville Pres. Alphonse Massamba-Debat was

ousted again Sept. 4 for failing to "assure peace and national unity" by the military government following fierce fighting between regular army units and a Cuban-trained militia of some 300 men. The rebels reportedly had resisted incorporation of the militia into the army, which took over their camp late Aug. 31. The junta, headed by Capt. Marien Nguabi, named Alfred Raoul interim president.

'Final' Nigerian Assault—Nigeria claimed the capture of the Biafran cities of Aba Sept. 4 and Owerri Sept. 16 in what the army described as its "final offensive" against the secessionist state. Federal troops were reported marching on Umuahia, the last remaining city held by the Biafrans and headquarters of their military leader. Lt. Col. Chukwuemeka Odu-megwu Ojukwu.

UN Truce Bid—The UN Security Council, meeting since Sept. 4 to study Israeli charges that Egyptians had kidnapped an Israeli soldier after killing two others in an ambush along the Suez Canal, Sept. 18 called on Israel and the Arab states to respect the Council's cease-fire orders and urged them to cooperate with UN envoy Gunnar V. Jarring's Mideast mission.

Czechoslovak Crisis Continues—Soviet 1st Deputy Foreign Min. Vasily V. Kuznetsov arrived in Prague Sept. 6 to confer with Czechoslovak leaders for 5 days on the Moscow agreement. In line with that accord, two quasi political clubs formed in the wake of the liberalized Dubcek program were outlawed Sept. 6. This followed the banning Sept. 2 of 3 journals termed "counterrevolutionary" by the Soviets. Premier Oldrich Cernik in an economic mission to Moscow Sept. 10 signed two trade protocols. One provided for the USSR to build a natural gas pipeline from Kiev. The other was not disclosed. Soviet tank units moved from conspicuous positions in Prague to the surrounding countryside Sept. 11, but continued to occupy strategic areas such as the international airport. The National Assembly Sept. 13 reimposed "preventive censorship." Dubcek appealed for public order Sept. 14, urging his people not to provoke clashes with the occupying troops. After intensive Soviet pressure for his dismissal, Foreign Min. Jiri Hajek was ousted Sept. 19. Hajek, who had been in Yugoslavia at the time of the invasion, had put his country's case against the occupation before the UN. A Dubcek mission to Moscow authorized by the presidium due to rising disagreement over the interpretation of the Moscow agreement was cancelled Sept. 24.

UAR-Israeli Clashes Continue—Both Israeli and Egyptian forces suffered heavy casualties in a 4-hour artillery duel across the cease-fire line of the Suez Canal Sept. 8. The Israeli reported 10 soldiers killed, 17 wounded; Egypt, 5 soldiers and 6 civilians killed, 12 soldiers and 30 civilians wounded. Three Egyptian towns were reported heavily damaged. Arab saboteurs had carried out damaging explosive attacks in Jerusalem Aug. 18 and in Tel Aviv Sept. 4 as part of a stepped-up guerrilla terror drive against Israeli civilians. Sporadic guerrilla and Israeli patrol clashes continued along the cease-fire line and Sept. 25 Israeli Defense Min. Moshe Dayan said he feared another war was imminent. Israeli Foreign Min. Abba Eban Sept. 26 rejected a 4-point USSR plan to end the Mideast impasse as identical to a plan presented by the Soviets Nov. 22, 1967, which he said, called for Israeli withdrawal "without the possibility of sure and recognized frontiers."

2d French H-Bomb—France exploded its second hydrogen bomb Sept. 8 over its

Mururoa Atoll testing ground and announced the end of the two-month test series, which had included 3 atomic and two thermonuclear explosions, on Sept. 9.

France Vetoes UK Again—France for the 3d time vetoed Britain's entry into the European Common Market Sept. 27, when it turned down a West German interim plan to give the United Kingdom membership.

Canadian Parliament Opens—with a Liberal party majority in the House of Commons, Canada's Parliament opened Sept. 12. The traditional opening speech, read by Gov. Gen. Roland Michener to Commons and the Senate, was prepared by Prime Min. Pierre Elliott Trudeau and reiterated his pledge for a "just society."

West Bars Soviet Force—The U. S., Britain and France warned Russia Sept. 17 that carrying out its threats to use military force against West Germany would bring "immediate Allied response" under the North Atlantic Treaty.

Philippines Claims Sabah—A law claiming Malaysia's Borneo state of Sabah belonged to the Philippines Republic was signed by Philippine Pres. Ferdinand E. Marcos Sept. 18, and precipitated a rupture with Malaysia, which suspended diplomatic relations with the Philippines Sept. 19. There were international repercussions as well since the U. S. proclaimed its neutrality, for which it was assailed by Manila legislators Sept. 20. Thousands marched in protest against the Philippines in Malaysia Sept. 20. In retaliation for British support of Malaysia in the dispute, the Philippines Sept. 23 said UK and Australian ships could not go through Philippine waters without prior permission. Some 250 students attacked the British Embassy in Manila Sept. 27. Another demonstration in the U. S. Embassy grounds Sept. 27 protested the "insincere neutrality."

Mexican Army Seizes University—In a move to end 7 weeks of student agitation in Mexico City an army force of 1,300 seized the National University Sept. 18. This precipitated new clashes between students and police, causing at least 17 deaths through Sept. 24 and the arrest of more than 1,000 students. At least 15 were killed in fierce fighting Sept. 23-24 when students fired on police from university buildings and surrounding houses. Striking students returned after the army withdrew from the campus Sept. 30.

UN Assembly Opens—The UN General Assembly gathered at UN headquarters Sept. 24 for its 23d regular session, after a brief meeting Sept. 22, when the issue of Mideast peace was held over for the 23d term. With Guatemalan Foreign Min. Emilio Arenales Catalan presiding, the Assembly Sept. 24 unanimously elected the new African state of Swaziland as the UN's 125th member.

New Portugal Premier—Dr. Marcelo Caetano, 62, was named premier of Portugal Sept. 27 to succeed Antonio de Oliveira Salazar, 79, who had been in a coma from a brain hemorrhage since Sept. 16. Dr. Caetano, a long-time associate of Salazar, who had governed the country since 1932, was a law professor and businessman. He had been assistant premier from 1955 to 1958.

Greek Junta Charter Okd—Greek voters Sept. 29 approved the new constitution submitted by the ruling military junta to replace the 1952 charter. Final figures showed 4,638,543, or 91.7% of the 5,048,981 votes cast under military law were in favor of the constitution.

GENERAL

Humphrey Starts Drive—Vice Pres. Hubert H. Humphrey, Democratic Presidential candidate, launched his drive in a Labor Day parade in New York Sept. 2, marching beside AFL-CIO Pres. George Meany. In a sharp attack on Nixon's policy, Humphrey Sept. 8 said the Republican party had joined "forces with the most reactionary elements" to "exploit the fears and tensions that grip significant portions of our people." He pointed out he had fought reactionaries and extremists on the right for human rights, adding that now he was defending rights against extremism of both left and right. In the early stages of the campaign, crowds were small and mostly sprinkled with anti-war demonstrators. By the 3d week he stepped up his attacks on Nixon, but drew his biggest response in Sioux Falls, S. D., Sept. 19 and in Louisville, Ky., Sept. 20 when he pledged the end of the Vietnam war would be his chief goal if elected. While stumping in Ohio, Minnesota, California and Oregon Sept. 22-28, he stressed the need to reassess Vietnam issues, proposed a 50% increase in Social Security benefits over 4 years and a river conservation program.

Nixon Launches Campaign—Republican Presidential candidate Richard M. Nixon drew a crowd of some 450,000 persons when started his campaign with a Chicago motorcade Sept. 4. He was accompanied by Sen. Edward W. Brooke (R., Mass.), who told the crowd Nixon would unite the country, "black and white," and "do everything he can" to end the Vietnam war. Nixon drew large crowds everywhere. In Houston, Tex., Sept. 6 he said there was "not a dime's worth of difference" between his opponent's policies and "what we've had for the past 4 years." Discussing "law and order" at B'nai B'rith's convention in Washington Sept. 8, he declared some "people think it is a code for racism." Actually, he said, "order without progress is tyranny. You cannot have order without progress in a free society." He declared the balance of power in the Mideast "must be tipped in Israel's favor." Polls indicated Nixon was leading as he campaigned in California, Salt Lake City and Philadelphia Sept. 16-21. Campaigning in 9 states Sept. 23-28, he cited the Administration's high taxes and inflationary prices and said the country "cannot afford Hubert Humphrey as president." In Louisville Sept. 27 he wrote off Humphrey's attempt to get him to debate as "kid stuff." He described 3d party Presidential candidate George C. Wallace as Humphrey's "secret weapon" to "beat Nixon in the new South."

Muskie Campaign—Sen. Edmund S. Muskie (Me.) appealed to voters "to get our emotions under control" and to "start using our heads" in launching his Democratic campaign for Vice President in San Antonio, Tex., Sept. 8. Throughout his campaign he accented the issues of Vietnam and crime and scored 3d party Presidential candidate George C. Wallace. He deplored "playing upon the discontent and uneasiness of the voters" by "playing off one group of Americans against another."

Agnew Apologizes—Maryland Gov. Spiro T. Agnew put strong stress on "law and order" in his drive as GOP Vice Presidential candidate. In Washington Sept. 10 he charged Democratic Presidential candidate Hubert H. Humphrey had been soft on Communism. After criticism in his party as well as the opposition he retracted the statement Sept. 12. He came under fire again for using the terms "Jap"

and "Polack" in referring to Americans of Japanese or Polish ancestry and apologized for his faux pas **Sept. 23**, asserting it was "ridiculous" to accuse him, "son of a Greek immigrant," of being "insensitive to the national pride and heritage of other people."

DISASTERS

Death toll after weekend of earthquakes in eastern Iran was put at 10,000 **Sept. 2** . . . Single-engine plane exploded and crashed in thunderstorm near Wilkes-Barre, Pa., **Sept. 2**, killing all 3 aboard . . . Landslides from heavy rains in San Salvador **Sept. 2** killed 14 . . . Three soccer fans were killed in riot when stand collapsed during game in Bhanguara, East Pakistan, **Sept. 4** . . . Bulgarian airliner carrying East German tourists to Black Sea coast crashed near Burgas, Bulgaria, **Sept. 4**, killing 50 of 89 aboard . . . All 95 aboard perished **Sept. 12** when an Air France jet en route from Corsica to Nice crashed into stormy waters off the French Riviera . . . Dozens were injured and trapped in their homes when 3 earthquakes rocked Jahrum, Iran, **Sept. 15** . . . One died, 48 were injured in HemisFair monorail train crash **Sept. 15** in San Antonio, Tex. . . . Twenty-eight soldiers perished **Sept. 16** when their truck plunged over a cliff into the Kali River in northern Uttar Pradesh, India . . . Eleven persons were killed and 19 injured **Sept. 17** when their truck plunged into ravine near Bursa, Turkey . . . Diesel fuel-fed explosion and fire on freighter Cerberus, being broken up for scrap in Hong Kong, left 5 dead, 20 injured **Sept. 18** . . . Six children perished in landslide that destroyed their homes in San Jose, Costa Rica, **Sept. 20** . . . Chilean Air Force plane crashed into home in Santiago **Sept. 20**, killing 6 . . . Six died in French experimental plane crash **Sept. 20** in Farnborough, England . . . Head-on collision of two trains near Depok, Indonesia **Sept. 20** killed 30, injured 150 . . . Twenty-three persons were injured **Sept. 21** in 35-vehicle chain collision on fog-shrouded New Jersey Turnpike near Woodbury, N. J. . . . Twin-engined Navy plane crashed on landing at Lakehurst Naval Air Station, N. J., **Sept. 21**, killing 3 . . . One was killed, 11 were hurt in 30-car crash in heavy fog over U. S. 10 Freeway, Midland, Mich., **Sept. 23** . . . Eleven were killed, 23 injured and 22 escaped unhurt when Air Force jet tanker crash landed at Wake Island **Sept. 24** with one engine out . . . Nineteen perished **Sept. 28** in Madras, India, fireworks factory explosion.

October—1968

NATIONAL

LBJ Withdraws Fortas' Name—President Johnson **Oct. 2** withdrew his nomination of Supreme Court Justice Abe Fortas as Chief Justice of the U. S. after an effort to end a Senate filibuster to block the nomination failed. The withdrawal also voided the nomination of Judge Homer Thornberry to succeed Fortas as Associate Supreme Court Justice.

U. S. Jets for Israel—President Johnson **Oct. 9** gave State Secy. Dean Rusk the go-ahead signal to negotiate with Israel on its request to buy U. S. jet fighter-bombers. His directive was in line with a Foreign Aid Authorization Act amendment urging the U. S. to sell planes to Israel to prevent "future Arab aggression by offsetting sophisticated weapons received by the Arab states (from the USSR) and to replace losses suffered by Israel in the 1967 conflict."

Justice Warren to Stay—In the aftermath of the filibuster that "prevented" the Senate from voting on the nomination" of Justice Abe Fortas, President Johnson **Oct. 10** disclosed that Earl Warren, Chief Justice of the U. S., would stay on "until his successor qualifies."

LBJ Calls Bombing Halt—President Johnson **Oct. 31** announced that he was calling a complete halt to all American air, naval and artillery bombardment of North Vietnam as of 8 a.m. (EST) on **Nov. 1**. See *The War in Vietnam*, Page 40.

INTERNATIONAL

Mexico Students, Troops Clash—Women and children were killed when the bloodiest clash between students and troops in the 9-week student strike erupted **Oct. 2** in a Mexico City housing project plaza, where 6,000 had gathered for a march on the National Polytechnic Institute to protest army occupation of the campus. Conflicting reports put the toll at 28 to 200 dead, 200 to 500 wounded. Some 1,500 were jailed.

Rusk Hits Soviet Invasion—U. S. State Secy. Dean Rusk **Oct. 2** scored the Soviet invasion of Czechoslovakia in a major address at the U. S. 23d General Assembly. He charged the Russians were violating the UN Charter by flouting the occupied country's sovereignty and heating up the cold war. Soviet Foreign Min. Andrei A. Gromyko **Oct. 3** countered that the invasion was "self-defense taken by the Socialist countries against imperialistic intrigue."

Peru's Belaunde Ousted—Peruvian military leaders early **Oct. 3** ousted Pres. Fernando Belaunde Terry, 55, in a bloodless coup and put him on a plane to Buenos Aires, Argentina. Gen. Juan Velasco Alvarado, 58, Army chief of staff and president of the joint chiefs of staff, took over as president of the new "Revolutionary Government."

Prague Yields to Kremlin—After two postponements and one cancellation, Czechoslovakia's leaders finally went to Moscow **Oct. 3-4** and gave in to Kremlin pressure to abandon the remnants of their 8-month liberalization program and to let Soviet troops stay on. Although press censorship had been reimposed, Czech newspapers **Oct. 5** scored the "lies" in Soviet news media, which leveled a steady propaganda barrage at the Czech "slowness" in "normalization." Soviet Premier Aleksei N. Kosygin and other Russian officials signed in Prague **Oct. 16** a treaty giving the USSR the right to station troops in the country "temporarily."

Israel Submits Peace Plan—Israeli Foreign Min. Abba Eban **Oct. 8** detailed a 9-point Mideast peace plan at the UN General Assembly. The program, providing for withdrawal of Israeli troops from Arab territories in exchange for a permanent peace treaty, called for secure boundaries, a mutual nonaggression pact, open frontiers, freedom of navigation, solution of the Arab refugee problem, new arrangements for Jerusalem's religious shrines, mutual recognition of sovereignty and regional cooperation.

UK-Rhodesia Talks Fail—British Prime Min. Harold Wilson and Ian D. Smith, his Rhodesian counterpart, met aboard the British warship Fearless in Gibraltar harbor **Oct. 9-13**, but failed to agree on the problem of eventual black majority rule in Rhodesia.

Junta Ousts Arias—Arnulfo Arias, 67, inaugurated President of Panama **Oct. 1**, was ousted in a coup by the National

Guard Oct. 11. A junta headed by Col. Jose M. Pinilla and Col. Bolivar Urrutia, named President and Vice President, respectively, took over **Oct. 12.** Arias, who took refuge in the U. S.-controlled Canal Zone **Oct. 12,** flew to Washington **Oct. 22** and "symbolically" occupied the Panama Embassy for a day, asserting he was still his country's constitutional president. Pro-junta men moved in again **Oct. 23.**

New Quebec Separatist Party—Two Quebec separatist groups merged at a convention in the city of Quebec **Oct. 11-14** to form the Parti Québécois (PQ), dedicated to independence by peaceful, democratic means for a republican Quebec linked in an economic union with Canada. René Lévesque, head of the Mouvement Souveraineté-Association, one of the groups, was elected president and Gilles Grogier, head of Ralliement National, the other, vice president.

GENERAL

Humphrey Campaign Trail—Vice President Hubert H. Humphrey **Oct. 1** said in a radio address in Nashville, Tenn., he would run thereafter as the Democratic "candidate and leader of my party" and not as Vice President. The previous day, in Salt Lake City, Utah, he pledged he would stop the bombing of North Vietnam "as an acceptable risk for peace" if he should be elected President. He challenged Nixon to TV debates **Oct. 7** and **Oct. 20,** but the GOP candidate would not be drawn into them.

Wallace Tags LeMay as VP—At a joint TV press conference in Pittsburgh, Pa., **Oct. 3,** George C. Wallace, 3d party Presidential candidate, introduced Gen. Curtis E. LeMay, 61, former Air Force Chief of Staff, as his Vice Presidential running mate. LeMay's remarks on the use of nuclear weapons stirred controversy and brought expressions of concern from both major party candidates **Oct. 4.** LeMay said he would use nuclear arms "if it was necessary," but he added, "I don't think it's necessary in this case or this war to use" them.

Nixon Campaign—GOP Presidential candidate Richard M. Nixon, engaging in a 5-day-a-week campaign schedule across the country and resting weekends in Key Biscayne, Fla., told UPI editors and publishers **Oct. 7** he could accept a Vietnam peace settlement. President Johnson could not accept. Anti-war hecklers attempted to disrupt some of his rallies. At one, in Santa Monica, Calif., **Oct. 9,** he shouted: "Those who have had a chance for 4 years and could not produce peace should not be given another chance."

11-Day Apollo 7 Flight—Three U. S. astronauts **Oct. 11-22** successfully circled the earth 163 times in an 11-day test flight of the Apollo 7, the space ship designed to carry the first Americans to the moon. Navy Capt. Walter Marty (Wally) Schirra, Jr., 45, the first man to go into orbit for a 3d time, commanded the 260-hour, 4,500,000-mile space journey. It was a 1st flight for the other crew members, Air Force Maj. Donn Fulton Eisele, 38, the navigator, and Ronnie Walter Cunningham, 36, a civilian, who monitored the controls and handled communications. All 3 astronauts had colds during the flight but suffered no ill effects. They started transmitting the 1st of 7 live TV broadcasts from the spaceship **Oct. 14.** In the splashdown 7:11 a.m. EDT **Oct. 22,** some 325 mi. south of Bermuda, the capsule landed upside down, but was quickly

righted by inflated balloons. It landed only one-third of a mile from the aiming point. Air Force Lt. Gen. Samuel C. Phillips, Apollo program director, **Oct. 22** declared the flight was "the first space operation that has accomplished more than 100% of its preplanned objectives." See *Space 1968*, Page 43.

Mrs. Kennedy, Onassis Wed—Mrs. Jacqueline Kennedy, 39-year-old widow of President John F. Kennedy, was married to Greek shipping magnate Aristotle Socrates Onassis, 62, in a Greek Orthodox ceremony **Oct. 20** on his private island of Skorpios off the Greek coast. The wedding was attended only by relatives, including her two children, Caroline, 10, and John, Jr., 7, and a few close friends.

Daughter to Lynda Bird—Mrs. Charles S. Robb, President Johnson's older daughter, gave birth to a 7-pound, 8-ounce girl early **Oct. 25.** The former Lynda Bird Johnson's husband, Marine Capt. Charles S. Robb, was stationed in Danang, South Vietnam.

4-Day Soviet Space Flight—A Soviet spacecraft, Soyuz 3, manned by Col. Georgi T. Beregovoi, 47, was launched **Oct. 26** and carried out in its 1st orbit of the earth an approach maneuver with Soyuz 2, an unmanned craft sent up the day before. After flying two days in tandem, Soyuz 2 landed in the Soviet Union **Oct. 28.** Four days after he was lofted into orbit, Beregovoi brought his craft to a soft landing in the steppes of Kazakhstan **Oct. 30.**

N. Y. School Strike Continues—Some 1,000,000 New York City children were still out of school all through **October** as the strike called by the United Federation of Teachers, headed by Alfred Shanker, continued and threatened to extend throughout the entire term. The strike, against the leaders of a model decentralization program in the predominantly Negro community of Ocean Hill-Brownsville in Brooklyn, brought charges of racial discrimination from both sides.

DISASTERS

Six crewmen were reported missing but 31 were rescued from a disabled Panamanian vessel **Oct. 2** after it was hit by typhoon Elaine in Taiwan Strait. Eleven persons were killed, 7 injured and 32 missing **Oct. 3** when a truck plunged into a river south of Bangkok, Thailand. . . . Eight coal miners were killed, 7 missing and two injured **Oct. 4** when a gas explosion wrecked a mine in Lünen, the Ruhr, Germany. . . . More than 2,000 perished in 4 days of floods **Oct. 4-7,** caused by torrential rains in the eastern Himalayas. . . . Two buses plunged over cliffs in provincial areas of South Korea **Oct. 8,** killing 18. . . . Crash of light plane into a television tower guy wire near Hetlands, S. D., **Oct. 8** left 4 dead. . . . Ten perished and 20 were injured when fire swept Hotel Metzgerbrau in Zurich, Switzerland, **Oct. 9.** . . . Eleven perished in the crash of a Czechoslovak Airlines plane **Oct. 11,** shortly after takeoff. . . . At least 300 died **Oct. 10** when an overloaded ferry sank in shark-infested waters off Mindanao island, Philippines. . . . A bus plunged into a northern Kashmir ravine **Oct. 14,** killing 21 and injuring 20. . . . Seven died **Oct. 18** when a disabled private plane crashed and exploded in a residential area in Cleveland's West Side. . . . Forty persons were missing after a boat capsized while crossing the Koel River near Rourkela, India **Oct. 19.**

Statue of Liberty National Monument

Since 1886 the Statue of Liberty Enlightening the World has stood on Liberty Island in New York harbor, as a symbol of freedom. It also commemorates Franco-American friendship for it was given by the people of France and designed by Frederic Auguste Bartholdi (1834-1904). A \$2,500,000 building housing the American Museum of Immigration is being constructed at the base of the statue. Exhibit halls, a library and study rooms as well as a Hall of Records will be grouped within the star-shaped Fort Wood which encompasses the statue. The statue is a National Monument, administered by the National Park Service.

Edouard de Laboulaye, French historian and admirer of American political institutions, suggested that the French present a monument to the United States, the latter to provide pedestal and site. In June, 1871, Bartholdi, who had defended his native Colmar in Alsace when it was overrun during the Franco-Prussian War, came to the United States to investigate the project. He visualized the idea of a colossal statue at the entrance of New York harbor, welcoming the peoples of the world with the torch of liberty. Bartholdi was then 37 years old.

The French approved the idea and formed the Franco-American Union to raise funds, which eventually reached \$250,000. Bartholdi began work about 1874 in Paris. He made several models and one, 36 ft. tall, enabled him to compute the statue in sections. Wooden battens were made and sheets of copper 3-32 of an inch thick were hammered into shape on them by hand. A framework of four steel supports was designed by Gustave Eiffel, creator of the Eiffel tower. When completed the statue was 151 ft., 1 in. tall.

The hand of the statue holding aloft the torch was exhibited at the Centennial exposition in Philadelphia in 1876 and later in Madison Square.

On Washington's birthday, Feb. 22, 1877, Congress approved the use of a site on Bedloe's island suggested by Bartholdi. This island of 12 acres had been owned in the 17th century by a Walloon named Isaac Bedloe, who came to New Amsterdam in 1639. He died in 1673 and his wife sold the island for \$80. In later years it was owned by the City of New York and the U. S. Government. It was called Bedloe's until Aug. 3, 1956, when President Eisenhower approved a resolution of Congress changing the name to Liberty Island.

The head was shown at the Paris exposition of 1878. When framework and base were put in place in Paris the American minister, Levi P. Morton, drove the first rivet on Oct. 24, 1881, in honor of the centennial of the battle of Yorktown, in which French and Americans were allies.

The statue was finished May 21, 1884, and formally presented to U. S. Minister Morton July 4, 1884, by Ferdinand de Lesseps then head of the Franco-American Union and promoter of the Panama Canal.

On Aug. 5, 1884, the Americans laid the cornerstone for the pedestal. This was to be built on the foundations of Fort Wood, which had been erected by the Government in 1811. The fort originally mounted 24 heavy guns and had a garrison of from 50 to as many as 600 troops.

The American committee had raised \$125,000, but when the pedestal was 15 ft. high, this was found to be inadequate.

Joseph Pulitzer, owner of *The World* of New York City, on Mar. 16, 1885, called for general subscriptions. By Aug. 11, 1885 he had raised \$100,000. The total cost of statue and pedestal was estimated at \$500,000.

The statue arrived dismantled, in 214 packing cases, in the steamship *Iser*, which reached New York from Rouen, France, in June, 1885. The pedestal was made of concrete with granite facing and steel girders were built into it to connect with the framework of the statue. The first rivet of the statue was driven July 12, 1886, and the last on Oct. 28, 1886, when President Grover Cleveland dedicated the statue in the presence of the sculptor.

The torch was originally maintained by the Lighthouse Service. Funds for permanently lighting the statue were raised by subscription by *The World* of New York in 1916 and President Wilson turned on the lights Dec. 2, 1916. The Island was used by the United States Army until 1937, when the post was given up.

The statue weighs 450,000 lbs. or 225 tons. The copper sheeting weighs 200,000 lbs. There are 167 steps from the land level to the top of the pedestal, 168 steps inside the statue to the head, and 54 rungs on the ladder leading to the arm that holds the torch. Visitors may enter the head, which holds from 30 to 40 persons, but not the torch. The statue is open daily.

DIMENSIONS OF THE STATUE	Ft.	In.
Height from base to torch	151	1
Foundation of pedestal to torch	305	1
Heel to top of head	111	1
Length of hand	16	5

Tablet, width	13	7
Tablet, thickness	2	0

EMMA LAZARUS' FAMOUS POEM

A poem by Emma Lazarus, which is graven on a tablet within the pedestal on which the Goddess stands, follows:

THE NEW COLOSSUS

Not like the brazen giant of Greek fame,
With conquering limbs astride from land to land;
Here at our sea-washed, sunset gates shall stand
A mighty woman with a torch, whose flame
Is the imprisoned lightning, and her name
Mother of Exiles. From her beacon-hand
Glowed world-wide welcome; her mild eyes command
The air-brided harbor that twin cities frame.
"Keep ancient lands, your storied pomp!" cries she
With silent lips. "Give me your tired, your poor,
Your huddled masses yearning to breathe free,
The wretched refuse of your teeming shore.
Send these, the homeless, tempest-tost to me,
I lift my lamp beside the golden door!"

Nearby Ellis Island, abandoned as an immigration center in 1954 after having served as the gateway to America for 16,000,000 was proclaimed by President Johnson in 1965 part of the Statue of Liberty National Monument. Congress authorized \$6,000,000 to develop Ellis Island as a park and museum.

The 1960 census officially listed Los Angeles as the United States city with the largest area—454.8 square miles. However, Oklahoma City claimed an area of 647.5 square miles in 1968 after a series of annexation ordinances. And Jacksonville, Fla., topped both of them by a wide margin when most of Duval County was consolidated into the city's borders Oct. 1, 1968, giving the city 827 sq. mi.

Geographic Centers, United States and States

			West Virginia—Braxton, 4 miles east of Sutton.		
			Wisconsin—Wood, 9 miles S.E. of Marshfield.		
			Wyoming—Fremont, 58 miles E.N.E. of Lander.		

There is no generally accepted definition of geographic center, and no satisfactory method for determining it. The geographic center of an area may be defined as the center of gravity of the surface, or that point on which the surface of the area would balance if it were a plane of uniform thickness.

No marked or monumented point has been established by any government agency as the geographic center of either the 50 states, the conterminous United States, or the North American continent. However, a monument was erected in Lebanon, Kan., by a group of citizens.

National Trails System and Wild & Scenic Rivers System Established

A National Trails System, established by 1968 Federal legislation, includes initially the Appalachian Trail, extending 2,000 miles generally along the Appalachian Mountains from Maine to Georgia, and the Pacific Crest Trail, running 2,350 miles along western mountain ranges from the Mexico-California border to the Canada-Washington

border near Lake Ross. Also established by 1968 legislation was a National Wild & Scenic Rivers System. Named for immediate inclusion were stretches of the Clearwater (middle fork), in Idaho; Eleven Point, in Mo.; Feather, Calif.; Rio Grande, N. M.; Rogue, Ore.; Saint Croix, Minn. and Wis.; Salmon (middle fork), Idaho; and Wolf, Wis.

Maritime Traffic in 11 Major U. S. Seaports

Source: Maritime Assn. of the Port of New York, Wm. F. Giesen, Gen. Mgr.

The total of ocean-going vessels moving through the 11 major U. S. ports (arrivals and sailings) during the first 6 months of 1968 was 52,031, a decrease of 2,124 vessels from the figure of the corresponding period in 1967. The total for the calendar year, 1967, was 106,757, a decrease of 1,548 vessels from the 1966 total.

In the first half of 1968, New York continued to hold top place by a wide margin, although New York's share of the total volume dropped to 20.2%, compared with 22% recorded in the first 6 months of the previous year. Philadelphia continued in second place despite a slight percentage decrease under the corresponding period in 1967. The Los Angeles-Long Beach share of the total was 11%, an increase of 1.6% over the 1967 figure.

Total activity (arrivals and sailings) in the 11 major ports during the first half of 1968 and the first half of 1967 was reported as follows:

	First 6 Months of:	
	1968	1967
New York	10,528	11,888
Philadelphia	5,994	6,493
Los Angeles-Long Beach	5,724	5,118
San Francisco	5,137	5,126
Hampton Roads	4,760	5,243
New Orleans	4,646	4,643
Baltimore	4,520	4,853
Houston	4,454	4,221
Seattle	2,428	2,483
Portland, Oregon	2,105	2,082
Boston	1,735	2,005
Totals	52,031	54,155

¹Preliminary. Revised to reflect transfer of uranium oxide from Crude Materials to Semi-mfrs.

Total agricultural exports were valued as follows (in millions of dollars): 1961—5,084; 1962—5,101; 1963—5,631; 1964—6,439; 1965—6,306; 1966—6,962; 1967—6,451.

Agricultural imports for consumption were valued as follows (in millions of dollars): 1961—3,689; 1962—3,809; 1963—4,020; 1964—4,143; 1965—4,082; 1966—4,530; 1967—4,412.

Important Waterways and Canals

The **St. Lawrence Waterway**, the largest inland navigation system on the continent, extends from the Atlantic Ocean to Duluth at the western end of Lake Superior, a distance of 2,342 miles. With the deepening of channels and locks to 27 ft., ocean carriers are able to penetrate to ports in the Canadian interior and the American midwest.

The major canals in Canada are those of the St. Lawrence-Great Lakes waterway—the 3 new canals of the St. Lawrence Seaway, with their 7 locks, providing navigation for vessels of 25-foot draught from Montreal to Lake Ontario; the Welland Ship Canal by-passing the Niagara River between Lake Ontario and Lake Erie with its 8 locks, and the Sault Ste. Marie Canal and lock between Lake Huron and Lake Superior. These 16 locks overcome a drop of 580 ft. from the head of the lakes to Montreal. From Montreal to Lake Ontario the former bottleneck of narrow, shallow canals and of slow passage through 22 locks has been overcome, giving faster and safer movement for larger vessels. The new locks and linking channels now accommodate all but the largest ocean-going vessels and the upper St. Lawrence and Great Lakes are open to 80% of the world's saltwater fleet.

Subsidiary Canadian canals or branches include the St. Peters Canal between Bras d'Or Lakes and the Atlantic Ocean in Nova Scotia; the St. Ours and Chambly Canals on the Richelieu River, Quebec; the Ste. Anne, Carillon and Grenville Canals on the Ottawa River; the Rideau Canal between the Ottawa River and Lake Ontario, and the Trent and Murray Canals between Lake Ontario and Georgian Bay in Ontario. The commercial value of these canals is not great but they are maintained to control water levels and permit the passage of small vessels and pleasure craft. The Canso Canal, completed 1957, permits shipping to pass through the causeway connecting Cape Breton Island with the Nova Scotia mainland. During 1966, 111,188,312 tons of freight passed through all Canadian canals in 22,592 vessels.

The **Saint Lawrence Seaway**, opened 1959 set new records for cargo traffic in 1967 with a grand total of 44,028,638 cargo tons. The total for 1968 is estimated at 52,000,000 tons. The general cargo tonnage for 1967 was 5,962,747.

Ship transits amounted to 6,921 in 1967 with an average cargo ton load per transit of 6,361.

Cargo traffic via the Montreal-Lake Ontario section during the 1967 navigation season was 46,178,486 tons.

St. Lawrence Seaway provides a navigational channel with a minimum water depth of 27 ft. to link the Great Lakes to the Atlantic Ocean. A vessel entering the Great Lakes from the Atlantic ascends 20 ft. above sea level in the 1,000-mile long reach up the Gulf of St. Lawrence and St. Lawrence River to Montreal, Quebec. At Montreal, the vessel enters the first of 7 new locks, 5 of which are in Canadian waters and 2 within United States waters, which raise or lower shipping a total of

226 ft. in the 182-mile stretch of the St. Lawrence River between Montreal and Lake Ontario. Crossing Lake Ontario, the vessel enters Canada's 28-mile-long Welland Canal, with 8 locks to compensate for the difference in elevation of 326 ft. between Lake Ontario and Lake Erie.

The Seaway, built and operated jointly by the United States and Canada, is unique in that the statutes of both nations provide that the full costs of construction, operation and maintenance, with interest, be repaid to the federal treasuries within 50 years from revenues by the assessment of tolls levied against Seaway users.

Saint Lawrence Seaway Development Corporation (U.S.), Seaway Circle, Massena, New York. Joseph H. McCann, Administrator.

St. Lawrence Seaway Authority (Canada), Ottawa, Ontario. Dr. Pierre Camu, president.

The **Welland Canal** overcomes the 326-ft. drop of Niagara Falls and the rapids of the Niagara River. It has 8 locks, each 859 ft. long, 80 ft. wide and 30 ft. deep. Regulations permit ships of 730-ft. length and 75-ft. beam to transit with special handling, while largest size for regular handling is 715-ft. length and 72-ft. beam.

In 1967 the Welland Canal carried 52,-809,414 cargo tons; in 1966 59,271,666 cargo tons were carried, a loss of 10.9%. A tie-up of lake shipping due to strike action decreased the traffic in 1967.

Sault Ste. Marie Canal reported 89,366,-249 short tons passing through the American locks and 1,037,728 short tons passing through the Canadian canal for a total of 90,403,977 for the season of 1967.

In 1966 the comparable American figure was 102,309,719 and the Canadian figure 1,281,211 for a total of 103,670,930 short tons.

PANAMA CANAL

Cargo tonnage on the Panama Canal in fiscal 1968 amounted to 105,527,869 compared with 92,983,791 tons in 1967. Transit of oceangoing ships in fiscal 1968 totaled 14,807 compared with 13,385 in fiscal 1967. Toll collections in fiscal 1968 were \$93,-154,680 compared with \$82,296,638 in 1967.

Improvements have included the widening of the eight-mile long channel through Gaillard Cut from 300 to 500 feet, costing \$50,000,000; illumination of Gaillard Cut and installation of new towing locomotives at the locks costing \$8,000,000.

Thatcher Ferry Bridge, opened 1962, spans Panama Canal 201 ft. above the water level near Balboa. It is a steel-arch bridge, about 1 mi. long, with 3 spans and 4 lanes. It cost \$20,000,000 authorized by the U. S. Congress in 1956.

OTHER FOREIGN CANALS

One of the busiest canals in Europe is the Gota, in Sweden, 115 mi. long. Others: Kiel Canal, Germany, connecting the Baltic with the North Sea, 61 mi.; Elbe, Germany, 41 mi.; Amsterdam, Netherlands, 16 mi. Also the Manchester Ship Canal, England, 35.5 mi.

The Suez Canal is now operated by the government of United Arab Rep. For its history see page 557.

A Super Barge Load of Sugar

The world's largest barge, the Caribbean, carried its largest load Aug. 9-16, 1968. Towed by tug Elizabeth Moran, it brought 17,391 long tons of raw sugar, worth \$3,000,000 and enough to fill household needs of 10,000,000 people for a year, from Puerto Rico to N.Y.C.

Merchant Fleets of the World

OCEANGOING STEAM AND MOTORSHIPS OF 1,000 GROSS TONS AND OVER

Source: Maritime Administration, U. S. Dept. of Commerce

Excludes ships operating exclusively on the Great Lakes and Inland Waterways and special types such as channel ships, icebreakers, cable ships, etc. and merchant ships owned by any military force.

Gross Tons: Volume, not weight; each gross ton represents 100 cubic ft. of enclosed space. Deadweight Tons: Number of long tons (2,240 lbs. ea.) of cargo, fuel, etc. a ship can carry at maximum draft.

*Maiden voyage. (a) The Savannah, a fully rigged sailing vessel with steam auxiliary (over 300 tons, 98.5 ft. long, beam 25.8 ft., depth 12.9 ft.), was launched in the East River in 1818. It was the first ship to use steam in crossing any ocean. It was supplied with engines and detachable iron paddle wheels. On its famous voyage it used steam 105 hours during parts of 12 days. The world's first nuclear-powered merchant ship, the N.S. Savannah, was named for the old steamship. (b) First Cunard liner. (c) Carried Charles A. Lindberg back to the United States after his flight from New York to Paris. (d) Carried Hiroshima atomic bomb in World War II. (e) Set world speed record; average speed east-bound on maiden voyage 35.59 knots (about 41 m.p.h.); westbound, 34.51 knots. (f) First atomic submarine to cross Atlantic both ways submerged. (g) World's first atomic submarine, also first to make undersea voyage under polar ice cap, 1,830 mi. from Point Barrow, Alaska, to Atlantic Ocean, Aug. 1-4, 1958, reaching North Pole Aug. 3. Second undersea transit of the North Pole made by submarine USS Skate Aug. 11, 1958, during trip from New London, Conn., and return. (h) World's largest submarine. Nuclear-powered Triton was submerged during nearly all its voyage around the globe. It duplicated the route of Ferdinand Magellan's circuit (1519-1522), 30,708 mi., starting from St. Paul Rock, off the NE coast of Brazil, Feb. 24-Apr. 25, 1960, then sailed to Cadiz, Spain, before returning home. (i) First underwater transit of Northwest Passage. (j) Fastest freighter crossing of Atlantic.

Navigable Distances Between Ports

Source: Distances between ports, U. S. Naval Oceanographic Office

Distances between U. S. ports, Coast and Geodetic Survey ESSA

One nautical mile: International Nautical Mile (INM) is equivalent to 1,852 meters, or approximately 6,076.11549 feet.

One statute mile = 5,280 ft. Distances shown are in nautical miles. For statute miles, multiply by 1.151.

Navigable Distances from New York City

The distances from New York to European ports and Straits of Gibraltar are based on Track "C" (North Atlantic Track Agreement 1950), which is used from July 1 through April 10.

May, 1937	Santa Fe	Los Angeles, Calif.—Chicago	2228.6	36 49	60.5
May, 1937	Santa Fe	La Junta, Colo.—Dodge City, Kan.	202.4	2 19	87.3
May, 1955	Baltimore & Ohio	Washington, D. C.—Chicago (Train consisted of 3 Budd Rail Diesel cars)	768.0	12 29 30	61.5
July, 1966	New York Central	Bryan, Ohio (MP 350-345)	5.0	1 39½	181.00*
May, 1967	Pennsylvania	County—Milham Tower	2.12	11†	115.66†
Jan., 1968	ATSF Super-C (Fast Freight)	Corwith—Hobart Yard	2202.1	34 35 40	63.6

*The official speed measured by ground instruments was 183.85 in passing mile post 347 + 13 over an accurately measured 300 feet of track. This is the highest speed on rails ever recorded in the United States. The run was made by a single Budd Rail Diesel car fitted with two turbo-jet J-47 aircraft engines mounted on the forward end. Time and speed calculated from standing start at County to passing Milham Tower (end of test track) at 80 mph, after which train was gradually braked down on regular track to a stop in Trenton passenger station. Between mileposts 46 and 51 speed was 150 mph or over, a momentary peak of 156 mph was reached in the vicinity of milepost 47.

†All runs listed above are in the "start-to-stop" category, several including intermediate stops as well. The several "pass-to-pass" runs (where train passed both starting and finishing points at speed) such as the 1 mile in 32 seconds—112.5 claimed for the "Empire State Express" in 1893 which did appear in this listing are now eliminated. Some of these runs were actually segments of some of the longer runs listed above while others border on the fantastic, having little supporting testimony as to their authenticity.

Japanese Trains Average Over 100 Miles per Hour

Service between Tokyo and Osaka via the standard-gauged New Tokaido Line is headed by 25 "Hikari" superexpress trains daily in each direction which make the 320.1-mile run, inclusive of stops at Nagoya and Kyoto, in 3 hrs. 10 mins.—at an average overall speed of 101.1 mph. Twenty-one "Kodama" or limited express trains in each direction make the run in 4 hours, inclusive of 10 intermediate stops, averaging just 80 mph. overall

First High-Speed Trains Under U. S. Federal Program in Service

First results of the Federal Government's 3-year \$90,000,000 program for mass transportation research and development may be seen in the current timetable of the Pennsylvania Railroad under which service between New York and Washington has been greatly expanded and schedules speeded up. New self-propelled electric trains make the 224.6-mile run in 2 hr. 59 min.—averaging 75.3 mph overall.

Rapid Transit Service in Cities Over 500,000

¹Data for years prior to 1964 have been revised to represent amounts actually outstanding in order that they may be comparable to those shown for the year 1964.

State Automobile Speed Limits

(Except as otherwise posted)

Source: American Automobile Assn., Digest of Motor Laws 1967

Alabama: Interstate highways, 70 mph. daytime, 60 mph. nighttime; open highways, 60 mph. daytime, 50 mph. nighttime; residential districts, 25 mph.; business districts, school zones, etc., 15 mph.

Alaska: Open highways, 50 mph.; urban area, 35 mph.; residential and business districts, 30 mph.

Arizona: State highways, 65 mph. daytime, 60 mph. nighttime; other state highways, 50 mph. daytime, 45 mph. nighttime; residential areas, business districts, 25 mph.; school zones, 15 mph.

Arkansas: Interstate highways, 70 mph.; controlled access highways, 60 mph.; urban districts, 30 mph.; other locations, 60 mph.

California: Statewide limit, 65 mph. (except freeways posted for 70 mph.); residential and business districts, school zones, 25 mph.

Colorado: Open highways, 60 mph.; residential districts, 30 mph.; business districts, 25 mph.; open mountain highway, 40 mph.; winding mountain highway, 20 mph.

Connecticut: Super highways, 70 mph.; other highways, 60 mph.; residential and business, reasonable rate.

Delaware: Open highways, 4-lane, 60 mph., 2-lane, 50 mph.; residential and business districts, 25 mph.

District of Columbia: Expressways, 45 mph.; school and playground areas, 15 mph.; other roads, 25 mph.

Florida: Interstate highways, 70 mph. day, 65 mph. night; open highway, 65 mph. day, 55 mph. night; residential & business districts, 30 mph.

Georgia: Interstate highways, 70 mph. daytime, 65 mph. nighttime; open highway, 60 mph. daytime, 50 mph. nighttime; residential, business and school areas, 25 mph.

Hawaii: Open highways, 45 mph.; residential and business districts, local ordinances govern.

Idaho: Interstate highways, 70 mph.; open highway, 60 mph. daytime, 55 mph. nighttime; urban and business districts, 35 mph.

Illinois: Expressways, 70 mph.; open highways, 65 mph.; urban areas, 30 mph.; school zones, 20 mph.

Indiana: Open highways, 65 mph.; residential district, 30 mph.; business district, 20 mph.; Interstate highways, 70 mph.

Iowa: Interstate limited access roads, 75 mph. daytime, 65 mph. nighttime; open highways, 70 mph. daytime, 60 mph. nighttime; suburban, 45 mph.; residential and school districts, 25 mph.; business districts, 20 mph.; secondary roads, 60 mph. daytime, 50 mph. nighttime.

Kansas: Interstate highways, 75 mph. daytime, 70 nighttime; open highways, 70 mph. daytime, 60 mph. nighttime; residential districts, 30 mph.; business districts, 20 mph.; Kansas Turnpike, 80 mph.

Kentucky: Interstate highways, 70 mph.; open highways, 60 mph. daytime, 50 mph. nighttime; residential and business districts, 35 mph.

Louisiana: Open highways 4-lane, 70 mph.; other open highways, 60 mph.

Maine: Turnpikes, 70 mph. daytime, 65 mph. nighttime; open highways, 45 mph.; residential and business districts, 25 mph.; school zones at recess and when children going to and from school, 15 mph.

Maryland: Open country, expressways, 60 mph.; dual lane highways, 55 mph.; other highways, 50 mph.; residential and business districts, 30 mph.; thinly settled areas, 35 mph., other highways 30 mph.

Massachusetts: Turnpike, 65 mph.; divided highway, 50 mph.; other highways, 40 mph.; residential and business districts, 30 mph.; school zones, 20 mph.

Michigan: Freeways, 70 mph.; open highways, 65 mph. daytime, 55 mph. nighttime; residential and business districts, 25 mph.

Minnesota: Open highways, 65 mph. daytime, 55 mph. nighttime; all speeds in urban districts, 30 mph.

Mississippi: Open highways, 65 mph.; residential districts, 25 mph.; business districts, 20 mph.; school zones, 15 mph.

Missouri: Dual lane U. S. routes, 70 mph.; undivided U. S. routes, 70 mph. daytime, 65 mph.

nighttime; other open highways, 65 mph. daytime, 60 mph. nighttime; municipalities, 45 mph.

Montana: Open highways, day, reasonable and prudent unless posted, 55 mph. night, except Interstate highways 65 mph. nights; residential and business districts, 25 mph.

Nebraska: Interstate highways, 75 mph.; open highways, 65 mph. daytime, 60 mph. nighttime; residential districts, 25 mph.; business districts, 20 mph.; on non-hard surfaced roads, 50 mph.

Nevada: Careful and prudent; residential and business, posted.

New Hampshire: Turnpike, 70 mph.; open highways, 60 mph.; rural residential districts, 35 mph.; urban and business districts, 30 mph.; school zones, 20 mph.

New Jersey: Turnpike, 60 mph.; open highways, 50 mph.; residential and business districts, 25 mph.

New Mexico: Open highways, 70 mph. daytime, 60 mph. nighttime; other highways, 60 mph. daytime, 50 mph. nighttime; residential and business districts, 25 mph.; school zones, 15 mph.

New York: New York State Thruway, 65 mph.; open highways, 50 mph.; school zones when children going to and from school, 15 mph.

North Carolina: Open highways, 55 mph.; residential districts, 35 mph.; business districts, 20 mph.

North Dakota: Interstate highways, 75 mph. day, 65 mph. night; all other highways, 60 mph.; residential and business districts, 25 mph.; school zones, 20 mph.

Ohio: Ohio Turnpike and expressways, 70 mph.; open highways, 60 mph. daytime, 50 mph. nighttime; within municipal corporations, 25 mph.; school zones, 20 mph.

Oklahoma: Turnpikes and Interstate highways, 70 mph.; open highways, 65 mph. daytime, 55 mph. nighttime; school zones, 25 mph.

Oregon: Open highways, 55 mph.; freeways up to 70 mph; residential districts, 25 mph.; business and school zones, 20 mph.

Pennsylvania: Turnpike, 65 mph.; open highways 55 mph.; residential and business districts, 25 to 35 mph.; school zones, 15 mph.

Rhode Island: Residential and business districts, 25 mph.; elsewhere, 50 mph. daytime, 45 mph. nighttime.

South Carolina: Interstate System 70 mph. daytime, 65 mph. night; State highways 60 mph. daytime, 55 mph. night; urban districts 30 mph.

South Dakota: Interstate highways, 75 mph. daytime, 70 mph. nighttime; open highways, 70 mph. daytime, 60 mph. nighttime; residential and business districts, 30 mph.; school zones, 15 mph.

Tennessee: Open highways, 65 mph. day, 55 mph. night; school zones, 15 mph; Interstate highways 75 mph.

Texas: Federal or State roads, 70 mph. daytime, 65 mph. nighttime; other rural roads, 60 mph. daytime, 55 mph. nighttime; in urban districts, 30 mph.

Utah: Open highways, as posted; residential and business districts, 25 mph.; school zones, 20 mph.

Vermont: Interstate highways, 65 mph.; open highways, 50 mph.

Virginia: Open highways, 55 mph.; residential, business and school areas, 25 mph.

Washington: County roads, 50 mph.; cities and towns, 25 mph.; school zones, 20 mph.; Interstate highways 70 mph.; in other locations, 60 mph.

West Virginia: Interstate highways, 70 mph.; Turnpike, 60 mph.; open highways, 55 mph.; residential districts, 25 mph.; school zones, 15 mph.

Wisconsin: Interstate highways, 70 mph. daytime, 60 mph. nighttime; open highways, 65 mph. daytime, 55 mph. nighttime; residential and business districts, 25 mph.; school zone, 15 mph.

Wyoming: Open highways 4-lane divided, 70 mph.; open highways, 65 mph.; residential districts, 30 mph.; business and school districts, 20 mph.

Canal Zone: Outside town limits, 40 mph.; within town limits, 25 mph.

Guam: Roads, 45 mph.; school zones when children at recess or going to and from school, 10 mph.

Puerto Rico: Open highways, 45 mph.; urban districts and school zones, 25 mph.

Another New Record in Automobile Traffic Volume in U. S.

Some 105,000,000 Americans took to the highways within their own country for at least one vacation or pleasure trip by automobile during 1968, establishing a new record. They spent \$29 billion and traveled an estimated 195 billion miles. The total mileage traveled by the over 84,000,000

passenger cars registered in this country in 1968 amounted to 780 billion miles. In addition, more than 200 billion miles were driven by the nearly 17,000,000 trucks and buses. It is estimated that private passenger automobiles are used for 90% of all vacation and recreation trips in the U. S.

Major Turnpikes; Passenger Car Tolls and Speed Limits

Source: American Automobile Association, Washington, D. C. 20006

Airport Expressway: Miami International Airport to North-South Expressway interchange, 4.4 miles. Speed limit 60 mph. Toll 5¢ per axle.

Atlantic City Expressway: N. J. Freeway at Turnersville to Atlantic City, N. J. 44 miles. Speed limit 70 mph. Maximum toll \$1.15.

Bluegrass Parkway: Fort Springs to Elizabethtown, Ky. 72 miles. Maximum toll \$1.30.

Connecticut Turnpike: N. Y. State line near Greenwich, Conn., to R. I. State line at Killingly, Conn., 129 miles. Speed limit 60 mph. Maximum toll \$2.

Eastern Townships Autoroute: Montreal to Magog, Quebec, 72 miles. Speed limit 70 mph. (50 minimum). Maximum toll \$1.50.

Ensenada-Tijuana Tollway: Ensenada to Tijuana, Mexico, 63 miles. Speed limit 68 mph. Maximum toll \$2.40.

Everett Turnpike: Mass.-N. H. state line to Concord, N. H. 40 miles. Speed limit 60 mph. Toll maximum 50¢.

Garden State Parkway: Montvale, N. J., to Cape May, N. J., 173 miles. Speed limit 60-65 mph. Maximum toll \$2.75.

H. E. Bailey Turnpike: Oklahoma City to Randlett, Okla., 86.4 miles. Speed limit 70 mph. Toll maximum \$1.70.

Hutchinson River Parkway: N.Y.C. to Conn. state line, 15 miles. Speed limit 50 mph. Toll 25¢.

Illinois Tollway: Includes Tri-State Tollway from Indiana state line to Deerfield; Northwest Tollway from the Tri-State to Wisconsin state line at So. Beloit, Ill., and East-West Tollway between Chicago and Aurora. 187 miles. Maximum tolls, Tri-State \$2.10, Northwest \$1.55 and East-West 50¢.

Indian Nation Turnpike: Henryetta to McAlester, Okla. 41 miles. Speed limit 70 mph (40 minimum). Maximum toll 75¢.

Indiana Toll Road: Eastpoint (Ohio line) to Westpoint (Illinois line), 157 miles. Speed limit 70 mph. (40 mph. minimum). Maximum toll \$2.80.

John F. Kennedy Memorial Highway: Baltimore, Md., to Wilmington, Del., 60 miles. Speed limit 60 mph. Maximum toll \$1.30.

Kansas Turnpike: Kansas City to South Haven, Kan. 236 miles. Speed limit 80 mph. 40 mph minimum. Maximum toll \$4.95.

Kentucky Turnpike: Louisville to Elizabethtown, Ky. 40 miles. Speed limit 70 mph, 40 minimum. Maximum toll 60¢.

Maine Turnpike: Kittery, Me., to Augusta, Me., 106 miles. Speed limit 70 mph. (65 at night). Maximum toll \$2.15.

Massachusetts Turnpike: Downtown Boston to State Line, Mass., (N. Y. border), 135 miles. Speed limit 65 mph. (40 mph. minimum). Maximum toll \$3.

Motor-Vehicle Registrations

Motor-vehicle registrations in the United States will reach 99,958,000 by Jan. 1, 1969, according to estimates by the Federal Highway Administration of the U. S. Dept. of Transportation. This represents an expected increase of more than 3,000,000 over the total registered a year earlier. Passenger car registration will reach 82,821,000, a 3% increase over year-earlier figures, while trucks and buses will total 17,137,000, a 3.7% increase.

California's estimated 11,200,000 registrations

Merritt Parkway: New York-Conn. State line to Housatonic River, Stratford, Conn., 37½ miles. Speed limit 60 mph. Toll 20¢.

Montreal-Laurentian Autoroute: Montreal to Ste. Adele, 45 miles. Speed limit 70 mph. Maximum toll \$1.

Mountain Parkway: Winchester to Salyersville, Ky. 76 miles. Speed limit 70 mph. Maximum toll \$1.60.

New Hampshire Turnpike: Mass.-N. H. State line to Portsmouth, N. H., 14.7 miles. Speed limit 60 mph. Toll 15¢ to 25¢.

New Jersey Turnpike: Deepwater, N. J., to Ridgefield Park, N. J., 131 miles including extensions. Speed limit 60 mph. (50 mph. on Hudson County extension). Maximum toll \$1.75.

New York Thruway: (Thomas E. Dewey Thruway): Pennsylvania border near Erie to New York City, 559 miles including extensions. Speed limit 65 mph. Maximum toll \$8.20.

Ohio Turnpike: Ohio-Pennsylvania line to Ohio-Indiana line, 241 miles. Speed limit 70 mph. Maximum toll \$3.50.

Pennsylvania Turnpike: Gateway (state line near Youngstown, Ohio) to New Jersey line near Norristown, Pa., then to Scranton, 470 miles. Speed limit 65 mph. Maximum toll \$4.80.

Richmond-Petersburg Turnpike: North of Richmond, Va., to south of Petersburg, Va., 34.7 miles, speed 65 mph. (minimum 40 mph.) Maximum toll 95¢.

Saw Mill River Parkway: New York City to Katonah, N. Y. 30.4 miles. Speed limit 50 mph. Maximum toll 25¢. Trailers not permitted.

Seventeen-Mile Drive: Pacific Grove through Pebble Beach, Monterey, Calif. Maximum toll \$2.

Spaulding Turnpike: Portsmouth, N. H., to Rochester, N. H., 22.8 miles. Speed limit 60 mph. Maximum toll 10¢ to 25¢.

Sunshine State Parkway: Miami, Fla., to Wildwood, Fla., 265 miles. Speed limit 70 mph. (40 mph. minimum). Maximum toll \$4.80.

Turner Turnpike: Oklahoma City to Tulsa, Okla., 86 miles. Speed limit 70 mph. Maximum toll \$1.40.

Western Kentucky Parkway: Elizabethtown to Princeton, Ky., 127 miles. Speed limit 70 mph. Maximum toll \$2.

West Virginia Turnpike: Princeton, W. Va., to Charleston, W. Va., 88 miles. Speed limit 60 mph. Maximum toll \$2.25.

Wilbur Cross Parkway: Milford to Meriden, Conn. 29.5 miles. Speed limit 60 mph. Maximum toll 35¢.

Will Rogers Turnpike: Tulsa, Okla., to Joplin, Mo., 88 miles. Speed limit 70 mph. Maximum toll \$1.50.

in U. S. Near 100,000,000

are followed by 6,200,000 in New York and nearly 5,000,000 in Texas. Ohio and Pennsylvania will have 3,500,000 motor vehicles each by the beginning of 1969. Illinois and Michigan will have more than 4,000,000 each, Florida and New Jersey more than 3,000,000 each, and Minnesota, Indiana, North Carolina, Massachusetts, Missouri, Wisconsin, Virginia and Georgia in the 2,000,000 registration class. There will be 15 additional states with registrations of more than 1,000,000 each.

*Directions for Use of Mileage Charts

To measure mileage between the east and west charts there are 5 key cities: Chicago, Jackson (Miss.), Memphis, New Orleans and St. Louis.

Plot your course between the city listed nearest your home town and whichever of the 5 key cities you desire to pass through to the city of your destination. Add the

mileage shown and this will give you the approximate total mileage.

For example: The mileage between Cheyenne and Philadelphia through St. Louis. Philadelphia to St. Louis = 885 miles, St. Louis to Cheyenne = 898; the total is 1,783 miles.

National Interstate Highway System Nearly 70% Completed

The National System of Interstate and Defense Highways was more than 68% completed at the end of 1968, with approximately 28,000 miles open to traffic. The total cost of this 41,000-mile network of high-speed, super roads is currently estimated at \$56.5 billion, of which the Federal Government will pay 90% and the states 10%.

The Interstate System will span the nation and link more than 90% of all cities of over 50,000

population and thousands of smaller cities and towns. It is predicted that by 1975 the system will be carrying nearly 25% of the total 1.3 trillion vehicle miles of travel projected for that year. The system is expected to cut driving time drastically, to save at least 8,000 lives annually because of its safety design, and to enable motorists to cross the United States on non-stop highways with no traffic lights.

Average Retail Prices of Used Automobiles

Listed below are average prices that a buyer may expect to pay for various American-made automobiles, of model years 1965 through 1968. They are NOT the prices one might expect to receive from a dealer. The prices listed are average retail values based upon reports of actual transactions by dealers. They are derived chiefly from the N.A.D.A. Official Used Car Guide, Eastern Edition for October, 1968, published by Automobile Dealers Used Car Guide Co., 2000 K St., N.W., Washington, D. C. 20006. The table is intended only as a guide for used-car buyers; actual prices may vary throughout the country. The listed values are for cars in average condition with average mileage (15,000 miles per year); values will vary according to condition and mileage.

All cars 4-door sedans with automatic transmission, power steering, radio and heater except where otherwise designated.

Additional Auto Safety Requirements Go Into Effect

New safety standards and requirements which must be met by all autos manufactured after Jan. 1, 1969, for sale or use in the United States were issued in 1968 by the Department of Transportation's Federal Highway Administration.

These were in addition to a longer list of such safety rules which took effect Jan. 1, 1968.

The new rules included:

Head restraints (head-rests) to reduce the severity of whiplash injuries, on two front seats.

Two latches, or a double latch, on front-opening hoods to reduce the danger of them opening while

car is in motion.

Vehicle identification numbers to be installed inside all cars, near the driver but visible from outside the car, as an aid to reducing auto thefts.

Fail-safe devices for cars with concealed headlights, designed so the shielding covers cannot close while the lights are on, and, if they should fall, they would fall in open position.

An amendment to earlier rules which will extend to passenger cars (as of Jan. 1, 1969) requirements for 4-way flashing signal lights, back-up lights and 4 side reflectors or side lights.

Women Defeat Men in 1968 Mobil Economy Run

Ice, snow, heavy winds and torrential rains in the Rockies, plus higher average speeds, all combined to lower the average gasoline economy of the late-model American stock cars competing in the 1968 Mobil Economy Run. Over-all fuel mileage was 19.1671 mi. per gallon compared to 19.9884 in 1967. Average speed was 55.03 m.p.h. compared to 51.36 in 1967. Women drivers again scored better with an average of 19.9203 compared to 19.0073 for the men. The run was ended in Indianapolis on Apr. 5 after the 40 competing cars had covered 2,272.25 mi. The event which started in Los Angeles Apr. 2 was scheduled to have ended in New York Apr. 7. The early ending was made because Apr. 7 had been declared a day of mourning in memory of Dr. Martin Luther King. The run is conducted under the supervision of the U. S. Auto Club.

Mobile Homes and Travel Trailers—Manufacturers' Shipments

Source: Dept. of Commerce, Business and Defense Services Administration; *Construction Review*

A mobile home, or housing-type trailer, is a vehicular portable structure built on a chassis and designed to be used without a permanent foundation as a year-round dwelling when connected to utilities. Mobile homes are defined as units 29 feet or longer and weighing over 4,500 pounds; travel trailers, as units less than 29 feet long, regardless of weight, or weighing less than 4,500 pounds, regardless of length. Excludes units designed for commercial uses, pickup cabs, folding campers, and amphibious units.

Domestic and International Express Service

Source: REA Express

Domestic surface and air express service extends throughout the U. S., Puerto Rico and points in Canada. The company operates an international shipping service by surface transportation between the U. S. and 112 countries. Agents in the countries operate in a manner similar to REA Express in the U. S. The company also operates a worldwide air shipping service via connections with International (IATA) airlines.

Express service was inaugurated March 4, 1939. Air express service was inaugurated September 1, 1927.

Credit Unions Are World Wide

There are about 52,000 credit unions in the world with more than 30,800,000 members. At the end of 1967 in the United States and its territories, there were 23,210 credit unions with 19,100,000 members who had savings of \$11.3 billion and assets of \$12.7 billion.

Credit unions are financial self-help groups whose members save their money together and make loans to each other at low interest. They are nonprofit corporations. All credit unions are chartered by Federal or state governments and regulated by law. They are entirely owned by their members, and their operations are restricted to

their membership.

Credit unions are found throughout the free world. In the United States and Canada, where the majority are located, they are usually formed by groups who share the same employment, such as factory workers, government employees and school teachers. Other groups that have formed credit unions include members of the same church congregation, fraternal organizations and residents of the same community.

(For Bureau of Federal Credit Unions see Social Security.)

*Figures in parentheses are age limits for junior permits, school permits or in other special situations.
¹Registrations include: Automobiles, private and commercial (including taxicabs) 80,013,724; publicly owned 400,456. Buses, private and commercial 164,670, publicly owned 339,798. Total private and commercial motor vehicles 95,551,372, publicly owned 1,413,504. Total commercial 1,934,413, publicly owned 18,609.
²Total motor fuel consumed in gallons for private and commercial use, 80,059,523,000 for public use, 1,862,985,000. Losses allowed for evaporation, handling, etc., not included in total are 677,834,000. Tax rate changes in 1967 were as follows: Conn., Minn., and N. M., 6 to 7¢, July 1; Ill., 5 to 6¢, Aug. 1; Mont., 6 to 6.5¢, July 1; Ore., 6 to 7¢, Oct. 1; Wash., 7.5 to 9¢, May 1; Wyo., 5 to 6¢, May 20.
³The state tax rate is 8¢ per gal. in Hawaii County and 5¢ in the other counties. Trucks or combinations of more than two axles pay motor-fuel tax at rate of 9¢ per gallon in Kentucky and Virginia.
⁴Weighted average tax rate. (For motor-fuel was 6.45¢ per gallon.)
⁵Does not include an estimated 5.7 billion gallons of aviation jet fuel.

Details of Famous Inventions

Automobile. Charles E. Duryea declared he operated the first successful American automobile in Springfield, Mass., Apr. 19, 1892. His brother, J. Frank Duryea, said he made essential contributions to the car and that it did not run until Sept., 1893. Practical patent was granted to C. E. Duryea June 11, 1895. Supplementary patents were granted to Charles and also to J. Frank Duryea.

Broadcasting. A plaque at the Univ. of Wisconsin, Madison, Wis., says the oldest broadcasting station is WHA, which as 5XM began scheduled broadcasts in 1919. Originator was Earle M. Terry (1879-1929).

Radar. Principle recognized in 1922 by Dr. A. Hoyt Taylor and Leo C. Young, U. S. Naval Research Aircraft Laboratory, Washington, D. C. The Navy ordered radar for ships, 1936. First vessel to use it was U. S. S. New York, 1938. Radar recorded coming of Japanese planes at Pearl Harbor, but no hostile mission was suspected. During the 1930s the British, alerted by the Taylor-Young experiments, independently developed radar, which they called radio-location.

Rockets. Dr. Robert H. Goddard (1882-1945) proved practicality of rockets Mar. 16, 1926, at Auburn, Mass. He obtained 20 patents on rockets and missiles and the U. S. Government Aug. 5, 1950 paid his heirs, Mrs. Goddard, and the D. & F. Guggenheim Foundation, \$1,000,000 for patent infringements. He was first to launch a liquid-fuel rocket. Two of his engine inventions are in use. Rocket invention also is credited to Hermann Oberth, German, and Konstantin Tsiolkovski, Russian.

Television. Developed in the 1930s in laboratories, principal patents going to Vladimir Zworykin and Philo Farnsworth, who developed it independently. Authorized by Federal Communications Commission, July 1, 1941. There were five months of telecasting to about 10,000 sets before Pearl Harbor. First commercial TV from Empire State Bldg., New York, 1941. First stations were WNBT (NBC, New York), WCEB (CBS, New York) and Dumont. The image orthicon pick-up tube was developed by RCA in 1946.

J. L. Baird, British inventor, completed his telechrome for color television in 1944. In the United States Peter C. Goldmark made contributions to color TV. CBS demonstrated a color system in 1945. RCA in 1947. The first color broadcast of any duration was a one-hour program by CBS June 25, 1951, over a network. Alfred C. Schroeder, of RCA laboratory at Penns Neck, N. J., received a patent for a tri-color tube in March, 1952, and assigned it to RCA.

MANUFACTURES AND MINERALS

General Statistics for Major Industry Groups

Source: Bureau of the Census

The estimates for 1966 in the following table are based upon reports from a representative sample of about 60,000 manufacturing establishments.

Industry	All employees		Production workers			Value added by mfr adjusted \$1,000
	Num-ber	Payroll \$1,000	Num-ber	Man-hours 1,000	Wages \$1,000	
Food and kindred products.....	1,642,145	9,542,146	1,097,657	2,239,475	5,675,932	24,895,940

Employees on Non-farm Payrolls Continue Upward

The Bureau of Labor Statistics reported Sept. 11, 1968, that non-farm payroll employment reached a record high of 68,724,000 in June, 1968. The figure dipped to 68,358,000 in July but edged up to 68,596,000 in August.

Preliminary figures on installed capacity of electric generating plants as of Dec. 31, 1967 are (kilowatts): hydro 47,349,685; steam 215,910,457; int. comb. 3,814,545. Total 267,074,687.

Preliminary data on combined utility and industrial production of electric energy for 1967 show a total of 1,314,298,521,000 kilowatt-hours; combined capacity was 285,916,300 kw.

Electric operating revenues of the larger privately owned utilities were \$14,363,930,000 as indicated by the preliminary total for 1966, this includes Alaska and Hawaii.

¹Also called "errors and omissions." Believed to consist largely of unreported short-term capital flows.²Includes gold, convertible currencies, and International Monetary Fund position.³Includes U. S. Government nonmarketable medium-term convertible securities in the amount of \$703 million in 1963, \$376 million in 1964, \$122 million in 1965, \$945 million in 1966 and \$455 million in 1967.

Statistical Information About the United States

In the *Statistical Abstract of the United States* the Bureau of the Census of the U. S. Dept. of Commerce annually publishes a summary of social, political and economic information. A book of more than 1,000 pages, it presents in 33 sections comprehensive data on population, housing, health, education, employment, income, prices, business, banking, science, defense, trade, and other subjects. A special section includes comprehensive data for metropolitan areas. The book is prepared under the direction of Edwin D. Goldfield, chief statistical information division, Bureau of the Census Supplements to the *Statistical Abstract* are *Pocket Data Book, USA, 1967* (1969 edition in preparation); *County and City Data Book, 1967*; *Congressional District Data Book (Districts of the 88th Congress)* and its supplements for states that redistricted for the 89th and 90th Congresses; *Historical Statistics of the United States, Colonial Times to 1957* and its supplement . . . *Continuation to 1962 and Revisions*. Information concerning these and other publications may be obtained from the Supt. of Documents, Government Printing Office, Washington, D. C. 20402.

*Excludes Alaska and Hawaii, 1925-53. Data for 1925-46 are not strictly comparable with those for subsequent years, since for the earlier years the value of heavy clay products has not been replaced by the value of raw clays used for such products. *Production as measured by mine shipments sales, or marketable production.

1967 Scrap Iron Production and Export

Source: Institute of Scrap Iron & Steel
(net tons 2,000 pounds each)

The United States generated an estimated 42,400,000 tons of ferrous scrap. Of this total, 14,000,000 tons is attributed to "prompt industrial" scrap, the leftovers from the fabrication of new iron and steel products.

Consumption of mill revert and purchased scrap..... 85,361,000 tons
Consumption of purchased scrap only..... 35,127,000 tons (est.)

Value of exports..... \$245,300,000

Sales of scrap amounted to..... \$2,500,000,000

Exports of iron and steel scraps..... 7,504,000 tons

Imports of iron and steel scrap..... 229,000,000 tons

(Export and Import figures are from Dept. of Commerce.)

Engineering Wonders of the U. S.

Selected by American Society of Civil Engineers

In 1954 the American Society of Civil Engineers, after several years of research, selected the seven modern civil engineering wonders in the United States (shown listed in alphabetical order) and then selected one each year from 1960 on.

1968—San Mateo-Hayward Bridge over San Francisco Bay, Calif.

1967—The Gateway Arch at St. Louis, Mo.

1966—NASA Complex 39, Appollo-Saturn V assembly.

1965—Chesapeake Bay Bridge-Tunnel.

1964—Glen Canyon Dam on Colorado River.

1963—Ohio River Valley Clean Streams Program.

1962—Intercontinental Ballistic Missiles Program.

1961—John F. Kennedy (N.Y.) Internatl. Airport.

1960—St. Lawrence Power and Seaway Project.

1954 Awards

1. Chicago's sewage disposal system.
2. Colorado River Aqueduct.
3. Empire State Building.
4. Grand Coulee Dam and Columbia Basin Project.
5. Hoover Dam.
6. Panama Canal.
7. San Francisco-Oakland Bay Bridge.

*Revised to exclude from both net budget receipts and budget expenditures the appropriations of receipts to the Railroad Retirement Account.

(1) Average for period March 4, 1789, to Dec. 1, 1800.

(2) Years ended Dec. 31, 1801, to 1842; average for 1841-1850 is for the period Jan. 1, 1841, to June 30, 1850.

(3) Receipts from 1937 on have deducted appropriations to Federal old-age and survivors insurance trust fund.

(4) Expenditure; for years 1932 through 1946 have been revised to include Government Corporations (wholly owned) etc. (net).

(5) Effective January 3, 1949, amounts refunded by the Government, principally for the overpayment of taxes, are being reported as deductions from total receipts rather than as expenditures. Also, effective July 1, 1948, payments to the Treasury, principally by wholly owned Government corporations for retirement of capital stock and for disposition of earnings, are excluded in reporting both budget receipts and expenditures. Neither of these changes affects the size of the budget surplus or deficit. Beginning 1931 figures in each case have been adjusted accordingly for comparative purposes.

(6) Figures for 1918 through 1946 are revised to exclude statutory debt retirement (sinking fund, etc.).

(7) Excludes \$3 billion transferred to Foreign Economics Corporation Trust Fund.

(8) Includes \$3 billion representing expenditures made from the FEC Trust Fund.

Total currency and coin outstanding, \$48,126,692,699; less amounts held by the Treasury, \$799,071,286 and the Federal Reserve banks, \$2,615,178,217; amounts in circulation, \$44,712,443,196.

¹Excludes gold certificates. Series of 1934, which are issued only to Federal Reserve banks and do not appear in circulation. ²Issued on and after July 1, 1929. ³Issued before July 1, 1929. ⁴Issued before Series of 1934. ⁵Based on Census Bureau estimates of population. ⁶Highest amount to date.

There is maintained in the Treasury—(i) as a reserve for United States notes—\$156,039,431 in gold bullion; (ii) as security for outstanding silver certificates issued after June 30, 1929 silver in bullion and standard silver dollars of a monetary value equal to the face amount of such silver certificates; and (iii) as security for gold certificates of Series of 1934—gold, bullion of a value at the legal standard equal to the face amount of such gold certificates. Treasury notes of 1890, silver certificates issued before July 1, 1929, and gold certificates prior to Series of 1934 are redeemable from the general fund of the Treasury and upon redemption will be retired. Federal reserve notes are contingent liabilities of the United States. Funds have been deposited in the Treasury for the retirement of Federal Reserve notes of all series prior to the series of 1928. Federal Reserve notes, except those for which such payment has been

made to the Treasury, are a first lien on all assets of the issuing Federal Reserve Bank and secured by the deposit by the Federal Reserve Bank concerned with its Federal Reserve Agent, of a like amount of collateral consisting of such discounted or purchased paper as is eligible under the terms of the Federal Reserve Act, or gold certificates, or securities issued by the United States. Each Federal Reserve Bank must maintain reserves in gold certificates of not less than 25 percent against its Federal Reserve notes in actual circulation. Gold certificates deposited with Federal Reserve Agents as collateral, and those deposited with the Treasurer of the United States as a redemption fund, are counted as part of the required reserve. "Gold certificates" as herein used includes credits with the Treasurer of the United States payable in gold certificates. Federal Reserve bank notes and National bank notes are in process of retirement.

¹Includes unincorporated business savings of the types specified. Figures are rounded and will not necessarily add to totals. The foregoing data have been compiled by the Commission from many different sources. Because of the nature of the figures, current data are necessarily estimates and, therefore, are subject to revision.

²Includes shares in savings and loan associations and shares and deposits in credit unions.

³Includes non-guaranteed Federal agency securities.

⁴Includes closed-end investment companies as well as mutual funds.

⁵In addition to corporate funds, includes reserves of nonprofit organizations and multi-employer plans.

⁶Includes civil service, railroad retirement and state and local retirement funds.

⁷Mortgage debt to institutions on one-to-four-family non-farm dwellings.

⁸Consumer debt owed to corporations. Policy loans on life insurance have been deducted from those items of saving.

⁹Change in bank loans to brokers and dealers and others made for the purpose of purchasing or carrying securities.

U. S. Commercial Banks With Deposits Over One Billion

A compilation of the 300 largest commercial banks in the United States is made twice a year by the American Banker, daily banking newspaper, 67 Pearl St., New York, N. Y. Of these the first 45 banks had deposits of more than 1 billion on Jan. 1, 1968. They are listed below. (Copyright 1968, by American Banker.)

Federal Reserve System

The Federal Reserve System, central banking system of the United States, was established Dec. 23, 1913, by an Act of Congress to give the country an elastic currency, to provide facilities for discounting commercial paper, and to improve supervision of banking. Today it is generally recognized that the primary function of the System is to foster a flow of credit and money that will facilitate orderly economic growth, a stable dollar, and a long-run balance in international payments.

The Federal Reserve System consists of the (1) Board of Governors of the Federal Reserve System; (2) Federal Open Market Committee; (3) 12 Fed. Reserve Banks and 24 branches; (4) member banks; and (5) Fed. Advisory Council.

The 7 members of the Board of Governors in Washington are appointed by the President with advice and consent of the Senate; Wm. McC. Martin, Jr., is chairman. One of the Board's principal functions is in the area of monetary policy. The Board has authority to approve changes in discount rates, to change member bank reserve requirements within specified limits, to set margin requirements for certain kinds of stock transactions, and to set maximum interest rates payable on member banks' savings and time deposits. Another important duty of the Board relates to supervision of Federal Reserve Banks and member banks. Expenses of the Board of Governors are paid out of assessments upon the Reserve Banks.

The Federal Open Market Committee is composed of the 7 members of the Board of Governors and 5 Federal Reserve Bank representatives

elected annually. The Committee establishes System open market policy for the purchases and sales of securities and for operations in foreign currencies.

Rather than having one central bank in the political capital, as in central banking systems of most countries, the Federal Reserve System is divided into 12 districts, each with a Federal Reserve Bank—in Boston, New York, Philadelphia, Cleveland, Richmond, Atlanta, Chicago, St. Louis, Minneapolis, Kansas City, Dallas, and San Francisco. Reserve Banks are operated for public service. By statute, their stock is held entirely by member banks, which include all national banks and such state banks and trust companies as have been admitted to membership. Ownership of Reserve Bank stock is in the nature of an obligation incident to membership in the System and does not carry with it the attributes of control and financial interest ordinarily attached to stock ownership in corporations that are operated for profit. The amount of stock that member banks own is specified by law and dividends are limited to 6% per annum. In case of the liquidation of any Reserve Bank, its surplus would be paid entirely to the United States. Each Reserve Bank has 9 directors, 6 of whom are chosen by member banks and 3 by the Board of Governors.

The 12-member Federal Advisory Council is composed of one member selected annually by the directors of each Federal Reserve Bank. The Council meets in Washington at least 4 times a year and advises the Board of Governors on matters within the Board's jurisdiction.

¹Per capita personal income for each state is derived by the division of total personal income by total population. Personal income is a measure of the income received from all sources during the calendar year by the residents of each state. It comprises income received by individuals in the form of wages and salaries, net income of proprietors (including farmers), dividends, interest, net rents, and other items such as social insurance benefits, relief, veterans pensions and benefits, and allotment payments to dependents of military personnel.

Truth-in-Lending Becomes Federal Law

The Consumer Credit Protection Act, better known as the Truth-in-Lending law, was enacted by Congress in 1968 and signed by President Johnson on May 29.

The law provides that consumers must be given comprehensive and easily understandable information on what they pay in finance charges on both loans and credit purchases.

Effective July 1, 1969, the law requires banks, finance companies and other lenders, and also retailers, to provide borrowers and credit customers

the amount, in writing, of finance charges, in terms of dollars and cents and in annual percentages as well.

In addition, the law puts restrictions, effective July 1, 1970, on the garnishment of wages.

The law further is designed to protect home owners from mortgaging their properties, without realizing they are doing so, in order to finance repairs. It also makes extortionate lending and collection practices a Federal crime.

How to Determine the Value of Silver in Coins

Source: Treasury Department

To figure the value of the silver contained in the silver coins issued by the U. S. Treasury prior to the clad or copper sandwiched coins it is necessary to find the value of pure silver. This may be accomplished by taking the market price as listed and dividing by .999 (the fineness of commercial grade silver) to arrive at the price for silver 1,000 fine. Then multiply by the fraction shown under the table beneath. This will give you the value of the silver content in each coin.

Fine Troy Weight

	Oz.	Grain
Dollar	.7734375	371.25
Half-Dollar	.3616875	173.61

Fine Troy Weight

	Oz.	Grain
Quarter	.18084375	86.805
Dime	.0723375	34.722

For example: If the market price is \$2.30 per troy ounce, then divide \$2.30 by .999 the fineness of commercial grade silver = \$2.3023 per troy ounce 1,000 fine. For dollars, then multiply .7734375 by \$2.3023 = \$1.78. For half dollars .3616875 × \$2.3023 = 83 cents. For quarters .18084375 × \$2.3023 = 41.6 cents. For dimes .0723375 × \$2.3023 = 16.6 cents.

The silver content of the new silver-copper half dollar is .14789341504 of a fine troy ounce and this multiplied by the selling price of \$2.3023 gives a value for the silver content of 34 cents.

The Secretary of the Treasury by the authority of the Coinage Act of 1965 issued an order effective May 18, 1967, prohibiting the melting of silver coins of the United States; exportation (with certain exceptions), or the treatment of any such coins.

Average Consumer Price Indexes

Source: Bureau of Labor Statistics, United States Department of Labor

The Consumer Price Index measures the average change in prices of goods and services purchased by urban wage-earner and clerical-worker families and single workers living alone. Data for 56 large, medium size, and small cities are combined for the all-city average.

Worktime Required to Buy Food and Other Articles

Source: Bureau of Labor Statistics, U. S. Dept. of Labor

Production workers in manufacturing in the United States in Sept. 1967, earned an average of \$2.85 per hour, including overtime. At this rate with average prices as they were at that time, he worked 13 minutes to earn enough to buy one pound of ground beef, 19 minutes for one pound of butter, and corresponding lengths of time for other articles, as shown below. A month's rent for a dwelling unit of average cost would be earned in about 3 working days. Prices of automobiles and equipment vary widely throughout the United States, roughly, however, a good used car could be bought for about 9½ weeks' work, and a new car of one of the popular makes for about 26½ weeks' work

Wholesale Price Indexes

Source: Bureau of Labor Statistics, United States Department of Labor

The Wholesale Primary Market Price Index is designed to show the rate and direction of the composite of price movements, and to measure price changes not influenced by quality, quantity, terms of sale, etc. Wholesale refers to sales in quantities, not to prices received or paid by wholesalers.

Bureau of the Mint

Source: Bureau of the Mint

The first United States Mint was established in Philadelphia, Pa., then the nation's capital, by the Act of April 2, 1792 which provided for gold, silver and copper coinage. Originally, supervision of the Mint was a function of the Secretary of State, but it became (1799) an independent agency reporting directly to the President. When the Coinage Act of 1873 was passed, all mint and assay office activities were placed under a newly organized Bureau of the Mint in the Department of the Treasury.

The Bureau of the Mint manufactures all domestic coins, receives and disburses gold and silver bullion and safeguards the Government's holdings of monetary metals. Other activities include the refining of gold and silver, coinage for foreign governments, manufacture of medals for the armed services, manufacture of coinage dies and platinum assay utensils, and special assays of bullion and ores. Coinage production for the calendar year 1967 is shown as follows:

Production of U. S. coins by the Philadelphia and Denver Mints, and the San Francisco Assay Office¹, calendar year 1967

¹Coinage operations authorized by Public Law 89-81, approved July 23, 1965. ²Includes 1,863,344 special Mint Sets.

New U. S. Composite-Type Coins in Circulation

The Coinage Act of 1965 (Public Law 89-81, approved July 23, 1965) authorized a change in the metallic composition of the three subsidiary denominations to clad or composite-type coins. The clad dimes and quarters are composed of an outer layer of 75% copper and 25% nickel metallurgically bonded to a center core of pure copper. The clad half dollars, with an overall silver content of 40%, contain an outer layer of 80% silver and 20% copper bonded to an inner core of approximately 20% silver and 80% copper. The new quarters were placed in circulation Nov. 1, 1965, and the dimes and half dollars in Mar. 1966. Subsidiary coins of 90% silver and 10% copper circulate alongside the clad coins. The Coinage Act of 1965, first basic change in U. S. coinage since the nation's monetary system was established in 1792, left the composition of one and five cent coins and silver dollars unchanged. One cent coins are 95% copper and 5% zinc, and five cent coins, 75% copper and 25% nickel. Standard silver dollars are 90% silver and 10% copper.

* Data exclude Alaska and Hawaii.

A business failure, as defined for this record, occurs when a commercial or industrial enterprise is involved in a court proceeding or a voluntary action which is likely to end in loss to creditors. Specifically, the Dun and Bradstreet record of failure includes discontinuances following assignment, voluntary or involuntary petition in bankruptcy, attachment, execution, foreclosure, etc.; voluntary withdrawals from business with known loss to creditors, also enterprises involved in court action, such as receivership, and since June, 1943, reorganization, or arrangement, which may or may not lead to disturbances; as well as businesses making voluntary compromises with creditors out of court. Comparison of this series with the bankruptcy reports of the Attorney General of the United States is not possible. The latter give complete coverage of all types of cases, including farmers, employees, professional men and others not in business, all which are excluded from the Dun & Bradstreet statistics.

Interest Laws and Consumer Finance Loan Rates

Source: Revised by Roger S. Barrett of Chicago, Editor Consumer Finance Law Bulletin.

Most states have laws regulating interest rates. These laws fix a legal or conventional rate which applies when there is no contract for interest. They also fix a general maximum contract rate, but there are exceptions for particular purposes including consumer finance loan laws. In many states there are so many exceptions that the general contract maximum actually applies only to exceptional cases.

1. **Legal rate of interest.** The legal or conventional rate of interest applies to money obligations when no interest rate is contracted for and also to judgments. The rate is usually 6% a year, but in some states it is 5% or 7%.

2. **General maximum contract rates.** All states, except Colorado, Massachusetts, and New Hampshire have general laws fixing the maximum rate of interest which may be contracted for, unless another law authorizes a higher rate. The general maximum is fixed by the state constitution in Arkansas, California, Oklahoma, Tennessee, and Texas. The most common maximum rates are 6% and 8% a year, but some states permit 10% or 12%. Rhode Island permits 21%. Penalties for infraction range from forfeiture of interest to loss of the entire principal and even imprisonment. Loans to corporations are frequently exempted or subject to a higher maximum. Courts generally hold that installment sale charges are not interest, but installment sale charges are limited by laws in many states.

3. **Specific enabling acts.** In many states

special statutes permit industrial loan companies and banks to charge interest and fees without regard to installment payments which yield 1½% a month or more. Credit unions may generally charge 1% a month. Pawnbrokers' rates vary widely. Building and loan associations, loans insured by the Federal Housing Administration, and frequently retail charge account credit are also specially regulated.

4. **Consumer finance loan statutes.** Consumer finance loan statutes are based on early models drafted by the Russell Sage Foundation (1916-42) to provide small loans to wage earners under license and other protective regulations. In general, licensed lenders may charge 2½% or 3% a month for \$300 or less and reduced rates for additional amounts up to \$1,000, \$1,500 or more. A number of states permit add-on rates of 17% to 20% (\$17 to \$20 per \$100) a year of the original principal for \$300 and lower rates for additional amounts. An add-on of 17% (\$17 per \$100) per year yields about 2½% per month when the loan is paid in equal monthly installments. In the table below unless otherwise stated, monthly rates are based on reducing principal balances, annual add-on rates are based on the original principal for the full term, and two or more rates apply to different portions of balance or original principal.

The states with consumer finance loan laws and the rates of charge as of October 1, 1968, are as follows:

State	Maximum rate	State	Maximum rate
Ala.....	Monthly unless otherwise stated 3% to \$200, 2% to \$300. Special rate up to 8%.	N. H....	2% to \$600, 1½% to \$1,500, 1½% on larger loans to \$5,000

Federal Deposit Insurance Corporation (FDIC)

The primary purpose of the Federal Deposit Insurance Corporation (FDIC) is to insure the deposits of all banks entitled to insurance benefits under the Federal Deposit Insurance Act. The major functions of the FDIC are to pay off depositors of insured banks closed without adequate provision having been made to pay depositors' claims, to act as receiver for all national banks placed in receivership and for state banks placed in receivership when appointed receiver by state authorities, and to prevent the continuance or development of unsafe and unsound banking practices. The FDIC's entire income consists of assessments on insured banks and income from investments; it receives no appropriations from Congress. It may borrow from the U. S. Treasury not to exceed \$3 billion outstanding at any one time, but has made no such borrowings since it was organized in 1933. The FDIC surplus (Deposit Insurance Fund) as of Dec. 31, 1967, was \$3,485,486,215.

SOCIAL SECURITY PROGRAMS

Medicare; Old-Age, Survivors and Disability Insurance

Legislation Signed in 1968 Increases Old-Age, Survivors and Disability Benefits by 13% ; Tax Base Changed

Source: Office of Research and Statistics, Social Security Administration, Dept. of Health, Education and Welfare

The Social Security Amendments of 1967, signed Jan. 2, 1968, included changes that raised old-age, survivors, and disability benefits 13% beginning with the check for February, 1968, raised the taxable and creditable earnings base, revised the contribution schedule, raised the amount a worker may earn and still get benefits, provided benefits for disabled widows and widowers at reduced rates at age 50, and made it possible for workers disabled before age 31 to qualify for benefits. Changes in Medicare included coverage of added days of hospital care, coverage of physical therapy services and certain podiatrists' services under medical insurance, and transfer of all outpatient hospital services to medical insurance.

The Social Security Act provides that the Secretary of Health, Education, and Welfare is to determine and promulgate each year between July 1 and October 1 the deductible (the amount paid by the patient) for inpatient hospital services under Medicare for the next calendar year. In 1968, the Secretary announced that the patient must pay the first \$44 (instead of the first \$40) for the first 60 days' hospital care in 1969.

The Commissioner of Social Security is Robert M. Ball. There are 642 district offices (with 117 branch offices) in the country, where the public may obtain information about its right to benefits.

MEDICARE HEALTH INSURANCE FOR AGED

Beginning July 1966, most Americans aged 65 and over became eligible for hospital insurance and if they choose to take it, for voluntary medical insurance, in addition.

Hospital Insurance—In the second year of operation (July 1967-June 1968) about \$3.7 billion was paid in hospital benefits. About 19,700,000 persons were enrolled as of June 1968. There were 5,600,000 hospital admissions, 450,000 admissions to extended-care facilities, and 260,000 start-of-care notices for home health services recorded under the program in the 12-month period.

The hospital insurance program pays the cost of covered services for hospital and posthospital care as follows:

- Up to 90 days of hospital care during a benefit period (spell of illness, starting on the 1st day of care as a bedpatient is received in a hospital or extended-care facility and ending when the individual has not been a bedpatient for 60 consecutive days). For the first 60 days, the hospital insurance pays for all but the first \$44 of expenses; for the 61st to 90th day, the program pays all but \$10 a day for covered services. In addition, each person has a 60-day lifetime reserve that can be used after the 90 days of hospital care in a benefit period are exhausted, and all but \$20 a day of expenses during the reserve days are paid. Once used the reserve days are not replaced. (Payment for care in a mental hospital is limited to 190 days.)
 - Up to 100 days' care in an extended-care facility (skilled nursing home) in each benefit period. Hospital insurance pays for all covered services for the first 20 days and all but \$5 daily for the next 80 days. At least 3 days' hospital stay must precede these services, and the extended-care facility must be entered within 14 days after leaving the hospital.
 - Up to 100 visits by nurses or other health workers (not doctors) from a home health agency in the 365 days after release from a hospital or extended-care facility.
- Money to pay these benefits comes from a spe-

cial contribution paid by workers and by their employers and by the self-employed. In 1968 and for 1969 through 1972, it is 1/6 of 1% (0.6%) on earnings up to \$7,800 (the maximum taxable amount under the 1967 amendments). The tax gradually increases then by steps stated in the law. The contributions are placed in a separate Hospital Insurance Trust Fund from which benefits and administrative expenses are paid. These contributions are made at the same time as those for social security cash benefits.

Medical insurance—Aged persons can receive benefits under this supplementary program only if they sign up for them and agree to pay a monthly premium (\$4, beginning April 1968). The Federal Government pays a matching amount.

The medical insurance program pays 80% of the reasonable charges (after the first \$50 in each calendar year) for the following services:

- Physicians' and surgeons' services, whether in the doctor's office, a clinic, or hospital or at home.
- Home health services even without a hospital stay—up to 100 visits in a year.
- Other medical and health services, such as diagnostic tests, surgical dressings and splints, and rental or purchase of medical equipment.
- Physical therapy services furnished under the supervision of a participating hospital, clinic, extended-care facility, or agency.
- Certain services by podiatrists.
- All outpatient services of a participating hospital (including diagnostic tests).

Beginning April 1968, X-ray or laboratory services of physicians for hospital bedpatients are paid on the basis of full reasonable charges without the need to meet the \$50 deductible.

To get medical insurance protection, persons approaching age 65 may enroll in the 7-month period that includes 3 months before the 65th birthday, the month of the birthday, and 3 months after the birthday, but if they wish coverage to begin in the month they reach 65 they must enroll in the 3 months before their birthday. Persons not enrolling within their 7-month enrollment period may enroll during the first 3 months of each year, provided this period begins within 3 years after the first chance to enroll.

The monthly premium is deducted from the cash benefit for persons receiving social security, railroad retirement, or civil service retirement benefits. Income from the medical premiums and the Federal matching payments are put in a Supplementary Medical Insurance Trust Fund, from which benefits and administrative expenses will be paid.

Persons qualifying for hospital insurance under social security receive a health insurance card similar to the cards now used by Blue Cross and other health agencies. The card indicates whether the individual has taken out medical insurance protection. It is to be shown to the hospital, extended care facility, home health agency, doctor, or whoever provides the covered services. The part of the bill for which payment can be made is taken care of by the program. Payments are made only in the 50 States, Puerto Rico, the Virgin Islands, Guam, and American Samoa, except that hospital services may be provided in border areas immediately outside the U. S. if comparable services are not accessible in the U. S. for a beneficiary who becomes ill or is injured in the U. S.

The health insurance programs do not pay the entire costs of health care. Those unable to pay medical bills not covered by the health insurance programs may qualify for aid from the public welfare agency. Most States have programs to help persons who cannot pay their medical bills. Some of these programs provide aid only for the aged; others help the medically needy, regardless of age.

OLD-AGE, SURVIVORS, AND DISABILITY INSURANCE

Retired and disabled workers and their families and the survivors of deceased workers received \$22.5 billion in social security cash benefits in the 12 months ended in June 1968. In that month the

average benefit being received by a retired worker was \$98; for retired workers just coming on the rolls, the average benefit award was about \$103. For a disabled worker, the June check was \$112, and new disabled-worker beneficiaries were awarded \$115, on the average.

Old-age, survivors, and disability insurance covers almost all jobs in which people work for wages or salaries, as well as most work of self-employed persons, whether in a city job, or in business, or on a farm.

Old-age, survivors, and disability insurance is paid for by a tax on earnings (beginning Jan. 1, 1968, up to \$7,800). The employed worker and his employer share the tax equally. (Beginning 1966, cash tips count as covered wages if they amount to \$20 or more from one place of employment. The worker reports them to his employer, who includes them in his social security tax reports, but only the worker pays contributions on the amount of the tips.)

The employer deducts the tax each payday and sends it, with an equal amount as his own share, to the District Director of Internal Revenue. The collected taxes are deposited in the Federal Old-Age and Survivors Insurance Trust Fund and the Federal Disability Insurance Trust Fund; they can be used only to pay benefits and administrative expenses.

The contribution rates on the first \$7,800 of covered earnings and the schedule of increases to come are shown in the 2nd table on page 151 for the old-age, survivors, and disability insurance program and for the new hospital insurance program.

AMOUNT OF WORK REQUIRED

To qualify for benefits for himself and his family, the worker must have been in covered employment long enough to become insured. Just how long depends on his date of birth (or if he dies or becomes disabled, the date of his death or disability).

A person is fully covered if he has one quarter of coverage for every year after 1950 up to but not including the year in which he reaches age 65 (62 for women), dies, or becomes disabled. Under a special 1965 provision a person who reached retirement age before 1957 can qualify for benefits at age 72 with less than 6 quarters of coverage, and his wife or widow (if he was living in 1965) may also receive a benefit at 72 (\$40 benefit for the worker or the widow, \$20 for the wife).

To get disability benefits, the worker must also have credit for 5 out of 10 years before he becomes disabled. Under the 1965 amendments, persons disabled before age 31 because of blindness as defined in the law can qualify with a briefer period of coverage.

The following table shows the number of work years required to be fully insured for old-age benefits, according to the year worker reaches retirement age or dies.

Retirement age* or death	Years of credit
In 1957.....	1½
1958.....	1½
1959.....	2
1960.....	2½
1961.....	2½
1962.....	2½
1963.....	3
1964.....	3½
1965.....	3½
1966.....	3½
1967.....	4
1968.....	4½
1969.....	4½
1970.....	4½
1971.....	5
1975.....	6
1979.....	7
1983.....	8
1987.....	9
1991 or later.....	10

*Age 62 for women, age 65 for men. Men may actually retire at age 62 and receive a reduced benefit, but age 65 is used for men in determining the minimum number of quarters of coverage needed.

AGED 72 OR OVER

A 1966 provision made special benefits payable, beginning Oct. 1966, to non-insured persons aged 72 or over or reaching that age before 1968 and residing in the 50 states or the District of Columbia, even if they have no quarters of coverage. Persons reaching 72 after 1967 can also qualify for special benefits, but they must have at

least 3 quarters of coverage for each calendar year after 1966 and before the year they become 72.

SELF-EMPLOYED

A self-employed person who has earnings of \$400 or more in a year must report his earnings for income-tax and social security tax purposes. If he is not a farmer he reports only net returns from his business. He need not add income from real estate, savings, dividends, loans, pensions or insurance policies if these are not part of his business.

A self-employed person who has net earnings of \$400 or more in a year gets 4 quarters of coverage for that year. If his earnings are less than \$400 in a year they do not count toward social security credits.

Under a 1966 law, the nonfarm self-employed person must make estimated payments of his social security taxes, on a quarterly basis, for taxable years after Dec. 31, 1966, if combined estimated income tax and social security tax amount to at least \$40.

When a person has both taxable wages and earnings from self-employment, only as much of the self-employment income as will bring total earnings to \$7,800 is subject to tax for social security purposes. A self-employed person pays the tax at a lower rate than the combined rate for an employee and his employer, 1½ times what the employee alone pays.

Before the 1967 amendments, the religious work of ministers and members of religious orders was covered on an individual elective basis. Under the 1967 amendments, services of ministers and members of religious orders who have not taken a vow of poverty are covered automatically unless, within specified time limits, an exemption is obtained from the Internal Revenue Service on the grounds of religious principles or conscience. Once an exemption is obtained it cannot be withdrawn.

FARM OWNERS AND HANDS

Self-employed farmers whose gross annual earnings from farming are under \$2,400 may report ½ of their gross earnings instead of net earnings for social security purposes. Cash or crop shares received from a tenant or share farmer count if the owner participated materially in production or management. The self-employed farmer pays contributions at the same rate as other self-employed, but he may make his tax returns annually.

Farm Workers. Earnings from farm work count toward benefits (1) if the employer pays \$150 or more in cash during the year; (2) if the employee works on 20 or more days for cash pay figured on a time basis. Under these rules a person gets credit for one calendar quarter for each \$100 in cash pay in a year but no more than four quarters in any one year.

Foreign farm workers admitted to the United States on a temporary basis will not be covered.

HOUSEHOLD WORKERS

Anyone working as maid, cook, laundress, nursemaid, baby-sitter, chauffeur, gardener and at other household tasks in the home of another, is covered by social security if he or she earns \$50 or more in cash in three months from any one employer. Room and board do not count, but care counts if paid in cash. The job does not have to be regular or fulltime. The employee should get a card at the social security office and show it to the employer.

The employer deducts the amount of the social security tax from the worker's pay, adds an identical amount as his own tax and sends the total amount to the Federal Government, with the number of the employee's social security card.

WHAT AGED WORKERS GET

When a person has enough work in covered employment and reaches retirement age (65 for full benefit, 62 for reduced benefit), he may retire and get monthly old-age benefits. If he continues to work and has earnings of more than \$1,680, some benefits are withheld. But only \$1 in benefits will be withheld for every \$2 of earnings between \$1,680 and \$2,880 and \$1 in benefits for every \$1 in earnings above \$2,880. The eligible worker who is 72 receives the full amount of benefit, regardless of earnings.

When a person receives old-age benefits, payments can also be made to certain of his dependents including a wife 62 or over, dependent children under 18 or who became totally disabled before that age or who is a full-time student not yet aged 22, a wife (regardless of age) if caring for an eligible child, and a dependent husband 62 or over.

The special benefit for persons aged 72 or over who do not meet the regular coverage requirements is \$40 a month (\$60 for a couple if both members are eligible). It is not paid to persons on the public assistance rolls.

Social Security benefits are not subject to income taxes.

A woman worker is eligible for a full old-age benefit at age 65, but she may retire at 62 and get 80% of her full benefit for the rest of her life; the nearer she is to 65 when she begins collecting her benefit, the larger it will be. (Benefits for men retiring before 65 are reduced at the same rate as benefits for women retiring before 65.)

Under the 1967 amendments, a child can get benefits based on his mother's earnings on the same conditions as those entitling a child to benefits based on his father's earnings record.

BENEFITS FOR WORKER'S WIFE (OR HUSBAND)

The wife of a man who is getting social security retirement or disability payments may become entitled to wife's insurance benefits in a reduced amount when she reaches 62, or she may wait until she reaches 65 and get the entire amount of the wife's benefit, which is one-half of the husband's benefits (but not more than \$105). Benefits are also payable to the divorced wife of an insured worker if she was married to him for at least 20 years and he was contributing to or was ordered by a court to contribute to her support.

If a woman worker entitled to old-age benefit has a dependent husband aged 65 or over, he may draw a benefit similar to a wife's benefit at 65 (or a reduced benefit at age 62).

BENEFITS FOR CHILDREN OF RETIRED OR DISABLED WORKERS

If a worker has children under 18 when he retires for age or disability they will get a benefit that is half his benefit, and so will his wife, even if she is under 62. Total benefits based on his earnings up to \$6,600 cannot be more than \$395.60. (Eventually, as workers earnings records reflect more closely the new \$7,800 taxable earnings limit, the maximum family benefit will be \$434.40.)

When his children reach 18, their benefits will stop, except that a child permanently and totally disabled before 18 may get a benefit as long as his disability meets the definition in the law. In addition, his benefits are payable until the child reaches his 22nd birthday if he is attending school as a full-time student.

SURVIVOR BENEFITS

If a worker should die while insured, one or more types of survivor benefits would be payable to his survivors.

1. A cash payment to cover burial expenses that amounts to 3 times the basic benefit but not more than \$255, paid at the death of every insured worker.

2. A benefit for each child until the child reaches

18. The monthly benefit of each child of a worker who has died is three-quarters of the amount the worker would have received if he had lived and drawn retirement benefits. A child with a permanent disability that began before age 18 may receive his benefit after that age (or up to age 22, if he is attending school).

3. A mother's benefit for the widow, if children under 18 are left in her care. Her benefit is 75% of the basic benefit and she draws it until the youngest child reaches 18. Payments stop then even if the child's benefit continues because he is attending school. They will start again when she is 62 (or 60), unless she marries. If she marries and the marriage is ended, she regains benefit rights. If she has a disabled child beneficiary aged 18 or over in her care, her benefits also continue.

The 1967 amendments provide that disabled widows and widowers will be eligible for benefits at age 50 at reduced rates depending on the age at entitlement. The widow or widower must have become totally disabled before or within 7 years after the spouse's death.

4. If there are no children entitled to receive benefits, the widow will get a benefit at 62 that is 82½% of the basic benefit amount. She may choose to start getting benefits at age 60; if she makes this choice, her benefit is reduced by 5/9 of 1% for each month she receives a benefit before she is 62.

5. Dependent parents may be eligible for benefits, if they have been receiving at least half their support from the worker before his death, have reached retirement age (62) and are not eligible for an old-age benefit based on their own earnings. Each parent receives 75% of the basic benefit except that, if there is only one surviving parent, the benefit is 82% of the basic benefit.

The survivors of a woman worker receive benefits on the same basis as those of men workers.

WHAT DISABLED WORKER GETS

If a worker becomes so severely disabled that he is unable to work, he may be eligible to receive a monthly disability benefit that is the same amount he would receive as an old-age benefit if he were 65 at the start of his disability. When he reaches 65, his disability benefit becomes an old-age benefit.

Benefits like those provided for dependents of retired-worker beneficiaries may be paid to dependents of disabled beneficiaries.

FEDERAL CREDIT UNION

The Bureau of Federal Credit Unions is responsible for chartering, examining, and supervising Federal credit unions. These are voluntary cooperative associations to promote thrift among members and provide loans. Large numbers of credit unions are found among employee groups in commerce, industry, and government. At the end of June 1968 there were 12,500 Federal credit unions with about 10,163,000 members and assets of \$6,555 billion. The Bureau of Federal Credit Unions is a part of the Social Security Administration.

Disabled worker—under 65	27.50	44.20	57.50	70.20	82.50	95.00	105.00
Wife 65 or older	44.00	70.80	92.00	112.40	132.00	152.00	174.40
Retired worker at 62	20.70	33.20	43.20	52.70	61.90	71.30	78.80
Wife at 62, no child	55.00	73.00	94.90	115.90	136.20	156.70	179.90
Widow at 60, no child	47.70	63.30	82.30	100.50	118.10	135.90	156.00
Disabled widow at 50, no child	33.40	44.30	57.60	70.30	82.70	95.10	109.20
Wife under 65 and one child	27.50	44.20	57.40	70.20	82.50	95.00	105.00
Widow under 62 and one child	82.50	132.60	172.60	210.60	247.60	285.00	327.00
Widow under 62 and two children	82.50	132.60	202.40	280.80	354.40	395.60	434.40
One child of retired or disabled worker	27.50	44.20	57.50	70.20	82.50	95.00	109.00
One surviving child	55.00	88.30	115.30	140.30	165.30	189.90	218.00
Maximum family payment	82.50	132.60	202.40	280.80	354.40	395.60	434.40

¹Generally, average earnings are figured over the period from 1950 until the worker reaches retirement age, becomes disabled, or dies. Up to 5 years of low earnings can be excluded. The maximum earnings creditable for social security are \$3,600 for 1951-1954; \$4,200 for 1955-1958; \$4,800 for 1959-1965; and \$6,600 for 1966-1967. The maximum creditable in 1968 and after is \$7,800, but average earnings cannot reach this amount until later. Because of this, the benefits shown in the last two columns on the right generally will not be payable until later. When a person is entitled to more than one benefit, the amount actually payable is limited to the larger of the benefits.

EMPLOYMENT SERVICES

The Federal-State Employment Service consists of the U. S. Employment Service in the Bureau of Employment Security and affiliated state employment services with their network of some 2,400 local offices, including 171 youth opportunity centers. During the fiscal year ended June 30, 1968, these local offices recorded 5,759,923 placements in nonfarm jobs and 4,601,501 in year-round seasonal farm jobs. There were 2,999,955 job tests given, and applicants received almost 2,599,022 job counseling interviews. Since the beginning of the training program under the Manpower Development and Training Act in Sept. 1962 through June 30, 1968, enrollees to institutional training have numbered 739,500 and to on-the-job training 295,900.

The Federal-State employment service is concerned with utilizing to the fullest the human resources of the nation; with referring those who are employable to job openings utilizing their highest skills; with reaching out and finding those who are unemployed or underemployed and providing or arranging for necessary service or training to make them employable; with counseling and testing as necessary; with developing appropriate job openings; with referral for employment; and with followup to insure placement.

Special services are provided for those with employment problems—older workers, the young and inexperienced, members of minorities, migrant workers, the handicapped, and the disadvantaged. Veterans are provided with special services in accordance with their needs for employment counseling, job development, and placement and there are Veterans Employment Service representatives in the Bureau's national, state and local offices. Since August 1967, at the direction of the President, the public employment service has been contacting all individuals discharged from military service, to assure that they find jobs rapidly.

The public employment service assists employers in meeting their labor needs and provides appropriate employment-related personnel services. It insures, before an immigrant worker may receive a visa, that there are insufficient workers available for the employment and that there will be no adverse effect upon wages and working conditions of similarly employed U. S. workers. In the case of supplementary seasonal foreign farmworkers, the employment service provides a special program of local and interstate recruitment to insure that domestic farmworkers are given preference in employment. The public employment service assists in development and utilization of civilian manpower capability for meeting national emergencies and disaster needs, and assists other countries to improve their manpower programs.

The human resources development concept was introduced in 1965 and by the end of fiscal year 1967 had been adopted as the operating policy of all public employment service offices. The goal of this effort is to provide total employment and related service to meet needs of the disadvantaged. Human resources development involves outreach—the sending of employment service staff into disadvantaged neighborhoods to seek out and help those who may become employable. Close cooperation with other agencies, such as local community action agencies, is basic to the program.

During the fiscal 1968, 1,236,000 applicants were reached by Youth Opportunity Centers for job placement, training, or other manpower services. Most applicants were between 16 and 22 years of age. These centers and other local employment service offices recorded 4,322,100 registrations of youth, 683,500 initial counseling interviews, and 2,784,400 placements in farm and nonfarm jobs. Employment service offices also referred 63,762 applicants to the Job Corps and 127,200 to the Neighborhood Youth Corps for work-training experience, and provided job placement and other related services to many of those completing or leaving these programs.

UNEMPLOYMENT INSURANCE

Unlike old-age and survivors insurance, entirely a Federal program, unemployment insurance is a

Federal-State program which provides insured wage earners with partial replacement of wages lost during involuntary unemployment. The program protects most workers in industry but few in agriculture. The amount of weekly benefits is determined by State laws, prior wages, and length of employment. Some 56,000,000 jobs in commerce, industry, and government, including the Armed Forces, were covered under the Federal-State system in fiscal year 1968. Another 700,000 railroad workers were insured against unemployment under a system administered by the Railroad Retirement Board.

Each state, as well as the District of Columbia and Puerto Rico, has its own law and operates its own program. The Federal Unemployment Tax Act levies an excise tax of 3.1% on the first \$3,000 of payrolls of employers with four employees or more in 20 weeks in a year. Although the Federal tax is limited to employers with four or more workers more than half of the state laws cover firms with fewer than four. Against that tax a credit of up to 2.7% is allowed for taxes paid under State unemployment insurance laws which meet certain criteria, leaving the Federal share at 0.4% of taxable wages from which the Federal Government grants to the states funds to cover the administrative cost of the unemployment insurance and employment service programs. The Social Security Act requires as a condition of such grants, prompt payment of benefits when due to unemployed workers under a state law, and provides safeguards for workers' rights to benefits if they do not take jobs that fail to meet certain labor standards. Through the Unemployment Insurance Service of the Bureau of Employment Security, the Secretary of Labor determines whether states qualify for grants for unemployment insurance administration, and for purposes of tax offset credit for employers.

Benefits are financed solely by employer contributions except in Alaska, Alabama, and New Jersey, where employees also contribute. Employers subject to state unemployment insurance taxes paid about \$2.6 billion in fiscal year 1968. Benefits are paid through state public employment offices at which unemployed workers must register for work and to which they must report regularly for referral to a possible job during the time when they are drawing weekly benefit payments. During the 1968 fiscal year, \$2,054,970,554 in benefits were paid under the state UI programs to 4,300,000 beneficiaries representing compensation for 50,858,504 weeks of unemployment. They received an average weekly payment of \$41.25 for total unemployment for an average duration of 11.7 weeks. See table on page 153 for data by states.

For Federal Services

Title 5, chapter 85 of the U. S. code provides unemployment insurance protection to about 2,950,000 Federal civilian employees and about 3,550,000 members of the armed forces. Benefits for unemployed Federal workers and ex-servicemen are financed through direct Federal appropriations but are paid by the state employment security agencies as agents of the Federal Government on the basis of each state's law.

During fiscal year 1968, a total of \$47,300,000 was paid to some 70,806 unemployed Federal civilian workers for a total of 1,086,354 weeks of unemployment. The average weekly payment was \$42.41 and was paid for an average of 15.3 weeks. A total of \$58,500,000 was paid to 148,161 unemployed ex-servicemen for 1,357,733 weeks of unemployment. The average weekly benefit was \$42.69 and was paid for an average of 9.2 weeks.

In fiscal year 1968, under arrangements made with state employment security agencies, weekly training allowances, including subsistence and transportation in certain cases, totaling about \$151,000,000 were paid to some 165,000 persons taking basic education or vocational training under sections 203 and 241 of the Manpower Development and Training Act. Arrangements were also in effect with state employment security agencies for payment of \$1,649,000 in readjustment allowances to 1,619 workers found to have been affected adversely under the Trade Expansion Act of 1962 or the Automotive Products Trade Act of 1965.

¹Claimants whose base-period earnings or whose employment—covered by the unemployment insurance program—was sufficient to make them eligible for unemployment insurance benefits as provided by State law. ²Based on number of first payments.

³Based on final payments. Some claimants shown, therefore, actually experienced their final week of compensable unemployment toward the end of the previous fiscal year but received their final payments in the current fiscal year. Similarly, some claimants who served their last week of compensable unemployment toward the end of the current fiscal year did not receive their final payment in this fiscal year and hence are not shown. A final week of compensable unemployment in a benefit year results in the exhaustion of benefit rights for the benefit year. Claimants who exhaust their benefit rights in one benefit year may be entitled to further benefits in the following benefit year.

⁴Excludes intrastate transitional claims to reflect more nearly instances of new unemployment. Includes claims filed by interstate claimants in the Virgin Islands.

⁵Adjusted for voided benefit checks and transfers under interstate combined wage plan.

⁶Sum of balance in State clearing accounts, benefit-payment accounts, and unemployment trust fund accounts maintained in the U. S. Treasury.

How Unemployment Statistics Are Obtained

Source: Bureau of Labor Statistics, U. S. Department of Labor

The main source of unemployment statistics in the United States is the Current Population Survey, a sample survey of households, conducted monthly since 1940. The material is collected and tabulated by the Bureau of the Census under contract with the Bureau of Labor Statistics, which analyzes and publishes the data in *Employment and Earnings* and *Monthly Report on the Labor Force*.

In this survey trained interviewers obtain information from approximately 50,000 households each month; the households form a probability sample representative of the entire civilian noninstitutional population. Sufficient information is obtained to classify persons 16 years of age and over as (1) employed (2) unemployed or (3) not in the labor force. The labor force is simply the total of the employed and the unemployed, and is com-

monly referred to as the civilian labor force since it excludes the Armed Forces.

Under this system the unemployed consist of all civilians 16 years of age or older who did not work during the survey week (the week including the 12th of the month) but who looked for work in the previous 4 weeks, and were available for work during the survey week. Persons who never had a job are counted among the unemployed if they meet these criteria. Persons with jobs but on lay-off and those planning to start new jobs within 30 days are also classified as unemployed. The data on the unemployed are analyzed by sex, age, previous occupation and industry, duration of unemployment, and other characteristics. The unemployment rate is the percent of the labor force who are unemployed.

Social and Rehabilitation Service

Source: Dept. of Health, Education and Welfare

A new agency, the Social and Rehabilitation Service, was established in the Department of Health, Education, and Welfare, Aug. 15, 1967, to strengthen and realign the former functions of the Vocational Rehabilitation Administration, the Administration on Aging, the Welfare Administration, and the Mental Retardation Division of the Bureau of Health Service, Public Health Service, Miss Mary E. Switzer, former Commissioner of Vocational Rehabilitation, was appointed Administrator.

The reorganization is designed to make possible a more unified attack on the problems of needy Americans, with special emphasis on the family and with a more concerted effort toward rehabilitation in the Department's social and welfare programs. A major goal is to give people who receive public assistance the help, the skills, and the incentives they need to become independent.

A Social and Rehabilitation Service Commissioner has been assigned to each of the 9 HEW regions and will supervise all programs and activities of the Service in his region and give approval to all state plans. This will enable states, communities, and voluntary private groups to establish closer working relationships with the Federal government on all SRS programs.

A large number of persons will benefit by the range of services now merged in SRS:

- About 7,600,000 persons (4% of the population) receive cash assistance at any given time under Federally-aided programs. These payments total \$7.8 billion annually; 58% (\$4.5 billion) comes from the Federal Government and the remainder from state and local governments.
- In 1967 200,000 persons were rehabilitated for gainful employment through vocational rehabilitation programs.
- Over 6,000,000 needy persons receive medical services each year through Federally-assisted programs, including the new Title XIX Medicaid program.
- Over 600,000 children receive child welfare services related to adoption, foster care, or neglect. An additional 4,000,000 dependent children of public assistance families will receive the same quality of child welfare services under the 1967 amendments to the Social Securities Act.
- Over 450,000 crippled children receive medical services each year with Federal assistance.
- More than 250,000 women received family planning help last year through Childrens Bureau programs.
- More than 700 projects assisted by the Administration on Aging provide services for many of the 19,000,000 Americans over 65.

The combined 1968 appropriations of the HEW components joined in the Social and Rehabilitation Service totalled \$6.05 billion in Federal funds. The new agency is staffed by about 1,900 employees in the following 5 major program units:

Rehabilitation Services Administration: responsible for programs aiding the handicapped, disabled Social Security applicants, crippled children, the mentally retarded, and for services for the blind and the permanently and totally disabled.

Children's Bureau: responsible for studies and investigations of the status of children, and for Federal-State child welfare, maternal and child health and juvenile delinquency programs, for health services to school children, and for family and child welfare services.

Administration on Aging: responsible for administration of the Older Americans Act, and for collecting and disseminating information on the status of Older Americans, for services for the aged (including insurance and assistance beneficiaries), for maintaining standards for services to OAA beneficiaries and for the Foster Grandparent program.

Medical Services Administration: responsible for medical assistance services by State and local agencies, including Title XIX programs (Medicaid).

Assistance Payments Administration: responsible for the money payment aspects of public assistance programs (Aid to Families with Dependent Children, Old Age Assistance, Aid to the Blind, and Aid to the Permanently and Totally Disabled) and for the administration of Work Experience and Community Work Training programs.

A significant aspect of the new SRS is the separation of cash payments and social service functions in public assistance. This was done to offer greater opportunities for recipients to obtain social and other rehabilitation services which could lead them to self support and terminate their need for public financial aid.

STATISTICS OF BOOK TRADE

The number of new books (titles) published in the U. S. fell from 30,050 in 1966 to 28,762 in 1967, (21,877 new books and 6,885 new editions) according to Publishers' Weekly. The lower figure, however, did not necessarily mean a decline in U. S. book publishing, but is accounted for, at least in part, by new counting procedures initiated by PW at the beginning of 1967. For example, multi-volume sets are now counted as individual books only if each volume in the set has a different title. Also, imported books are counted in the yearly total of new titles only if there is no more than a year's time between their publication abroad and the time they are available in the U. S. Accordingly, the number of imported books fell from 6,347 in 1966 to 4,852 in 1967 (4,107 new books and 745 new editions).

In 1966, the last year for which complete statistics were available, sales of all publishers totaled \$2,295,000,000, an increase of about 13% over 1965. Hardcover book prices have risen 51% since the base period 1957-59, but rose only about 6 tenths of 1% during 1966-67.

By far the best selling book of 1967 was William Manchester's *Death of a President*, with over 500,000 copies sold. The best selling work of fiction in 1967 was a first novel, Elia Kazan's *The Arrangement*, which sold about 212,500 copies in bookstores.

The Long Short Cut, a suspense novel by Andrew Garve, published in 1967 by Harper & Row, was purported to be the first book (other than directories) set into type by a computer. Using the R.C.A. Videocomp and computer system, up to 600 characters a second were set, a speed 60 times greater than the fastest earlier methods of book type setting.

Best Sellers of Government Printing Office

Of the 24,000 publications available at the Government Printing Office, Washington, D. C. 20402, these are the 15 best sellers. The 70,000,000 publications sold annually bring in \$17,000,000 and net \$7,000,000 for the Treasury.

U. S. Opera Survey

Reviews of Activities of Opera Companies in Twenty-One U. S. Cities

The number of operatic performances in the U. S. held fairly steady in the 1967-1968 season with 5,222 performances of 343 works, as against 5,487 performances of 335 works in the 1966-1967 season, according to Opera News and Central Opera Service. The most performed opera was The Barber of Seville with 299 performances; Hansel and Gretel had 156 and La Boheme had 143. However, the most performed opera by all groups, including high schools and church groups, was, for the 15th consecutive year, Menotti's Amahl and the Night Visitors with 368 performances.

The U. S. had 297 opera companies and 325 colleges with productive opera departments in 1967-68. Colleges continued to pioneer the production of less well known works of intrinsic value which would rarely, if ever, get a hearing in the commercial or civic theater. For instance, Virginia's Lynchburg College performed Monteverdi's Orfeo, Northern Illinois Univ. gave Telemann's Pimpinone and Cornell produced Cesti's Oronthea.

METROPOLITAN OPERA ASSN., New York, opened its 84th season Sept. 16, 1968, and was scheduled to close Apr. 19, 1969. The season, the third at the Metropolitan Opera House in Lincoln Center, was highlighted by the presentation of 4 new productions: Puccini's *Tosca*, Strauss' *Der Rosenkavalier*, Verdi's *Il Trovatore*, and Wagner's *Das Rheingold*, the second installment in a new Ring Cycle, conducted by Herbert von Karajan. The repertoire also included: La Sonnambula, Wozzeck, Carmen, Peter Grimes, Andriana Lecouvreur, Lucia di Lammermoor, Faust, Romeo et Juliette, Don Giovanni, La Boheme, Turandot, Il Barbiere di Siviglia, Die Frau ohne Schatten, Don Carlo, Rigoletto, Simon Boccanegra, Die Meistersinger and Die Walkure. Rudolf Bing is general manager. METROPOLITAN OPERA NATIONAL AUDITIONS, New York. Nine National Finalists were to compete for a Metropolitan Opera contract and a number of other awards at the Metropolitan Opera House, Nov. 17, 1968. The 9 finalists were winners of regional contests held throughout the U. S. and Canada, Puerto Rico and Australia in which approximately 2,000 singers were auditioned. The finalists were Jacquelyn Benson, Patricia Craig, Helen-Kay Eberley, Glenys Fowles, Jessye Norman, Nancy Shade, Ruth Welton, Loretta Ziskin (all sopranos) and Gwen Jones, mezzo-soprano.

NEW YORK CITY OPERA CO., New York State Theater, Lincoln Center, N. Y., opened its third season at Lincoln Center (after 41 seasons at the City Center) with Puccini's *Il Trittico* on Sept. 19. The 1968 repertoire included a new production of Gounod's *Faust* and the world premiere of Weisgall's *Nine Rivers From Jordan*. Other operas included Barber of Seville, Bomarzo, La Boheme, Cavalleria Rusticana, Pagliacci, Julius Caesar, Le Coq D'Or, Magic Flute, Manon, Tosca and La Traviata. The fall season was to conclude on Nov. 17. The winter season (Feb. 17-Apr. 20, 1969) had scheduled *The Turn of the Screw*, *Madama Butterfly* and *The Ballad of Baby Doe*. Julius Rudel is general director and John S. White is associate director.

BALTIMORE CIVIC OPERA CO., Baltimore, Md., presented 3 operas in its 1968-69 season. Opening night, Oct. 24, featured Verdi's *Otello* with Robert Nagy, Mary Curtis Verna and Louis Quilico. Other operas scheduled were: Puccini's *Manon Lescaut* with Raina Kabaivanska and John Reardon; and Puccini's *Tosca* with Jeannine Crader, Chester Ludwig and Bernabe Marti. Rosa Ponselle is artistic director and the Baltimore Symphony Orchestra accompanies each performance. The season was to be concluded Apr. 28, 1969.

OPERA COMPANY OF BOSTON, Boston, Mass., scheduled 4 American premiers for its 11th season: The original versions of Strauss' *Ariadne Auf Naxos* and Verdi's *Macbeth*; Bartok's ballet *The Wooden Prince* performed with his *Bluebeard's Castle* and *Miraculous Mandarin*; and *Roger Sessions' Montezuma*. A fifth production was to be Mozart's *The Marriage of Figaro*. Sarah Caldwell is artistic director.

CENTRAL CITY OPERA HOUSE ASSN., Central City, Colo., a summer operation, presented 5 weeks

of Gilbert and Sullivan performed by the D'Oyly Carte Co. from June to Aug., 1968.

CINCINNATI SUMMER OPERA, Cincinnati, Ohio, presented, during summer 1968, 10 operas for its 48th annual season. Opening June 26 with *Il Trovatore*, the repertory also included *The Elixir of Love*, *Madama Butterfly*, *Manon*, *Salome*, *Don Pasquale*, *Lucia di Lammermoor*, *Carmen*, *La Traviata*, and *The Tales of Hoffmann*, which closed July 28, 1968. Styck Orwoll is general manager.

DALLAS CIVIC OPERA, Dallas, Tex., scheduled the opening of its 1968 season Nov. 8 with Offenbach's *Orpheus in the Underworld* with Graziella Porretta and Loren Driscoll singing the leading roles and Jacques d'Amboise and Melissa Hayden the ballet soloists. *Otello* was to follow on Nov. 15, starring John Vickers and Victoria de los Angeles. The regular season concluded with Donizetti's *Anna Bolena*, featuring Elena Suliotis and Ezio Flagello. A special Dorothy Kirsten Concert was scheduled for Nov. 30. Lawrence Kelly is general manager.

FORT WORTH OPERA ASSN. was to open its 1968-69 season Nov. 21 with *La Traviata* with Maralin Niska and Dominic Cossa. Three other operas scheduled were *Don Pasquale* with Spiro Malas and Joy Clements; *Turandot* with Elinor Ross and Flaviano Labo; and *Romeo and Juliet* with John Alexander and Karan Armstrong, which was scheduled to close the season Apr. 20, 1969. Rudolph Kruger is musical director.

HOUSTON GRAND OPERA, Houston, Tex., scheduled 26 performances of 5 operas, 11 of them student matinees, for its 1968-1969 season. The season was to open Oct. 29 with *La Boheme*, featuring Teresa Stratas and Maralin Niska. Also to be presented were *Salome* with Nell Rankin, *The Barber of Seville* with Sherrill Milnes and Anne Elgar, *Don Carlo* with Placido Domingo and Raina Kabaivanska, and to conclude the season on May 12, 1969, *Don Quixote* with Norman Treigle. Walter Herbert is the conductor and director.

INDIANA UNIV. OPERA THEATER, Bloomington, Ind., opened its 1968-1969 season Oct. 12 with Rossini's *The Italian Girl in Algiers*. This was to be followed by Verdi's *La Traviata*, Mozart's *The Marriage of Figaro*, Stravinsky's *The Rake's Progress*, Tchaikovsky's *The Queen of Spades* and Wagner's *Parsifal*, which was to close the season Mar. 23.

LYRIC OPERA OF CHICAGO, Chicago, Ill., scheduled 9 operas, including a double-bill of Stravinsky operas, *Le Rossignol* and *Oedipus Rex*, for its 1968 season. *Salome* was presented opening night Sept. 27, followed by *Norma*, *Tosca*, *Falstaff*, *A Masked Ball*, *Don Pasquale* and *Manon Lescaut* starring Renata Tebaldi, which was to close the season Dec. 14.

PHILADELPHIA GRAND OPERA CO., Philadelphia, Pa., scheduled 8 operas for the 1968-1969 season including the world premiere of *Jericho Road* by Pietro Ariea on Mar. 12, 1969. *Carmen* was performed opening evening, Oct. 10, with Rosalind Elias and Richard Tucker. Other operas billed were *Aida*, *La Boheme*, *Lucia di Lammermoor* with Roberta Peters, *La Traviata* with Gabriella Tucci, *I Pagliacci*, and *Il Trovatore*, both with Richard Tucker, which was to close the season Apr. 18, 1969.

PHILADELPHIA LYRIC OPERA CO., Philadelphia, Pa., opened its 1968-1969 season Oct. 22 with Bellini's *I Capuletti e Montecchi*, with Renata Scott. The repertory also included: *La Boheme*, *Lakme* with Joan Sutherland, *Madama Butterfly* with Martina Arroyo, *Lucrezia Borgia* with Montserrat Caballe and John Alexander, and *Tosca* with Dorothy Kirsten, which was scheduled to close the season Mar. 25, 1969.

PITTSBURGH OPERA CO., Pittsburgh, Pa., scheduled 6 operas for its 30th season, 1968-1969. The season opened Oct. 24 with *Rigoletto*. This was to be followed by *Samson Et Dalila* with Mignon Dunn, *La Boheme* with Heather Thomson, *Cavalleria Rusticana* with Edith Lang, *Pagliacci* with Gianni Savelli; *Le Nozze Di Figaro* starring Roberta Peters was to close the season Apr. 12, 1969. Richard Karp is general and musical director.

SAN ANTONIO SYMPHONY SOCIETY, San Antonio, Tex., was to celebrate its 25th anniversary

with its annual Grand Opera Festival in March, 1969. The Festival scheduled 4 operas: *Faust* with Norman Treigle, Placido Domingo and Beverly Sills; *Il Trovatore* with Montserrat Caballe; *Turandot* with Birgit Nilsson and Richard Tucker; and *Lucia di Lammermoor* with Roberta Peters.

SAN DIEGO OPERA, San Diego, Calif., presented *Rigoletto* Oct. 17, as the first of 3 operas scheduled for its 1968-1969 season. The leading roles were sung by Peter Glossop and Anne Elgar. Remaining productions were *La Boheme* with John Stewart and Lee Venora and Massenet's *Don Quixote* with Norman Treigle and Nedda Casei, which was to close the season Apr. 26, 1969. Walter Herbert is artistic director and conductor.

SAN FRANCISCO OPERA, San Francisco, Calif., opened its 46th season Sept. 13, 1968, with Verdi's *Ernani*, starring Leontyne Price. Other productions included *Il Barbiere di Siviglia*, *Les Troyens*, *Die Walkure*, *Madama Butterfly*, *Schoenberg's Erwartung*, *Well's Royal Palace*, *Milhaud's Christopher Columbus*, *Il Trovatore*, *Wozzeck*, *Lucia di Lammermoor*, *Salome*, *Don Giovanni*, *Turandot*, and *Fra Diavolo*. The fall season was scheduled to end Dec. 1, 1968. From Mar. 1 to 29, 1969, the Music Center Opera Assn. of Los Angeles, in conjunction with the San Francisco Opera, scheduled 10 operas. This is the first season in a plan to merge eventually the operatic operations of both cities. Kurt Herbert Adler is general director and Howard K. Skinner is manager.

SANTA FE OPERA, Santa Fe, N. M., was destroyed by fire July 27, 1967. A new open-air opera house was scheduled for completion in time for the opening of the 1968 season on July 2, 1968, with a production of *Madama Butterfly*. The repertory included two American premieres, *The Bassarids* by Hans Werner Henze and *Die Jacobsleiter* by Arnold Schoenberg, in addition to *Persephone*, *The Magic Flute*, *La Traviata*, *The Elixir of Love* and *Der Rosenkavalier*. John Crosby is the general director.

ST. LOUIS MUNICIPAL OPERA, St. Louis, Mo., one of America's most famous summer theaters, presented a varied repertory for the 1968 season. The first evening opened with *My Fair Lady*. This was followed by *The Pajama Game*, *Annie Get Your Gun*, *The Merry Widow*, *Brigadoon*, *Carousel*, *Call Me Madam*, *Show Boat*, *The Wizard of Oz*, *The Sound of Music* and *Hello Dolly*. America's oldest summer musical theater, the St. Louis Municipal Opera presented its first performance June 15, 1919. Since that time, the theater has given over 230 different comic and light operas, operettas and musical comedies. The group that founded the theater believed that it should belong to all the people of St. Louis and thus they decided not to charge admission for a portion of the seats. Today, approximately 1,500 seats are free of charge. The total seating capacity of the outdoor amphitheater in Forest Park is 12,000.

ST. PAUL CIVIC OPERA ASSN., St. Paul, Minn., was scheduled to open its 1968-1969 season Dec. 14, with *Hansel and Gretel*. The second half of the season was to present *Manon Lescaut*, and conclude on May 3 with a double-bill consisting of *De Falla's* two-act opera *La Vida Breve* and his two-act ballet *El Sombrero De Tres Picos*.

SEATTLE OPERA ASSN., Seattle, Wash., opened its 1968-1969 season with *Aida* Sept. 11 and continued with Giordano's *Andrea Chenier* starring Franco Corelli; *Der Rosenkavalier* featuring Regine Crespin and Regina Sarafy; *Tosca* presenting Dorothy Kirsten and Cornell MacNeil in the leading roles; and *L'Elisir d'Amore*, which was to close the season May 3, 1969. Glynn Ross is gen. dir.

SHREVEPORT SYMPHONY SOCIETY, Shreveport, La., scheduled 3 operas for its 1968-1969 season. *La Traviata*, was performed opening night, Nov. 26, Poulenc's *La Voix Humaine* was to follow in Feb. and the season was to close with the Barber of Seville Apr. 18, 1969. John Shenaut is musical director and Joe V. Graber is manager.

TULSA OPERA, Tulsa, Okla., opened its 1968-1969 season Nov. 7 with *Rigoletto* starring Roberta Peters as Gilda and Sesto Bruscantini as Rigoletto. As a Christmas delight, *Hansel and Gretel* was to be performed with Marija Kova and Lee Venora in the title roles. The season was scheduled to close Mar. 13, 1969, with *Die Fledermaus* featuring Eileen Schauler as Rosalinda.

Movies of the Year (Oct. 1, 1967, to Oct. 1, 1968)

Selected and Rated by the New York Daily News Film Critics

While movie fans have complained bitterly, justifiably, of pornography and violence on the screen, there are still many fine films that have eschewed these two undesirable elements.

The fiscal year, October 1967 to October 1968, has flourished at the box office, as good or better financially as the previous year, the record breaker in motion picture history. Available are clean films of various types that make paying customers glad they spent their money for appealing entertainment.

The Odd Couple has made millions of movie goers happy. And is still doing so everywhere it is shown. *The Graduate*, a more sophisticated comedy, may, as a money maker, come just under the big two of all times, *Sound of Music* and *Gone With the Wind*. A phenomenal success all over the world is *2001—A Space Odyssey*, a grand spectacle that appeals especially to men and boys.

Planet of the Apes was the big surprise of the year, popular with all ages. *Guess Who's Coming to Dinner*, an important contribution to motion pictures, is among the year's successes. Sidney Poitier, one of its stars, who has since made his own film, *For Love of Ivy*, is the actor of the year. Paul Newman is close to Poitier in popularity with the public here and abroad. Katharine Hepburn, Oscar winner for *Guess Who's Coming to Dinner*, is the actress of the year. And watch out for Joanne Wood-

ward with the same distinction next year.

Doctor Doolittle, a splendid musical made primarily for children, is a financial disappointment while, on the other side of the coin, the sordid melodrama, *Valley of the Dolls*, torn to shreds by the New York Film Critics, is in the big money class. Three foreign films worth mentioning are *Closely Watched Trains*, from Czechoslovakia, *The Two of Us*, from France and *War and Peace*, a magnificent production of Tolstoy's classic, from Russia.

The Fall season started off in New York City with a unique drama, *Rachel, Rachel* and the stunning, wonderful musical, *Funny Girl*. And the greatest of them all, *Gone With the Wind*, is being released all over the country, every scene re-colored and for the first time on wide screen with stereophonic sound.

Listed below, alphabetically, are films rated by The New York Daily News star system. ★★★★★ is for excellent; ★★★★★½, very good; ★★★★, good; ★★★½, mediocre; ★★, fair; ★½, poor; ★ very poor. Documentaries, such as *Survival 1967*, do not receive stars because they are photographic records of people and places, not fictional stories with actors playing the roles. Included are foreign films of merit.

RECORDINGS

Sales of Discs Pass the Billion Dollar Mark in 1968

U. S. record producers, blessed with an ever-growing market for recordings of music both new and classical, set a "record" of their own in 1968, reaching and passing a billion dollars in sales.

The Beatles claimed worldwide sales of more than 210,000,000 records, a figure keeping them in the lead, ahead of that long-time popularity king, Bing Crosby, whose total output was reckoned at "over 200,000,000."

In an industry where sales statistics are not readily available to the public, the Record Industry Assn. of America kept count of new top-selling recordings. It regularly presents Gold Record Awards in two categories: for single records it certifies as having sold 1,000,000 copies, and for long-play (LP) albums it certifies as having \$1,000,000 in sales (reckoned in manufacturers' sales figured at 50% of list prices). The RIAA certified awards, it should be noted, did not begin until 1958; many artists sold millions of records before that year.

Under the certification system, the Beatles have been credited with 16 singles with sales of 1,000,000 each, and 12 LP albums with over \$1,000,000 in sales each. Their top-selling single was reportedly "I Want to Hold Your Hand," with 5,300,000 copies.

Bing's Mark Still Stands

Bing Crosby, with most of his sales in the days of singles, before the age of the LP album and the RIAA certification, still was tops in individual record sales with 16,000,000 of "White Christmas," over 10,000,000 of "Silent Night" and over 7,000,000 of "Jingle Bells."

Crosby had a total of 20 singles which sold a million copies each. His "Merry Christmas" album, having sold over 5,000,000 copies in various speeds and sizes, racked up new sales annually.

Elvis Presley is credited with 45 singles which sold more than 1,000,000 each, including "Hound Dog" with 6,485,000 copies. His total sales have reached well over 100,000,000; those of his singles alone were put at \$1,450,000; he also has sold 11 LP albums which won Gold Record awards.

Sinatra Ranks High

Frank Sinatra has made 11 such LP albums, as well as 5 singles with over a million copies each, and a great number of singles with lesser sales.

Fats Domino made 22 singles that sold over a million each, including "Blueberry Hill," with total sales (in the '50s and '60s) of 27,000,000 records. Eddy Arnold, though credited with only one single in the over-a-million class, "Bouquet of Roses" (1948), and two albums with \$1,000,000 in sales, reportedly has sold over 49,000,000 discs.

Artists ranking high in numbers of Gold Record LP albums include:

The Beatles, 12; Frank Sinatra, Elvis Presley, Andy Williams, Mitch Miller, 11 each; The Beach Boys, Herb Alpert & the Tijuana Brass, 10; Kingston Trio, 9; Dean Martin, Rolling Stones, Johnny Mather, 8; Barbra Streisand, Bill Cosby,

Ray Conniff, 7; Mantovani, Harry Belafonte, Roger Williams, 6; Bob Dylan, The Monkees, and Peter, Paul & Mary, 5. Simon & Garfunkel have sold 3 LP albums and 2 singles which won Gold Record awards.

Top mark for sales of an LP album was the 8,000,000 copies claimed for of the movie soundtrack of "The Sound of Music," followed by the original cast recording of "My Fair Lady," 6,000,000.

The only LP classical to sell a million copies was the Van Cliburn rendition of Tchaikovsky's "Piano Concerto No. 1," with nearly 2,000,000.

Leopold Stokowski hit a million copies with both "Tales from the Vienna Woods" and "Blue Danube Waltz." Arthur Fiedler did it with "Jalousie," Jose Iturbi hit the magic number with two singles, "Clair de Lune" and Chopin's "Polonaise in A-Flat." Percy Faith joined the club with "Song from Moulin Rouge" and "Theme from a Summer Place."

No Figures on Caruso

Among the top recording artists of all times were Enrico Caruso and Arturo Toscanini, but figures on their sales are not available.

Only a half-dozen records sold the magic number of a million in the 1920s. Technical improvements and a tremendous growth in the number of phonographs and record players helped bring the industry to its present peak.

Artists ranking high in singles which had sales of more than 1,000,000 each include:

Perry Como, Connie Francis, 13; Pat Boone, 12; Glenn Miller, 10; Artie Shaw, Frankie Laine, 8; Patti Page, Harry James, Kay Kyser, Little Richard, Ricky Nelson, 7; Aretha Franklin, The Monkees, Guy Mitchell, Evely Brothers, 6; Nat King Cole, Al Jolson, Gene Autry, Chubby Checkers, Bobby Darin, The Platters, Bobby Rydell, Dean Martin, The Weavers, Doris Day, The Drifters, Hank Ballard & The Midnighters, 5.

Those who have sold at least 4 singles over a million each include: Guy Lombardo, Les Paul and Mary Ford, Ames Brothers, Paul Anka, Tony Bennett, Jimmy Dorsey, Tommy Dorsey, Eddie Fisher, Joni James, Vaughan Monroe, Jimmy Rodgers, Four Aces, The Coasters, Bill Black's Combo.

Among those who sold singles of a million each in the '30s and are not among those named above were: Rudy Vallee, "Stein Song," 1930; Jeanette MacDonald and Nelson Eddy, "Indian Love Call," 1935; Ella Fitzgerald, "A-Tisket, A-Tasket," 1938; Will Glaze, "Beer Barrel Polka," 1938; Cab Calloway, "Jumpin' Jive," 1939; Orrin Tucker, "Oh, Johnny," 1939.

The recorders who managed to sell a million copies in the '20s were Paul Whiteman, "Whispering," 1920, and "Three O'Clock in the Morning," 1922; Clyde McCoy, "Sugar Blues," 1923 (in 1946 McCoy again sold over a million copies of "Sugar Blues"); Vernon Dalhart, "Prisoner's Song," 1924; Gene Austin, "My Blue Heaven," 1927, and "Ramona," 1928.

Famous Paintings and Where You Can See Them

The paintings in this list have been chosen because of the fame they have achieved (for various reasons, not necessarily their individual artistic merit) and because of their being viewable in public, rather than private collections. They are listed chronologically. Some are representative of a famed artist, several of whose works are equally well-known. A few of these paintings may not be on view at a particular time in the museum listed because of being on loan elsewhere.

- Giotto, Pieta**, 1305, Arena Chapel, Padua.
- Fra Filippo Lippi, Adoration of the Child**, c. 1435, Staatliches Museum, Berlin.
- Piero Della Francesca, Duke of Urbino**, 1465, Uffizi Gallery, Florence.
- Giovanni Bellini, Pieta**, c. 1466, Brera, Milan.
- Botticelli, The Birth of Venus**, c. 1480, Uffizi Gallery, Florence.
- Hieronymus Bosch, Christ Crowned with Thorns**, c. 1500, National Gallery, London.
- Leonardo da Vinci, Mona Lisa (La Gioconda)**, c. 1505, Louvre, Paris.
- Michelangelo, Creation of Adam**, 1508-12, Sistine Chapel, Vatican, Rome.
- Giorgione, Sleeping Venus**, c. 1508, Gemaldegalerie, Dresden.
- Raphael, The Sistine Madonna**, 1515-19, Gemaldegalerie, Dresden.
- Titian, The Tribute Money**, 1516, Gemaldegalerie, Dresden.
- Durer, The Four Apostles**, 1523-26, Alte Pinakothek, Munich.
- Holbein, Henry VIII**, 1540, National Gallery, Rome.
- Pieter Brueghel the Elder, Massacre of the Innocents**, 1566, Kunsthistorisches Museum, Vienna.
- El Greco, The Burial of Count Orgaz**, 1586, Santo Tome, Toledo, Spain.
- Rubens, Venus and Adonis**, c. 1620, Metropolitan Museum of Art, N. Y.
- Frans Hals, Laughing Cavalier**, 1624, Wallace Collection, London.
- Van Dyck, Charles I of England**, c. 1635, Louvre, Paris.
- Ribera, The Martyrdom of St. Bartholomew**, 1630-39, Prado, Madrid.
- Rembrandt, The Night Watch**, 1642, Rijksmuseum, Amsterdam.
- Velasquez, Maids of Honor**, 1656, Prado, Madrid.
- Vermeer, Young Woman with a Water Jug**, c. 1658-64, Metropolitan, N. Y.
- Ruisdael, View of Haarlem**, c. 1670, Rijksmuseum, Amsterdam.
- Murillo, Virgin and Child**, c. 1672, Metropolitan, N. Y.
- Natteau, The Embarkation for Cythera**, c. 1712, Louvre, Paris.
- Jogarth, The Orgy (Rake's Progress)**, c. 1734, Soane's Museum, London.
- Fragonard, The Love Letter**, c. 1769-70, Metropolitan, N. Y.
- Gainsborough, The Blue Boy**, c. 1770, Huntington Gallery, San Marino, Calif.
- John Singleton Copley, Watson and the Shark**, 1778, Museum of Fine Arts, Boston.
- Joshua Reynolds, Mrs. Siddons as the Tragic Muse**, 1784, Huntington Gallery, San Marino, Cal.
- John Trumbull, The Declaration of Independence**, 1786-94, Capitol, Washington, D. C.
- Gilbert Stuart, George Washington**, c. 1795, Museum of Fine Arts, Boston. (Others in Metropolitan, N. Y., etc.)
- David, The Rape of the Sabines**, 1799, Louvre, Paris.
- Goya, The Naked Maja**, 1799, Prado, Madrid.
- Ingres, Odalisque**, 1814, Louvre, Paris.
- John Constable, The Hay Wain**, 1821, National Gallery, London.
- Thomas Lawrence, The Calmady Children**, 1823, Metropolitan, N. Y.
- John James Audubon, Birds of America** (433 of the original 435 paintings), early 19th Century, New York Historical Society.
- Joseph M. W. Turner, The Grand Canal, Venice**, early 19th Century, Metropolitan, N. Y.
- George Caleb Bingham, Fur Traders Descending the Missouri**, 1845, Metropolitan, N. Y.
- Emanuel Leutze, Washington Crossing the Delaware**, 1851, Washington Crossing State Park, Pa.
- Rosa Bonheur, The Horse Fair**, 1853-55, Metropolitan, N. Y.
- Jean-Baptiste Corot, Le Lac de Terni**, 1861, Corcoran Gallery, Washington.
- Honore Daumier, The Third-Class Carriage**, c. 1862, Metropolitan, N. Y.
- Jean-Francois Millet, Man with the Hoe**, 1863, San Francisco Museum.
- James McNeill Whistler, Arrangement in Black and Gray—The Artist's Mother**, c. 1872, Louvre, Paris.
- Thomas Eakins, The Gross Clinic**, 1875, Jefferson Medical College, Philadelphia.
- A. M. Willard Spirit of '76**, 1876 (3 versions): Cleveland City Hall; Western Reserve Historical Society, Cleveland; Abbot Hall, Marblehead, Mass.
- Edgar Degas, La Danseuse au Bouquet**, 1878, Rhode Island School of Design Museum, Providence.
- Edouard Manet, In a Boat**, 1879, Metropolitan, N. Y.
- Pierre-Auguste Renoir, Luncheon of the Boating Party**, 1881, Phillips Collection, Washington.
- Georges Seurat, Sunday Afternoon on the Grande Jatte**, 1884-86, Art Institute of Chicago.
- Paul Cezanne, Mont Sainte-Victoire**, 1885-87, Metropolitan, N. Y.
- Vincent Van Gogh, Wheat Field and Cypress Trees**, 1889, National Gallery, London.
- Albert Pinkham Ryder, Trollers of the Sea**, c. 1890, Addison Gallery, Andover, Mass.
- Paul Gauguin, La Orana Maria (Hail Mary)**, 1891, Metropolitan, N. Y.
- Henri de Toulouse-Lautrec, At the Moulin Rouge**, 1892, Art Institute of Chicago.
- Claude Monet, Rouen Cathedral**, 1894, Metropolitan, N. Y.
- Winslow Homer, Gulf Stream**, 1899, Art Institute of Chicago.
- John Singer Sargent, The Wyndham Sisters**, 1900, Metropolitan, N. Y.
- Frederic Remington, Cavalry Charge on the Southern Plains**, 1907, Metropolitan, N. Y.
- Georges Braque, Head of a Woman**, 1909, Musee d'Art Moderne, Paris.
- Henri Rousseau, The Dream**, 1910, Museum of Modern Art, N. Y.
- Marc Chagall, I and the Village**, 1911, Museum of Modern Art, N. Y.
- Marcel Duchamp, Nude Descending a Staircase**, 1912, Philadelphia Museum of Art.
- Paul Chabas, September Morn**, 1912, Metropolitan, N. Y.
- Amadeo Modigliani, Portrait of Madame Zboroski**, 1917-18, Rhode Island School of Design Museum, Providence.
- Piet Mondrian, Composition**, 1921, Kunstmuseum, Basel, Switzerland.
- Paul Klee, Twittering Machine**, 1922, Museum of Modern Art, N. Y.
- George Bellows, The Dempsey-Firpo Fight**, 1924, Whitney Museum of American Art, N. Y.
- Vasily Kandinsky, Several Circles**, 1926, Guggenheim Museum, N. Y.

- Salvador Dali, Crucifixion**, 1954, Metropolitan, N. Y.
- Raphael Soyer, Portrait of Hugo Kaster**, 1957, Metropolitan, N. Y.

Famous Sculptures and Where You Can See Them

The statues, monuments and other sculptures in the following list have been chosen because of the fame they have won, independent of the question of their individual artistic merit, and because they are on public view. They are listed chronologically, except for the group titled Non-Western. In a few cases, two works by the same artist have been listed. Some of the works are representative of a famed artist, many of whose works are equally well-known. The creators of some of the earliest works are unknown.

ANCIENT EGYPT

The Great Sphinx, c. 2900 B.C., limestone and masonry, Giza, United Arab Republic.

Queen Nofretete, c. 1365 B.C., painted limestone, State Museum, West Berlin.

Colossus of Ramses II, c. 1230 B.C., sandstone, Abu Simbel, United Arab Republic.

ANCIENT GREECE

Charlotte of Delphi, c. 470 B.C., bronze, Museum, Delphi, Greece.

Myron: Discobolus (Discus Thrower), marble Roman copy of Myron's bronze original of c. 450 B.C., Terme Museum, Rome.

Phidias: Parthenon Sculptures, c. 438 B.C., marble (by or under direction of Phidias), British Museum, London.

Polycletus: Doryphorus (Spear Bearer), marble Roman copy of Polycletus' original of late 5th Century B.C., National Museum, Naples.

Praxiteles: Hermes with the Infant Dionysus, c. 350 B.C., Museum, Olympia; **Aphrodite of Cnidus**, marble Roman copy of Praxiteles' original of 330 B.C., Vatican, Rome.

Scopas: Head from the Temple at Tegea, c. 350 B.C., National Museum, Athens.

Lysippus: Apoxyomenos (athlete cleansing himself with a scraper), marble Roman copy of Lysippus' bronze original of 330 B.C., Vatican, Rome.

Nike of Samothrace (Winged Victory), c. 300 B.C., marble, Louvre, Paris.

Aphrodite of Melos (Venus de Milo), 2nd Century B.C., marble, Louvre, Paris.

Laocoön, 2nd Century B.C., marble, by Agesander, Athenodorus and Polydorus of Rhodes, Vatican, Rome.

ANCIENT ROME

Augustus, c. 20 B.C., marble, Vatican, Rome.

Caracalla, 211-217 A.D., marble, National Museum, Naples.

GOTHIC

Virgin of Paris, early 14th Century, stone, Notre Dame Cathedral, Paris.

Claus Sluter: Moses, c. 1400, stone, Champmol Monastery, near Dijon.

Tomb of Philippe Pot, c. 1480, painted stone, Louvre, Paris.

RENAISSANCE

Donatello: St. George, c. 1415, marble, National Museum, Florence; **Gattamelata**, 1445-50, bronze, Piazza del Santo, Padua.

Andrea del Verrocchio: Colleoni, c. 1485, bronze, Campo SS. Giovanni e Paolo, Venice; **Michelangelo Buonarroti: David**, 1501-04, marble, Academy, Florence; **Pieta**, 1498-99, marble, St. Peter's, Rome.

Benvenuto Cellini: Perseus with the Head of Medusa, 16th Century, marble, Loggia dei Lanzi, Florence.

Jose de Creeft: Alice in Wonderland, 1959, bronze, Conservatory Lake, Central Park, N. Y.

Henry Moore: Reclining Figure, 1963-65, bronze, Lincoln Center, N. Y.

Sculpture Carves Its Niche in the News

Sculpture, both ancient and modern, made news during 1968.

There were new, and paradoxical, activities underwater. At the eastern end of the Mediterranean, divers used suction pumps, underwater phones and a submerged decompression chamber in a search near Greece for ancient statues and other relics of sunken ships. At the western end of the same sea, modern artist Joan Miro, with the aid of other divers and a sea-going crane, deposited his statue *Sea Venus* in an underwater grotto on the Mediterranean's floor near Juan-les-Pins, France.

Rising in the wake of the New York Metropolitan

Museum's denunciation of its own long-revered ancient Bronze Greek horse as a fake and a forgery, two world-renowned art experts declared it was genuine. They cited technical reasons to back their opinions, just as the Metropolitan's expert had done in denouncing the statue.

In England, the dean of British sculptors, Henry Moore, was feted with an unprecedented round of tributes on his 70th birthday, July 38. There were testimonial dinners, full-page articles in newspapers (including Britain's biggest-circulation tabloid), and exhibits of his works. An American collector donated \$30,000 to the famed Tate Gallery in Moore's honor.

For new PRESIDENT and VICE PRESIDENT see Index under ELECTION RETURNS and ELECTIONS (1968)

UNITED STATES GOVERNMENT

THE JOHNSON ADMINISTRATION

As of October 1, 1968

Terms of office of the President and Vice President, from January 20, 1965 to January 20, 1969. No person may be elected President of the United States for more than two four-year terms.

PRESIDENT—Lyndon B. Johnson of Texas. Receives salary of \$100,000 a year, taxable, and in addition an expense allowance, also taxable, of \$50,000 to assist in defraying expenses resulting from his official duties. Also there may be expended not exceeding \$40,000, nontaxable, a year for travel expenses and official entertainment. Congress in 1958 provided lifetime pensions of \$25,000 a year, free mailing privileges, free office space, and up to \$65,000 a year for office help for ex-Presidents and \$10,000 annually for their widows.

VICE PRESIDENT—Hubert H. Humphrey of Minnesota. Salary \$43,000 a year and \$10,000 for expenses, all of which is taxable.

Order of succession to Presidency See P. 195.

Justices of the United States Supreme Court

The Supreme Court comprises the Chief Justice of the United States and such number of Associate Justices as may be fixed by Congress. By virtue of an act of June 25, 1943, the number of Associate Justices is eight. Power to nominate is vested in the President and appointments are made by and with the advice and consent of the Senate. Judges of the Federal courts hold office during good behavior and their compensation may not be diminished while they are in office. A Justice may retire at 70 after serving 10 years as a Federal judge or at 65 after 15 years of service. Salary of the Chief Justice is \$40,000 annually, that of each Associate Justice \$39,500.

*Retired. (a) Rejected Dec. 15, 1795; (b) Resigned Oct. 3, 1942, to assume new post as chairman of Economic Stabilization Board. (c) Resigned court, appointed UN Ambassador July 20, 1965.

Robert H. Harrison, who is listed above as an Associate Justice of the Court, was nominated Sept. 24, 1789; confirmed by the Senate, September 26, 1789; and commissioned September 28, 1789. There is nothing affirmative to show that he ever accepted the commission or took the oath. Justice Iredell was nominated February 9, 1790, "vice Harrison, resigned." Under date of Jan. 1790, Harrison wrote to the President saying, "I cannot accept the appointment."

Ambassadors and Ministers

AS OF OCTOBER 1, 1968

The address of foreign embassies to the United States is Washington, D. C.

*Embassy has been closed and personnel withdrawn. Limited staffs remain in Algeria, Sudan, and UAR but no ambassadors are assigned.

- U. S. Mission to the European Office of the United Nations and other International Organizations, Geneva—Roger W. Tubby.
- U. S. Mission to the Organization for Economic Cooperation and Development, Paris—Philip H. Trezise.

The National Anthem—The Star-Spangled Banner

The Star-Spangled Banner was ordered played by the military and naval services by President Woodrow Wilson in 1916. It was designated the National Anthem by Act of Congress, March 3, 1931. It was written by Francis Scott Key, of Georgetown, D. C., during the bombardment of Fort Mchenry, Baltimore, Md., Sept. 13-14, 1814. Key was a lawyer, a graduate of St. John's College, Annapolis, and a volunteer in a light artillery company. When a friend, Dr. Beanes, a physician of Upper Marlborough, Md., was taken aboard Admiral Cockburn's British squadron for interfering with ground troops, Key and J. S. Skinner, carrying a note from President Madison, went to the fleet under a flag of truce on a cartel ship to ask Beanes' release. Admiral Cockburn consented, but as the fleet was about to sail up the Patapsco to bombard Fort Mchenry he detained them, first on H. M. S. Surprise, and then on a supply ship. Key witnessed the bombardment from his own vessel. It began at 7 a.m., Sept. 13, 1814, and lasted, with intermissions, for 25 hours. The British fired over 1,500 shells, each weighing as much as 220 lbs. They were unable to approach closely because the Americans had sunk 22 vessels in the channel. Only four Americans were killed and 24 wounded. A British bomb-ship was disabled.

Oh, say can you see by the dawn's early light
What so proudly we hail'd at the twilight's last gleaming?
Whose broad stripes and bright stars, thru the perilous fight,
O'er the ramparts we watch'd were so gallantly streaming?
And the rocket's red glare, the bombs bursting in air,
Gave proof through the night that our flag was still there.
Oh, say does that star-spangled banner yet wave
O'er the land of the free and the home of the brave?

On the shore, dimly seen through the mists of the deep,
Where the foe's haughty host in dread silence reposes,
What is that which the breeze, o'er the towering steep,
As it fitfully blows, half conceals, half discloses?
Now it catches the gleam of the morning's first beam,
In full glory reflected now shines on the stream:
'Tis the star-spangled banner! O long may it wave
O'er the land of the free and the home of the brave!

During the bombardment Key wrote a stanza on the back of an envelope. Next day at Indian Queen Inn, Baltimore, he wrote out the poem and gave it to his brother-in-law, Judge J. H. Nicholson. Nicholson suggested the tune, Anacreon in Heaven, and had the poem printed on broadsides, of which two survive. On Sept. 20 it appeared in the Baltimore American. Later Key made 3 copies; one is in the Library of Congress and one in the Pennsylvania Historical Society.

The copy that Key wrote in his hotel Sept. 14, 1814, remained in the Nicholson family for 93 years. In 1907 it was sold to Henry Walters of Baltimore. In 1934 it was bought at auction in New York from the Walters estate by the Walters Art Gallery, Baltimore, for \$26,400. The Walters Gallery in 1953 sold the manuscript to the Maryland Historical Society for the same price.

The flag that Key saw during the bombardment is preserved in Smithsonian Institution, Washington. It is 30 by 42 ft., and has 15 alternate red and white stripes and 15 stars, for the original 13 states plus Kentucky and Vermont. It was made by Mary Young Pickersgill. The Baltimore Flag house, a museum, occupies her premises, which were restored in 1953.

And where is that band who so vauntingly swore
That the havoc of war and the battle's confusion,
A home and a country should leave us no more!
Their blood has wash'd out their foul footsteps' pollution
No refuge could save the hireling and slave
From the terror of flight, or the gloom of the grave:
And the star-spangled banner in triumph doth wave
O'er the land of the free and the home of the brave!

Oh! thus be it ever, when freemen shall stand
Between their loved homes and the war's desolation!
Blest with victory and peace, may the heav'n rescued land
Praise the Power that hath made and preserved us a nation.
Then conquer we must, when our cause it is just,
And this be our motto: "In God is our trust."
And the star-spangled banner in triumph shall wave
O'er the land of the free and the home of the brave!

National Political Committees

As of Sept., 1968

DEMOCRATIC OFFICERS

Chairman—Lawrence O'Brien
 Vice Chairman—Mrs. Geri Joseph
 Secretary—Mrs. Dorothy Vredenburg Bush
 Treasurer—Robert Short (act.)
 National Headquarters—2600 Virginia Ave.
 N.W., Washington, D. C. 20037

REPUBLICAN OFFICERS

Chairman—Ray C. Bliss
 Assistant Chairman—Mrs. C. Wayland Brooks
 Vice Chairmen—Donald R. Ross, Mrs. J. W. Marriott, J. Drake Edens, Jr., Mrs. Collis P. Moore.
 Secretary—Consuelo Northrop Bailey
 Treasurer—J. William Middendorf, 2nd.
 National Headquarters—1625 Eye Street, N.W., Washington, D. C. 20006

International Boundary Lines of the United States

The length of the northern boundary of the conterminous United States—the U.S.-Canadian border, excluding Alaska—is 3,987 miles according to the U. S. Geological Survey, Dept. of the Interior. The length of the Alaskan-Canadian border is 1,538 miles. The length of the U.S.-Mexican border, from the Gulf of Mexico to the Pacific Ocean, is approximately 1,933 miles (1963 boundary agreement).

The Mayflower Compact

The Mayflower Compact, regarded by some historians as marking the beginning of democracy in America, was signed by 41 adult male members of the Pilgrims aboard the Mayflower as it lay alongside the present site of Provincetown, Mass., in 1620. Because the Pilgrims' patent from the Virginia Company gave them no right to settle so far north, there was grumbling among some members of the company who said abandonment of the Virginia patent left their leaders with no authority over them. To prevent disorder, the Mayflower Compact was signed, binding the Pilgrims to form a government and to abide by its laws. See *Index* for other details.

The text of the compact follows:

In the Name of God, Amen. We whose names are underwritten, the loyal subjects of our dread sovereign Lord, King James, by the grace of God, of Great Britain, France and Ireland; King, Defender of the Faith, etc.

Having undertaken, for the glory of God, and advancement of the Christian faith and honor of our King and Country, a voyage to plant the first colony in the northern parts of Virginia, do by these presents solemnly and mutually in the presence of God and one of another, covenant and combine ourselves together into a civil body politic, for our better ordering and preservation and furtherance of the ends aforesaid; and by virtue hereof enact constitute and frame such just and equal laws, ordinances, acts, constitutions and offices, from time to time, as shall be

thought most meet and convenient for the general good of the Colony; unto which we promise all due submission and obedience.

In witness whereof we have hereunder subscribed our names at Cape Cod the 11 of November, (Nov. 21 new style calendar), in the year of the reign of our sovereign Lord, King James of England, France and Ireland the eighteenth, and of Scotland the fifty-fourth. Ano Dom. 1620.

How America Was Named

America was named for Amerigo Vespucci (1454-1512), an Italian reputed to have made 4 voyages to the New World for Spain (1497-1503). The German geographer, Martin Waldseemüller, first used the name to honor Vespucci in a book published in 1507.

Proper Display and Use of the United States Flag

President Johnson signed July 5, 1968, a bill providing penalties of up to a year's imprisonment or a \$1,000 fine, or both, for burning publicly or otherwise deliberately desecrating the United States flag. All the states and the District of Columbia already had laws against flag desecration, with varying penalties, but the 1968 legislation provided the first Federal penalties.

A flag code for civilians was adopted June 14, 1923, by a conference of patriotic organizations in Washington. A joint resolution of Congress to codify display of the flag was approved June 22, 1942, for the use of civilians.

When to Display the Flag—The flag should be displayed on all days when the weather permits, especially on legal holidays and other special occasions, on official buildings when in use, in or near polling places on election days, and in or near schools when in session. A citizen may fly the flag at any time he wishes. It is customary to display the flag only from sunrise to sunset on buildings and on stationary flagstaffs in the open. However, it may be displayed at night on special occasions, preferably lighted. In Washington, the flag flies over the White House from sunrise to sunset. It flies over the Senate wing of the Capitol when the Senate is in session and over the House wing when that body is in session. It flies day and night over the east and west fronts of the Capitol, without floodlights at night but receiving light from the illuminated Capitol dome. It flies 24 hours a day at several other places, including the Fort McHenry National Monument in Baltimore, where it inspired Francis Scott Key to write The Star Spangled Banner.

How to Fly the Flag—The flag should be hoisted briskly and lowered ceremoniously, and should never be allowed to touch the ground or the floor. When hung over a sidewalk from a rope extending from a building to a pole, the union should be away from the building. When hung over the center of a street it should have the union to the north in an east-west street and to the east in a north-south street. No other flag may be flown above or, if on the same level, to the right of the United States flag, except that at the United Nations Headquarters the UN flag may be placed above flags of all member nations and other national flags may be flown with equal prominence or honor with the flag of the United States. Also, at services conducted by Navy chaplains at sea, the church pennant may be flown above the flag.

When two flags are placed against a wall with crossed staffs, the U. S. flag should be at right—its own right, and its staff should be in front of the staff of the other flag; when a number of flags are grouped and displayed from staffs, it should be at the center and at the highest point of the group.

Church and Platform Use—In an auditorium, the flag may be displayed flat, above and behind the speaker. If on a staff in a church chancel or on a speaker's platform, it should be in the position of honor at the clergyman's or speaker's right as he faces the congregation or audience. Any other flag in the chancel or on the platform should be displayed at the clergyman's or speaker's left. If elsewhere than in chancel or on platform, the flag should be displayed at the right of the congregation or audience as they face the speaker. The flag should not cover a speaker's desk or be draped in front of a platform.

When the flag is displayed horizontally or vertically against a wall, the stars should be at the observer's left.

When to Salute the Flag—All persons present should face the flag, stand at attention and salute on the following occasions: (1) When the flag is passing in a parade or in a review, (2) During the

ceremony of hoisting or lowering, (3) When the National Anthem is played and the flag is displayed, and (4) During the Pledge of Allegiance. Those present in uniform should render the military salute. When not in uniform, men should remove the hat with the right hand holding it at the left shoulder, the hand being over the heart. Men without hats should salute in the same manner. Aliens should stand at attention. Women should salute by placing the right hand over the heart.

On Memorial Day, May 30, the flag should fly at half-staff until noon, then be raised to the peak.

As proclaimed by President Eisenhower in 1954, the flag should fly at half-staff for 30 days from the day of a death of a President or former President; for 10 days from the day of death of a Vice President, Chief Justice or retired Chief Justice of the U.S., or Speaker of the House of Representatives; from day of death until burial of an Associate Justice of the Supreme Court, Cabinet member, former Vice President, or Secretary of the Army, Navy or Air Force; for a U. S. Senator, Representative, Territorial Delegate, or the Resident Commissioner of Puerto Rico, on day of death and the following day within the metropolitan area of the District of Columbia and from day of death until burial within the decedent's state, Congressional district, territory or commonwealth; and for the death of the governor of a state, territory or possession of the United States, the flag should fly at half-staff from day of death until burial within that state, territory or possession.

When used to cover a casket, the flag should be placed so that the union is at the head and over the left shoulder. The flag should not be lowered into the grave nor touch the ground.

Prohibited Uses of the Flag—The flag should not be dipped to any person or thing. It should never be displayed with the union down save as a signal of distress. It should never be carried flat or horizontally, but always aloft and free.

It should not be displayed on a float, motor car or boat except from a staff.

It should never be used as a covering for a ceiling, nor have placed upon it any word, design, or drawing. It should never be used as a receptacle for carrying anything. It should not be used to cover a statue or a monument.

The flag should never be used for advertising purposes, nor be embroidered on such articles as cushions or handkerchiefs, printed or otherwise impressed on boxes or used as a costume or athletic uniform. Advertising signs should not be fastened to its staff or halyard.

The flag should never be used as drapery of any sort, never festooned, drawn back, nor up, in folds, but always allowed to fall free. Bunting of blue, white and red always arranged with the blue above and the white in the middle, should be used for covering a speaker's desk, draping the front of a platform, and for decoration in general.

How to Dispose of Worn Flags—The flag, when it is in such condition that it is no longer a fitting emblem for display, should be destroyed in a dignified way, preferably by burning. Because of the dignity and reverence due the flag, it should be burned in private.

The President's Flag—It has a dark blue rectangular background on which appears the coat of arms of the President surrounded by a circle of 50 white stars.

When the President visits a vessel of the United States, the President's flag is broken at the main the moment he reaches the deck and is kept flying as long as he is on board.

Pledge of Allegiance to the Flag

I pledge allegiance to the flag of the United States of America and to the republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

This, the current official version of the Pledge of Allegiance, has developed from the original pledge, which was first published in the Sept. 8, 1892, issue of the Youth's Companion, a weekly magazine then published in Boston. The original pledge contained the phrase "my flag," which was changed more than 30 years later to "flag of the United States of America." An act of Congress in 1954 added the words "under God."

The authorship of the pledge has been in dispute for many years. The Youth's Companion stated in

1917 that the original draft was written by James B. Upham, an executive of the magazine who died in 1910. A letter, circulated by the magazine later named Upham as the originator of the draft "afterwards condensed and perfected by him and his associates of the Companion force."

Francis Bellamy, a former member of the Youth's Companion editorial staff, publicly claimed authorship of the pledge in 1923. The United States Flag Assn., acting on the advice of a committee named to study the controversy, upheld in 1939 the claim of Bellamy, who had died 8 years earlier. The Library of Congress issued in 1957 a report attributing the authorship to Bellamy.

The Flag of the United States—The Stars and Stripes

The 50-star flag of the United States was raised for the first time officially at 12:01 a.m. on July 4, 1960, at Fort McHenry National Monument in Baltimore, Md. The 50th star had been added for Hawaii; a year earlier the 49th, for Alaska. Before that, no star had been added since 1912, when New Mexico and Arizona were admitted to the Union.

In the 50-star flag, the stars are arranged in alternate rows of 6 and 5, staggered; there are 5 rows of 6 and 4 rows of 5 stars.

HISTORY OF THE FLAG

The true history of the Stars and Stripes has become so cluttered by a volume of myth and tradition that the facts are difficult, and in some cases impossible, to establish. For example, it is not certain who designed the Stars and Stripes, who made the first such flag, or even whether it ever flew in any sea fight or land battle of the American Revolution. Historians disagree on many details of the history of the Stars and Stripes and the flags that preceded it in the American colonies.

One thing all agree on is that the Stars and Stripes originated as the result of a resolution offered by the Marine Committee of the Second Continental Congress at Philadelphia and adopted June 14, 1777. It read:

Resolved: that the flag of the United States be made of thirteen stripes, alternate red and white; that the union be thirteen stars, white in a blue field, representing a new constellation.

Congress gave no hint as to the designer of the flag, no instructions as to the arrangement of the stars, and no information on its appropriate uses. Historians have been unable to find anything to reveal what provided the basis of the resolution—the original flag law.

The resolution establishing the flag was not even published until Sept. 2, 1777, more than 11 weeks after its passage. Despite repeated requests by the American commander, Gen. George Washington, for the "Standard of the United States" for his army, he did not get the flags until 1783, after the Revolutionary War was over. And there is no certainty that the flags were indeed the Stars and Stripes.

EARLY FLAGS

Although it was never officially adopted by the Continental Congress, many historians consider the first flag of the United States to have been the Grand Union (sometimes called Great Union) flag. This was a modification of the British Meteor flag, which had the red cross of St. George and the white cross of St. Andrew combined in the blue canton. For the Grand Union flag, 6 horizontal stripes were imposed on the red field, dividing it into 13 alternate red and white stripes. On Jan. 1, 1776, when the Continental Army came into formal existence, this flag was unfurled on Prospect Hill, Somerville, Mass. Washington wrote that "we hoisted the Union Flag in compliment to the United Colonies."

Citizens of Easton, Pa., started in 1968 a movement to have the Post Office Department include in a series of U. S. flag commemorative stamps a red, white and blue flag that has been in the public library at Easton for almost 150 years. Supporters of the movement contend that this flag was actually the first Stars and Stripes, and that it was first displayed on July 8, 1776, on the occasion of the public reading of the Declaration of Independence at the court house in Easton. This flag has 13 red and white stripes in the canton, 13 white stars centered in a blue field.

A flag was hastily improvised from garments by the defenders of Fort Schuyler at Rome, N. Y., Aug. 3-22, and this has led to the assumption that it was the Stars and Stripes. Historians believe it was the Grand Union Flag.

The Sons of Liberty had a flag of 9 red and white stripes, to signify 9 colonies, when they met in New York in 1765 to oppose the Stamp Tax. By 1775 the flag had grown to 13 red and white stripes, with a rattlesnake on it.

At Concord, Apr. 19, 1775, the minute men from Bedford, Mass., are said to have carried a flag having a silver arm with sword on a red field.

At Cambridge, Mass., the Sons of Liberty used a plain red flag with a green pine tree on it.

In June, 1775, Washington went from Philadelphia to Boston to take command of the army, escorted to New York by the Philadelphia Light Horse Troop. It carried a yellow flag which had

an elaborate coat of arms—the shield charged with 13 knots, the motto "For These We Strive"—and a canton of 13 blue and silver stripes.

In February, 1776, Col. Christopher Gadsden, member of the Continental Congress, gave the South Carolina Provincial Congress a flag "such as is to be used by the commander-in-chief of the American Navy." It had a yellow field, with a rattlesnake about to strike and the words Don't Tread on Me. Benjamin Franklin's paper, the Pennsylvania Gazette, had suggested sending a cargo of rattlesnakes to London parks to retaliate for British injustice.

At the battle of Bennington, Aug. 16, 1777, patriots used a flag of 7 white and 6 red stripes with a blue canton extending down 9 stripes and showing an arch of 11 white stars over the figure 76 and a star in each of the upper corners. The stars are seven-pointed. This flag is preserved in the Historical Museum at Bennington, Vt.

At the battle of Cowpens, Jan. 17, 1781, the 3rd Maryland Regt. is said to have carried a flag of 13 red and white stripes, with a blue canton containing 12 stars in a circle around one star.

LEGENDS ABOUT THE FLAG

Who Designed the Flag? No one knows for a certainty. Francis Hopkinson, a signer of the Declaration of Independence and designer of seals for the State Department, the Treasury Board and of a naval flag, declared he also had designed the flag and in 1781 asked Congress to reimburse him for his services. Congress did not do so. Dumas Malone of Columbia Univ. wrote: "This talented man . . . designed the American flag."

Who Called the Flag Old Glory?—The flag is said to have been named Old Glory by William Driver, a sea captain of Salem, Mass. One legend has it that when he raised the flag on his brig, the Charles Doggett, in 1824, he said: "I name thee Old Glory." But his daughter, who presented the flag to the Smithsonian Institution, said he named it at his 21st birthday celebration Mar. 17, 1824, when his mother and some neighbors presented the homemade flag to him.

Washington Coat-of-Arms Legend—The idea that the flag was suggested by Washington's coat of arms was publicized by Martin F. Tupper, an English writer, in a play in the 1870s. It rests on a coincidence and has no connection with the flag.

Washington's Invocation Legend—Circulation has been given to this speech attributed to General Washington: "We take the stars from heaven, the red from our mother country, separating it by white stripes, thus showing that we have separated from her, and the white stripes shall go down to posterity representing liberty." There is no proof that Washington ever said this.

The Betsy Ross Legend—The widely publicized legend that Mrs. Betsy Ross made the first Stars and Stripes in June, 1776, at the request of a committee composed of George Washington, Robert Morris and George Ross, an uncle, was first made public in 1870 by a grandson of Mrs. Ross. Historians have been unable to find a historical record of such a meeting or committee. Dr. Milo Milton Quaife wrote: "No record has ever been found of the creation by Mrs. Ross of the first Stars and Stripes." The New Century Encyclopedia of Names (1954) says: "There is documentary evidence that she was paid in May, 1777, for 'making ships colours, etc.' but no direct documentary evidence has been found to link her with the flag adopted by the Continental Congress on June 14, 1777, as the national emblem, and most historians now doubt if she made it."

ADDING NEW STARS

The flag of 1777 was used until 1795. Then, on the admission of Vermont and Kentucky to the Union, Congress passed and President Washington signed an act that after May 1, 1795, the flag should have 15 stripes, alternate red and white, and 15 white stars on a blue field in the union.

When new states were admitted it became evident that the flag would become burdened with stripes. Congress thereupon ordered that after July 4, 1818, the flag should have 13 stripes, symbolizing the 13 original states; that the union have 20 stars, and that whenever a new state was admitted a new star should be added on the July 4 following admission. No law designates the permanent arrangement of the stars. However, since 1912 when a new state has been admitted, the new design has been announced by executive order. No star in the flag is specifically identified with any state.

(*) John C. Calhoun resigned Dec. 28, 1832, having been elected to the U. S. Senate (Dec. 12, 1832) to fill vacancy caused by the resignation of Robert Y. Hayne. (x) Andrew Johnson—A Democrat nominated by Republicans and elected with Lincoln on the Nation Union ticket. Adlai E. Stevenson, 23rd Vice President, was grandfather of Democratic candidate for President, 1952 and 1956.

CABINETS OF THE UNITED STATES

Secretaries of State

The Department of Foreign Affairs was created by Act of Congress July 27, 1789, and the name changed to Department of State on Sept. 15. Thomas Jefferson, the minister to France, was appointed Secretary of State by President Washington Sept. 26, and took office March 21, 1790. John Jay, who had held the office of Secretary for Foreign Affairs since his appointment by the Ninth Continental Congress in March 1784, in place of Robert R. Livingston (appointed Jan. 1781), left it in September 1789, when the U. S. Supreme Court was established with him as Chief Justice.

The Secretary of State is charged, under the direction of the President, with the duties appertaining to correspondence with the public ministers and the consuls of the United States and with the representatives of foreign powers accredited to the United States, and to negotiations of whatever character relating to the foreign affairs of the United States.

Secretaries of the Treasury

The second Continental Congress on July 29, 1775, appointed Michael Hillegas and George Clymer, Esqs., as "joint treasurers of the United Colonies." Francis Hopkinson was elected Treasurer of Loans July 27, 1778. Robert Morris was appointed Superintendent of Finance by the Seventh Continental Congress on Feb. 20, 1781. The Treasury Department was organized by Act of Congress on Sept. 2, 1789, and President Washington commissioned Alexander Hamilton Secretary of the Treasury on Sept. 11.

Secretaries of War

The Second Continental Congress set up in June, 1776, a board of War and Ordnance consisting of five members: John Adams, Roger Sherman, Benjamin Harrison, James Wilson and Edward Rutledge. Richard Peters was elected Secretary on June 12. This Board, several times changed, continued until Oct. 30, 1781, when Congress appointed Benjamin Lincoln Secretary of War, a position created by Act of Congress the previous February. The Eleventh Continental Congress on March 6, 1785, appointed Gen. Henry Knox to succeed him with the added duties of the Navy. The War (and Navy) Department was created by Act of Congress Aug. 7, 1789, and Gen. Henry Knox was commissioned Secretary of War under that Act Sept. 12, 1789.

Postmasters General

Benjamin Franklin had been Deputy Postmaster in America (1737), and Postmaster General for the Colonies (1753) under the King until summarily dismissed by him Jan. 30, 1774. The Second Continental Congress created the Post Office Department with headquarters in Philadelphia and on July 26, 1775, elected Benjamin Franklin Postmaster General for one year. On his sailing later for France as one of the ambassadors, Richard Bache succeeded him on Nov. 7, 1776. Ebenezer Hazard was appointed Postmaster General Jan. 28, 1782. Congress temporarily established the Post Office Department as a branch of the Treasury, on Sept. 22, 1789, and Washington commissioned Samuel Osgood Postmaster General on Sept. 26. The Postmaster General was made a member of the Cabinet March 9, 1829. His is the only portfolio in the Cabinet that expires every four years. The Post Office Department was established as an executive department June 8, 1872.

The American's Creed

Written by William Tyler Page, clerk of the U. S. House of Representatives, in 1917.

I believe in the United States of America as a government of the people, by the people, for the people; whose just powers are derived from the consent of the governed, a democracy in a republic; a sovereign nation of many sovereign states, a perfect union, one and inseparable, established upon those principles of freedom, equality, justice and humanity for which American patriots sacrificed their lives and fortunes. I therefore believe it is my duty to my country to love it, to support its Constitution; to obey its laws; to respect its flag, and to defend it against all enemies.

Presidents of the United States

According to a ruling of the State Dept., Grover Cleveland is counted twice, as the 22nd and the 24th President, because his two terms were not consecutive. Only 35 individuals have been President.

BIOGRAPHIES OF THE PRESIDENTS AND THEIR WIVES

George Washington

George Washington, first President, was born Friday, Feb. 22, 1732 (Feb. 11, Old Style), the son of Augustine Washington and Mary Ball, at Wakefield on Pope's creek, Westmoreland Co., Va. Col. John Washington, George's great-grandfather, came from Northamptonshire in 1657 or 1658; in 1665 he and an associate named Spencer bought 5,000 acres on the Potomac. George's father took the north 2,500 acres near Hunting creek in 1735 and built a house in which George lived from 3 to 6 years of age; when 6 the family moved to Ferry farm, near Fredericksburg. His father died in 1743 when he was 11. He studied mathematics and surveying and when 16 went to live with his half-brother Lawrence, who had inherited the Potomac farm and built Mount Vernon, the original house having burned. George surveyed the lands of William Fairfax on the Shenandoah, keeping a diary. He accompanied Lawrence to Barbados, West Indies, contracted smallpox and was deeply scarred. Lawrence died in 1752 and George acquired his property by inheritance and purchase and added the 2,500 acres held by the Spencers. He valued land and when he died owned 70,000 acres in Virginia and 40,000 acres on the Great Kanawa and environs.

Washington's military service began in 1753 when Gov. Dinwiddie of Virginia made him lieutenant of militia. He clashed with the French and had to surrender Fort Necessity July 3, 1754. He was an aide to Braddock and helped organize the retreat after the fatal ambush of July 9, 1755. He helped take Fort Duquesne from the French in 1758.

After his marriage to Martha Dandridge Custis, 1759, Washington lived at Mount Vernon, bred horses and cattle, raised fruit and practiced crop rotation. In 1773 he enlarged the house. During the stamp act agitation, 1765, he supported the protesting Virginians. Although not at first for independence, he stood out against British exactions and took charge of the Virginia troops before war broke out. He was made commander-in-chief by the Continental Congress June 15, 1775 and took command at Cambridge July 3.

The successful issue of a war filled with hardships was largely due to his leadership. He was resourceful, a stern disciplinarian, and the one strong, dependable force for unity. He favored a federal government and became chairman of the Constitutional convention of 1787. He helped get the Constitution ratified and was unanimously elected President and inaugurated, April 30, 1789, on the balcony of New York's Federal hall at Broad and Wall Sts., now marked by his statue. In New York his mansion, near Franklin Sq., was the scene of formal dinners and levees. His pew in St. Paul's chapel is preserved.

His birthplace, Wakefield, was burned in 1789. On Feb. 22, 1932, a new Wakefield, built by donations, was dedicated as the George Washington Birthplace Monument, administered by the National Parks Service. The older Washingtons are buried there. It is 34 miles from Fredericksburg, Va., on State road 3, and five miles from Stratford Hall, birthplace of Robert E. Lee.

Although a Federalist, Washington made Thomas Jefferson secretary of state (resigned 1793). He was reelected 1792, but refused to consider a third term and retired to Mount Vernon, 1797. He suffered acute laryngitis after a ride in snow and rain around his estate, was bled profusely, and died Dec. 14, 1799, aged 67. He was mourned here and abroad as one of the great men of his time. He was buried in a vault at Mount Vernon. (See article on Mount Vernon.) He willed Mount Vernon to his nephew, Bushrod Washington (1762-1829), associate justice, U. S. Supreme Court.

MARTHA WASHINGTON

Mrs. Martha Dandridge Custis Washington was born June 2, 1732, in New Kent Co., Va. In 1749 she married Daniel Parke Custis, wealthy planter, who died in 1757. She lived in the White House on the Pamunkey, site of McClellan's supply depot in 1862. (Her house had burned down and been replaced before the Civil War.) In 1758 Washington, hurrying to Williamsburg, was invited by the owner of Poplar Grove to meet "the prettiest and richest widow in Virginia." She was plump, small, had dark hair and hazel eyes. Washington fell, and on his return from taking Fort Duquesne they were

married, Jan. 6, 1759. Martha had two children living, two having died in infancy. Her daughter Martha died at 17. Her son, Col. John Parke Custis, bought the 1,100 acres of Arlington in 1778, but died 1781, from wounds received at Yorktown. Washington adopted John's son, George Washington Parke Custis, who inherited Arlington and built the present house; his daughter Mary married Robert E. Lee there in 1831. Martha Washington managed her husband's plantations in his absence and in winter visited him at Valley Forge, Newburgh and other camps. She presided gracefully at official levees as Lady Washington. She died in 1802 and was buried at Mount Vernon.

John Adams

John Adams, 2nd President, Federalist, was born in Braintree (Quincy), Mass., Oct. 30, 1735 (Oct. 19, O. S.), the son of John Adams, a farmer and Susanna Boylston of Brookline. He was a great-grandson of Henry Adams who came from England in 1636. He was graduated from Harvard, 1755, taught school, studied law. In 1785 he argued against taxation without representation before the royal governor. In 1776 he defended the British soldiers who fired on civilians in the "Boston Massacre." He took part in the Provincial Congress of Massachusetts and the Continental Congress, seconded the independence resolution presented by Richard Henry Lee and with his cousin, Samuel Adams, signed the Declaration of Independence. He was a commissioner to France, 1778, with Benjamin Franklin and Arthur Lee; won recognition of the United States by The Hague, 1782; was first American minister to England, 1785-1786, and elected vice president with Washington, 1789 and 1792.

In 1796 Adams was chosen President by the electors, 71 to 68 so that opponents called him "president by 3 votes." The candidate with the second highest number of votes became vice president; this was Thomas Jefferson, his opponent. Intense antagonism to America by France caused agitation for war, led by Alexander Hamilton. Adams, breaking with Hamilton, opposed war but put the Navy on a fighting basis. The U. S. S. Constitution, the United States, both 44 guns, and the Constellation, 36 guns, and armed merchantmen bagged 84 French ships in an undeclared war. To fight alien influence and muzzle criticism Adams supported the Alien and Sedition laws of 1798, which led to his defeat for reelection. He died July 4, 1826, on the same day as Jefferson, and was buried in the First Unitarian church in Quincy, Mass.

ABIGAIL ADAMS

Mrs. Abigail Smith Adams was born at Weymouth, Mass., Nov. 25, 1744 (Nov. 12, O. S.), daughter of a Congregational minister and descendant of the Puritan divine, Thomas Shepard of Cambridge, Mass. She died at Quincy, Oct. 28, 1818. She had two daughters and three sons, one of whom, John Quincy Adams, became the sixth President. Often separated from John Adams during the Revolution, she joined him in Paris in 1784, and from 1785 to 1788 endured social slights at the court of St. James's, where Adams was our first minister. When New York was the seat of Washington's administration she lived at Richmond Hill, a manor house located where Charlton crosses Varick St. She was known for her sharp criticism of Adams' opponents.

Thomas Jefferson

Thomas Jefferson, 3rd President, was born April 13, 1743 (Apr. 2, O. S.) at Shadwell, Va., the son of Peter Jefferson, a civil engineer of Welsh descent who raised tobacco, and Jane Randolph. Jefferson was an agrarian, an expansionist; because he opposed the Federalists and centralization he was called a Republican, now synonymous with Democrat. His father died when he was 14, leaving him 2,750 acres and his slaves. Jefferson attended the College of William and Mary, 1760-1762, read classics in Greek and Latin; studied law with George Wythe in Williamsburg; played the violin and rode horses. In 1769 he was elected to the House of Burgesses. In 1770 Shadwell burned and he began Monticello, near Charlottesville. In 1772 he married Martha Wayles Skelton. He was a member of the Virginia Committee of Correspondence and the Continental Congress and denied Britain's right to tax. Named a member of the committee to draw up a Declaration of Independence, he wrote the basic draft, 1776. He was a member of the Virginia House of Delegates, 1776-79, elected

governor to succeed Patrick Henry, 1779, re-elected 1780, resigned, June 1781, amid charges of ineffectual military preparation. During his term he wrote the statute on religious freedom. In the Continental Congress, 1783, he drew up an ordinance for the Northwest Territory, forbidding slavery after 1800; its terms were put into the Ordinance of 1787. He was sent to Paris with Benjamin Franklin and John Adams to negotiate treaties of commerce, 1784; made minister to France, 1785, he made treaties with France and Prussia, studied architecture, gardening and the French Revolution, whose leaders consulted him.

Washington appointed him secretary of state, 1789. Jefferson's strong faith in the consent of the governed, as opposed to executive control favored by Hamilton, secretary of the treasury, often led to conflict: Dec. 31, 1793, he resigned. He was the Republican candidate for President in 1796; beaten by John Adams, he became vice president. He opposed Adams' alien and sedition laws with the Kentucky and Virginia resolutions, reiterating the basic rights of states. In 1800 Jefferson and Aaron Burr received equal votes for President, so the House of Representatives, with Hamilton's help, elected Jefferson, the first President to be inaugurated in Washington. Adams left town before the ceremony, but when Jefferson was re-elected in 1804 he voted for him. Jefferson cancelled levees and titles and ignored diplomatic precedence. He turned Federalists out of office. He opposed a strong navy. By fighting those who feared to give power to the people he made democracy work. He considered John Marshall's Supreme Court reactionary. Big events of his administration were the Louisiana Purchase, 1803, and the Lewis and Clark Expedition. He established the University of Virginia and designed its buildings. After the Library of Congress was burned by the British he sold Congress 13,000 vols. for \$23,950. He was 6 ft. 2, temperate in debate, a deist in religion. He died July 4, 1826, on the same day as John Adams and was buried at Monticello, which, after various vicissitudes, passed to the Thomas Jefferson Memorial Foundation in 1923.

MRS. THOMAS JEFFERSON

Mrs. Martha Wayles Jefferson, daughter of John Wayles, was 23 and the widow of Bathurst Skelton when she married Jefferson Jan. 1, 1772. She bore Jefferson six children at Monticello, two of whom lived to maturity. Martha, 1772-1836, married Thomas Mann Randolph, Jr.; Mary (Marie) 1778-1804, married her cousin, J. W. Eppes. Mrs. Jefferson's father's large farm and slaves became part of the estate. She died Sept. 6, 1782.

James Madison

James Madison, 4th President, Republican, was born Mar. 16, 1751 (Mar. 5, O. S.) at Port Conway, King George Co., Va., the eldest of 12 children of James Madison and Eleanor Rose Conway. His great-grandfather, James Taylor (1674-1729), was also the great-grandfather of Zachary Taylor. Madison was graduated from Princeton, 1771, studied theology, 1772, sat in the Virginia Constitutional Convention, 1776, where his resolution on religious freedom was voted down; was a member of the Continental Congress and of the Annapolis convention, 1786, where he and Hamilton proposed the Constitutional Convention. He was chief recorder at that convention in 1787, and supported ratification in the Federalist papers, written with Hamilton and Jay. In 1785 he carried Jefferson's statute on religious liberty through the Virginia assembly. He was elected to the House of Representatives in 1789, helped adopt the Bill of Rights and fought John Adams' alien and sedition laws. He favored agrarian policies with Jefferson and in 1801 became Jefferson's secretary of state. In 1803, when the Louisiana Purchase was consummated, he insisted on free navigation of the Mississippi, which he had already urged on Jay in 1780.

Elected President in 1808, Madison was a "strict constructionist," opposed to the free interpretation of the Constitution by the Federalists; he vetoed federal funds for state improvements, but changed in his second term. Madison inherited the conflict with Britain over its orders in council and impressment of American seamen, which had led to Jefferson's embargo act and injured American commerce. He was reelected in 1812 by the votes of the agrarian South and recently admitted western states. Caught between British and French maritime restrictions, Madison drifted into war, declared June 18, 1812, unaware that Britain had cancelled the orders two days before. While the war was inconclusive, it opened the way to peaceful negotiations. Madison successfully advocated a

tariff to protect industry, a national system of roads and canals and a strong military organization. He retired in 1817 to his estate at Montpelier (now Montpelier), Va., built 1760, with a portico suggested by Jefferson. There he edited his famous papers on the Constitutional Convention. He became rector of the Univ. of Virginia, 1826. He died June 28, 1836, and was buried near his home.

DOLLEY MADISON

Mrs. Dorothea (Dolley) Payne Madison, was born May 12, 1768, in North Carolina, daughter of John Payne, a Virginia Quaker, who freed his slaves. She grew up in Hanover County, Va. Her first husband, John Todd, died in 1793. She married Madison Sept. 15, 1794, and when he became secretary of state in 1801, became hostess for Jefferson in the White House. She presided at the first inaugural ball in 1809. She is supposed to have rescued Gilbert Stuart's portrait of Washington from the White House when the British came Aug. 24, 1814. She helped edit Madison's records of the Constitutional Convention. From 1817 to 1837 she lived at Montpelier, Orange Co., Va. (now Montpelier, privately owned). She returned to Washington as a welcome, but impecunious, social leader, in 1837. Congress bought her husband's records in 1837 for \$30,000, and other papers in 1846, for \$25,000. She took part in the dedication of the Washington monument and sent the first personal message over S. F. B. Morse's telegraph wire. She was respected for her tact and intelligence by presidents from Washington to Polk. In old age she suffered from the wastefulness of a son. She died July 12, 1849, aged 81, and is buried beside Madison near Montpelier.

James Monroe

James Monroe, 5th President, Republican, was born April 28, 1758, in Westmoreland Co., Va., the son of Spence Monroe and Eliza Jones, who were of Scottish and Welsh descent, respectively. He attended the College of William and Mary, fought in the 3rd Virginia regiment at White Plains, Brandywine, Monmouth, and was wounded at Trenton. He studied law with Thomas Jefferson, 1780, was a member of the Governor of the Virginia House of delegates and of Congress, 1783-86. He opposed ratification of the Constitution because it lacked a bill of rights; was U. S. Senator, 1789; minister to France, 1794-96, during which he improved relations with France, Spain and Algiers; four times governor of Virginia, 1799-1802, and 1811. Jefferson sent him to France as minister, 1803, to join R. R. Livingston in buying the Isle of New Orleans from France and East and West Florida from Spain. Exceeding instructions, he signed a treaty for all of Louisiana. (Navigation of the Mississippi was one of his demands as early as 1783.) He was also sent to Madrid, 1804, and London, 1805, to settle disputes. He ran against Madison for President in 1808. He was chosen member of the Virginia Assembly, 1810-1811; secretary of state under Madison, 1811-1817; also secretary of war Sept. 1814-Mar., 1815.

In 1816 Monroe was elected President; in 1820 reelected with all but one vote, this being cast for John Quincy Adams by William Plumer, Sr., of New Hampshire. Although many historians have held that Plumer withheld his vote from Monroe so that only Washington would have been elected unanimously, Plumer himself said he voted for Adams because he had "discovered a want of foresight" in Monroe. Monroe's administration became the Era of Good Feeling. He obtained the Floridas from Spain and suppressed the Seminoles; settled boundaries with Canada and eliminated border forts; supported the anti-slavery position that led to the Missouri Compromise. (In 1801 he had proposed settling Negro slaves in Africa. Monrovia, Liberia, was named for him.) In July, 1823, the U. S. served notice on Russia that it would oppose any Russian colony on this continent, after Russia had prohibited fishing on the northwest coasts. On Dec. 2, 1823, Monroe announced the Doctrine that the U. S. would consider its safety endangered if European powers had authority on this hemisphere or attempted colonization. First half had been suggested by George Canning, British foreign minister, to curb Spain; U. S., rejecting proposal for joint declaration, issued it also as warning to Russia. Monroe owned Ash Lawn, 5 mi. from Charlottesville, Va., 1799-1835; inherited Oak Hill, Loudon Co., Va., from his uncle Jos. Jones, 1806. The mansion, replacing Jones' cottage, was designed by Jefferson and executed by Jas. Hoban, White House architect. He moved to New York, 1830, to be with his daughters, and died there July 4, 1831, and was buried in

Marble cemetery. In 1858 his remains were removed to Richmond.

MRS. JAMES MONROE

Mrs. Elizabeth Kortwright Monroe was born in New York, 1768, the daughter of Lawrence Kortwright, formerly British army officer. She married Monroe in 1786. They had two daughters, who married and lived in New York. She died 1830 at Oak Hill.

John Quincy Adams

John Quincy Adams, 6th President, independent Federalist, was born July 11, 1767, at Braintree (Quincy), Mass., the son of John and Abigail Adams. He was educated in Paris, Leyden, and Harvard, graduating in 1787. He served as American minister in the Netherlands, Berlin, St. Petersburg and London and helped draft the peace treaty of 1814. He had served as senator from 1803 to 1808 and his support of the Republican administration alienated the Federalists. President Monroe made him secretary of state, 1817, and he negotiated the cession of the Floridas from Spain, supported exclusion of slavery in the Missouri Compromise, and laid the base for the Monroe Doctrine, of which he, as much as Monroe, was the creator. In 1824 he was elected President by the House after he failed to win an Electoral College majority over Henry Clay and Andrew Jackson. His expansion of executive powers was strongly opposed and he was beaten in 1828 by Jackson. In 1831 he was sent to Congress as representative and served nine terms with distinction and independence. He fought slavery, opposed the annexation of Texas and the war with Mexico; was responsible for the Smithsonian Institution. He had a stroke in the House and died in the Speaker's room, Feb. 23, 1848.

MRS. JOHN QUINCY ADAMS

Mrs. Louisa Catherine Johnson Adams was born in London, Feb. 12, 1775, the daughter of Joshua Johnson, a Marylander who acted as American fiscal agent there. She married Adams July 26, 1797. Of their four children, George Washington Adams, John Q. Adams, Jr., Charles Francis Adams and Louisa Catherine Adams, Charles Francis became Free Soil candidate for vice president in 1848, member of Congress, minister to England during the Civil War and president of the Geneva Board of Arbitration. He was father of Charles Francis Adams, Henry Adams and Brooks Adams.

Andrew Jackson

Andrew Jackson, 7th President, originally Jeffersonian-Republican, later first Democrat, was born in the Waxhaws district, New Lancaster Co., S. C., Mar. 15, 1767, the posthumous son of Andrew Jackson, who came from County Antrim, Ireland, with his wife, Elizabeth Hutchinson, and two sons, in 1765. At 13 he joined the militia in the Revolution and when captured a British officer struck Andrew with his sword when the boy refused to shine his boots. He read law in Salisbury, N. C., moved to Nashville, Tenn., speculated in land, married and raised cotton at the Hermitage, originally a log house. In 1796 he helped draft the Constitution of Tennessee and for one year occupied its one seat in the national House. He was in the Senate in 1797, and again in 1823. He defeated the Creek Indians at Horseshoe Bend, Ala., 1814, and as major general, U. S. A., drove the British out of Pensacola. With 6,000 backwoods fighters he defeated Pakenham's 12,000 British troops at Chalmette, outside New Orleans, Jan. 8, 1815, losing only seven to the British loss of 2,000. In 1818 he fought so recklessly against the Seminoles in Florida that he endangered foreign relations. In 1824 he ran for President against John Quincy Adams and was voted down by the House, though he had the most votes; in 1828 he carried everything, the West rising to support "Old Hickory" and a liberal land policy. He was a noisy debater and duellist and introduced rotation in office or "spoils system." He was suspicious of privilege; ruined the Bank of the United States by depositing federal funds with state banks. Though "Let the people rule" was his slogan, he at times supported strict constructionist policies against the expansionist West. He killed the Congressional caucus for nominating presidential candidates and substituted the national convention, 1832, when he was reelected, with Martin Van Buren vice president. When South Carolina refused to collect imports under his protective tariff he ordered army and naval forces to Charleston. At the Jefferson Day dinner, 1830, he offered the toast: "Our Federal Union; it must be preserved." Vice

President John C. Calhoun, exponent of state sovereignty, gave in reply the toast: "The Union—next to our liberty, most dear." Jackson recognized the Republic of Texas, 1836. His party took the name of Democrat. He died at the Hermitage, June 8, 1845, and is buried there.

MRS. ANDREW JACKSON

Mrs. Rachel Jackson was the daughter of Col. John Donelson, a surveyor at Nashville, and first married Capt. Lewis Robards. Under the impression that Robards had obtained a divorce she married Jackson in Natchez in 1791. Robards did not get a divorce until 1793, when the Jacksons were remarried, but the ordeal affected her spirits. She died in 1828 after Jackson's election and never lived in the White House. Jackson adopted her sister's son, named him Andrew Jackson, Jr. White House hostesses were his wife's niece, Mrs. Emily Donelson, and the adopted son's wife, Mrs. Sarah York Jackson, a Philadelphia Quaker.

Martin Van Buren

Martin Van Buren, 8th President, Democrat, was born Dec. 5, 1782, at Kinderhook, N. Y., the son of Abraham Van Buren, a Dutch farmer, and Mary Hoes. He was surrogate of Columbia county, New York, state senator and attorney general and a law partner of Benj. F. Butler in Albany. He was U. S. senator, 1821, re-elected, 1827, elected governor of New York, 1828. He helped swing eastern support to Andrew Jackson in 1828 and was his secretary of state, 1829-31. In 1832 he was elected vice president. He was a consummate politician, known as "the little magician," and influenced Jackson's policies. In 1836 he defeated William Henry Harrison for President by 170 to 73 electoral votes. He inaugurated the independent treasury system, and was the first advocate of mutual insurance of deposits by banks. He advocated tariff for revenue only and opposed internal improvements at national expense. His refusal to spend land revenues led to his defeat by Harrison in 1840. He lost the Democratic nomination of 1844 to Polk because he opposed annexation of Texas. In 1848 he ran for President on the Free Soil ticket and lost. Thus he ran three times. He died July 24, 1862 at Kinderhook, N. Y.

MRS. MARTIN VAN BUREN

Mrs. Hannah Hoes Van Buren, born 1783, was a relative of Van Buren's mother and his classmate in school. She married in 1807, died 1819. Their son Abraham, 1807-1873, a West Pointer, was secretary to the President, an officer in the Mexican war and a New York resident. His wife, Angelica Singleton, cousin of Dolley Madison, was White House hostess during Van Buren's term. Another son, John Van Buren (1810-1866), was elected attorney general of New York, 1845.

-William Henry Harrison

William Henry Harrison, 9th President, Whig, who served only 31 days, was born in Berkeley, Charles City Co., Va., Feb. 9, 1773, the third son of Benjamin Harrison, signer of the Declaration of Independence. Educated at Hampden Sydney college, he later studied medicine under Dr. Benjamin Rush. Commissioned by Washington, he fought under Gen. Anthony Wayne at Fallen Timbers, 1794. He was secretary of Northwest Terr., 1798; its delegate in Congress, 1799; first governor of Indiana Terr., and supt. of Indian affairs. With 900 men he routed Tecumseh's Indians at Tippecanoe, Nov. 7, 1811. A major general, he defeated British and Indians at Battle of the Thames, Oct. 5, 1813. He served Ohio in Congress, 1816; as senator, 1824; was minister to Colombia. In 1840, when 68, he was elected President with John Tyler, 234 to 60, on a "log cabin and hard cider" slogan. He caught pneumonia during the inauguration and died April 4, 1841. He was buried in North Bend, O.

MRS. WILLIAM HENRY HARRISON

Mrs. Anna Symmes Harrison, daughter of Col. John Cleves Symmes, chief justice of the New Jersey Supreme Court and Revolutionary veteran, was born in Morristown, N. J., 1775 and died 1864. She did not leave her North Bend, O., home for Washington and Mrs. Jane Findlay Irwin Harrison, wife of her son, Col. W. H. Harrison, Jr., stayed in the White House during Harrison's illness. Another son, John Scott Harrison, 1804-1873, was member of Congress and father of Benjamin Harrison, 23rd President.

John Tyler

John Tyler, 10th President, independent Whig, was born Mar. 29, 1790, in Greenway, Charles City

Co., Va., son of John Tyler and Mary Armistead. His father was governor of Virginia, 1803-11. Tyler was graduated from William and Mary, 1807; member of the House of Delegates, 1811; in Congress, 1816-21; in Virginia legislature, 1823-25; governor of Virginia, 1825-26; U. S. senator, 1827-36. In 1836 he was defeated for vice president on a states' rights Whig ticket. In 1840 he was elected vice president on a Whig ticket with Harrison and succeeded him. He favored pre-emption, allowing settlers to get government land; rejected a new bank bill and thus alienated Whig supporters except Daniel Webster, his secretary of state; refused to honor the spoils system. He signed the resolution annexing Texas, Mar. 1, 1845. He accepted renomination, 1844, but withdrew before election. He condemned South Carolina's nullification and secession and as Virginia's commissioner to Buchanan tried to keep Fort Sumter neutralized. He was president of the peace congress called in Washington by Virginia, 1861. After its failure he supported secession, sat in the provisional Confederate congress, became a member of the Confederate House, but died, Jan. 18, 1862, before it met. He is buried in Richmond.

MARRIAGES OF JOHN TYLER

When 23 John Tyler married Letitia Christian of Cedar Grove, Va., born 1790, daughter of a planter. She was an invalid and died in the White House, 1842. She was an Episcopalian. Of her children Robert Tyler, 1816-1877, married Priscilla Cooper, daughter of a tragedian; presided in the White House. On June 26, 1844, in New York, Tyler married Julia Gardiner, born 1826, daughter of David Gardiner of Gardiner's Island, N. Y. She became a Catholic, 1872; died, 1889. Her son Lyon Gardiner Tyler became president of William and Mary, 1888; died 1935. Another, David Gardiner Tyler, judge, member of Congress and Confederate veteran, died 1927. A third son, Robert Fitzwalter Tyler, died 1927 at Richmond, aged 70.

James Knox Polk

James Knox Polk, 11th President, Democrat, was born in Meckenburg Co., N. C., Nov. 2, 1798, the son of Samuel Polk, farmer and surveyor of Scotch-Irish descent, and Jane Knox. He went to Maury Co., Tenn., 1806; was graduated from the University of North Carolina, 1818; member of the Tenn. state legislature, 1823-25, known as "Napoleon of the Stump." He served in Congress 1825-39 and as speaker 1835-39. He supported Jackson and Van Buren, but was always expansionist. He was governor of Tennessee, 1839-41, being defeated 1841, '43. In 1844, when both Clay and Van Buren announced opposition to annexing Texas, the Democrats made Polk the first dark horse nominee because he demanded control of all Oregon and annexation of Texas. He won 170 to 105. James Buchanan was his secretary of state. He re-established the independent treasury system originated by Van Buren. His expansionist policy was opposed by Clay, Webster, Calhoun; he sent Zachary Taylor and an army to the Mexican border and when Mexicans attacked declared war existed. Abraham Lincoln, a Whig in Congress, opposed his war policy. Polk approved the acquisition of California, Utah and New Mexico (522,568 square miles) as part of America's "manifest destiny," but opposed retaining Mexico by force. He compromised on the Oregon boundary ("54-40 or fight!") by accepting the 49th parallel and giving Vancouver to the British. The Wilmot Proviso, outlawing slavery in new states, was debated in his term. Polk died in Nashville, June 15, 1849, and is buried on the capitol grounds there.

MRS. JAMES K. POLK

Mrs. Sarah Childress Polk was born in 1803 and married Polk Jan. 1, 1824. Her father was a wealthy planter near Murfreesboro, Tenn. She was educated by the Moravians. The Polks were Methodists and Mrs. Polk prohibited liquor and dancing in the White House. They had no children.

Zachary Taylor

Zachary Taylor, 12th President, Whig, who served only 16 months, was born Nov. 24, 1784, in Orange Co., Va., the son of Richard Taylor, later collector of the port of Louisville. His grandfather and James Madison's paternal grandmother were brother and sister. Taylor enlisted 1806; was commissioned lieutenant by Jefferson, 1808; fought in the War of 1812, the Black Hawk War, 1832, and the Seminole war, 1837. He became known as Old Rough and Ready. He settled on a plantation near Baton Rouge, La. In 1845 Polk sent him to the Rio Grande; when the Mexicans attacked him, Polk declared war. Taylor was successful at Palo

Alto and Resaca de la Palma, May 8 and 9, 1846; occupied Monterey. Polk made him major general but gave many of his troops to Gen. Winfield Scott at Vera Cruz. Taylor, with 5,000 men, defeated Santa Anna's 20,000 at Buena Vista, Feb. 22, 1847. He defeated Scott at the Whig convention, 1848; was elected President over Martin Van Buren (Free Soil) with Millard Fillmore vice pres. He resumed the spoils system and though once a slave-holder worked to have California admitted as a free state. He died of typhus July 9, 1850, and was buried near Louisville.

MRS. ZACHARY TAYLOR

Mrs. Margaret Smith Taylor was born in 1788, the daughter of Walter Smith, Maryland planter. She married Taylor, 1810, died 1852. Of their daughters Elizabeth, Mrs. W. W. S. Bliss, was hostess of the White House; Ann married Dr. Robert Wood, asst. surgeon general, U. S. A.; Sarah Knox married Jefferson Davis, 1835, and died three months later. A son, Richard, 1826-79, served under Stonewall Jackson and became a Confederate general. He died in New York.

Millard Fillmore

Millard Fillmore, 13th President, Whig, was born Jan. 7, 1800, in a log cabin on a farm in Cayuga Co., N. Y., cleared in 1795 by his father, Nathaniel. He was apprenticed to a fuller and dyer; bought his freedom for \$50 to study and became a teacher and postmaster in Buffalo, N. Y. He was counselor of the state supreme court, 1829; in the state assembly, 1829-32; in Congress, 1833-35 and again 1837-43. He opposed the entrance of Texas as slave territory and voted for a protective tariff. He supported the appropriation of \$30,000 for Morse's telegraph. In 1844 he was defeated for governor of New York. In 1848 he was elected vice president and succeeded as President July 10, 1850. Daniel Webster was secretary of state until he died, 1852; then Edward Everett. Fillmore favored the compromise of 1850 and signed the Fugitive Slave Law. His policies pleased neither expansionists nor slave-holders and he was not renominated. In 1856 he was nominated by the American (Know-Nothing) party and accepted by the Whigs, but defeated by Buchanan. He was chancellor of the University of Buffalo. He died in Buffalo, Mar. 3, 1874.

FILLMORE'S TWO MARRIAGES

The first Mrs. Fillmore, 1798-1853, was Abigail Powers, the daughter of Lemuel Powers, a Baptist clergyman of Stillwater, N. Y., and taught school in Cayuga Co. Owing to her poor health her daughter, Mary Abigail (1832-54) was the White House hostess. Their other child was Millard Powers Fillmore (1828-89). The second Mrs. Fillmore was Mrs. Caroline Carmichael McIntosh, born in Morristown, N. J., and widow of an Albany merchant. They had no children.

Franklin Pierce

Franklin Pierce, 14th President, Democrat, was born in Hillsboro, N. H., Nov. 23, 1804, the son of Benjamin Pierce, veteran of the Revolution and governor of New Hampshire, 1827. He attended Exeter and was graduated from Bowdoin, 1824. A lawyer, he served in the New Hampshire House, 1829-32; in Congress, supporting Jackson, 1833; U. S. Senator, 1837-42. He enlisted in the Mexican war, became brigadier general of volunteers and was wounded at Contreras. In 1852 Pierce was nominated on the 49th ballot over Cass, Douglas and Buchanan, defeating Gen. Winfield Scott, Whig. Though against slavery, Pierce was influenced by southern pro-slavery men (Jefferson Davis was his secy. of war) but he ignored the Ostend Manifesto that the U. S. either buy or take Cuba. He approved the Kansas-Nebraska act, leaving slavery to popular vote ("squatter sovereignty"), 1854, and named a pro-slavery governor of Kansas. He signed a reciprocity treaty with Canada and approved the Gadsden Purchase from Mexico, 1853. He supported Commodore Matthew Perry's opening of Japan, 1854. Pierce died at Concord, N. H., Oct. 8, 1869.

MRS. FRANKLIN PIERCE

Mrs. Jane Means Appleton Pierce was born at Hampton, N. H., 1806, daughter of the Rev. Jesse A. Appleton, president of Bowdoin. The Pierces had three children: one died in infancy, one at 4 and one was killed in a railroad accident at 11. Mrs. Pierce died in 1863.

James Buchanan

James Buchanan, 15th President, Federalist, later Democrat, was born of Scottish descent near Mercersburg, Pa., Apr. 23, 1791. He was a volunteer in the War of 1812; graduated from Dickinson,

1809; member Pa. legislature, 1814-16, Congress, 1820-31; Jackson's minister to Russia, 1831-33; senator, 1834-45. As Polk's secy. of state, 1845-49, he ended Oregon dispute with Britain, supported Mexican war and annexation of Texas. As minister to Britain, 1853, he signed the Ostend Manifesto, 1854, urging U. S. to take Cuba. Nominated by Democrats over Pierce and Stephen A. Douglas, he was elected, 1856, over John C. Fremont (Republican) and Millard Fillmore (American Know-Nothing and Whig tickets). On slavery he favored popular sovereignty and choice by state constitutions; he accepted the pro-slavery Dred Scott decision as binding. His support of the pro-slavery Lecompton constitution for Kansas caused a break with Douglas Democrats. He denied the right of states to secede but wanted U. S. constitutional recognition of property rights in slaves and Federal action against fugitives. Buchanan refused demands of South Carolina for Federal property, but also refused to reinforce forts there until too late to help Fort Sumter. A strict constructionist, he desired to keep peace and found no authority for using force. He died at Wheatland, near Lancaster, Pa., June 1, 1868, aged 77.

Buchanan was a bachelor. The mistress of the White House was the daughter of Buchanan's sister Jane, Harriet Lane, whose parents had died when she was a child. The major social event was the visit in 1860 of the Prince of Wales, later Edward VII.

Abraham Lincoln

Abraham Lincoln, 16th President, Republican, was born Feb. 12, 1809, in a log cabin on a farm then in Hardin Co., Ky., now in Larue. He was the son of Thomas Lincoln (1778-1851), a descendant of Samuel Lincoln, who came with his wife Martha from Hingham, England, 1635, settled at Salem and Hingham, Mass., and had 11 children. Thomas, a carpenter, married Nancy Hanks, June 12, 1806. She was the natural daughter of Lucy Hanks, whose ancestor, Thomas Hanks, came from England to Virginia, 1644. Abe had a sister, Sarah, born 1807, died 1828, and a brother, Thomas, who died in infancy.

The Lincolns moved to Spencer Co., Ind., near Gentryville, when Abe was 7. His mother died Oct. 5, 1818, aged 35. His father married Mrs. Sarah Bush Johnston, 1819; she had a favorable influence on Abe. He was 6 ft., 3 in. tall. Abe made two trips on flatboats to New Orleans, one via the Ohio-Mississippi, 1828, and one via the Illinois-Mississippi, 1831. In 1830 the family moved to Macon County, Ill., where Abe and a cousin split 3,000 fence rails. In 1831 they moved to Coles County. In New Salem, 1831-1837, Lincoln lost election to the Illinois General Assembly, 1832, but won four times later, beginning in 1834. He enlisted in the militia for the Black Hawk War, 1832. In New Salem he ran a store, 1833, surveyed land, 1834-36, was postmaster, 1833-36. Ann Rutledge, whom he is said to have loved, died near New Salem, 1835, aged 19.

In 1837 Lincoln was admitted to the bar and became partner in a Springfield law office. He began practice on 8th Judicial Circuit, 1839. He was a presidential elector, 1839, 1844, 1852, 1856. He failed of nomination for representative, 1843, but was elected to the 30th Congress, 1847. He opposed the Mexican war. He stumped New England for Zachary Taylor, 1848. He refused offices of secretary and governor of Oregon Terr., 1849. He opposed the Kansas-Nebraska Act and extension of slavery, 1854. When elected to the Ill. legislature, 1854, he declined in order to try for the Senate, but failed of election, 1855. He was proposed but not chosen for vice president at the first Republican convention, 1856, and he made 50 speeches for John C. Fremont, presidential nominee.

In 1858 Lincoln had Republican support in the Ill. legislature for the Senate but was defeated by Stephen A. Douglas, Dem., who sponsored the Kansas-Nebraska Act. The issues were debated by Lincoln and Douglas Aug. 21-Oct. 15 at Ottawa, Freeport, Jonesboro, Charleston, Galesburg, Quincy and Alton, Ill.

Lincoln was nominated for President by the Republican party over Wm. H. Seward, on an anti-slavery platform, at Chicago, May 18, 1860. He ran against Stephen A. Douglas, northern Democrat; John C. Breckinridge, southern pro-slavery Democrat; John Bell, Constitutional Union party. Lincoln got only 40% of the votes, but 180 electoral votes to 123. South Carolina seceded from the Union Dec. 20, 1860, followed in 1861 by 10 southern states.

Lincoln was inaugurated Mar. 4, 1861. Fort

Sumter was attacked Apr. 12-14, and surrendered. Lincoln called for 75,000 volunteers Apr. 15, and 500,000 May 3. On Sept. 22, 1862, 5 days after the battle of Antietam, he announced that slaves in territory then in rebellion would be free Jan. 1, 1863, date of the Emancipation Proclamation. He reached the highest degree of eloquence at Gettysburg National Cemetery, Nov. 19, 1863.

Lincoln was re-elected, 1864, over Gen. Geo. B. McClellan, Democrat. Lee surrendered April 9, 1865. On April 14 (Good Friday) Lincoln was shot by John Wilkes Booth, actor, in Ford's Theater, Washington. He died the next day. His body lay in state in New York, Chicago and other cities before burial in Springfield, Ill. His estate reached \$110,974, most of it saved from his annual salary of \$25,000. His humanity, lofty concept of office and generous spirit made him the hero of the common man the world over.

MRS. LINCOLN AND FAMILY

Mrs. Mary Todd Lincoln was born in Lexington, Ky., 1818, daughter of a pioneer; moved to Springfield, Ill., 1837, where she married Lincoln Nov. 4, 1842. Her half-sister, Emily, became the wife of Brig. Gen. Ben Hardin Helm of the Confederate Army, who was killed at Chickamauga. Mrs. Lincoln was accused of undue extravagance while in the White House. In 1875 she was temporarily in a mental hospital in Batavia, Ill. She died 1882.

The Lincolns had four sons. Edward Baker died 1850; Wm. Wallace, 1862; Thomas ("Tad"), 1871. Robert Todd Lincoln, born Aug. 1, 1843, in Springfield, attended Ill. State Univ., Phillips Exeter Acad., A. B. Harvard, 1864, in Harvard Law School, 1864. Captain, USA, on staff of Grant, 1865. Secy. of War, 1881-85; minister to Great Britain, 1889-93; later pres. Pullman Co. Married Mary Harlan, dau. Sen. Jas. Harlan (Iowa) 1868; children, since deceased, were Abraham (d at 17), Mrs. Chas. Isham, Mrs. Robt. J. Randolph. Robert Todd Lincoln died July 26, 1926, at Manchester Vt., was buried at Arlington, Va. Gave Library of Congress 18,350 letters and documents of Lincoln's tenure, opened July 26, 1947. The Lincoln family Bible and Bible on which Lincoln took oath of office were given to library by Mrs. Robert Lincoln (d. 1937).

Andrew Johnson

Andrew Johnson, 17th President, Democrat, was born in Raleigh, N. C., Dec. 29, 1808, the son of Jacob Johnson, porter at an inn and church sexton, and Mary McDonough Johnson, who had been a maid at the inn. His father died when he was 5. At 10 he was apprenticed to a tailor. At 16 he ran off to Greenville, Tenn. He became an alderman, 1828; mayor, 1830; state representative and senator, 1835-43; member of Congress, 1843-53; governor of Tennessee, 1853-57; U. S. Senator, 1857-62. He supported John C. Breckinridge against Lincoln in 1860. He had held slaves, but opposed secession and refused to follow Tennessee out of the Union. In March, 1862, Lincoln appointed him military governor of occupied Tennessee. In 1864 he was nominated for vice president with Lincoln on the National Union ticket to win Democratic support. He succeeded Lincoln as President April 15, 1865. In a controversy with Congress over the president's power over the South, he proclaimed, May 26, 1865, an amnesty to all Confederates except certain leaders if they would abolish slavery and ratify the 13th amendment. States doing so added anti-Negro provisions that enraged Congress, which intended to enfranchise all Negroes and disenfranchise former Confederates. Congress restored military control over the South. When Johnson removed Edwin M. Stanton, secretary of war, without notifying the Senate, thus repudiating the Tenure of Office Act, the House impeached him for this and other reasons. He was tried by the Senate, which voted 35 for conviction, 19 for acquittal, lacking the two-thirds necessary to convict, May 26, 1868. He was a candidate before the next Democratic convention, but not nominated. He returned to the Senate in 1875, and in a strong speech defended his course. He supported the Lincoln policies, but his conciliatory attitude toward the South was fought by the radical Republicans. Johnson died July 31, 1875, and was buried at Greenville (now Greenville), where his log-cabin tailor shop and home are museums.

MRS. ANDREW JOHNSON

Mrs. Eliza McCauley Johnson was born in Leesburg, Tenn., in 1810, the only daughter of a widow in a mountain hamlet when Johnson married her. She helped him get an education. Their daughter Martha, born 1828, educated in Georgetown, D. C., was often a guest at the White House in Polk's

administration. In 1857 she married Judge D. T. Patterson. She was mistress of the White House in place of her invalid mother. Another daughter, Mary, married Daniel Stover of Carter Co., Tenn., and had three children; after Stover's death she married W. R. Bacon of Greenville. Mrs. Johnson died in 1876.

Ulysses S. Grant

Ulysses Simpson Grant, 18th President, Republican, was born at Point Pleasant, O., Apr. 27, 1822, son of Jesse E. Grant, a tanner. The next year the family moved to Georgetown, O. Grant's mother was Hannah Simpson. Grant was named Hiram Ulysses, but on entering West Point, 1839, his name was entered as Ulysses Simpson and he adopted it. He was graduated in 1843; was 1st lieutenant and captain under Gens. Taylor and Scott in the Mexican War; resigned, 1854, worked in St. Louis until 1860, then went to Galena, Ill., where his father sold leather and hardware. He became colonel of the 21st Illinois Vols., 1861, then brigadier general; took Forts Henry and Donelson; made maj. gen. of volunteers; fought at Shiloh. Took Vicksburg, became maj. gen. USA., and in Mar., 1864, lieutenant general. He accepted Lee's surrender at Appomattox. In 1866 he was named General of the Army. President Johnson appointed Grant secretary of war when he suspended Stanton in defiance of the Senate, but Grant was not confirmed. He was nominated on the first ballot, May 30, 1868, and elected over Horatio Seymour, Democrat, 214 vs. 80 electoral votes. The 15th amendment, amnesty bill and civil service reform were events of his administration. The Liberal Republicans opposed him with Horace Greeley, also Democratic nominee, 1872, but he was re-elected. He vetoed the inflation bill, 1874. An attempt by the Stalwarts (Old Guard) to nominate him in 1880 failed. In 1884 the collapse of Grant & Ward, investment house, left him penniless. He began his *Personal Memoirs*, writing while ill of cancer and completing them four days before his death at Mt. McGregor, N. Y., July 23, 1885. The book realized over \$450,000. Grant was buried in an imposing tomb on Riverside Drive, New York, where his wife also lies.

MRS. ULYSSES S. GRANT

Mrs. Julia Dent Grant (1826-1902) was the daughter of Judge Frederick Dent of St. Louis, son of a Revolutionary officer. She married Grant, Aug. 1848. Their children were Frederick Dent Grant (1850-1912), minister to Austria-Hungary, police commissioner of New York, major general, Spanish-American War; Ulysses, Jr. (1852-1929); Jesse R. (1858-1934); Nellie (1857-1922), who was married in the White House to Capt. Algernon Sartoris, 1874, and in 1912, a widow, married Frank H. Jones. Cleveland's assistant postmaster general.

Rutherford Birchard Hayes

Rutherford Birchard Hayes, 19th President, Republican, was born in Delaware, O., Oct. 4, 1822, the posthumous son of Rutherford Hayes, a farmer, and Sophia Birchard. He was descended from George Hayes, a Scot who reached Windsor, Conn., in 1680. He was raised by his uncle Sardis Birchard, educated in Norwalk, O., and Middletown, Conn., and graduated from Kenyon College, 1842, and Harvard Law school, 1845. He practiced law in Lower Sandusky, O., now Fremont; was city solicitor of Cincinnati, 1858-61. He was major of the 23d Ohio Vols., wounded at South Mountain; became brigadier general and major general by brevet, 1864. He served in Congress 1864-67, supporting Reconstruction and Johnson's impeachment. He was elected governor of Ohio, 1867 and 1869; beaten for Congress 1872; re-elected governor, 1875. He supported the merit principle in appointments, economy, prison reform and public libraries. In 1876 he was nominated for President over James G. Blaine and believed he had lost to Samuel J. Tilden, Democrat, 184 to 153 electoral votes. But Zachariah Chandler, chairman of the Republican National Committee, relying on Republican domination of the South, urged the validity of contesting 22 electoral returns from Florida, South Carolina, Louisiana; also Oregon. Frauds in Louisiana injuring Tilden were permitted to stand. Promises to withdraw troops from the South were reported used to suborn Democrats. The election was judged by an Electoral Commission, appointed by Congress, 8 Republicans and 7 Democrats, who refused to "go behind state returns" and by strict party vote elected Hayes by 185 over 184. Tilden's refusal to fight back was blamed by his party. The withdrawal of troops followed, but handi-

capped Republican rule, and as Hayes proceeded to reform civil service he alienated political spoils-men. He advocated repeal of the Tenth of Office Act that had led to Johnson's impeachment. He supported sound money and specie payments. Hayes died in Fremont, O., Jan. 17, 1893.

MRS. RUTHERFORD B. HAYES

Mrs. Lucy Webb Hayes, born 1831, was the daughter of Dr. James Webb of Chillicothe, O. She married Hayes Dec. 30, 1852. She was an advocate of temperance, as was Hayes, and did not permit alcoholic beverages in the White House. The Hayesses had eight children: Birchard A. (1853-1928); Webb C. (1856-1934); Rutherford P. (1858-1927); Joseph T. (1861-1883); George C. (1864-66); Frances (1867-1950); Scott R. (1871-1923); Manning F. (1873-74). Mrs. Hayes died June, 1889.

James Abram Garfield

James A. Garfield, 20th President, Republican, was born Nov. 19, 1831, in a log cabin at Orange, Cuyahoga Co., Ohio., the son of Abram and Eliza Ballou Garfield. His father, a canal contractor and farmer from New York, was descended from Edward Garfield, who reached Massachusetts Bay Colony in 1630 and helped found Watertown, Mass.; his mother was a descendant of an owner of Providence Plantation. James was the youngest of four children; his father died in 1833 and his mother supported them. He worked as canal bargeman, farmer and carpenter; got an education at Western Reserve Eclectic, later Hiram College, and was graduated from Williams in 1856. He became professor of ancient languages and literature at Hiram, then principal. He was in the Ohio senate in 1859. Anti-slavery and anti-secession, he volunteered for the war, became colonel of the 42nd Ohio Infantry and brigadier general in 1862. He fought at Shiloh, was chief of staff for Rosecrans and was made major general for gallantry at Chickamauga. He entered Congress as a radical Republican in 1863; supported specie payment as against paper money (greenbacks). He was elected to the electoral commission in 1876 he voted for Hayes against Tilden on strict party lines. He was senator-elect in 1880 when he became the Republican nominee for President. He was chosen on the 36th ballot as a compromise between Gen. Grant, James G. Blaine and John Sherman. This alienated the Grant following but Garfield was elected and Blaine became his secretary of state. On July 2, 1881, Garfield was shot by an unbalanced office-seeker, Charles J. Guiteau, while entering the old Baltimore & Potomac station in Washington. He died Sept. 19, 1881, at Elberon, N. J., and was buried in Cleveland, O. Guiteau was hanged June 30, 1882.

MRS. JAMES A. GARFIELD

Mrs. Lucretia Endolph Garfield was born in 1832, daughter of an Ohio farmer. Her mother was a descendant of Gen. Nathaniel Greene. She and Garfield were schoolmates and were married Nov. 11, 1858, when he was principal at Hiram, O. Cyrus W. Field and friends raised a trust fund of \$360,000 for the family. She died March 13, 1918. Five children survived. James R. became secretary of the interior, 1907-09; Harry A. was president of Williams College; Irvin M. became a Boston lawyer and Abram G. a Cleveland architect; a daughter, Mrs. Mary Stanley-Brown, died Dec. 30, 1947.

Chester Alan Arthur

Chester A. Arthur, 21st President, Republican, was born at Fairfield, Vt., Oct. 5, 1830, the son of the Rev. William Arthur, from County Antrim, Ireland, and Malvina Stone Arthur, member of a New Hampshire family. He was graduated at Union College, 1848, taught school at Fownall, Vt., studied law in New York. In 1853 he argued in a fugitive slave case that slaves transported through New York state were thereby freed; in 1855 he obtained a ruling that Negroes were to be treated the same as whites on street cars. He helped organize the New York State militia, 1861; was made quartermaster general and equipped troops for the front. He was made collector of the port of New York, 1871. In 1877 President Hayes, reforming the civil service, ordered Arthur's resignation; he refused because he was not personally culpable, but was removed, 1879. This made Senators Conkling, Platt and the New York machine stalwarts enemies of Hayes. Arthur and the stalwarts tried to nominate Grant for a third term, 1880; when Garfield was nominated, Arthur received second place in the interests of harmony. On Sept. 19, 1881, he succeeded Garfield as President. He supported civil service reform and the tariff

of 1883; arranged an unratified canal treaty with Nicaragua. He was defeated for renomination by James G. Blaine, 1884, but supported Blaine. He died Nov. 18, 1886, and was buried in Albany, N. Y.

MRS. CHESTER A. ARTHUR

Mrs. Ellen Lewis Herndon Arthur was born in Fredericksburg, Va., in 1837, the daughter of Commander William Lewis Herndon, U. S. N. She died in 1880. The Arthurs had three children, W. L. H. Arthur, who died in infancy; Chester Alan Arthur, Jr., (1865-1937) and Ella Herndon Arthur, born 1871 (Mrs. Charles Pinkerton). The mistress of the White House was Arthur's sister, Mary, Mrs. John E. McElroy of Albany, N. Y.

Grover Cleveland

According to a ruling of the State Dept. Grover Cleveland is both the 22nd and the 24th president, because his two terms were not consecutive. By individuals, he is only the 22nd.

Grover Cleveland, 22nd and 24th President, Democrat, was born in Caldwell, N. J., Mar. 18, 1837, the son of Richard F. Cleveland, a Presbyterian minister, and Ann Neale, daughter of a Baltimore merchant who had come from Ireland. He was named Stephen Grover, but dropped Stephen. He clerked in Clinton and Buffalo, N. Y., taught in the New York City Institution for the Blind; was admitted to the bar in Buffalo, 1859; ass't district attorney, 1863; sheriff, 1869; mayor, 1881; governor of New York, 1882. He was an independent, honest administrator who hated corruption. He was nominated for President over Tammany opposition, 1884, defeating James G. Blaine, 219 to 182. He enlarged the civil service, vetoed many pension raids on Treasury. In 1888 he was defeated by Benjamin Harrison, although his popular vote was larger. Re-elected over Harrison, 1892, by 277 to 145, he faced a money crisis brought about by lowering of the gold reserve, circulation of paper and exorbitant silver purchases under the Sherman act; he obtained repeal of the latter and a reduced tariff. An income tax was passed but declared unconstitutional by the Supreme Court, 1895. A severe depression and labor troubles racked his administration but he refused to interfere in business matters and rejected as crackpot theory, Jacob Coxey's demand for work relief of \$20,000,000 monthly. He broke the Pullman strike with troops to move the mails, 1894. He rejected the platform of W. J. Bryan's silver Democrats, 1896, and supported the gold Democrats, Falmer & Buckner. He had part in the reorganization of the Equitable Life Assurance Assn. He died in Princeton, N. J., June 24, 1908.

MRS. GROVER CLEVELAND

Mrs. Frances Folsom Cleveland was born in 1864, the daughter of Cleveland's law partner in Buffalo. Oscar Folsom and Emma C. Harmon. She married Cleveland in the White House, June 2, 1886. They had five children, Ruth, Esther, Marion, Richard Folsom and Francis Grover. Mrs. Cleveland married, Feb. 10, 1913, Thomas J. Preston, Jr., an archaeologist in Princeton, N. J. She died Oct. 29, 1947.

Benjamin Harrison

Benjamin Harrison, 23rd President, Republican, was born at North Bend, O., Aug. 20, 1833. His great-grandfather, Benjamin Harrison, was a signer of the Declaration of Independence; his grandfather, William Henry Harrison, was 9th President; his father John Scott Harrison was a Member of Congress, 1853-57. His mother was Elizabeth F. Irwin. He attended school in a log cabin on his father's farm; was graduated from Miami Univ. 1852; admitted to the bar, 1853 and practiced in Indianapolis, Ind. As 2nd lieutenant, he raised recruits and became colonel of the 70th Indiana Volunteer Infantry. He fought at Kenesaw Mountain, Peachtree Creek, Nashville, and in the Atlanta campaign. In 1865 he was made brigadier general by brevet. He failed to be elected governor of Indiana, 1876; but became Senator, 1881, and worked for the G. A. R. pensions vetoed by Cleveland. In 1888 he defeated Cleveland for president, 233 to 168. He expanded the pension list greatly; suppressed the Louisiana lottery; signed the McKinley high tariff bill and the Sherman silver purchase act. He helped the admission of North and South Dakota, Montana, Washington, Idaho and Wyoming, Republican states. He was defeated for reelection, 1892. He represented Venezuela in arbitration with Great Britain in Paris, 1899. He died at Indianapolis, Mar. 13, 1901, and was buried there.

HARRISON'S TWO MARRIAGES

Mrs. Caroline Lavinia Scott Harrison was born

in 1832 in Oxford, O., the daughter of Prof. John W. Scott of Miami Univ. She married Harrison Oct. 29, 1853. She was the first head of the Daughters of the American Revolution. She died in the White House, 1892. Her son Russell B. became a mining engineer. Her daughter Mary married an Indianapolis merchant, James R. McKee; Mary's child, "Baby McKee," was a White House favorite and became a New York businessman. Mary died in Greenwich in 1930. Harrison's second wife was Mrs. Harrison's niece, Mrs. Mary Scott Lord Dimock, whom he married in 1896. She was born in Honesdale, Pa., 1858, and died in New York, Jan. 5, 1948. She spent two years in the White House during her aunt's lifetime. She had one daughter, Elizabeth Harrison, born 1897, who married James Blaine Walker, Jr., great-nephew of Blaine.

William McKinley

William McKinley, 25th President, Republican, was born in Niles, O., Jan. 29, 1843, the son of William McKinley, an iron manufacturer, and Nancy Allison McKinley, and was the seventh of nine children. His father's family was Scotch-Irish from County Antrim; his great-grandfather fought in the American Revolution. McKinley attended school in Poland, O., and Allegheny College, Meadville, Pa., and enlisted for the Civil War at 18 in the 23rd Ohio in which R. B. Hayes was a major. He was a commissary sergeant at Antietam, where the state of Ohio honored him with the tallest monument. He rose to captain and in 1865 was made major by brevet. He studied law in the Albany, N. Y., law school; opened an office in Canton, O., in 1867, and campaigned for Grant and Hayes. From 1876 to 1890, excepting 1882, he served in the House of Representatives and led the fight for a high tariff to protect "infant industries" with reciprocal trade agreements (McKinley bill, enacted Oct. 1, 1890). Defeated on this issue in 1890, he was elected governor of Ohio, 1891 and 1893. He received 182 ballots for President in the Republican convention that nominated Benjamin Harrison in 1892. In 1896 he was elected President on a protective tariff, sound money (gold standard) platform over William J. Bryan, Democratic proponent of free silver. Chief factor was the astute vote-getting of Senator Marcus A. Hanna. McKinley was reluctant to intervene in Cuba on grounds of humanity, but the loss of the battleship Maine at Havana crystallized opinion. He demanded Spain's withdrawal from Cuba; Spain agreed to arbitration and armistice but Congress announced state of war as of Apr. 21. (Peace signed Dec. 10.) In the 1900 campaign he defeated Bryan's anti-imperialist arguments with the prestige of prosperity, "the full dinner pail" and the vigorous campaigning of Theodore Roosevelt, vice presidential nominee. McKinley was a Methodist, beloved for his conciliatory nature, but conservative (stand-pat) on business issues. He abhorred violence. The need to regulate the Philippines is believed to have inspired John Hay's Open Door Policy in Asia. On Sept. 6, 1901, while welcoming citizens at the Pan-American exposition, Buffalo, N. Y., he was shot by Leon Czolgosz, an anarchist terrorist. He died Sept. 14. His last words were: "It is God's way. His will, not ours, be done." McKinley, his wife and infant daughters rest in an imposing tomb in Canton. His favorite flower, the red carnation, was made the state flower.

MRS. WILLIAM MCKINLEY

Mrs. Ida Saxton McKinley, born 1847, was the daughter of James A. Saxton and Katherine DeWalt. She was cashier in her father's bank in Canton, O., when she married McKinley. Their two children died in childhood. Mrs. McKinley became an invalid through a nervous ailment, but presided in the White House and was with her husband when he was assassinated. She died in 1907.

Theodore Roosevelt

Theodore Roosevelt, 26th President, Republican, was born in New York City, Oct. 27, 1858, the son of Theodore Roosevelt, Collector of the Port, and Martha Bulloch, daughter of Maj. Jas. S. Bulloch. Roswell, Ga. He was descended from Claes Martenszen van Rosenvelt, and his wife Janette, who reached New Netherland from Holland about 1650. Theodore was a fifth cousin of Franklin D. Roosevelt and an uncle of Mrs. Eleanor Roosevelt. His mother was of Scotch-Irish, Huguenot stock and a Southern sympathizer. Roosevelt was graduated from Harvard, 1880, attended Columbia Law School briefly; sat in the New York State Assembly, 1882-84; ranched in North Dakota, 1884-86; failed

of election as mayor of New York, 1886; member of U. S. Civil Service Comm. 1889; president, New York Police Board, 1895, supporting the merit system; Asst. Secy. of the Navy under McKinley, Apr. 19, 1897—May 10, 1898, during which he instituted naval target practice and instructed Commodore George Dewey to take Manila in the event of war with Spain. He organized the 1st U. S. Volunteer Cavalry (Rough Riders) as Lieut. col., Leonard Wood, col.; led the charge up Kettle Hill at San Juan and was made colonel by brevet. Elected governor, New York, 1898-1900, he fought the spoils system and achieved taxation of corporation franchises. Drafted for vice president, 1900, he became nation's youngest President at 42 years, 10 mos., 18 days, when McKinley died at Buffalo, Sept. 14, 1901. As President he fought corruption of politics by big business; dissolved Northern Securities Co. and others for violating anti-trust laws; intervened in coal strike on behalf of the public, 1902; instituted Dept. of Commerce and Labor; obtained Elkins law forbidding rebates to favored corporations, 1903; Hepburn law regulating railroad rates, 1906; Pure Food and Drugs Act, 1906, Reclamation Act and employers' liability laws. He organized Conservation, mediated the peace between Japan and Russia, 1905; won the Nobel peace prize. He was the first to use the Hague Court of International Arbitration. By recognizing the new Republic of Panama he made Panama Canal possible, appointed Col. Geo. W. Goethals head commissioner and began canal. He was re-elected 1904, with 336 electoral votes vs. 140.

In 1908 he obtained the nomination of William H. Taft, who was elected; considering Taft inimical to liberal policies he organized the Progressive party, June 22, 1912, and ran for President against Taft and Woodrow Wilson, splitting the Republicans and causing Wilson's election. He was shot during the campaign but recovered. He advocated recall of elected officials, referendum on legislation and recall of judicial decisions, which alienated conservatives. In 1916 he left the Progressives and supported Charles A. Hughes, Republican. A strong friend of Britain, he fought American isolation. In 1917 President Wilson refused to let him organize a division. His four sons served in World War I; two were wounded, one killed. He wrote on many topics—his Winning of the West is best known—was a naturalist and hunter and traced the River of Doubt in Brazil, 1913, now Rio Roosevelt. He was looked upon as certain nominee of the Republicans in 1920. He died Jan. 6, 1919, at Sagamore Hill, Oyster Bay, Long Island, N. Y., now a national shrine, and was buried near the Roosevelt bird refuge there.

THEODORE ROOSEVELT'S FAMILY

Mrs. Alice Hathaway Lee Roosevelt, daughter of George Cabot Lee and Caroline Haskell Lee, of Boston, married Roosevelt Oct. 27, 1880, in Boston. She and Roosevelt's mother died in New York Feb. 14, 1884. She was the mother of Alice Lee Roosevelt, who married Nicholas Longworth, of Cincinnati. Member of Congress in the White House, 1906. Their daughter, Paulina, was born Feb. 14, 1925. Longworth, Republican Speaker of the House, died April 9, 1931.

Roosevelt's second wife, Edith Kermit Carow, married him Dec. 2, 1886, in London. She was born in Norwich, Conn., Aug. 16, 1861, daughter of Charles and Gertrude Tyler Carow, and survived her husband 29 years, dying Sept. 30, 1948, aged 87. Of their five children Theodore Roosevelt, Jr., was Lieut. col., governor of Puerto Rico and governor of the Navy, general of the Philippines. He failed of election as governor of New York. A brigadier general, he served in North Africa, Italy and in Normandy with the 1st Army, and died there July 12, 1944, aged 86. Kermit, major in World War II, died on active duty in Alaska, June 4, 1943, aged 53. Ethel Carow is Mrs. Richard Derby. Archibald Bulloch was a Lieut. colonel in World War II. Quentin, aviator in World War I, was killed in action and buried where he fell in France.

William Howard Taft

William Howard Taft, 27th President, Republican, was born in Cincinnati, O., Sept. 15, 1857, the son of Alphonso Taft and Louisa Maria Torrey. His father was secretary of war and attorney general in Grant's cabinet; minister to Austria and Russia under Arthur. Taft was graduated from Yale, 1878, Cincinnati Law School, 1880, became law reporter for Cincinnati newspapers; was ass't prosecuting attorney, 1881-83; ass't county solicitor, 1885; judge, Superior Court, 1887; U. S. solicitor-general,

1890; federal circuit judge, 1892. In 1900 he became head of the U. S. Philippine Comm. and was first civil governor of the Philippines, 1901-04. Secretary of war, 1904; provisional governor of Cuba, 1906. He was groomed for President by Theodore Roosevelt as an exemplary public servant and elected over W. J. Bryan, 1908. His administration dissolved Standard Oil and tobacco trusts; instituted Department of Labor; drafted direct election of senators and income tax amendments. His tariff and conservation policies angered progressives; though renominated he was fought by Theodore Roosevelt; the result was Wilson's election. Taft was president League to Enforce Peace, supporting the League of Nations. He was professor of constitutional law, Yale, 1913-21; Chief Justice of the United States, 1921-30, when illness forced him to resign. He died in Washington, Mar. 8, 1930, and was buried in Arlington National cemetery.

MRS. WILLIAM H. TAFT

Mrs. Helen Herron Taft (1861-1943) was born in Cincinnati, daughter of John W. Herron and Harriet Collins. She was a musician and a founder of the Cincinnati orchestra. The Taft children are Helen (Mrs. Frederick J. Manning), born 1891, prof. of history and former dean and acting president at Bryn Mawr; Robert Alphonso Taft, born 1889, U. S. Senator from Ohio 1938-1953, died July 31, 1953, and Charles Phelps Taft, born 1897, lawyer, former mayor of Cincinnati. Mrs. Taft introduced musicales at White House dinners and instigated planting cherry trees along the Tidewater basin.

Woodrow Wilson

Woodrow Wilson, 28th President, Democrat, was born at Staunton, Va., Dec. 28, 1856, as Thomas Woodrow Wilson, son of a Presbyterian minister, the Rev. Joseph Ruggles and Janet (Jessie) Woodrow, daughter of a Scotch Presbyterian minister. He was a grandson of James Wilson, a Presbyterian of Ulster who reached Philadelphia in 1807, became a printer and in 1808 married an Ulster Presbyterian girl, a shipmate. In his youth Wilson lived in Augusta, Ga., Columbia, S. C., and Wilmington, N. C. He attended Davidson College, 1873-74; was graduated from Princeton, A.B., 1879; A.M., 1882; read law at the Univ. of Virginia, 1881; practiced law, Atlanta, 1882-83; Ph.D., Johns Hopkins, 1886 with "Congressional Government." He taught history and political economy at Bryn Mawr, 1885-88; at Wesleyan, 1888-90; was professor of jurisprudence and political economy at Princeton, 1890-1910; president of Princeton, 1902-1910, during which he tried to introduce innovations of organization that were fought by the graduate dean and alumni; governor of New Jersey, 1911-13, during which he obtained a primary election law, an employers' liability law and other reforms. In 1912 he was nominated for President by the strategy of Wm. J. Bryan, who was out to defeat Champ Clark and Tammany. He won because the Republican vote for Taft was split by the Progressives under Theodore Roosevelt.

Wilson protected American interests in revolutionary Mexico and fought for American rights on the high seas as the first World War opened. His sharp warnings to Germany led to the resignation of his secretary of state, Wm. J. Bryan, pacifist, while his protests against British interference with American ships disturbed the Allies. In 1916 he was re-elected by a slim margin with the slogan, "He kept us out of war," over Charles Evans Hughes, who was strongly supported by Theodore Roosevelt. Wilson's offer to mediate in the war (Dec. 18, 1916) was rejected. When the Germans started unrestricted submarine warfare, contrary to pledges, he broke diplomatic relations. After four American ships had been sunk he asked a declaration of war: it was voted April 6, 1917.

Wilson kept tight personal control over all phases of diplomatic and military activity. He relied more on reports of his confidential agent in Europe, Col. E. M. House, than on Secretary of State Robert Lansing and the U. S. ambassadors. However, he backed Gen. John J. Pershing, U. S. commander in chief, Herbert Hoover, food administrator, and others who had his confidence.

Wilson proposed peace Jan. 8, 1918, on the basis of the Fourteen Points, a state paper with worldwide influence. Basic was his doctrine of self-determination, or consent of the governed, in which he opposed handing peoples from one sovereignty to another. He also demanded a league to enforce peace. The Germans overturned the monarchy and a new republic accepted his terms and

an armistice, Nov. 11. At the November elections the Democrats lost control of Congress.

Wilson went to Paris to help negotiate the peace treaty, the crux of which he considered the League of Nations, also urged by Gen. J. C. Smuts, Lord Robert Cecil, Lord Phillimore, William H. Taft and Elihu Root. In the U. S. Senate Henry Cabot Lodge, William E. Borah and Hiram Johnson demanded reservations that would not make the United States subordinate to the votes of other nations in case of war. Wilson refused to consider any reservations and toured the country to get support. At Pueblo, Colo., Sept. 25, 1919, he broke down and several days later suffered a stroke that made him an invalid. The treaty was rejected, Mar. 1920, by 49 to 35 (29 being sufficient to kill it). He made a public appearance on the day of Harding's inauguration, and formed a law partnership with Bainbridge Colby, but did not practice. He won the Nobel peace prize, 1919. During invalidism of 17 months he was confined to his home, seeing few members of his administration, but holding on to the executive powers. He died Feb. 3, 1924, and was buried in Washington Cathedral.

WILSON'S TWO MARRIAGES

Mrs. Ellen Louise Axson Wilson was born in Rome, Ga., in 1860, the daughter of the Rev. S. E. Axson and Margaret Hoyt. She married Wilson June 28, 1885, and died in the White House Aug. 6, 1914. They had three daughters: Margaret W., born 1886, member of a religious colony in Pondicherry, India, when she died in 1944; Eleanor B., second wife of William G. McAdoo, Wilson's secretary of the treasury, later divorced; Jessie W., who married Francis B. Sayre in the White House Nov. 25, 1913 and died Jan. 15, 1933.

Mrs. Edith Bolling Wilson was born in Wytheville, Va., 1872, and was the widow of Norman Galt, a Washington jeweler, when she married Wilson, Dec. 18, 1915. She died in Washington Dec. 28, 1961. During the President's illness Mrs. Wilson conveyed his wishes to members of the government and instituted what she called "a workable system of handling matters of state." She was a director of the Woodrow Wilson Foundation and bequeathed her house to the National Trust for Historic Preservation.

Warren Gamaliel Harding

Warren Gamaliel Harding, 29th President, Republican, was born near Blooming Grove, now Corsica, O., Nov. 2, 1865, the son of Dr. Geo. Tyron Harding, a country doctor, and Phoebe Elizabeth Dickerson. He attended Ohio Central College, Iberia, O., 1879-82; worked on the Star, Marion, O., 1884, and a few years later bought the paper with a friend's help for a reported sum of \$300. He was state senator, 1900-04; lieutenant governor, 1904-06; defeated for governor, 1910; chosen U. S. Senator, 1915. He was a regular, Old Guard Republican; supported Taft, opposed Federal control of food and fuel, voted for anti-strike legislation, woman's suffrage, Volstead prohibition enforcement act over President Wilson's veto and opposed the League of Nations. In 1920 he was nominated for President on the tenth ballot with Calvin Coolidge. The Republicans capitalized war weariness and fear that Wilson's League of Nations would curtail U. S. sovereignty. They defeated the Democrats, James M. Cox and Franklin D. Roosevelt, 16,152,000 to 9,147,000. Harding stressed a return to "normalcy"; worked for repeal of excess profits and high income taxes and a revision of tariff. On announcing ratification of treaties with Germany, Austro-Hungary, Nov. 14, 1921, he declared war officially ended July 2, 1921. His cabinet included Charles Evans Hughes (State); Herbert Hoover (Commerce); Andrew S. Mellon (Treasury). Two appointees, Albert B. Fall (Interior) and Harry Daugherty (Atty. General), became involved in the Teapot Dome scandal that embittered Harding's last days. He called the International Conference on Limitation of Armaments, Nov. 11, 1921-Feb. 1, 1922, and dedicated the Lincoln Memorial. He left for Alaska June 20, 1923; became ill on his return and died in San Francisco, Aug. 2, 1923. He was buried in Marion, Ohio.

MRS. WARREN GAMALIEL HARDING

Mrs. Florence Kling Harding was born Aug. 15, 1860, the daughter of Amos O. Kling, a Marion, O., hardware merchant and later banker. She married, first, Henry De Wolfe, and had a son, Marshall Eugene De Wolfe. She divorced De Wolfe and in

1891 married Harding. For 14 years she was his associate in managing the Star. She died in Marion, Nov. 21, 1924. The Hardings had no children.

Calvin Coolidge

Calvin Coolidge, 30th President, Republican, was born in Plymouth, Vt., July 4, 1872, the son of John Calvin Coolidge, a storekeeper, and Victoria J. Moor, and named John Calvin Coolidge. His paternal ancestors came from England to Watertown, later Cambridge, Massachusetts Bay Colony, in 1630. Coolidge was graduated at Amherst, 1895; admitted to the bar in Northampton, 1897; city councilman, 1899; city solicitor, 1900-01; clerk of the courts, 1904; member of the lower Massachusetts house, 1907-08; mayor of Northampton, 1910-11; State Senator, 1912-15; and president of Senate, 1914-15; lieutenant governor, 1916-18; governor, 1919; re-elected, 1920. In Sept., 1919, Coolidge attained national prominence by his action in the Boston police strike, during which he wired Samuel Gompers of the A. F. of L.: "There is no right to strike against the public safety by anybody, anywhere, anytime." This brought his name before the Republican convention of 1920, where he received 34 votes for President and was nominated for vice president by 674½ votes. He succeeded to the presidency on Harding's death, Aug. 2, 1923, the oath being administered by his father, a justice of the peace, in his home in Plymouth, Aug. 3, and again Aug. 17 before Justice A. A. Hoehling of the Supreme Court of the District of Columbia. He opposed the League of Nations; approved the World Court; vetoed the soldiers' bonus bill, which was passed over his veto. In 1924 he was re-elected by a huge majority with 15,725,016 over John W. Davis, Dem., 8,385,538, and Robert M. LaFollette, Prog., 4,822,856. He reduced the national debt by \$2,000,000,000 in three years. He opposed the McNary-Haugen farm bill and price fixing, and supported his secretary of state, Frank B. Kellogg, in the Kellogg-Briand treaties outlawing war. His dry, laconic remarks are often quoted: opposing reduction of Europe's war debt. "They hired the money, didn't they?" With Republicans eager to renominate him he announced, Aug. 2, 1927: "I do not choose to run for President in 1928." He became a life insurance director, wrote syndicated articles and died of a heart attack in Northampton, Jan. 5, 1933. He was buried on a Plymouth hillside.

MRS. CALVIN COOLIDGE

Mrs. Grace Anne Goodhue Coolidge was born in Burlington, Vt., Jan. 3, 1879, the daughter of Andrew I. Goodhue, a steamboat inspector under Cleveland. She was graduated from the Univ. of Vermont, 1902; taught in the Clarke School for the Deaf, 1902-1905, and became president of its board. She married Coolidge Oct. 4, 1905. She died July 8, 1957, in Northampton, Mass.; aged 78. The Coolidges had two sons: John, born 1906, and Calvin (1908-1924).

Herbert Hoover

Herbert Clark Hoover, 31st President, Republican, was born at West Branch, Iowa, Aug. 10, 1874, son of Jesse Clark Hoover, a blacksmith (1847-1880) and Hulda Randall Minthorn (1848-83). Ancestor Andrew Hoover came to Penn. from Palatinate, 1738; great-grandfather reached West Branch, 1854. Hoover grew up in Indian Terr. and Oregon, won A.B. in engineering, Stanford, 1891. Briefly with U. S. Geological Survey and western mines; then mining engineer in western Australia, Asia, Europe, Africa, America. While chief engineer, imperial mines, China, he directed food relief for victims of Boxer Rebellion, 1900. He became a world figure in relief work, distributing over \$5 billion worth during 1914-1923. He directed American Relief Committee, London, 1914-15; U. S. Comm. for Relief in Belgium, 1915-1919; U. S. Food Administrator, 1917-1919; American Relief Admin., 1918-1923, feeding children in defeated nations; Russian Relief, 1918-1923; Interallied Food Council; Supreme Economic Council; Comm. on Industrial Relations. As Secy. of Commerce, 1921-28, he began regulation of radio and aviation, pushed research program for Natl. Academy of Science; organized 7-state pact for Colorado River irrigation and Hoover (Boulder) Dam. Elected President over Alfred E. Smith, 1928, he started White House conferences on child health and protection, and housing; supported conservation of forests, oil, resources; initiated Naval Conference, 1930; organized RFC, Home Loan Banks, expanded Farm Loan Banks; called WEO.

He gave his official salary to charities and underpaid help. President Truman made him coordinator of European Food Program, 1947, and ch. of Comm. for Reorganization of the Executive Branch, 1947-49, and ch. of the 2nd Comm. on Reorganization, 1953-55. He founded the Hoover Institution on War, Revolution & Peace at Stanford Univ., Calif. In his final years he lived at Waldorf Towers, New York, N. Y. He died there Oct. 20, 1964, and was buried at West Branch, Iowa, where his birthplace is now a memorial.

MRS. HERBERT HOOVER

Mrs. Lou Henry Hoover was born in Waterloo, Ia., Mar. 29, 1875, daughter of Charles D. Henry, a banker. The family moved to Monterey, Calif. She was graduated from Stanford University 1898 and married Hoover in 1899. She died Jan. 7, 1944.

Sons: Herbert Hoover, Jr., b. 1903; Allan Henry Hoover, b. 1907.

Franklin D. Roosevelt

Franklin Delano Roosevelt, 32nd President, Democrat, was born near Hyde Park, N. Y., Jan. 30, 1882, the son of James Roosevelt (died 1900) and Sara Delano (died 1941). His ancestor, Claes Martenszen van Rosenvelt, came to New Amsterdam from Holland in 1649. Claes' son Nicholas, a New York alderman in 1700 and 1715, had a son Johannes, from whom Theodore Roosevelt was descended, and a son Jacobus, from whom Franklin D. Roosevelt was descended. Roosevelt was graduated at Harvard, 1904; attended Columbia Law school, was admitted to the bar. He went to the New York Senate from his Dutchess county district 1910 and 1913. He voted for Woodrow Wilson at the 1912 Democratic convention; in 1913 Wilson made him assistant secretary of the Navy.

Roosevelt ran for vice president, 1920, with Jas. M. Cox and was defeated. From 1920 to 1928 he was a New York lawyer and v.p. of Fidelity & Deposit Co. In Aug., 1921, infantile paralysis paralyzed his legs. He learned to walk with leg braces and a cane and established the Warm Springs, Ga., Foundation, for helping those so afflicted.

Roosevelt presented the name of Alfred E. Smith to the Democratic convention of 1924 in New York, and 1928 in Houston, Texas, calling Smith the Happy Warrior. Smith was nominated in 1928 and defeated. Roosevelt was elected governor of New York, 1928 and 1930. In 1932 at Chicago W. G. McAdoo, pledged to John N. Garner, threw his votes to Roosevelt, who was chosen, alienating Smith. The financial crash, unemployment and the Democratic promise to repeal prohibition made his victory inevitable. He asked emergency powers, proclaimed the New Deal, and put into effect a vast number of administrative changes. Foremost was "pump priming," or use of public funds for relief and public works, resulting in deficit financing. He greatly expanded the controls of the central government over business and by an excess profits tax and pyramiding income taxes produced a redistribution of earnings on an unprecedented scale. The Wagner act gave labor many advantages in organizing and collective bargaining, at the same time denying equal privileges to employers. He was the last President inaugurated on Mar. 4 (1933) and the first inaugurated on Jan. 20 (1937).

Roosevelt was a tremendous worker and traveler despite physical handicaps. He was the first President to use radio for "fireside chats." When the Supreme Court voided his measures he demanded additional judges of Congress. It refused, but resignations soon enabled him to replace conservatives who had opposed him. He was the first President to break the third term tradition and was elected to a fourth term, 1944, despite failing health. The culminating event of his career was World War II. He was openly hostile to fascist governments before the war and gave Britain substantial support, such as exchanging 50 destroyers for air bases, before Pearl Harbor made the United States a belligerent. He wrote the principles of fair dealing into the Atlantic Charter, Aug. 14, 1941 (with Winston Churchill) and in the Four Freedoms (Freedom of speech, of worship, from want, from fear) Jan. 6, 1941. He conferred with the heads of state at Casablanca, Jan., 1943; Quebec, Aug., 1943; Teheran, Nov.-Dec., 1943; Cairo, Dec., 1943; Yalta, Feb., 1945. He died at Warm Springs, Ga., April 12, 1945, aged 63, and was buried on his Hyde Park estate, where his house and library are in the national care.

ELEANOR ROOSEVELT

Mrs. Anna Eleanor Roosevelt was born Oct. 11, 1884, the daughter of Elliott Roosevelt, a younger brother of Theodore Roosevelt, and Anna Hall.

She was educated in private schools. She married Franklin D. Roosevelt Mar. 17, 1905. In 1924-28 she was finance chairman of the New York Democratic State committee. She was asst. director, Office of Civilian Defense, 1941-42; U. S. representative, General Assembly, U. N., 1945-53 and ch. of its Human Rights Commission. In 1961 President Kennedy appointed her to General Assembly, U. N. Mrs. Roosevelt died Nov. 7, 1962, in New York, N. Y., and was buried beside her husband at Hyde Park, N. Y. President Kennedy and former Presidents Eisenhower and Truman were present. The Roosevelts had 6 children, one dying in infancy. The others: Anna Eleanor (Mrs. James H. Halsted), b. 1906; James, b. Dec. 23, 1907; Elliott, b. Sept. 23, 1910; Franklin Delano, Jr., b. Aug. 17, 1914; John A., b. Mar. 13, 1916.

Harry S. Truman

Harry S. Truman, 33rd President, Democrat, was born at Lamar, Mo., May 8, 1884, the son of John Anderson Truman and Martha Ellen Young. Four grandparents were born in Kentucky and moved to Missouri in the 1840s. The Trumans came from England and the President's mother's grandmother from Northern Ireland, while an ancestor of his maternal grandfather, Solomon Young came from Germany. A family disagreement on whether Harry Truman's middle name was Shippe or Solomon, after names of two grandfathers, resulted in his using only S. for his middle initial. He is a Baptist.

He attended public schools in Independence, Mo., worked for the Kansas City Star, 1901, and as railroad timekeeper, and helper in Kansas City banks up to 1905. He joined the Missouri National Guard, 1905, and was rejected by West Point for defective eyesight. He ran his family's farm, 1906-17. He entered the Field Artillery school at Fort Sill, Okla., 1917; became 1st lieutenant, Battery F and capt., Battery D, 129th Field Artillery, 35th Div., A. E. F. He served in the Vosges, Meuse-Argonne and St. Mihiel actions and was discharged as major, 1919. He is a colonel in the Field Artillery Reserve. After the war he ran a haberdashery, became judge of Jackson Co. Court, 1922-24; attended Kansas City School of Law, 1923-25. He was defeated, then elected presiding judge.

Truman was chosen senator Nov. 6, 1934; reelected Nov. 5, 1940. In 1944 with President Roosevelt's approval he was nominated for vice president, and elected. On Roosevelt's death Apr. 12, 1945, Truman was sworn in as President by Chief Justice Harlan F. Stone. In 1948 he was elected President as polls predicted his defeat.

Truman supported the Marshall Plan, ECA, the rehabilitation of Greece and arming of Turkey, and NATO, naming Gen. of the Army Eisenhower to the supreme command in Europe. He opened the United Nations conference by radio and participated with Stalin and Attlee in the Potsdam Agreement. He authorized the first use of an atomic bomb at Hiroshima, Aug. 6; Nagasaki, Aug. 9, 1945). He supported a policy of compromise between Chiang Kai-shek and the Chinese Communists. When the Communists attacked in Korea, June, 1950, and the UN asked for armed aid he ordered, J. Edgar Hoover, the Army MacArthur to give it, but when MacArthur opposed his policy of limited objectives he removed him.

Truman established the Office of Defense Mobilization in 1950, instituted controls of materials and prices. He won a higher minimum wage, increased social security and aid for housing. In 1952 he ordered seizure of steel companies, which had refused demands of CIO and WSB, and when overruled by the U. S. Supreme Court refused to use the Taft-Hartley law. He rebuilt the White House. He retired to Independence, Mo., and wrote his memoirs. The Harry S. Truman Library, containing his letters and documents, was given by the city of Independence and friends to National Archives, 1957. It has offices for Mr. Truman.

MRS. HARRY S. TRUMAN

Mrs. Elizabeth Virginia Wallace Truman was born Feb. 13, 1885, in Independence, Mo., the eldest of four children and the only daughter of David Willock Wallace. She and Mr. Truman attended the same grade and high schools in Independence, both being graduated in 1901. She attended Barstow, a girls' preparatory school in Kansas City, Mo., and is an Episcopalian. She married Mr. Truman, June 28, 1919. They have one daughter, Margaret, born 1924, a concert and radio artist, who married Clifton Daniel, a New York newspaper editor, April 21, 1956. The Daniels have 4 sons: Clifton Truman, William Wallace, Harrison Gates, and Thomas Washington.

Dwight David Eisenhower

Dwight David Eisenhower, 34th President, Republican, was born Oct. 14, 1890, at Denison, Tex., the son of David Jacob Eisenhower and Ida Elizabeth Stover Eisenhower. His paternal grandfather descended from German Mennonites who left the Rhineland for Pennsylvania in the 1730s, moved to Kansas in 1878. His father met his mother at Lane University, a United Brethren college at Leocompton, Kan. When Dwight was 1 year old his parents moved to Abilene, Kan. He attended high school and in 1915 was graduated at West Point. He became 2nd lieutenant, 19th U. S. Infantry, at Fort Sam Houston, Tex. He was a lieutenant colonel in charge of a tank corps at Camp Colt, Gettysburg, Pa., in 1918. He was graduated from Infantry Tank School, 1922; Command and General Staff Sch., 1926; Army War College, 1928; Army Industrial College, 1933. He was asst. executive officer of the Asst. Secy. of War, 1929-1933, and in the office of the Chief of Staff, 1933-35. He was on the American Military Mission to the Philippines, 1935-39 and during 4 of those years on the staff of Gen. MacArthur. He was chief of staff, 3rd Div., later 9th Corps, 1940-41, and of the 3rd Army, 1941 as brigadier general. After the Louisiana maneuvers he was made chief of the War Plans Div., War Dept. General Staff, and then became asst. chief of staff, Operations Div. and in June, 1942, lieutenant general. He was made Commander of Allied forces landing in North Africa Nov. 8, 1942, and advanced to full general in Feb., 1943, and Commander in Chief of Allied Forces in North Africa. He became Supreme Commander, Allied Expeditionary Forces Dec. 31, 1943, and as such led the Normandy invasion June 6, 1944. He was given the temporary rank of General of the Army Dec. 19, 1944, which was made permanent in 1946. On May 7, 1945, he received the surrender of the Germans at Rheims. He was in command of the U. S. Occupation Force in Germany in 1945, and returned to serve as Chief of Staff, Nov. 19, 1945, to Feb. 7, 1948. From June 7, 1948, to Jan. 19, 1953, he was president of Columbia Univ., but he took leave of absence Dec. 16, 1950, to serve as Supreme Allied Commander in Europe to organize NATO forces.

Eisenhower resigned from the Army in June, 1952, and was nominated for President by the Republicans at Chicago July 11, 1952. He defeated Adlai E. Stevenson by 442 to 89 electoral votes, was inaugurated Jan. 20, 1953. He was renominated unanimously in San Francisco Aug. 22, 1956, and defeated Stevenson 457 to 74. He called himself a moderate, favored "free market system" vs. government price and wage controls; kept government out of labor disputes; reorganized defense establishment; promoted missile programs, including Polaris. With strong aid of John Foster Dulles, his Secy. of State, he continued foreign aid; demanded unification of Germany by free elections; sped end of Korean fighting; supplied planes to anti-communist Guatemalan govt.; endorsed Formosa and SE Asia defense treaties; backed U.N. in condemning Anglo-French raid on Egypt; advocated "open skies" policy of mutual inspection to USSR. He sent U. S. troops into Little Rock, Ark., Sept., 1957, during the segregation crisis and ordered Marines into Lebanon July-Aug., 1958. Eisenhower's rank as General of the Army was restored by Congress and signed by President Kennedy Mar. 22, 1961. He farms near Gettysburg, Pa.

MRS. DWIGHT D. EISENHOWER

Mrs. Dwight D. Eisenhower was born Mamie Geneva Doud in Boone, Ia., Nov. 14, 1896. Her home was in Denver when Eisenhower, then a 1st lieutenant of infantry at Fort Sam Houston, met her. They were married July 1, 1916. Their first son, Dwight Doud, died in infancy; their second is John Sheldon Doud Eisenhower, lt. colonel, USA, ret., left the Army 1963. He is married to Barbara Jean Thompson, and they have four children.

John F. Kennedy

John Fitzgerald Kennedy, 35th President, Democrat, was born May 29, 1917, in Brookline, Mass., the second of 9 children of Joseph P. Kennedy, financier who later became ambassador to Great Britain, and Rose Fitzgerald Kennedy. He entered Harvard, attended the London School of Economics briefly in 1935, received a B.S. *cum laude* from Harvard in 1940. He served in the U. S. Navy, 1941-1945, commanded a PT boat in the Solomons and won Navy and Marine Corps medals and the Purple Heart. He covered the Potsdam Conference

and the start of the U. N. at San Francisco for International News Service. He served as Representative in Congress from Massachusetts, 1947-1953, defeated Henry Cabot Lodge for the Senate in 1952, was re-elected 1958. He nearly won the vice presidential nomination in 1956.

Kennedy won the Democratic nomination for President at Los Angeles, July 14, 1960. Sen. Lyndon B. Johnson (Tex.), was named for vice president. Kennedy defeated Richard M. Nixon, Republican, by the slim margin of 118,550 popular votes and an electoral vote of 303 to 219. He was the first Roman Catholic to be elected President.

President Kennedy's most important act was his successful demand Oct. 22, 1962, that the Soviet Union dismantle all missile bases in Cuba. He established a quarantine of arms shipments to Cuba and continued surveillance by air. He defied Soviet attempts to force the Allies out of Berlin. He made the steel industry rescind its price rise. He backed civil rights, a mental health program, arbitration of railroad disputes and larger medical care for the aged. Astronaut flights and satellite orbiting were greatly developed during his less than 3-yrs. tenure. Cape Canaveral was renamed Cape Kennedy later. He wrote *Profiles in Courage*, which won a Pulitzer prize, and *Why England Slept*. He turned the White House spotlight on the cultural arts.

On Nov. 22, 1963, Kennedy was assassinated in Dallas, Texas. On Nov. 25, a national day of mourning, he was buried in Arlington National Cemetery, Va.

MRS. JOHN F. KENNEDY

Mrs. Jacqueline Bouvier Kennedy was born July 28, 1929, in Southampton, N. Y., daughter of John Vernon Bouvier, a New York Banker, and Janet Lee Bouvier (Mrs. Hugh D. Auchincloss). She attended private schools for girls and Vassar, and studied the history of art at the Sorbonne, Paris, during one year. She was graduated from George Washington Univ., 1951, afterward studying American history there. She was on the reporting staff of Washington Times-Herald, 1952. She married John F. Kennedy at Newport, Sept. 12, 1953, when she was 24 and Sen. Kennedy 36. They had three children: Caroline, born Nov. 27, 1957; John F., Jr., Nov. 25, 1960 and Patrick Bouvier, Aug. 7, 1963 (deceased). Mrs. Kennedy supervised the complete refurbishing of the White House. She moved to New York City in 1964.

Lyndon Baines Johnson

Lyndon Baines Johnson, 36th President, Democrat, was born on a farm near Stonewall, Tex., Aug. 27, 1908, son of Sam Ealy and Rebekah Baines Johnson. His father and grandfather had served in the Texas legislature. His family moved to Johnson City in 1913, where he was graduated from the high school in 1924. He received a B.S. degree at Southwest Texas State Teachers College, 1930, attended Georgetown Univ., Law School, Washington, 1935. He taught public speaking in Houston high school, 1930-32; served as secretary to Rep. R. M. Kleberg, 1932-35. In 1935 President Roosevelt appointed Johnson Texas state administrator of the National Youth Admin. In 1937 Johnson won a contest to fill the vacancy caused by the death of a Representative, and in 1938 was elected to the full term, after which he returned for four terms. A member of the Naval Reserve, he was lieutenant commander, U. S. Navy, 1941-42, winning the Silver Star for a flight over Japanese positions at New Guinea. He was elected Senator 1948 by only 87 votes margin over Gov. Coke Stevenson of Texas; in 1954 he was reelected by a large majority. He became Democratic whip, 1951, and leader, 1953, at 44. Johnson was Texas' favorite son for the Democratic presidential nomination in 1956 and had strong support in the 1960 convention, when the nominee, John F. Kennedy, asked him to run for Vice President. His campaigning helped overcome religious bias against Kennedy in the South. As Vice President he proved to be a tireless worker. He represented Kennedy abroad, was ch. of the President's Committee on Equal Employment Opportunity and member of advisory bodies dealing with security, space and the Peace Corps. Johnson took the oath of office as President at 2:30 p.m., CST, on November 22, 1963, 99 min. after the death of President Kennedy. In filling out the Kennedy term Johnson worked hard for welfare legislation and signed acts for civil rights, anti-poverty and tax reduction and averted strikes on railroads. He was nominated for President and elected Nov. 3, 1964, by 486 electoral votes to 52. Overshadowing

other developments during Johnson's first full term in the White House were the expansion of the war in Vietnam, the committing of more than 500,000 American servicemen to the conflict, intensive bombing by U. S. planes, mounting U. S. casualties, and attempts to achieve peace.

In a nationally televised speech Mar. 31, 1968, Johnson announced that he had ordered a halt to all and naval bombardment of most of North Vietnam. In a surprise statement at the close of the speech he said: "I shall not seek, and I will not accept, the nomination of my party for another term as your President." Johnson withdrew in the name of national unity after acknowledging that there was "division in the American house."

MRS. LYNDON B. JOHNSON

Mrs. Claudia Alta Taylor Johnson, affectionately called Lady Bird by family and friends, is the daughter of a Marshall, Texas, rancher and was

born Dec. 22, 1912. Her mother, dying when Claudia was a little girl, left her \$87,000, which she multiplied by careful investment. She was graduated from the Univ. of Texas, 1933, and married Johnson Nov. 17, 1934. An able business woman, she became owner of radio-television station KTBC in Austin, Tex., since placed in a trust. The Johnsons have two daughters, Lynda Bird, born Mar. 19, 1944 and Luci Baines, born July 2, 1947. The Johnson ranch of 400 acres is near Johnson City, Texas. President Johnson is a member of the Christian Church (Disciples of Christ). Mrs. Johnson and Lynda are Episcopalians; Luci became a Roman Catholic July 2, 1965. Luci was married to Patrick Nugent Aug. 6, 1966. She gave birth in Austin, Tex., June 21, 1967, to the President's first grandchild, Patrick Lyndon Nugent. On Dec. 9, 1967, Lynda was married to Marine Capt. Charles S. Robb in the first White House marriage of a President's daughter in 53 years.

Religious Background of Presidents

Baptist—Harding, Truman.
Christian Church (Disciples of Christ)—Garfield, Lyndon B. Johnson.
Congregationalist—Coolidge.
Episcopalian—Washington, Madison, Monroe, William Henry Harrison, Tyler, Taylor, Pierce, Arthur, and Franklin D. Roosevelt.
Jefferson, an Episcopal Church member, later became a deist, said he was a "disciple of the doctrines of Jesus," and commended Unitarianism.
Friends (Quakers)—Hoover.

Methodist—Polk, Andrew Johnson, Grant, McKinley.
Presbyterian—Jackson, Buchanan, Cleveland, Benjamin Harrison, Wilson, Eisenhower.
Lincoln attended Presbyterian services in Washington but was not a member. Hayes attended the Methodist Church, but never joined.
Reformed Dutch—Van Buren, Theodore Roosevelt.
Roman Catholic—Kennedy.
Unitarian—John Adams, John Quincy Adams, Fillmore, Taft.

Law on Succession to the Presidency

If by reason of death, resignation, removal from office, inability, or failure to qualify there is neither a President nor Vice President to discharge the powers and duties of the office of President, then the Speaker of the House of Representatives shall upon his resignation as Speaker and as Representative, act as President. The same rule shall apply in the case of the death, resignation, removal from office, or inability of an individual acting as President.

If at the time when a Speaker is to begin the discharge of the powers and duties of the office of President there is no Speaker, or the Speaker fails to qualify as Acting President, then the President pro tempore of the Senate, upon his resignation as President pro tempore and as Senator, shall act as President.

An individual acting as President shall continue to act until the expiration of the then current Presidential term, except that (1) if his discharge of the powers and duties of the office is founded in

whole or in part in the failure of both the President-elect and the Vice President-elect to qualify, then he shall act only until a President or Vice President qualifies, and (2) if his discharge of the powers and duties of the office is founded in whole or in part on the inability of the President or Vice President, then he shall act only until the removal of the disability of one of such individuals.

If, by reason of death, resignation, removal from office, or failure to qualify, there is no President pro tempore to act as President, then the officer of the United States who is highest on the following list, and who is not under disability to discharge the powers and duties of President, shall act as President: Secy. of State, Secy. of the Treasury, Secy. of Defense, Attorney General, Postmaster General, Secy. of the Interior, Secy. of Agriculture, Secy. of Commerce, Secy. of Labor, Secy. of Health, Education and Welfare, Secy. of Housing and Urban Development and Secy. of Transportation. Approved July 18, 1947; amended Sept. 9, 1965, and Oct. 15, 1966.

Presidents Who Wore Military Uniforms

Washington—French and Indian War; Revolution.
Monroe—Revolution.
Jackson—Revolution, Creek, 1812, and Seminole wars.
Harrison, W. H.—Indian wars, Ohio and Indiana, 1812.
Tyler—1812.

Taylor—1812, Black Hawk, Seminole and Mexican.
Pierce—Mexican.
Buchanan—1812.
Lincoln—Black Hawk.
Johnson, Andrew—Military Gov. Tennessee, Civil War.
Grant—Mexican, Civil War.
Hayes—Civil War.
Garfield—Civil War.
Arthur—Q. M. Gen., N. Y. State.
Harrison, B.—Civil War.
McKinley—Civil War.
Roosevelt, T.—Spanish War.
Truman—World War I.
Eisenhower—World War I and II.
Kennedy—World War II.
Johnson, Lyndon—World War II.

Burial Places of the Presidents

G. Washington... 1732-1799 Mt. Vernon, Va.
John Adams... 1735-1826 Quincy, Mass.
T. Jefferson... 1743-1826 Charlottesville, Va.
James Madison... 1751-1836 Montpelier, Va.
James Monroe... 1758-1831 Richmond, Va.
John Q. Adams... 1767-1848 Quincy, Mass.
Andrew Jackson... 1767-1845 Nashville, Tenn.
M. Van Buren... 1782-1862 Kinderhook, N. Y.
W. H. Harrison... 1773-1841 North Bend, Ohio
John Tyler... 1790-1862 Richmond, Va.
James Knox Polk... 1795-1849 Nashville, Tenn.
Zachary Taylor... 1784-1850 Louisville, Ky.

F. D. Roosevelt... 1882-1945 Hyde Park, N. Y.
J. F. Kennedy... 1917-1963 Arlington Nat'l Cem'y

Origin of the United States National Motto

In God We Trust, designated as the U. S. National Motto by Congress in 1956, originated during the Civil War as an inscription for U. S. coins, although it was used by Francis Scott Key in a slightly different form when he wrote The Star-Spangled Banner in 1814. On Nov. 13, 1861, when Union morale had been shaken by battlefield defeats, the Rev. M. R. Watkinson, of Ridleyville, Pa., wrote to Secy. of the Treasury Salmon P. Chase. "From my heart I have felt our national shame in disowning God as not the least of our present national disasters," the minister wrote, suggesting "recognition of the Almighty God in some form on our coins." Secy. Chase ordered designs prepared with the inscription *In God We Trust* and backed coinage legislation which authorized use of this slogan. It first appeared on some U. S. coins in 1864, disappeared and reappeared on various coins until 1955, when Congress ordered it placed on all paper money and all coins.

LAWS AND DOCUMENTS

DECLARATION OF INDEPENDENCE

The Declaration of Independence was adopted by the Continental Congress, in Philadelphia, on July 4, 1776. John Hancock was president of the Congress and Charles Thomson was secretary. A copy of the Declaration, engrossed on parchment, was signed by Members of Congress on and after August 2, 1776. On January 18, 1777, Congress ordered that "authenticated copies, with the names of the Members of Congress subscribed the same, be sent to each of the United States, and that they be desired to have same put upon record." Authenticated copies were printed in broadside form in Baltimore, where the Continental Congress was then in session. The following text is that of the original printed by John Dunlap at Philadelphia for the Continental Congress.

In CONGRESS, July 4, 1776.

A DECLARATION

**By the REPRESENTATIVES of the
UNITED STATES OF AMERICA,
In GENERAL CONGRESS assembled**

WHEN in the Course of human Events, it becomes necessary for one People to dissolve the Political Bands which have connected them with another, and to assume among the Powers of the Earth, the separate and equal Station to which the Laws of Nature and of Nature's God entitle them, a decent Respect to the Opinions of Mankind requires that they should declare the causes which impel them to the Separation.

We hold these Truths to be self-evident, that all Men are created equal, that they are endowed by their Creator with certain unalienable Rights, that among these are Life, Liberty, and the Pursuit of Happiness—That to secure these Rights, Governments are instituted among Men, deriving their just Powers from the Consent of the Governed, that whenever any Form of Government becomes destructive of these Ends, it is the Right of the People to alter or to abolish it, and to institute new Government, laying its Foundation on such Principles, and organizing its Powers in such Form, as to them shall seem most likely to effect their Safety and Happiness. Prudence, indeed, will dictate that Governments long established should not be changed for light and transient Causes; and accordingly all Experience hath shewn, that Mankind are more disposed to suffer, while Evils are sufferable, than to right themselves by abolishing the Forms to which they are accustomed. But when a long Train of Abuses and Usurpations, pursuing invariably the same Object, evinces a Design to reduce them under absolute Despotism, it is their Right, it is their Duty, to throw off such Government, and to provide new Guards for their future Security. Such has been the patient Sufferance of these Colonies; and such is now the Necessity which constrains them to alter their former Systems of Government. The History of the present King of Great-Britain is a History of repeated Injuries and Usurpations, all having in direct Object the Establishment of an absolute Tyranny over these States. To prove this, let Facts be submitted to a candid World.

He has refused his Assent to Laws, the most wholesome and necessary for the public Good.

He has forbidden his Governors to pass Laws of immediate and pressing Importance, unless suspended in their Operation till his Assent should be obtained; and when so suspended, he has utterly neglected to attend to them.

He has refused to pass other Laws for the Accommodation of large Districts of People, unless those People would relinquish the Right of Representation in the Legislature, a Right inestimable to them, and formidable to Tyrants only.

He has called together Legislative Bodies at Places unusual, uncomfortable, and distant from the Depository of their public Records, for the sole Purpose of fatiguing them into Compliance with his Measures.

He has dissolved Representative Houses repeatedly, for opposing with manly Firmness his Invasions on the Rights of the People.

He has refused for a long Time, after such Dissolutions, to cause others to be elected; whereby the Legislative Powers, incapable of Annihilation, have returned to the People at large for their exercise; the State remaining in the mean time exposed to all the Dangers of Invasion from without, and Convulsions within.

He has endeavoured to prevent the Population of these States; for that Purpose obstructing the

Laws for Naturalization of Foreigners; refusing to pass others to encourage their Migrations hither, and raising the Conditions of new Appropriations of Lands.

He has obstructed the Administration of Justice, by refusing his Assent to Laws for establishing Judiciary Powers.

He has made Judges dependent on his Will alone, for the Tenure of their Offices, and the Amount and Payment of their Salaries.

He has erected a Multitude of new Offices, and sent hither Swarms of Officers to harrass our People, and eat out their Substance.

He has kept among us, in Times of Peace, Standing Armies, without the consent of our Legislatures.

He has affected to render the Military Independent of and superior to the Civil Power.

He has combined with others to subject us to a Jurisdiction foreign to our Constitution, and unacknowledged by our Laws; giving his Assent to their Acts of pretended Legislation:

For quartering large Bodies of Armed Troops among us:

For protecting them, by a mock Trial, from Punishment for any Murders which they should commit on the Inhabitants of these States:

For cutting off our Trade with all Parts of the World:

For imposing Taxes on us without our Consent: For depriving us, in many Cases, of the Benefits of Trial by Jury:

For transporting us beyond Seas to be tried for pretended Offences:

For abolishing the free System of English Laws in a neighbouring Province, establishing therein an arbitrary Government, and enlarging its Boundaries, so as to render it at once an Example and fit Instrument for introducing the same absolute Rule into these Colonies:

For taking away our Charters, abolishing our most valuable Laws, and altering fundamentally the Forms of our Governments:

For suspending our own Legislatures, and declaring themselves invested with Power to legislate for us in all Cases whatsoever.

He has abdicated Government here, by declaring us out of his Protection and waging War against us.

He has plundered our Seas, ravaged our Coasts, burnt our Towns, and destroyed the Lives of our People.

He is, at this Time, transporting large Armies of foreign Mercenaries to compleat the Works of Death, Desolation, and Tyranny, already begun with circumstances of Cruelty and Perfidy, scarcely paralleled in the most barbarous Ages, and totally unworthy the Head of a civilized Nation.

He has constrained our fellow Citizens taken Captive on the high Seas to bear Arms against their Country, to become the Executioners of their Friends and Brethren, or to fall themselves by their Hands.

He has excited domestic Insurrections amongst us, and has endeavoured to bring on the Inhabitants of our Frontiers, the merciless Indian Savages, whose known Rule of Warfare, is an undistinguished Destruction, of all Ages, Sexes and Conditions.

In every stage of these Oppressions we have Petitioned for Redress in the most humble Terms: Our repeated Petitions have been answered only by repeated Injury. A Prince, whose Character is thus marked by every act which may define a Tyrant, is unfit to be the Ruler of a free People.

Nor have we been wanting in Attention to our British Brethren. We have warned them from Time to Time of Attempts by their Legislature to extend an unwarrantable Jurisdiction over us. We have reminded them of the Circumstances of our

Emigration and Settlement here. We have appealed to their native Justice and Magnanimity, and we have conjured them by the Ties of our common Kindred to disavow these Usurpations, which, would inevitably interrupt our Connections and Correspondence. They too have been deaf to the Voice of Justice and of Consanguinity. We must, therefore, acquiesce in the Necessity, which denounces our Separation, and hold them, as we hold the rest of Mankind, Enemies in War, in Peace, Friends.

We, therefore, the Representatives of the UNITED STATES OF AMERICA, in GENERAL CONGRESS, Assembled, appealing to the Supreme Judge of the World for the Rectitude of our Intentions, do, in the Name, and by Authority of the good People of these Colonies, solemnly Publish and Declare, That these United Colonies are, and

of Right ought to be, FREE AND INDEPENDENT STATES; that they are absolved from all Allegiance to the British Crown, and that all political Connection between them and the State of Great-Britain, is and ought to be totally dissolved; and that as FREE AND INDEPENDENT STATES, they have full Power to levy War, conclude Peace, contract Alliances, establish Commerce, and to do all other Acts and Things which INDEPENDENT STATES may of right do. And for the support of this Declaration, with a firm Reliance on the Protection of divine Providence, we mutually pledge to each other our Lives, our Fortunes, and our sacred Honor.

Signed by ORDER and in BEHALF of the CONGRESS,
JOHN HANCOCK, President.

ATTEST.

CHARLES THOMSON, Secretary.

World Almanac Guilty of the Crime of Sedition*

(Excerpts from an editorial in the New York World, former publisher of the World Almanac, dated Jan. 13, 1920, and reprinted in the American Heritage of June, 1963.)

The World Almanac for 1920 has already been printed and tens of thousands of copies have been distributed and cannot be recalled; but the Almanac once again contains the Declaration of Independence, and the new Sedition Bill as agreed to by the House Judiciary Committee provides that any person shall be deemed guilty of a felony "who either orally or by writing, printing or . . . shall otherwise teach, incite, advocate, propose or advise, or aid, abet or encourage forcible resistance to, or destruction of the Government of the United States. . . ."

Now, unfortunately, the second paragraph of the Declaration of Independence is defiantly seditious . . . The World can easily suppress the Declaration of Independence in all future editions of the Almanac, but in the mean time the mischief has been done for 1920 and the seditious utterances of Thomas Jefferson have been scattered to the four corners of the country.

For any evil consequences that may ensue . . . we can only beg for mercy and for such consideration as the Department of Justice may graciously grant. . . .

*Sedition is conduct which tends to treason, but which falls short of it for want of an overt act.

How the Declaration of Independence Was Adopted

On June 7, 1776, Richard Henry Lee, who had issued the first call for a congress of the colonies, introduced in the Continental Congress at Philadelphia a resolution declaring "that these United Colonies are, and of right ought to be, free and independent states, that they are absolved from all allegiance to the British Crown, and that all political connection between them and the state of Great Britain is, and ought to be, totally dissolved."

The resolution, seconded by John Adams on behalf of the Massachusetts delegation, came up again June 10 when a committee of five, headed by Thomas Jefferson, was appointed to express the purpose of the resolution in a declaration of independence. The others on the committee were John Adams, Benjamin Franklin, Robert R. Livingston, and Roger Sherman.

Drafting the Declaration was assigned to Jefferson, who worked on a portable desk of his own construction in a room at Market and 7th Sts. The committee reported the result June 28, 1776. The members of the Congress suggested a number of changes, which Jefferson called "deplorable." They didn't approve Jefferson's arraignment of the British people and King George III for encouraging and fostering the slave trade, which Jefferson called "an execrable commerce." They made 86 changes, eliminating 480 words and leaving 1,337. In the final form capitalization was erratic. Jefferson had written that men were endowed with "inalienable" rights; in the final copy it came out as "unalienable" and has been thus ever since.

The Lee-Adams resolution of independence was adopted by 12 yeas July 2—the actual date of the act of independence. The Declaration, which explains the act, was adopted the evening of July 4. After the Declaration was adopted, July 4, 1776, it was turned over to John Dunlap, printer, to be printed on broadsides. The original copy was lost

and one of his broadsides was attached to a page in the journal of the Congress. It was read aloud July 8 in Philadelphia, Easton, Pa. and Trenton, N. J. On July 9 at 6 p.m. it was read by order of Gen. George Washington to the troops assembled on the Common in New York City (City Hall Park).

The Continental Congress on July 19, 1776, adopted the following resolution:

"Resolved, That the Declaration passed on the 4th, be fairly engrossed on parchment with the title and stile of 'The unanimous Declaration of the thirteen united States of America' and that the same, when engrossed, be signed by every member of Congress."

Not all delegates who signed the engrossed Declaration were present on July 4. Robert Morris (Pa.), William Williams (Conn.) and Samuel Chase (Md.) signed on Aug. 2. Oliver Wolcott (Conn.), George Wythe (Va.), Richard Henry Lee (Va.) and Elbridge Gerry (Mass.) signed in August and September. Matthew Thornton (N.H.) joined the Congress Nov. 4 and signed later. Thomas McKean (Del.) rejoined Washington's Army before signing and said later that he signed in 1781.

Charles Carroll of Carrollton was appointed a delegate by Maryland on July 4, 1776, presented his credentials July 18, and signed the engrossed Declaration Aug. 2. Born Sept. 19, 1737, he was 95 years old and the last surviving signer when he died Nov. 14, 1832.

Two Pennsylvania delegates who did not support the Declaration on July 4 were replaced.

The four New York delegates did not have authority from their state to vote on July 4. On July 9 the New York state convention authorized its delegates to approve the Declaration and the Congress was so notified on July 15, 1776. The four signed the engrossed Declaration on Aug. 2.

The original engrossed Declaration is preserved in the National Archives Building in Washington.

The Liberty Bell; Its History and Significance

The Liberty Bell, in Independence Hall, Philadelphia, is an object of great reverence to Americans because of its association with the historic events of the War of Independence.

The original Province bell, ordered to commemorate the 50th anniversary of the Commonwealth of Pennsylvania, was cast by Thomas Lister, Whitechapel, London, and reached Philadelphia in August, 1752. It bore an inscription from Leviticus XXV, 10: "Proclaim liberty throughout all the land unto all the inhabitants thereof."

The bell was cracked by a stroke of its clapper in September, 1752, while it hung on a truss in the State House yard for testing. Pass & Stow, Philadelphia founders, recast the bell, adding 1½ ounces of copper to a pound of the original metal to reduce brittleness. It was found that the bell contained too much copper, injuring its tone, so Pass & Stow recast it again, this time successfully.

In June, 1753, the bell was hung in the wooden steeple of the State House, erected on top of the brick tower. In use while the Continental Congress was in session in the State House, it rang out in defiance of British tax and trade restrictions, and proclaimed the Boston Tea Party and the first public reading of the Declaration of Independence.

On Sept. 18, 1777, when the British Army was about to occupy Philadelphia, the bell was moved

in a baggage train of the American Army to Allentown, Pa., where it was hidden in Zion's Church until June 27, 1778. It was moved back to Philadelphia after the British left.

In July, 1781, the wooden steeple became insecure and had to be taken down. The bell was lowered into the brick section of the tower. Here it was hanging in July, 1835, when it cracked while tolling for the funeral of John Marshall, Chief Justice of the United States. Because of its association with the War of Independence it was not recast but remained mute in this location until 1846, the year of the Mexican War, when it was placed on exhibition in the Declaration Chamber of Independence Hall.

In 1876, when many thousands of Americans visited Philadelphia for the Centennial Exposition, it was placed in its old walnut frame in the tower hallway. In 1877 it was hung from the ceiling of the tower by a chain of 13 links. It was returned again to the Declaration Chamber and in 1896 taken back to the tower hall, where it occupied a glass case. In 1915 the case was removed so that the public might touch it. It remains there today.

The measurements of the bell follow: Circumference around the lip, 12 ft.; circumference around the crown, 7 ft. 6 in.; lip to the crown, 3 ft.; height over the crown, 2 ft. 3 in.; thickness at lip, 3 in.; thickness at crown, 1½ in.; weight, 2080 lbs.; length of clapper, 3 ft. 2 in.; cost, \$60 14s 5d.

Independence Hall, American Patriotic Shrine

Independence Hall is the central and main building of a group in Philadelphia, located in Independence Square and facing Chestnut St. It is connected by arcades with two 2-story buildings, the East and West Wings, and two separate corner buildings. Of the latter Congress Hall is at Sixth St., and Old City Hall at Fifth St.

Independence Hall originally was the State House. It was begun in 1732, and completed in 1759. The East and West Wings were intended to house offices. Tower and spire were completed by June 1753.

The Pennsylvania Assembly occupied Assembly Hall in 1735, before the whole structure was completed. In 1775 it gave the use of the room to the Second Continental Congress. Here, on June 16, 1775, George Washington accepted command of the Continental Army. Here the Declaration of

Independence was adopted on July 4, 1776; the Articles of Confederation and Perpetual Union were signed beginning on July 9, 1778, and the Constitution of the United States was framed by the Constitutional Convention in 1787.

Congress Hall, at the west end of the group, was erected in 1787 and was the seat of the United States Congress from 1790 to 1800, when the Congress moved to Washington, D. C. The Court House, or Old City Hall, at the east end, was built in 1790 for the municipal courts, and was the first seat of the United States Supreme Court.

Independence Hall and the other buildings in Independence Square form the nucleus around which has been developed the Independence National Historical Park, established in 1956. Much restoration work has been done on the buildings.

CONSTITUTION OF THE UNITED STATES

The Original Seven Articles

PREAMBLE

We, the people of the United States, in order to form a more perfect Union, establish justice, insure domestic tranquility, provide for the common defense, promote the general welfare, and secure the blessings of liberty to ourselves and our posterity, do ordain and establish this Constitution for the United States of America.

ARTICLE I.

Section 1—Legislative powers; in whom vested:

All legislative powers herein granted shall be vested in a Congress of the United States, which shall consist of a Senate and House of Representatives.

Section 2—House of Representatives, how and by whom chosen. Qualifications of a Representative. Representatives and direct taxes, how apportioned. Enumeration. Vacancies to be filled. Power of choosing officers, and of impeachment.

1. The House of Representatives shall be composed of members chosen every second year by the people of the several States, and the electors in each State shall have the qualifications requisite for electors of the most numerous branch of the State Legislature.

2. No person shall be a Representative who shall not have attained to the age of twenty-five years and been seven years a citizen of the United States, and who shall not, when elected, be an inhabitant of that State in which he shall be chosen.

3. Representatives and direct taxes shall be apportioned among the several States which may be included within this Union according to their respective numbers, which shall be determined by adding to the whole number of free persons, including those bound to service for a term of years, and excluding Indians not taxed, three-fifths of all other persons. The actual enumeration shall be

made within three years after the first meeting of the Congress of the United States, and within every subsequent term of ten years, in such manner as they shall by law direct. The number of Representatives shall not exceed one for every thirty thousand, but each State shall have at least one Representative; and until such enumeration shall be made, the State of New Hampshire shall be entitled to choose 3; Massachusetts, 8; Rhode Island and Providence Plantations, 1; Connecticut, 5; New York, 6; New Jersey, 4; Pennsylvania, 8; Delaware, 1; Maryland, 6; Virginia, 10; North Carolina, 5; South Carolina, 5; and Georgia, 3.

4. When vacancies happen in the representation from any State, the Executive Authority thereof shall issue writs of election to fill such vacancies.

5. The House of Representatives shall choose their Speaker and other officers, and shall have the sole power of impeachment.

Section 3—Senators, how and by whom chosen. How classified. State Executive, when to make temporary appointments, in case, etc. Qualifications of a Senator. President of the Senate, his right to vote. President pro tem., and other officers of the Senate, how chosen. Power to try impeachments. When President is tried, Chief Justice to preside. Sentence.

1. The Senate of the United States shall be composed of two Senators from each State, chosen by the Legislature thereof, for six years; and each Senator shall have one vote.

2. Immediately after they shall be assembled in consequence of the first election, they shall be divided as equally as may be into three classes. The seats of the Senators of the first class shall be vacated at the expiration of the second year, of the second class at the expiration of the fourth year, and of the third class at the expiration of the sixth year, so that one-third may be chosen every second year; and if vacancies happen by resignation or otherwise during the recess of the

Origin of the Constitution

The War of Independence was conducted by delegates from the original 13 states, called the Congress of the United States of America and generally known as the Continental Congress. In 1777 the Congress submitted to the legislatures of the states the Articles of Confederation and Perpetual Union, which were ratified by New Hampshire, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Pennsylvania, Delaware, Virginia, North Carolina, South Carolina and Georgia, and finally, in 1781, by Maryland.

The first article of the instrument read: "The stile of this confederacy shall be the United States of America." This did not signify a sovereign nation, because the states delegated only those powers they could not handle individually, such as power to wage war, establish a uniform currency, make treaties with foreign nations and contract debts for general expenses, such as paying the army. Taxes for the payment of such debts were levied by the individual states. The president under the Articles signed himself "President of the United States in Congress assembled," but here the United States were considered in the plural, a cooperating group. Canada was invited to join the union on equal terms but did not act.

When the war was won it became evident that a stronger federal union was needed to protect the mutual interests of the states. The Congress left the initiative to the legislatures. Virginia in January, 1786, appointed commissioners to meet with representatives of other states, with the result that delegates from Virginia, Delaware, New York, New Jersey and Pennsylvania met at Annapolis. Alexander Hamilton prepared their call asking delegates from all states to meet in Phila-

delphia in May, 1787, "to render the Constitution of the Federal government adequate to the exigencies of the union." Congress endorsed the plan Feb. 21, 1787. Delegates were appointed by all states except Rhode Island.

The convention met May 14, 1787. George Washington was chosen president (presiding officer). The states certified 65 delegates, but 10 did not attend. The work was done by 55, not all of whom were present at all sessions. Of the 65 qualified delegates, 16 failed to sign, and 39 actually signed Sept. 17, 1787, some with reservations. Some historians have said 74 delegates were named and 19 failed to attend. These 9 additional persons refused the appointment, were never delegates and never counted as absentees. Washington sent the Constitution to Congress with a covering letter and that body, Sept. 28, 1787, ordered it sent to the legislatures, "in order to be submitted to a convention of delegates chosen in each state by the people thereof."

The Constitution was ratified by votes of state conventions as follows: Delaware, Dec. 7, 1787, unanimous; Pennsylvania, Dec. 12, 1787, 43 to 23; New Jersey, Dec. 18, 1787, unanimous; Georgia, Jan. 2, 1788, unanimous; Connecticut, Jan. 9, 1788, 123 to 40; Massachusetts, Feb. 6, 1788, 187 to 168; Maryland, April 28, 1788, 63 to 11; South Carolina, May 23, 1788, 149 to 73; New Hampshire, June 21, 1788, 57 to 46; Virginia, June 26, 1788, 89 to 79; New York, July 26, 1788, 30 to 27. Nine states were needed to establish the operation of the Constitution "between the states so ratifying the same" and New Hampshire was the ninth state. The government did not declare the Constitution in effect until the first Wednesday in March, 1789, which was March 4. After that North Carolina ratified it Nov. 21, 1789, 197 to 77; and Rhode Island May 29, 1790, 34 to 32. Vermont in convention ratified it Jan. 10, 1791, and by act of Congress approved Feb. 19, 1791, was admitted into the Union as the 14th state, Mar. 4, 1791.

Legislature of any State, the Executive thereof may make temporary appointment until the next meeting of the Legislature which shall then fill such vacancies.

3. No person shall be a Senator who shall not have attained to the age of thirty years, and been nine years a citizen of the United States, and who shall not, when elected, be an inhabitant of that State for which he shall be chosen.

4. The Vice-President of the United States shall be President of the Senate, but shall have no vote unless they be equally divided.

5. The Senate shall choose their other officers, and also a President pro tempore, in the absence of the Vice-President, or when he shall exercise the office of the President of the United States.

6. The Senate shall have the sole power to try all impeachments. When sitting for that purpose, they shall be on oath or affirmation. When the President of the United States is tried, the Chief Justice shall preside; and no person shall be convicted without the concurrence of two-thirds of the members present.

7. Judgment in cases of impeachment shall not extend further than to removal from office, and disqualification to hold and enjoy any office of honor, trust, or profit under the United States; but the party convicted shall nevertheless be liable and subject to indictment, trial, judgment, and punishment, according to law.

Section 4—Times, etc., of holding elections, how prescribed. One session in each year.

1. The times, places and manner of holding elections for Senators and Representatives shall be prescribed in each State by the Legislature thereof; but the Congress may at any time by law make or alter such regulations, except as to places of choosing Senators.

2. The Congress shall assemble at least once in every year, and such meetings shall be on the first Monday in December, unless they shall by law appoint a different day.

Section 5—Membership, Quorum, Adjournments, Rules, Power to punish or expel. Journal. Time of adjournments, how limited, etc.

1. Each House shall be the judge of the elections, returns, and qualifications of its own members, and a majority of each shall constitute a quorum to do business; but a smaller number may adjourn from day to day, and may be authorized to compel the attendance of absent members in such manner and under such penalties as each House may provide.

2. Each House may determine the rules of its proceedings, punish its members for disorderly behavior, and with the concurrence of two-thirds expel a member.

3. Each House shall keep a journal of its proceedings, and from time to time publish the same, excepting such parts as may in their judgment require secrecy; and the yeas and nays of the members of either House on any question shall, at the desire of one-fifth of those present, be entered on the journal.

4. Neither House, during the session on Congress shall, without the consent of the other, adjourn for more than three days, nor to any other place than that in which the two Houses shall be sitting.

Section 6—Compensation, Privileges, Disqualifications in certain cases.

1. The Senators and Representatives shall receive a compensation for their services to be ascertained by law, and paid out of the Treasury of the United States. They shall in all cases, except treason, felony, and breach of the peace, be privileged from arrest during their attendance at the session of their respective Houses, and in going to and returning from the same; and for any speech or debate in either House they shall not be questioned in any other place.

2. No Senator or Representative shall, during the time for which he was elected, be appointed to any civil office under the authority of the United States which shall have been created, or the emoluments whereof shall have been increased during such time; and no person holding any office under the United States shall be a member of either House during his continuance in office.

Section 7—House to originate all revenue bills. Veto. Bill may be passed by two-thirds of each House, notwithstanding, etc. Bill, not returned in ten days, to become a law. Provisions as to orders, concurrent resolutions, etc.

1. All bills for raising revenue shall originate in the House of Representatives, but the Senate may propose or concur with amendments, as on other bills.

2. Every bill which shall have passed the House of Representatives and the Senate shall, before it becomes a law, be presented to the President of the United States; if he approve, he shall sign it, but if not, he shall return it, with his objections, to that House in which it shall have originated, who shall enter the objections at large on their journal, and proceed to reconsider it. If after such reconsideration two-thirds of that House shall agree to pass the bill, it shall be sent, together with the objections, to the other House, by which it shall likewise

be reconsidered; and if approved by two-thirds of that House it shall become a law. But in all such cases the votes of both Houses shall be determined by yeas and nays, and the names of the persons voting for and against the bill shall be entered on the journal of each House respectively. If any bill shall not be returned by the President within ten days (Sundays excepted) after it shall have been presented to him, the same shall be a law in like manner as if he had signed it, unless the Congress by their adjournment prevent its return; in which case it shall not be a law.

3. Every order, resolution, or vote to which the concurrence of the Senate and House of Representatives may be necessary (except on a question of adjournment) shall be presented to the President of the United States, and before the same shall take effect shall be approved by him, or being disapproved by him, shall be repassed by two-thirds of the Senate and the House of Representatives, according to the rules and limitations prescribed in the case of a bill.

Section 8—Powers of Congress.

1. The Congress shall have power To lay and collect taxes, duties, imposts, and excises, to pay the debts and provide for the common defense and general welfare of the United States; but all duties, imposts, and excises shall be uniform throughout the United States;

2. To borrow money on the credit of the United States.

3. To regulate commerce with foreign nations, and among the several States and with the Indian tribes.

4. To establish a uniform rule of naturalization and uniform laws on the subject of bankruptcies throughout the United States.

5. To coin money, regulate the value thereof, and of foreign coin, and fix the standard of weights and measures.

6. To provide for the punishment of counterfeiting the securities and current coin of the United States.

7. To establish post-offices and post-roads.

8. To promote the progress of science and useful arts by securing for limited times to authors and inventors the exclusive rights to their respective writings and discoveries.

9. To constitute tribunals inferior to the Supreme Court.

10. To define and punish piracies and felonies committed on the high seas, and offenses against the law of nations.

11. To declare war, grant letters of marque and reprisal, and make rules concerning captures on land and water.

12. To raise and support armies, but no appropriation of money to that use shall be for a longer term than two years.

13. To provide and maintain a navy.

14. To make rules for the government and regulation of the land and naval forces.

15. To provide for calling forth the militia to execute the laws of the Union, suppress insurrections, and repel invasions.

16. To provide for organizing, arming, and disciplining the militia, and for governing such part of them as may be employed in the service of the United States, reserving to the States respectively the appointment of the officers, and the authority of training the militia according to the discipline prescribed by Congress.

17. To exercise exclusive legislation in all cases whatsoever over such district (not exceeding ten miles square) as may, by cession of particular States and the acceptance of Congress, become the seat of Government of the United States, and to exercise like authority over all places purchased by the consent of the Legislature of the State in which the same shall be, for the erection of forts, magazines, arsenals, dockyards, and other needful buildings;—And

18. To make all laws which shall be necessary and proper for carrying into execution the foregoing powers and all other powers vested by this Constitution in the Government of the United States, or in any department or officer thereof.

Section 9—Provision as to migration or importation of certain persons. Habeas Corpus. Bills of attainder, etc. Taxes, how apportioned. No export duty. No commercial preference. Money, how drawn from Treasury, etc. No titular nobility. Officers not to receive presents, etc.

1. The migration or importation of such persons as any of the States now existing shall think proper to admit shall not be prohibited by the Congress prior to the year one thousand eight hundred and eight, but a tax or duty may be imposed on such importation, not exceeding ten dollars for each person.

2. The privilege of the writ of habeas corpus shall not be suspended, unless when in cases of rebellion or invasion the public safety may require it.

3. No bill of attainder or ex post facto law shall be passed.

4. No capitation or other direct tax shall be laid

unless in proportion to the census or enumeration herebefore directed to be taken.

5. No tax or duty shall be laid on articles exported from any State.

6. No preference shall be given by any regulation of commerce or revenue to the ports of one State over those of another, nor shall vessels bound to or from one State be obliged to enter, clear, or pay duties to another.

7. No money shall be drawn from the Treasury but in consequence of appropriations made by law; and a regular statement and account of the receipts and expenditures of all public money shall be published from time to time.

8. No title of nobility shall be granted by the United States. And no person holding any office of profit or trust under them shall, without the consent of the Congress, accept any present, emolument, office, or title of any kind whatever from any king, prince, or foreign state.

Section 10—(States prohibited from the exercise of certain powers.)

1. No State shall enter into any treaty, alliance, or confederation, grant letters of marque and reprisal, coin money, emit bills of credit, make anything but gold and silver coin a tender in payment of debts, pass any bill of attainder, ex post facto law or law impairing the obligation of contracts, or grant any title of nobility.

2. No State shall, without the consent of the Congress, lay any impost or duties on imports or exports, except what may be absolutely necessary for executing its inspection laws, and the net produce of all duties and imposts, laid by any State on imports or exports, shall be for the use of the Treasury of the United States; and all such laws shall be subject to the revision and control of the Congress.

3. No State shall, without the consent of Congress, lay any duty of tonnage, keep troops or ships of war in time of peace, enter into agreement or compact with another State, or with a foreign power, or engage in war, unless actually invaded, or in such imminent danger as will not admit of delay.

ARTICLE II.

Section 1—President; his term of office. Electors of President; number and how appointed. Electors to vote on same day. Qualification of Electors. On them the duties devolve in case of his removal, death, etc. President's compensation. His oath of office.

1. The Executive power shall be vested in a President of the United States of America. He shall hold his office during the term of four years, and together with the Vice President, chosen for the same term, be elected as follows:

2. Each State shall appoint, in such manner as the Legislature thereof may direct, a number of electors equal to the whole number of Senators and Representatives to which the State may be entitled in the Congress; but no Senator or Representative or person holding an office of trust or profit under the United States shall be appointed an elector.

(The electors shall meet in their respective States and vote by ballot for two persons, of whom one at least shall not be an inhabitant of the same State with themselves. And they shall make a list of all the persons voted for, and of the number of votes for each, which list they shall sign, certify, and transmit, sealed, to the seat of the Government of the United States, directed to the President of the Senate. The President of the Senate shall, in the presence of the Senate and House of Representatives, open all the certificates, and the votes shall then be counted. The person having the greatest number of votes shall be the President. If such number be a majority of the whole number of electors appointed, and if there be more than one who have such a majority, and have an equal number of votes, then the House of Representatives shall immediately choose by ballot one of them for President; and if no person have a majority, then from the five highest on the list the said House shall in like manner choose the President. But in choosing the President, the vote shall be taken by States, the representation from each State having one vote. A quorum, for this purpose, shall consist of a member or members from two-thirds of the States, and a majority of all the States shall be necessary to a choice. In every case, after the choice of the President, the person having the greatest number of votes if the electors shall be the Vice President. But if there should remain two or more who have equal votes, the Senate shall choose from them by ballot the Vice President.)

(*This clause has been superseded by the 12th amendment.)

3. The Congress may determine the time of choosing the electors and the day on which they shall give their votes, which day shall be the same throughout the United States.

4. No person except a natural born citizen, or a citizen of the United States at the time of the adoption of this Constitution, shall be eligible to the office of President; neither shall any person be eligible to that office who shall not have attained

to the age of thirty-five years and been fourteen years a resident within the United States.

(For qualification of the Vice President, see Article XII of the amendments.)

5. In case of the removal of the President from office, or of his death, resignation, or inability to discharge the powers and duties of the said office, the same shall devolve on the Vice President, and the Congress may by law provide for the case of removal, death, resignation, or inability, both of the President and Vice President, declaring what officer shall then act as President, and such officer shall act accordingly until the disability be removed or a President shall be elected.

(This clause has been amended by Article XX, sections 3 and 4, of the amendments.)

6. The President shall, at stated times, receive for his services a compensation which shall neither be increased nor diminished during the period for which he shall have been elected, and he shall not receive within that period any other emolument from the United States or any of them.

7. Before he enter on the execution of his office he shall take the following oath or affirmation: "I do solemnly swear (or affirm) that I will faithfully execute the office of President of the United States, and will, to the best of my ability, preserve, protect, and defend the Constitution of the United States."

Section 2—President to be Commander-in-Chief. He may require opinions of Cabinet Officers, etc., may pardon. Treaty-making power. Nomination of certain officers. When President may fill vacancies.

1. The President shall be Commander-in-Chief of the Army and Navy of the United States, and of the militia of the several States when called into the actual service of the United States; he may require the opinion, in writing, of the principal officer in each of the executive departments upon any subject relating to the duties of their respective offices, and he shall have power to grant reprieves and pardons for offenses against the United States except in cases of impeachment.

2. He shall have power by and with the advice and consent of the Senate to make treaties, provided two-thirds of the Senators present concur; and he shall nominate and by and with the advice and consent of the Senate shall appoint ambassadors, other public ministers and consuls, judges of the Supreme Court, and all other officers of the United States whose appointments are not herein otherwise provided for, and which shall be established by law; but the Congress may by law vest the appointment of such inferior officers as they think proper in the President alone, in the courts of law, or in the heads of departments.

3. The President shall have power to fill up all vacancies that may happen during the recess of the Senate by granting commissions, which shall expire at the end of their next session.

Section 3—(President shall communicate to Congress. He may convene and adjourn Congress, in case of disagreement, etc. Shall receive Ambassadors, execute laws, and commission officers.)

He shall from time to time give to the Congress information of the state of the Union, and recommend to their consideration such measures as he shall judge necessary and expedient; he may on extraordinary occasions, convene both Houses, or either of them, and in case of disagreement between them with respect to the time of adjournment, he may adjourn them to such time as he shall think proper; he shall receive ambassadors and other public ministers; he shall take care that the laws be faithfully executed, and shall commission all the officers of the United States.

Section 4—(All civil officers forfeited for certain crimes.)

The President, Vice President, and all civil officers of the United States shall be removed from office on impeachment for and conviction of treason, bribery or other high crimes and misdemeanors.

ARTICLE III

Section 1—Judicial powers. Tenure. Compensation.

The judicial power of the United States shall be vested in one Supreme Court, and in such inferior courts as the Congress may from time to time ordain and establish. The judges, both of the Supreme and inferior courts, shall hold their offices during good behavior, and shall at stated times receive for their services a compensation which shall not be diminished during their continuance in office.

Section 2—Judicial power; to what cases it extends. Original jurisdiction of Supreme Court Appellate. Trial by jury, etc. Trial, where.

1. The judicial power shall extend to all cases in law and equity arising under this Constitution, the laws of the United States, and treaties made, or which shall be made, under their authority; to all cases affecting ambassadors, other public ministers and consuls; to all cases of admiralty and maritime jurisdiction; to controversies to which the United

States shall be a party; to controversies between two or more States, between a State and citizens of another State, between citizens of different States, between citizens of the same State claiming lands under grants of different States, and between a State, or the citizens thereof, and foreign states, citizens, or subjects.

(This section is abridged by Article XI of the amendments.)

3. In all cases affecting ambassadors, other public ministers, and consuls, and those in which a State shall be party, the Supreme Court shall have original jurisdiction. In all the other cases before mentioned the Supreme Court shall have appellate jurisdiction both as to law and fact, with such exceptions and under such regulations as the Congress shall make.

3. The trial of all crimes, except in cases of impeachment, shall be by jury, and such trial shall be held in the State where the said crimes shall have been committed; but when not committed within any State the trial shall be at such place or places as the Congress may by law have directed.

Section 3—Treason defined. Proof of Punishment of.

1. Treason against the United States shall consist only in levying war against them, or in adhering to their enemies, giving them aid and comfort. No person shall be convicted of treason unless on the testimony of two witnesses to the same overt act, or on confession in open court.

2. The Congress shall have power to declare the punishment of treason, but no attainder of treason shall work corruption of blood or forfeiture except during the life of the person attainted.

ARTICLE IV.

Section 1—Each State to give credit to the public acts, etc., of every other State.

Full faith and credit shall be given in each State to the public acts, records, and judicial proceedings of every other State. And the Congress may by general laws prescribe the manner in which such acts, records, and proceedings shall be proved, and the effect thereof.

Section 2—Privileges of citizens of each State. Fugitives from justice to be delivered up. Persons held to service having escaped, to be delivered up.

1. The citizens of each State shall be entitled to all privileges and immunities of citizens in the several States.

2. A person charged in any State with treason, felony, or other crime, who shall flee from justice, and be found in another State, shall, on demand of the Executive authority of the State from which he fled, be delivered up, to be removed to the State having jurisdiction of the crime.

3. No person held to service or labor in one State, under the laws thereof, escaping into another shall in consequence of any law or regulation therein, be discharged from such service or labor, but shall be delivered up on claim of the party to whom such service or labor may be due. (See 13th amendment.)

Section 3—Admission of new States. Power of Congress over territory and other property.

1. New States may be admitted by the Congress into this Union; but no new State shall be formed or erected within the jurisdiction of any other State, nor any State be formed by the junction of two or more States or parts of States, without the consent of the Legislatures of the States concerned, as well as of the Congress.

2. The Congress shall have power to dispose of and make all needful rules and regulations respecting the territory or other property belonging to the United States; and nothing in this Constitution shall be so construed as to prejudice any claims of the United States, or of any particular State.

Section 4—Republican form of government guaranteed. Each State to be protected.

The United States shall guarantee to every State in this Union a Republican form of government, and shall protect each of them against invasion, and, on application of the Legislature, or of the

Executive (when the Legislature cannot be convened) against domestic violence.

ARTICLE V.

Constitution: how amended. Proviso.

The Congress, whenever two-thirds of both Houses shall deem it necessary, shall propose amendments to this Constitution, or, on the application of the Legislatures of two-thirds of the several States, shall call a convention for proposing amendments, which in either case, shall be valid to all intents and purposes, as part of this Constitution, when ratified by the Legislatures of three-fourths of the several States, or by conventions in three-fourths thereof, as the one or the other mode of ratification may be proposed by the Congress, provided that no amendment which may be made prior to the year one thousand eight hundred and eight shall in any manner affect the first and fourth clauses in the Ninth Section of the First Article; and that no State, without its consent, shall be deprived of its equal suffrage in the Senate.

ARTICLE VI.

Certain debts, etc., declared valid, Supremacy of Constitution, treaties, and laws of the United States. Oath to support Constitution, by whom taken. No religious test.

1. All debts contracted and engagements entered into before the adoption of this Constitution shall be as valid against the United States under this Constitution as under the Confederation.

2. This Constitution and the laws of the United States which shall be made in pursuance thereof, and all treaties made, or which shall be made, under the authority of the United States, shall be the supreme law of the land, and the judges in every State shall be bound thereby, anything in the Constitution or laws of any State to the contrary notwithstanding.

3. The Senators and Representatives before mentioned and the members of the several State Legislatures, and all executive and judicial officers, both of the United States and of the several States, shall be bound by oath or affirmation to support this Constitution; but no religious test shall ever be required as a qualification to any office or public trust under the United States.

ARTICLE VII.

What ratification shall establish Constitution.

The ratification of the Conventions of nine States shall be sufficient for the establishment of this Constitution between the States so ratifying the same.

Done in convention by the unanimous consent of the States present the 17th day of September in the year of our Lord 1787, and of the independence of the United States of America the 12th. In witness whereof we have hereunto subscribed our names.

George Washington, President and deputy from Virginia.

New Hampshire—John Langdon, Nicholas Gilman.

Massachusetts—Nathaniel Gorham, Rufus King.

Connecticut—Wm. Saml. Johnson, Roger Sherman.

New York—Alexander Hamilton.

New Jersey—Wil: Livingston, David Brearley, Wm. Paterson, Jona: Dayton.

Pennsylvania—B: Franklin, Thomas Mifflin, Robt. Morris, Geo. Clymer, Thos. Fitzsimons, Jarr: Ingersoll, James Wilson, Gouv. Morris.

Attest: William Jackson, Secretary.

Ten Original Amendments—The Bill of Rights

In force December 15, 1791.

The First Congress, at its first session in the City of New York, Sept. 25, 1789, submitted to the states 12 amendments to clarify certain individual and state rights not named in the Constitution. They are generally called the Bill of Rights.

Influential in framing these amendments was the Declaration of Rights of Virginia, written by George Mason (1725-1792) in 1776. Mason, a Virginia delegate to the Constitutional Convention, did not sign the Constitution and opposed its ratification on the ground that it did not sufficiently oppose slavery or safeguard individual rights.

In the preamble to the resolution offering the proposed amendments, Congress said: "The conventions of a number of the States having at the time of their adopting the Constitution, expressed a desire, in order to prevent misconstruction or abuse of its powers, that further declaratory and restrictive clauses should be added, and as extending the ground of public confidence in the government will best insure the beneficent ends of its institution, be it resolved," etc.

Ten of these amendments now commonly known as one to 10 inclusive, but in reality three to 12 inclusive were ratified by the states as follows: New Jersey, Nov. 20, 1789; Maryland, December 19, 1789; North Carolina, Dec. 22, 1789; South Carolina, Jan. 19, 1790; New Hampshire, Jan. 25, 1790; Delaware, Jan. 28, 1790; New York, Feb. 24, 1790; Pennsylvania, March 10, 1790; Rhode Island, June 11, 1790; Vermont, Nov. 3, 1791; Virginia, Dec. 15, 1791; Massachusetts, March 2, 1820; Georgia, March 18, 1820; Connecticut, April 19, 1820. These original 10 ratified amendments appear in order on the next page as Article I to X inclusive.

The two of the original proposed amendments which were not ratified by the necessary number of States related, the first to apportionment of Representatives; the second, to compensation of members.

ARTICLE I.

Religious Establishment Prohibited. Freedom of Speech, of the Press, and Right to Petition.

Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof; or abridging the freedom of speech or of the press; or the right of the people peaceably to assemble and to petition the Government for a redress of grievances.

ARTICLE II.

Right to Keep and Bear Arms.

A well-regulated militia being necessary to the security of a free State, the right of the people to keep and bear arms shall not be infringed.

ARTICLE III.

Conditions for Quarters for Soldiers.

No soldier shall, in time of peace, be quartered in any house without the consent of the owner, nor in time of war but in a manner to be prescribed by law.

ARTICLE IV.

Right of Search and Seizure Regulated.

The right of the people to be secure in their persons, houses, papers, and effects, against unreasonable searches and seizures, shall not be violated, and no warrants shall issue but upon probable cause, supported by oath or affirmation, and particularly describing the place to be searched, and the persons or things to be seized.

ARTICLE V.

Provisions Concerning Prosecution, Trial and Punishment—Private Property Not to Be Taken for Public Use Without Compensation.

No person shall be held to answer for a capital or other infamous crime unless on a presentment or indictment of a Grand Jury, except in cases arising in the land or naval forces, or in the militia, when in actual service, in time of war or public danger; nor shall any person be subject for the same offense to be twice put in jeopardy of life or limb; nor shall be compelled in any criminal case to be a wit-

ness against himself, nor be deprived of life, liberty, or property, without due process of law; nor shall private property be taken for public use without just compensation.

ARTICLE VI.

Right to Speedy Trial, Witnesses, etc.

In all criminal prosecutions, the accused shall enjoy the right to a speedy and public trial, by an impartial jury of the State and district wherein the crime shall have been committed, which districts shall have been previously ascertained by law, and to be informed of the nature and cause of the accusation; to be confronted with the witnesses against him; to have compulsory process for obtaining witnesses in his favor, and to have the assistance of counsel for his defense.

ARTICLE VII.

Right of Trial by Jury.

In suits at common law, where the value in controversy shall exceed twenty dollars, the right of trial by jury shall be preserved, and no fact tried by a jury shall be otherwise re-examined in any court of the United States than according to the rules of the common law.

ARTICLE VIII.

Excessive Bail or Fines and Cruel Punishment Prohibited.

Excessive bail shall not be required, nor excessive fines imposed, nor cruel and unusual punishments inflicted.

ARTICLE IX.

Rule of Construction of Constitution.

The enumeration in the Constitution of certain rights shall not be construed to deny or disparage others retained by the people.

ARTICLE X.

Rights of States Under Constitution.

The powers not delegated to the United States by the Constitution, nor prohibited by it to the States, are reserved to the States respectively, or to the people.

Amendments Since the Bill of Rights

ARTICLE XI.

Judicial Powers Construed.

The following amendment was proposed to the Legislature of the several States by the Third Congress on the 5th of March 1794, and was declared to have been ratified in a message from the President to Congress, dated Jan. 8, 1798.

The judicial power of the United States shall not be construed to extend to any suit in law or equity commenced or prosecuted against one of the United States, by citizens of another State, or by citizens or subjects of any foreign state.

(It was on Jan. 5, 1798, that Secretary of State Pickens received from 12 of the States authenticated ratifications, and informed President John Adams of that fact.)

As a result of recent research in the Department of State, it is now established that the Eleventh Amendment became part of the Constitution on Feb. 7, 1796, for on that date it had been ratified by twelve States as follows:

(1) New York, (March 27, 1794); (2) Rhode Island, (March 31, 1794); (3) Connecticut, (May 8, 1794); (4) New Hampshire, (June 16, 1794); (5) Massachusetts, (June 25, 1794); (6) Vermont, (between Oct. 9, 1794 and Nov. 9, 1794); (7) Virginia, (Nov. 18, 1794); (8) Georgia, (Nov. 29, 1794); (9) Kentucky, (Dec. 7, 1794); (10) Maryland, (Dec. 26, 1794); (11) Delaware, (Jan. 23, 1795); (12) North Carolina, (Feb. 7, 1795).

On June 1, 1796, more than a year after the Eleventh Amendment had become part of the Constitution (but before anyone was officially aware of this), Tennessee had been admitted as a State; but not until Oct. 16, 1797, was a certified copy of the resolution of Congress proposing the amendment sent to the Governor of Tennessee (John Sevier) by Secretary of State Pickens, whose office was then at Trenton, New Jersey, because of the epidemic of yellow fever at Philadelphia; it seems, however, that the Legislature of Tennessee took no action on the Eleventh Amendment, owing doubtless to the fact that public announcement of its adoption was made soon thereafter.

Besides the necessary twelve States, one other, South Carolina, ratified the Eleventh Amendment, but this action was not taken until Dec. 4, 1797; the two remaining States, New Jersey and Pennsylvania, failed to ratify.

ARTICLE XII.

Manner of Choosing President and Vice-President.

The following amendment was proposed to the Legislatures of the several States by the Eighth Congress Dec. 12, 1803, and was declared to have been ratified in a proclamation by the Secretary of State September 25, 1804.

The Electors shall meet in their respective States,

and vote by ballot for President and Vice-President one of whom at least shall not be an inhabitant of the same State with themselves; they shall name in their ballots the person voted for as President, and in distinct ballots the person voted for as Vice-President; and they shall make distinct lists of all persons voted for as President and of all persons voted for as Vice-President, and of the number of votes for each, which lists they shall sign and certify, and transmit, sealed, to the seat of the Government of the United States, directed to the President of the Senate; the President of the Senate shall, in the presence of the Senate and House of Representatives, open all the certificates and the votes shall then be counted—The person having the greatest number of votes for President shall be the President, if such number be a majority of the whole number of Electors appointed; and if no person have such majority, then from the persons having the highest numbers, not exceeding three, on the list of those voted for as President, the House of Representatives shall choose immediately, by ballot the President. But in choosing the President, the votes shall be taken by States, the representation from each State having one vote; a quorum for this purpose shall consist of a member or members from two-thirds of the States and a majority of all the States shall be necessary to a choice. And if the House of Representatives shall not choose a President whenever the right of choice shall devolve upon them, before the fourth day of March next following, then the Vice-President shall act as President, as in case of the death or other constitutional disability of the President. The person having the greatest number of votes as Vice-President shall be the Vice-President if such number be a majority of the whole number of Electors appointed, and if no person have a majority, then from the two highest numbers on the list the Senate shall choose the Vice-President; a quorum for the purpose shall consist of two-thirds of the whole number of Senators, and a majority of the whole number shall be necessary to a choice. But no person constitutionally ineligible to the office of President shall be eligible to that of Vice-President of the United States.

TITLES OF NOBILITY—Not Ratified

Congress, May 1, 1810, proposed to the States the following Amendment to the Constitution:

"If any citizen of the United States shall accept, claim, receive, or retain any title of nobility or honor, or shall, without the consent of Congress, accept and retain any present, pension, office, or emolument of any kind whatever, from any emperor, king, prince or foreign power, such person shall cease to be a citizen of the United States and shall be incapable of holding any office of trust or profit under them or either of them."

It was ratified by Maryland, (Dec. 23, 1810); Kentucky, (Jan. 31, 1811); Ohio, (Jan. 31, 1811); Delaware, (Feb. 2, 1811); Pennsylvania, (Feb. 6, 1811); New Jersey, (Feb. 13, 1811); Vermont, (Oct. 24, 1811); Tennessee, (Nov. 21, 1811); Georgia, (Dec. 13, 1811); North Carolina, (Dec. 23, 1811); Massachusetts, (Feb. 27, 1812); New Hampshire, (Dec. 10, 1812).

Rejected by New York (Senate), (March 12, 1811); Connecticut, (May session, 1813); South Carolina approved by Senate Nov. 28, 1811, reported unfavorably in House and not further considered Dec. 7, 1813; Rhode Island (Sept. 15, 1814). The amendment failed, not having sufficient ratifications.

THE CORWIN AMENDMENT—Not Ratified

Congress March 2, 1861, in a joint resolution signed by President James Buchanan, proposed to the States the following Amendments to the Constitution:

"No amendment shall be made to the Constitution which will authorize or give to Congress the power to abolish or interfere, within any State, with the domestic institutions thereof, including that of persons held to labor or service by the laws of said State."

Ratified by Ohio, (March 13, 1861); Maryland, (Jan. 10, 1862); Illinois (convention), (Feb. 14, 1862). The amendment failed, for lack of a sufficient number of ratifications.

THE RECONSTRUCTION AMENDMENTS

The 13th, 14th and 15th Amendments to the Constitution are commonly known as the Reconstruction Amendments, inasmuch as they followed the Civil War, and were drafted by Republicans who were bent on imposing their own policy of reconstruction on the South. Post-bellum legislatures there—Mississippi, South Carolina, Georgia, for example—had set up laws which, it was charged, were contrived to perpetuate Negro slavery under other names.

ARTICLE XIII. Slavery Abolished.

The following amendment was proposed to the Legislatures of the several States by the Thirty-eighth Congress (Feb. 4, 1865), and was declared to have been ratified in a proclamation by the Secretary of State (Dec. 18, 1865).

The Amendment when first proposed by a resolution in Congress, was passed by the Senate, 38 to 6, on April 8, 1864, but was defeated in the House, 95 to 66 on June 15, 1864. On reconsideration by the House, on Jan. 31, 1865, the resolution passed, 119 to 56. It was approved by President Lincoln on Feb. 1, 1865, although the Supreme Court had decided, in 1798, that the President has nothing to do with the proposing of amendments to the Constitution, or their adoption.

1. Neither slavery nor involuntary servitude, except as a punishment for crime whereof the party shall have been duly convicted, shall exist within the United States, or any place subject to their jurisdiction.

2. Congress shall have power by appropriate legislation, to enforce the provisions of this article.

ARTICLE XIV Citizenship Rights Not to Be Abridged.

The following amendment was proposed to the Legislatures of the several States by the Thirty-ninth Congress (June 16, 1866), and was declared to have been ratified in a proclamation by the Secretary of State (July 28, 1868).

The 14th amendment was adopted only by virtue of ratification subsequent to earlier rejections. Newly constituted legislatures in both North Carolina and South Carolina, respectively (July 4 and 9, 1868), ratified the proposed amendment, although earlier legislatures had rejected the proposal. The Secretary of State issued a proclamation, which, though doubtful as to the effect of attempted withdrawals by Ohio and New Jersey, entertained no doubt as to the validity of the ratification by North and South Carolina. The following day (July 21, 1868), Congress passed a resolution which declared the 14th Amendment to be a part of the Constitution and directed the Secretary of State so to promulgate it. The Secretary waited, however, until the newly constituted legislature of Georgia had ratified the amendment, subsequent to an earlier rejection, before the promulgation of the ratification of the new amendment.

1. All persons born or naturalized in the United States, and subject to the jurisdiction thereof, are citizens of the United States and of the State wherein they reside. No State shall make or enforce any law which shall abridge the privileges or immunities of citizens of the United States, nor shall any State deprive any person of life, liberty, or property without due process of law, nor deny to any person within its jurisdiction the equal protection of the laws.

Apportionment of Representatives in Congress, 2. Representatives shall be apportioned among the several States according to their respective numbers, counting the whole number of persons in each State excluding Indians not taxed. But when the right to Vote at any election for the choice of Electors for President and Vice-President of the United States, Representatives in Congress, the executive and judicial officers of a State, or the members of the Legislature thereof, is denied to any of the male inhabitants of such State, being twenty-one years of age, and citizens of the United States, or in any way abridged, except for participation in rebellion, or other crime, the basis of representation therein shall be reduced in the proportion which the number of such male citizens shall bear to the whole number of male citizens twenty-one years of age in such State.

Power of Congress to Remove Disabilities of United States Officials for Rebellion.

3. No person shall be a Senator or Representative in Congress, or Elector of President and Vice-President or hold any office, civil or military, under the United States, or under any State, who having previously taken an oath, as a member of Congress, or as an officer of the United States, executive or judicial officer of any State, to support or as a member of any State Legislature or as an the Constitution of the United States, shall have engaged in insurrection or rebellion against the same, or given aid or comfort to the enemies thereof. But Congress may, by a vote of two-thirds of each House, remove such disability.

What Public Debts Are Valid.

4. The validity of the public debt of the United States, authorized by law, including debts incurred for payment of pensions and bounties for services in suppressing insurrection and rebellion, shall not be questioned. But neither the United States nor any State shall assume or pay any debt or obligation incurred in aid of insurrection or rebellion against the United States, or any claim for the loss or emancipation of any slave; but all such debts, obligations, and claims shall be held illegal and void.

5. The Congress shall have power to enforce by appropriate legislation the provisions of this article.

ARTICLE XV.

Equal Rights for White and Colored Citizens.

The following amendment was proposed to the Legislatures of the several States by the Fortieth Congress (Feb. 26, 1869), and was declared to have been ratified in a proclamation by the Secretary of State (March 30, 1870).

1. The right of the citizens of the United States to vote shall not be denied or abridged by the United States or by any State on account of race, color, or previous condition of servitude.

2. The Congress shall have power to enforce this article by appropriate legislation.

ARTICLE XVI.

Income Taxes Authorized.

The following amendment was proposed to the Legislatures of the several States by the Sixty-first Congress (July 12, 1909) and was declared to have been ratified in a proclamation by the Secretary of State (Feb. 25, 1913).

The Congress shall have power to lay and collect taxes on incomes, from whatever source derived, without apportionment among the several States, and without regard to any census or enumeration.

ARTICLE XVII.

United States Senators to Be Elected by Direct Popular Vote.

The following amendment was proposed to the Legislatures of the several States by the Sixty-second Congress (May 16, 1912), and was declared to have been ratified in a proclamation by the Secretary of State (May 31, 1913).

1. The Senate of the United States shall be composed of two Senators from each State, elected by the people thereof, for six years and each Senator shall have one vote. The electors in each State shall have the qualifications requisite for electors of the most numerous branch of the State Legislatures.

2. When vacancies happen in the representation of any State in the Senate, the executive authority of such State shall issue writs of election to fill such vacancies: Provided, That the Legislature of any State may empower the Executive thereof to make temporary appointment until the people fill the vacancies by election as the Legislature may direct.

3. This amendment shall not be so construed as to affect the election or term of any Senator chosen before it becomes valid as part of the Constitution.

ARTICLE XVIII.

Liquor Prohibition Amendment.

The following amendment was proposed to the

Legislatures of the several States by the Sixty-fifth Congress (Dec. 18, 1917), and (Jan. 29, 1919) the United States Secretary of State proclaimed its adoption by 36 States, and declared it in effect (Jan. 16, 1920).

1. After one year from the ratification of this article the manufacture, sale, or transportation of intoxicating liquors within, the importation thereof into, or the exportation thereof from the United States and all territory subject to the jurisdiction thereof for beverage purposes is hereby prohibited.

2. The Congress and the several States shall have concurrent power to enforce this article by appropriate legislation.

3. This article shall be inoperative unless it shall have been ratified as an amendment to the Constitution by the Legislatures of the several States, as provided in the Constitution, within seven years from the date of the submission hereof to the States by the Congress.

The total vote in the Senates of the various States was 1,310 for, 237 against—84.6% dry. In the lower houses of the States the vote was, 3,782 for, 1,035 against—78.5% dry.

The amendment ultimately was adopted by all the States except Connecticut and Rhode Island.

Repealed by Article XXI effective Dec. 5, 1933.

ARTICLE XIX.

Giving Nation-Wide Suffrage to Women.

The following amendment was presented to the Legislatures of the several States by the Sixty-sixth Congress, having been adopted by the House of Representatives (May 21, 1919) and by the Senate (June 4, 1919). The Secretary of State (Aug. 26, 1920) proclaimed it in effect, having been adopted (June 10, 1919-August 18, 1920) by three-quarters of the States.

1. The right of citizens of the United States to vote shall not be denied or abridged by the United States or by any State on account of sex.

2. Congress shall have power to enforce this Article by appropriate legislation.

CHILD LABOR—Not Ratified

Congress, in a joint resolution passed by the House of Representatives Apr. 26, 1924, and by the Senate June 2, 1924, submitted to the states the following proposed amendment:

1. The Congress shall have power to limit, regulate and prohibit the labor of persons under 18 years of age.

2. The power of the several States is unimpaired by this article except that the operation of State laws shall be suspended to the extent necessary to give effect to legislation enacted by the Congress.

It was ratified by Arizona (1925), Arkansas (1924), California (1925), Colorado (1931), Idaho (1935), Illinois (1933), Indiana (1935), Iowa (1933), Kansas (1937), Kentucky (1937), Maine (1933), Michigan (1933), Minnesota (1933), Montana (1927), Nevada (1937), New Hampshire (1933), New Jersey (1933), New Mexico (1937), North Dakota (1933), Ohio (1933), Oklahoma (1933), Oregon (1933), Pennsylvania (1933), Utah (1935), Washington (1933), West Virginia (1933), Wisconsin (1925), Wyoming (1925). With ratification by 36 states necessary, only these 28 had ratified it by 1938, when Congress passed the Fair Labor Standards Act, prohibiting labor of children under 16 in industries whose products entered interstate commerce. When the constitutionality of this act was upheld the proposed child labor amendment became virtually a dead issue.

ARTICLE XX.

Terms of President and Vice-President to Begin on Jan. 20; Those of Senators and Representatives, on Jan. 3.

The following amendment was proposed to the Legislatures of the several States by the Seventy-second Congress (March, 1932), a joint resolution to that effect having been adopted, first by the House, and then (March 2) by the Senate. The Secretary of State (Feb. 6, 1933) proclaimed it in effect, 39 of the 48 States having ratified. By Oct. 15, 1933, it had been ratified by all of the 48 States.

1. The terms of the President and Vice-President shall end at noon on the 20th day of January, and the terms of Senators and Representatives at noon on the 3rd day of January, of the years in which such terms would have ended if this article had not been ratified; and the terms of their successors shall then begin.

2. The Congress shall assemble at least once in every year, and such meeting shall begin at noon on the 3rd day of January, unless they shall by law appoint a different day.

3. If, at the time fixed for the beginning of the term of the President, the President elect shall have died, the Vice-President elect shall become President. If a President shall not have been chosen before the time fixed for the beginning of his term, or if the President elect shall have failed to qualify, then the Vice-President elect shall act as President until a President shall have qualified; and the Congress may by law provide for the case wherein neither a President elect nor a Vice-President shall have qualified, declaring who shall then act as President, or the manner in which one who is to act shall be selected, and such person shall act accordingly until a President or Vice-President shall have qualified.

4. The Congress may by law provide for the case of the death of any of the persons from whom the House of Representatives may choose a President whenever the right of choice shall have devolved upon them, and for the case of the death of any of the persons from whom the Senate may choose a Vice-President whenever the right of choice shall have devolved upon them.

5. Sections 1 and 2 shall take effect on the 15th day of October following the ratification of this article (Oct., 1933).

6. This article shall be inoperative unless it shall have been ratified as an amendment to the Constitution by the Legislatures of three-fourths of the several States within seven years from the date of its submission.

ARTICLE XXI.

Repeal of the Eighteenth (Prohibition) Amendment by Conventions in the States.

The following proposed amendment in the Constitution, embodied in a joint resolution of the 72nd Congress (Senate, Feb. 16, 1933, by 63 to 23; House, Feb. 20, 1933, by 289 to 121), was transmitted to the Secretary of State on Feb. 21 and he at once sent to the governors of the States copies of the resolution. The amendment went into effect on Dec. 5, 1933, having been adopted by 36 of the 48 States—Utah was the 36th State to ratify.

1. The eighteenth article of amendment to the Constitution of the United States is hereby repealed.

2. The transportation or importation into any State, Territory, or Possession of the United States for delivery or use therein of intoxicating liquors, in violation of the laws thereof, is hereby prohibited.

3. This article shall be inoperative unless it shall have been ratified as an amendment to the Constitution by convention in the several States, as provided in the Constitution, within seven years from the date of the submission hereof to the States by the Congress.

ARTICLE XXII.

Limiting Presidential Terms of Office.

The following proposed amendment in the Constitution, embodied in a joint resolution of the 80th Congress (House, Feb. 25, 1947, by 385 to 121; Senate, March 12, 1947, by 59 to 23), Signed by the Speaker of the House, Mar. 24, 1947, and by the President pro tempore of the Senate, Mar. 24, 1947. Presented to the Secretary of State, Mar. 24, 1947. Went into effect Feb. 26, 1951, when Nevada became the 36th State to ratify. Utah had ratified earlier the same day, and Minnesota, Feb. 27th.

1. No person shall be elected to the office of the President more than twice, and no person who has held the office of President, or acted as President, for more than two years of a term to which some other person was elected President shall be elected to the office of the President more than once. But this Article shall not apply to any person holding the office of President when this Article was proposed by the Congress, and shall not prevent any person who may be holding the office of President, or acting as President, during the term within which this Article becomes operative from holding the office of President or acting as President during the remainder of such term.

2. This article shall be inoperative unless it shall have been ratified as an amendment to the Constitution by the Legislatures of three-fourths of the several States within seven years from the date of its submission to the States by the Congress.

ARTICLE XXIII

Presidential Vote for District of Columbia.

The following amendment was submitted to the Legislatures of the 50 states following approval by voice votes in both houses of the 87th Congress (House June 14, 1960; Senate June 16, 1960). Ratification by the required three-fourths majority of the states was completed Mar. 29, 1961, when Kansas became the 38th state to ratify, 42 minutes before approval by the Ohio Legislature. Arkansas was the only state to reject the amendment. The amendment was formally declared a part of the Constitution Apr. 3, 1961.

1. The District constituting the seat of Government of the United States shall appoint in such manner as the Congress may direct:

A number of electors of President and Vice President equal to the whole number of Senators and Representatives in Congress to which the District would be entitled if it were a State, but in no event more than the least populous State; they shall be in addition to those appointed by the States, but they shall be considered, for the purposes of the election of President and Vice President, to be electors appointed by a State; and they shall meet in the District and perform such duties as provided by the twelfth article of amendment.

2. The Congress shall have power to enforce this article by appropriate legislation.

ARTICLE XXIV

Barring Poll Tax in Federal Elections

The following amendment was submitted to the Legislatures of the 50 states Sept. 14, 1962, after approval by both houses of the 87th Congress. It became a part of the Constitution after ratification by the required 38 states was completed Jan. 23, 1964; South Dakota was the 38th state to ratify.

1. The right of citizens of the United States to vote in any primary or other election for President or Vice President, for electors for President or Vice President, or for Senator or Representative in Congress, shall not be denied or abridged by the United States or any State by reason of failure to pay any poll tax or other tax.

2. The Congress shall have the power to enforce this article by appropriate legislation.

ARTICLE XXV

Presidential Disability and Succession

The following amendment was submitted to the Legislatures of the 50 states July 6, 1965, after approval by both houses of the 89th Congress. It became a part of the Constitution Feb. 10, 1967, after ratification by the required 38 states, Nevada was the 38th state to ratify.

1. In case of the removal of the President from office or his death or resignation, the Vice Presi-

dent shall become President.

2. Whenever there is a vacancy in the office of the Vice President, the President shall nominate a Vice President who shall take the office upon confirmation by a majority vote of both houses of Congress.

3. Whenever the President transmits to the President pro tempore of the Senate and the Speaker of the House of Representatives his written declaration that he is unable to discharge the powers and duties of his office, and until he transmits to them a written declaration to the contrary, such powers and duties shall be discharged by the Vice President as Acting President.

4. Whenever the Vice President and a majority of either the principal officers of the executive departments or of such other body as Congress may by law provide, transmit to the President pro tempore of the Senate and the Speaker of the House of Representatives their written declaration that the President is unable to discharge the powers and duties of his office, the Vice President shall immediately assume the powers and duties of the office as Acting President.

Thereafter, when the President transmits to the President pro tempore of the Senate and the Speaker of the House of Representatives his written declaration that no inability exists, he shall resume the powers and duties of his office unless the Vice President and a majority of either the principal officers of the executive department or of such other body as Congress may by law provide, transmit within four days to the President pro tempore of the Senate and the Speaker of the House of Representatives their written declaration that the President is unable to discharge the powers and duties of his office. Thereupon Congress shall decide the issue, assembling within 48 hours for that purpose if not in session. If the Congress, within 21 days after receipt of the latter written declaration, or, if Congress is not in session, within 21 days after Congress is required to assemble, determines by two-thirds vote of both houses that the President is unable to discharge the powers and duties of his office, the Vice President shall continue to discharge the same as Acting President; otherwise, the President shall resume the powers and duties of his office.

Lincoln's Address at Gettysburg, 1863

Fourscore and seven years ago our fathers brought forth on this continent a new nation, conceived in liberty and dedicated to the proposition that all men are created equal.

Now we are engaged in a great civil war, testing whether that nation or any nation so conceived and so dedicated can long endure. We are met on a great battle field of that war. We have come to dedicate a portion of that field, as a final resting-place for those who here gave their lives that that nation might live. It is altogether fitting and proper that we should do this.

But, in a larger sense, we can not dedicate—we can not consecrate—we can not hallow—this ground. The brave men, living and dead, who struggled here, have consecrated it, far above our poor power to add or detract. The world will little note, nor long remember, what we say here, but it can never forget what they did here. It is for us the living, rather, to be dedicated here to the unfinished work which they who fought here have thus far so nobly advanced. It is rather for us to be here dedicated to the great task remaining before us—that from these honored dead we take increased devotion to that cause for which they gave the last full measure of devotion—that we here highly resolve that these dead shall not have died in vain—that this nation, under God, shall have a new birth of freedom—and that government of the people, by the people, for the people, shall not perish from the earth.

President Lincoln delivered his address at the dedication of the military cemetery at Gettysburg, Pa., Nov. 19, 1863. The battle had been fought July 1-3, 1863. He was preceded by Edward Everett, former president of Harvard, secretary of state and senator from Massachusetts, then 69 and one of the nation's great orators. Everett gave a full resume of the battle. Lincoln's speech was so short that the photographer did not get his camera adjusted in time. The report that newspapers ignored Lincoln's address is not entirely accurate; Everett's address swamped their columns, but the greatness of Lincoln's speech was immediately recognized. Everett wrote him: "I should be glad if I could flatter myself that I came as near the central idea of the occasion in two hours as you did in two minutes."

Five copies of the Gettysburg address in Lincoln's hand are extant. The first and second draft, prepared in Washington and Gettysburg just before delivery, are in the Library of Congress. The third draft, written at the request of Everett to be sold at a fair in New York for the benefit of soldiers, was given the Illinois State Historical Library by popular subscription.

The fourth copy was written out by Lincoln for George Bancroft, the historian, and remained in custody of the Bancroft family until 1929, when it was acquired by Mrs. Nicholas H. Noyes, of Indian-

apolis, Ind. In 1949 Mrs. Noyes presented this copy to the Cornell University Library, Ithaca, N.Y. The fifth copy, usually described as the clearest and best, was also written by Lincoln for George Bancroft, for facsimile reproduction in a volume to be sold for the benefit of soldiers and sailors in Baltimore, where Bancroft lived. It is the second Bancroft copy. It passed to Bancroft's stepchildren, named Bliss, and was sold for \$54,000 by the estate of Dr. William J. A. Bliss in New York April 27, 1949, to Oscar B. Cintas, former Cuban ambassador to the United States. He died in May, 1957, and willed it to the Lincoln room of the White House, where it was placed in March, 1959. Lincoln's spelling of battle field and can not as separated words in that version is reproduced above.

Sen. John Sherman Cooper (R.-Ky.) president of the Lincoln Sesquicentennial Commission, on June 17, 1959 presented a Latin translation of Lincoln's Gettysburg Address to the Apostolic Delegation of the Roman Catholic Church, in Washington, D. C. It was engrossed on vellum and was to be sent to Pope John XXIII for deposit in the Vatican Library. The presentation took place in the presence of Government officials and members of the Diplomatic Corps. The translation was made by the Rt. Rev. Edwin Ryan of White Plains, N. Y. The Latin Version was ordered printed in the Congressional Record.

Copyright Law of the United States

Source: Copyright Office, Library of Congress

An author or proprietor may obtain statutory copyright protection by complying with the provisions of Title 17 of the United States Code. Applications for registration of claims to copyright are filed with the Register of Copyrights, Library of Congress, Washington, D. C. 20540. Application forms as well as information circulars covering various subjects are furnished free upon request to the Register of Copyrights.

A bill providing the first major revision of the copyright law in 58 years was passed by the House of Representatives in 1967 and sent to the Senate. *Any Senate action on the bill will be found in the Work of Congress, for which see Index.*

CATEGORIES OF WORKS

The copyright law provides that the application for registration of any work shall specify to which of the following classes the work in which copyright is claimed belongs:

(a) Books, including composite and cyclopaedic works, directories, gazettes and other compilations; (b) periodicals, including newspapers; (c) lectures, sermons, addresses, prepared for oral delivery; (d) dramatic or dramatico-musical compositions; (e) musical compositions; (f) maps; (g) works of art, models or designs for works of art; (h) reproductions of a work of art; (i) drawings or plastic works of a scientific or technical character; (j) photographs; (k) prints and pictorial illustrations including prints or labels used for articles of merchandise; (l) motion-picture photoplays; (m) motion pictures other than photoplays.

Works reproduced in copies for sale or public distribution. 1. The notice of copyright should appear on all copies of the work at the time of printing and shall consist either of the word "Copyright" or the abbreviation "Copr.," or the symbol "©" accompanied by the name of the copyright proprietor, and if the work be a printed literary, musical, or dramatic work, the notice shall include also the year in which the copyright was secured by publication. For example: "© John Doe 19—." In the case, however, of copies of works specified above—(f) to (k)—the notice may consist of the letter C inclosed in a circle © accompanied by the initials, monogram, mark or symbol of the proprietor—provided that his name shall appear on some accessible part of the copies. 2. Promptly after publication send to the Copyright Office, Library of Congress, Washington, D. C. 20540, two copies (or if the work is by a foreign citizen and is first published in a foreign country, one copy only) of the best edition of the work, with an application for registration and \$6 fee.

The notice of copyright shall be applied in the case of a book or other printed publication, upon its title page or the page immediately following, or if a periodical, either upon the title page, or upon the first page of text of each separate number or under the title heading, or if a musical work either upon its title page or the first page of music.

Books by American authors, or alien authors domiciled within the United States at the time of first publication of the work. The copies deposited must be accompanied by an affidavit, under the official seal of an officer authorized to administer oaths, stating that the typesetting, printing and binding of the book have been performed within the United States. Affidavit and application forms will be supplied on request.

Works published outside of the United States. Foreign authors have an alternative to the requirements of the deposit of one copy of the work, an application for registration and a \$6 fee. The alternative is the deposit of two copies of the book, musical composition or other work, an application and a catalog card, but no fee. The alternative can be availed of only if the required items reach the Copyright Office in acceptable form within 6 months after first publication. A book or periodical in the English language must be registered within six months from first publication abroad if an ad interim copyright, which lasts for five years, is sought. An author who obtains an ad interim registration is permitted the importation into the United States of 1500 copies,

in one or more shipments, of a book or periodical in the English language during the 5 years after first publication abroad. Books or periodicals so imported must bear a U.S. copyright notice.

Works not reproduced in copies for sale. Copyright may also be had of certain classes of works of which copies are not reproduced for sale, by filing in the Copyright Office an application for registration, with the statutory fee of \$6, sending therewith: (1) In the case of lectures or other oral addresses or of dramatic or musical compositions, one complete copy of the work. (2) In the case of photographs, one photographic print. (3) In the case of works of art (paintings, drawings, sculptures), or of drawings or plastic works of a scientific or technical character, one photograph or other identifying reproduction of the work. (4) In the case of motion-picture photoplays, a title and description, with one print taken from each scene or act. (5) In the case of motion pictures other than photoplays, a title and description, with not less than two prints taken from different sections of a complete motion picture.

FEEES

A new fee schedule, reflecting the first increase since 1948, became effective Nov. 26, 1965. The fee schedule follows:

Registration of copyright claims (including a certificate bearing the Copyright Office seal) for all classes of works, \$6.

For registration of a claim to renewal, during the 28th year of the first term of copyright, \$4.

Each additional certificate; typewritten, certified copy of the record of registration, \$2.

Other certifications, including certifications of photocopies of Copyright Office records, \$3.

For recording each assignment, agreement or other document of 6 pages or less, listing no more than one title, \$5. For each page over 6 and each title over one, 50 cents.

For recording a notice of use of copyrighted music on mechanical instruments such as phonograph records, where the notice contains 5 titles or less, \$3. For each title over 5 in a single notice, 50 cents.

For recording a notice of intention to use copyrighted music on mechanical instruments such as phonograph records, where the notice contains 5 titles or less, \$3. For each title over 5 in a single notice of intention to use, 50 cents.

Searches: for each hour or fraction thereof spent by the Copyright Office staff in searching the official records, \$5.

Terms of Copyright. The original term of copyright runs for 28 years. Within one year prior to the expiration of the original term, the author or, if he is not living, certain specified representatives, may secure a renewal for a further term of protection. In case of composite works, posthumous work or works made for hire, the proprietor may secure the renewal.

UNIVERSAL COPYRIGHT

The United States is a party to the Universal Copyright Convention which became effective on Sept. 16, 1955.

Under terms of the convention each state will provide for protection of the rights of authors and other copyright owners in literary, scientific and artistic works, including writings, music, drama, cinematographic works, paintings, engravings and sculpture. Works first published in any member nation will generally get the same protection in other member nations as they afford their own nationals. The letter "c" in a circle accompanied by name of copyright owner and date of publication in a reasonable location on a work at first publication will obtain protection for the work in any member country.

One of the amendments to U. S. law was modification of the clause requiring books in English by foreign authors to be manufactured here in order to get copyright protection. Foreign works need not be subject to the U. S. requirement of deposit and registration, if they are first published in a Universal Convention country or are written by nationals of any contracting state.

Trademarks: How to Obtain and Protect Them

U. S. Government bureaus have adopted trademark as a single word compounded from the former trade mark.

A trademark, as defined by Act of Congress, "Includes any word, name, symbol, or device, or any combination thereof, adopted and used by a manufacturer or merchant to identify his goods and distinguish them from those manufactured or sold by others." Rights in trademarks are acquired only by use, which must continue if those rights are to be preserved. In order to be eligible for registration a mark must be in use in commerce which may be lawfully regulated by Congress.

Trademarks are registered on the Principal Register and the Supplemental Register of the U. S. Patent Office. "Coined, arbitrary, fanciful or suggestive marks, usually called technical marks, if otherwise qualified," may be registered on the Principal Register. A trademark that is merely descriptive of goods, or their regional origin, or is primarily a surname, is placed on the Supplemental Register.

The Trademark Act of 1946 provides that "For the purposes of registration on the supplemental register, a mark may consist of any trademark, symbol, label package, configuration of goods, name, word, slogan, phrase, surname, geographical name, numeral, or device, or any combination of any of the foregoing, but such mark must be capable of distinguishing the applicant's goods or services."

A trademark cannot be registered if it comprises immoral, deceptive or scandalous matter, or matter that may disparage or falsely suggest a connection with persons living or dead, institutions, beliefs, or national symbols. It cannot use the flag or coat of arms or other insignia of the United States, any state, municipality or foreign nation. It cannot use a portrait, signature or name of a living individual without his consent, or those of a deceased President of the United States without consent of his widow.

An application for registration must be filed in the name of the owner of the mark, who may submit his case or be represented by an attorney at law, or other person authorized to practice in trademark matters. A complete application comprises a written application, a drawing of the

mark, five specimens or facsimiles and the required filing fee.

The Patent Office publishes a pamphlet, General Information Concerning Trademarks, which describes the way applications and drawings are to be prepared and gives sample forms for applications. The Patent Office, upon request, will supply forms for the registration of a trademark in the name of (1) an individual; (2) a firm, and (3) a corporation. If facilities permit, the Office will make drawings from the applicant's direction and at his expense. If the application is allowed, the trademark will be published in the Official Gazette so that anyone who considers that he will be damaged by the new mark may file his opposition in 30 days.

The Trademark Act of 1946 also provides for the registration of service marks, certification marks and collective marks. A service mark is a title, symbol or name used in sale or advertising of services to identify them. A certification mark is used by others than the owner to certify origin or quality, such as work by a union. A collective mark is used by members of a cooperative, an association or other group and indicates membership in a union or other organization. A digest of registered trademarks may be inspected at the Patent Office.

A trademark is registered for 20 years and may be renewed for periods of 20 years if still in use in commerce regulated by Congress, or if nonuse is due to special circumstances which excuse nonuse and is not due to any intention to abandon the mark. The fee for the original application is \$35, and for the renewal is \$25, with lesser fees for corrections, amendments, abstracts of title and other services.

The pamphlet, General Information Concerning Trademarks, is a general guide. Pamphlet copies of the Trademark Laws and the Trademark Rules of Practice of the Patent Office also are published. The Official Gazette, issued weekly, contains information concerning trademarks published for opposition, registered, and renewed. The first pamphlet is available at the U. S. Patent Office, Washington, D. C. For the others inquiries may be addressed to the Supt. of Documents, Government Printing Office, Washington, D. C.

Patents and How to Apply for Them

A patent for an invention is granted by the United States Patent Office to the inventor of any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvements in these categories. The grant to the patentee is of "the right to exclude others from making, using or selling the invention throughout the United States" for the term of 17 years. A patent is also granted for certain distinct and new varieties of plants, also for 17 years.

Patents for new, original and ornamental designs for articles of manufacture may be obtained for 3½, 7 and 14 years, as requested by the inventor. The filing fee on each design application is \$20; the issue fee is \$10 for a 3½-yr. term, \$20 for 7 years and \$30 for 14 years.

Except in special circumstances, an application must be made by the inventor. If two are associated in the invention both must apply; if the inventor is mentally ill or dead, application may be made by the guardian or administrator of the estate. The specification must include a written description of the invention and of the manner and process of making and using it, and is required to be in such full, clear, concise, and exact terms as to enable any person skilled in the art to which the invention pertains, or with which it is most nearly connected, to make and use the same. The claims are full descriptions of the subject matter of the invention reciting all essential features necessary to distinguish the invention. A drawing is required by the statute in all cases which admit of drawings. The filing fee is \$65, with \$2 additional for each claim in excess of 10, and \$10 additional for each claim in independent form in excess of one.

The Patent Office examines the application to determine whether the invention is new and useful and whether the application otherwise complies with the law. If the application is allowed, a notice is sent the applicant and the final fee of \$100, plus \$10 for each page or portion thereof of specification as printed and \$2 for each sheet of drawing, is due within 3 months. The patent is in force on the date it is granted. The terms "patent applied for" and "patent pending" have no legal significance but serve notice that a patent

is being sought. Falsely using this marking is punishable by a fine.

If the Patent Office rejects an application, the applicant may ask for reconsideration, giving reason; if rejected again he may appeal to the Board of Appeals of the Patent Office, and if rejected there, may go to the Court of Customs and Patent Appeals or file a civil action in the U. S. District Court for the District of Columbia.

A patent will not be granted for a mere idea or suggestion, or a machine that will not operate, or an invention that lacks utility, or printed matter, or methods of doing business, or medicines that are merely mixtures of known ingredients, like physicians' prescriptions. So-called patent medicines are not protected by patents. So-called perpetual motion machines cannot be patented.

A patent cannot be obtained if the invention has been described in a printed publication or has been in public use or on sale before the date the invention was made or more than one year prior to the filing of the application. When two or more applications for patenting identical inventions are received, or when the applicant claims the invention for which a patent has been issued, the Patent Office begins "interference proceedings" to determine prior rights. The decision of the Patent Office may be reviewed by the courts.

Under certain conditions a license must be obtained before an application for a patent can be filed in a foreign country. The Commissioner of Patents may order an invention kept secret if publication would hurt the national safety or defense. Pamphlet copies of the Patent Laws, the Rules of Practice of the U. S. Patent Office in Patent Cases, and General Information Concerning Patents, can be obtained from the Superintendent of Documents, Government Printing Office, Washington, D. C.

The final report of the President's Commission on the Patent System was released by President Johnson Dec. 2, 1966. Bills based upon and incorporating many of the recommendations have been introduced in Congress and were under consideration in 1968.

TAXATION

Federal Individual Income Tax

Source: Internal Revenue Service, Treasury Dept.: Tax Foundation

WHO MUST FILE

Every individual under 65 years of age who resided in the United States and had a gross income of \$600 or more during the year, must file a Federal income tax return. Anyone 65 or older on the last day of the tax year is not required to file a return unless he had gross income of \$1,200 or more during the year.

A taxpayer with gross income of less than \$600 (or less than \$1,200 if 65 or older) should file a return to claim the refund of any taxes withheld, even if he is listed as a dependent by another taxpayer.

FORMS TO USE

Form 1040A may be filed by the taxpayer if his income is less than \$10,000 and consisted entirely of wages reported on withholding statements, or such wages and not more than \$200 income from other wages, dividends and interest. His accounting must be for the calendar year.

On this form the taxpayer does not itemize his deductions but takes the standard deduction. If his total income is \$5,000 or more, he can take the higher of the standard deduction of 10% or the minimum standard deduction. Both are limited to \$1,000 for all except a married taxpayer filing a separate return, who is limited to \$500.

If the adjusted gross income is under \$5,000, the taxpayer may not deduct the standard deductions, but must compute his tax from the tax table, which makes allowances for exemptions and standard deductions. If he wishes to itemize, he must use Form 1040.

Taxpayers are entitled to a minimum standard deduction of \$200 for a single individual, \$200 for a married couple filing jointly, plus \$100 for each exemption up to a total of \$1,000.

Form 1040 may be filed by an individual regardless of the source or amount of his income.

DATES FOR FILING RETURNS

For individuals using the calendar year, Apr. 15 is final date for filing income tax returns and for payment of any tax due, and the first quarterly installment of the estimated tax. Other installments of estimated tax to be paid June 15, Sept. 15 and Jan. 15.

Apr. 15 is final date for filing declaration of estimated tax. Amended declarations may be filed June 16, Sept. 15, and Jan. 15.

Instead of paying the 4th installment a final income return may be filed Feb. 2. Farmers may file a final return Feb. 16 to satisfy estimated tax requirements.

JOINT RETURN

A husband and wife may make a return jointly, even if one has no income personally. Their tax will be twice the tax imposed if the income were cut in half and taxed at the single rate.

One provision stipulates that if one spouse dies, the survivor may compute his tax using joint return rates for the first two taxable years following, provided he or she also was entitled to file a joint return the year of the death, and maintains in the household a home for a dependent child or stepchild. If the taxpayer remarries before the end of the taxable year these privileges are lost but he is permitted to file a joint return with his new spouse. An individual legally separated or divorced from spouse is not considered married. The survivor may file a joint return with the decedent for the year of death, if he does not remarry by the end of the tax year.

ESTIMATED TAX

If total estimated tax exceeds withheld tax by at least \$40, declarations of estimated income are required from (1) every single individual not head of a household or married individual not eligible to file a joint return with his spouse who expects over \$5,000 gross income; (2) every head of a household or surviving spouse who expects a gross income over \$10,000; (3) every married individual with over \$5,000 who is entitled to file a joint declaration with his spouse and their aggregate gross income can reasonably be expected to exceed \$10,000; and (4) every individual whose gross income can reasonably be expected to include more than \$200 from sources other than wages subject to withholding.

EXEMPTIONS

Personal exemption is \$600.

Every individual has an exemption of \$600, to be deducted from gross income. A husband and a wife are each entitled to a \$600 exemption. A taxpayer 65 or over gets another exemption of \$600. A blind person gets another exemption of \$600.

Exemption for dependents, over one-half of whose support comes from the taxpayer, is \$600. This applies to a child, stepchild or adopted child as well as certain other relatives with less than \$600 gross income; also to a child, stepchild, or adopted child of the taxpayer who is under 19 or full-time student even if he makes \$600 or more. A dependent can be a non-relative if a member of the taxpayer's household and living there all year.

Taxpayer gets the exemption for his child a student regardless of the student's age or earnings, provided the taxpayer provides over half of the student's total support. If the student gets a scholarship, this is not counted as support.

CHILD AND DISABLED DEPENDENT CARE

A woman, a widower, a man whose wife is in an institution or unable to care for herself, or a man legally separated or divorced who has the care of a dependent child under 13 or a disabled dependent regardless of age, may deduct not more than \$600 for one child or dependent and \$900 for two or more children or dependents for expenses incurred for care of dependent if taxpayer has to work. No deduction is allowed for payments to another dependent.

If a wife is working, the deduction is allowed only if she and her husband file a joint return. If their total income exceeds \$6,000, the allowance will be reduced by the amount above \$6,000. If the husband is incapable of self-support because handicapped, limitation and joint return requirement do not apply.

LIFE INSURANCE

Life insurance paid to survivors is not taxed as income. Interest on life insurance left with the insurance company and paid to survivors at intervals is taxable when available. Surviving spouse (husband or wife) has an exclusion of the pro-rata amount of principal payable at death plus up to \$1,000 per year of interest earned where life insurance proceeds are payable in installments.

Payments received as social security, and under the Railroad Retirement Act, are exempt.

DIVIDENDS

The first \$100 in dividends can be excluded from income. If husband and wife both receive \$100 on their joint return they can exclude \$200.

The exclusion does not apply to dividends from tax-exempt corporations, mutual savings banks, building and loan associations and several others.

Dividends paid in stock or in stock rights are generally exempt from tax, except when paid in place of preferred stock dividends of the current or preceding year, or when the stockholder has an option to take stock or property.

1968 Income Tax Rate Schedules*

I. (A) SINGLE TAXPAYERS WHO DO NOT QUALIFY IN TABLES II AND III, AND (B) MARRIED PERSONS FILING SEPARATE RETURNS.

If taxable income is:—The tax is:

Not over \$500	But not over	14% of taxable income	Of excess over	\$500
\$500	\$1,000	\$70	plus 15%	\$1,000
\$1,000	\$1,500	\$145	plus 16%	\$1,500
\$1,500	\$2,000	\$225	plus 17%	\$2,000
\$2,000	\$4,000	\$310	plus 19%	\$4,000
\$4,000	\$6,000	\$690	plus 22%	\$6,000
\$6,000	\$8,000	\$1,130	plus 25%	\$8,000
\$8,000	\$10,000	\$1,630	plus 28%	\$10,000
\$10,000	\$12,000	\$2,190	plus 32%	\$12,000
\$12,000	\$14,000	\$2,830	plus 36%	\$14,000
\$14,000	\$16,000	\$3,550	plus 39%	\$16,000
\$16,000	\$18,000	\$4,330	plus 42%	\$18,000
\$18,000	\$20,000	\$5,170	plus 45%	\$20,000
\$20,000	\$22,000	\$6,070	plus 48%	\$22,000
\$22,000	\$26,000	\$7,030	plus 50%	\$26,000
\$26,000	\$32,000	\$9,030	plus 53%	\$32,000
\$32,000	\$38,000	\$12,210	plus 55%	\$38,000

\$140,000	\$160,000	\$76,900	plus 68%	\$160,000
\$160,000	\$180,000	\$90,500	plus 69%	\$180,000
\$180,000		\$104,300	plus 70%	\$180,000

*Beginning Apr. 1, 1968 individual taxpayers were subject to a surcharge on income tax. For additional tax due see Surcharge Table.

DEDUCTIBLE MEDICAL EXPENSES

Expenses for medical care, not compensated for by insurance or other payment for taxpayer, spouse, and dependents, in excess of 3% of total income are deductible. This rule also applies to taxpayers 65 or over and dependent parents 65 or over. Previously these persons were not subject to the percentage limitations. There is no limit to the maximum amount of medical expense that can be deducted.

Medical care includes diagnosis, treatment and prevention of disease or for the purpose of affecting any structure or function of the body, and amounts paid for insurance to reimburse for hospitalization, surgical fees and other medical expenses.

Only medicine and drugs in excess of 1% of total income may be included with other medical expenses.

One-half the cost of medical care insurance premiums up to \$150 can be deducted without regard to the 3% limitation. The other half plus any excess over \$150 is included with other medical expenses subject to the 3% limitation.

Medical expenses for a decedent paid by his estate within one year after his death may be treated as expenses of the decedent taxpayer.

Medical and hospital benefits provided by the employer may be exempt from individual income tax. Wages paid as "sick pay" are exempt up to \$100 a week after a certain waiting period.

\$134 and over 7.5% of the adjusted tax.

¹Single person (other than Head of household)

and married person filing separate return

²Married persons or surviving spouse filing joint return.

DEDUCTIONS FOR CONTRIBUTIONS

Deductions up to 30% of taxpayers total income may be taken for contribution to most publicly supported charitable organizations, including churches or associations of churches, tax-exempt educational institutions, tax-exempt hospitals, and medical research organizations associated with a hospital, and nonprofit cemeteries. The deduction is limited to 20% for such organizations as private foundations.

Taxpayers also are permitted to carry over for five years certain contributions, generally to publicly supported organizations, which exceed the 30% allowable deduction the year the contribution was made.

Also permissible is the deduction as a charitable contribution of unreimbursed amounts up to \$50 a month spent to maintain an elementary or high school student, other than a dependent or relative, in taxpayer's home. The arrangement must be covered by a written agreement with an organization to which contributions are deductible.

DEDUCTION FOR INTEREST PAID

Interest paid by the taxpayer is deductible.

If personal property is bought under a contract providing for payment by installments, and in which carrying charges are stated but interest is not ascertainable, then subject to limitation payments are held to include interest equal to 6% on average unpaid balance.

PRIZES AND AWARDS

All prizes and awards must be reported in gross income, except when received without action by the recipient. To be exempt, awards must be received primarily in recognition of religious, charitable, scientific, educational, artistic, literary, or civic achievement. (Nobel and Pulitzer prizes exempt.)

Also excluded from gross income is any amount received as a scholarship at an educational institution, or a fellowship grant with money for research and clerical expense. The exclusion for those not candidates for a degree is limited to \$300 per month for 36 months.

DEDUCTIONS FOR EMPLOYEES

An employee may take the standard deduction and deduct as well the following if in connection with his employment: transportation, except commuting; automobile expense, including gas, oil and depreciation; however, meals and lodging are deductible as traveling expense only if the employee is away from home overnight.

An outside salesman—a salesman who works full-time outside the office, using the latter only

for incidentals—may deduct both the standard deduction and all his business expenses.

An employee who is reimbursed and is required to account to his employer for his business expenses will not be required to report either the reimbursed or the expenses on his tax return. Any allowance to the employee in excess of his expenses must be included in gross income. If he claims a deduction for an excess of expenses over reimbursement he will have to report the reimbursement and claim actual expenses.

An employee who is not required to account to his employer must report on his return the total amounts of reimbursements and expenses for travel, transportation, entertainment, etc., that he incurs under a reimbursement arrangement with his employer.

The expense of moving to a new place of employment may be deducted under certain circumstances regardless of whether the taxpayer is a new or continuing employee, or whether he pays his own expenses or is reimbursed by his employer if he reports the reimbursement as income.

RETIREMENT INCOME CREDIT

A credit against the tax, otherwise due of 15% of retirement income up to \$1,524 included in gross income is allowed to persons 65 and over. Persons under 65 and retired under a public retirement system (firemen, policemen, teachers, Federal employees) are allowed the same credit on income from pensions and annuities paid under the system, but not on dividends, interest and rent. Included in public systems are funds for members of the Armed Forces for 1955 and subsequent years. Any pension or annuity received under the Social Security Act or the Railroad Retirement Act reduces the \$1,524. Compensation in excess of \$900 received by an individual under 62 and compensation in excess of \$1,200 for one 62 or over but under 72 will reduce the \$1,524 by varying amounts.

NET CAPITAL LOSSES

An individual taxpayer may deduct up to \$1,000 against his ordinary income if his capital losses exceed his capital gains in the year of the loss. He may carry the rest over to subsequent years at the same rate. The law places no limit on the number of years.

INCOME AVERAGING

Individuals with large fluctuations in their annual income may be able to take advantage of averaging provisions available to taxpayers whose income for a particular year exceeds 133⅓% of their average income for the prior 4 years, if the excess is more than \$3,000.

WITHHOLDING

Every employer paying wages is required to withhold a tax based on a graduated scale which allows deductions for exemptions.

Employers may use either the percentage method or wage-bracket tables to determine the amount of tax to be withheld. The percentage method usually gives a result closer to actual tax liability.

Under the percentage method, a sum related to the taxpayers' exemptions is subtracted from his wage, and the tax is computed on the remainder, using tables with rates for married and single persons.

For example, the employer subtracts from a weekly wage \$13.50 times the number of exemptions claimed (i.e., \$13.50 for the taxpayer alone; \$27.00 for a married couple, \$54.00 for a couple with two children, etc.) to obtain the amount of taxable wages, and then uses the table shown below:

TABLE FOR PERCENTAGE METHOD OF WITHHOLDING**Weekly Payroll Period**

(a) Single person		
Wages after exemption		Tax to be
allowance:		withheld:
Not over \$4.....0		
Over—But not over	of excess over	
\$4 —\$13.....14%	\$4

\$917.....	\$194.85, plus 33%—\$917	

Federal Estate Tax

Source: Tax Foundation
An estate tax return must be filed for every citizen or resident of the United States whose gross estate exceeds \$60,000 in value at the time of his death. In general, the tax must be paid within 15 mos. from the date of death. Extensions may be granted in hardship cases. A return must be filed for a non-resident, not a citizen, if his gross estate in the U. S. exceeds \$2,000 in value.

An estate gets credit for state death taxes, according to a graduated table; also deductions for funeral expenses, administration, claims, and bequests to religious, charitable and fraternal organizations or government welfare agencies.

Life insurance payable to named beneficiaries is not to be included in the gross estate if the insured retained no incidents of ownership in the policy. A reversionary interest which exceeds 5

per cent of the value of the policy is considered an incident of ownership in the policy.

The marital deduction provides that the value of the taxable estate "shall be determined by deducting from the value of the gross estate an amount equal to the value of any interest in property which passes or has passed from the decedent to his surviving spouse." Thus the deduction applies when the surviving spouse has a right to the income for life from all or only a part of the property, as well as power to appoint all, or the part in which the survivor has income rights, whether or not the property is held in trust. If the spouse has control only over part, the deduction is limited proportionately. The deduction is limited, however, to the value of one-half of the adjusted gross estate.

ESTATE TAX RATE

The tax is computed under the rates listed below on the net taxable estate of the decedent, citizen or resident of the United States after allowing for the specific exemption of \$60,000 and deduction for debts, expenses, charitable, marital deductions. There is a credit allowance for state death taxes.

If the taxable estate is:		The tax shall be:	
Not over \$5,000.....		3% of the taxable estate	
Over \$5,000 but not over \$10,000.....	\$10,000.....	\$150, plus 7% of excess over \$5,000, plus 11% of excess over \$10,000.....	\$5,000
Over \$10,000 but not over \$20,000.....	\$20,000.....	\$1,600, plus 14% of excess over \$10,000.....	\$20,000
Over \$20,000 but not over \$30,000.....	\$30,000.....	\$3,000, plus 18% of excess over \$20,000.....	\$30,000
Over \$30,000 but not over \$40,000.....	\$40,000.....	\$4,800, plus 22% of excess over \$30,000.....	\$40,000

Georgia.....	Maximum Federal Credit (c, d)	10,040,000	60,000
Mississippi.....	1% on first \$60,000 to 16% (e, h)	10,000,000	60,000 (f, g)
New York.....	2% on first \$50,000 to 21% (e, h)	10,100,000	(f, g, i)
North Dakota.....	2% on first \$25,000 to 23% (e)	1,500,000	20,000 (g, j)
Ohio.....	2% on first \$40,000 to 7% (e)	500,000	5,000 (g, k)
Oklahoma.....	1% on first \$10,000 to 10% (e)	10,000,000	5,000 (g, l)
South Carolina.....	4% on first \$40,000 to 6% (e)	100,000	60,000 (g)
Utah.....	1% of first \$10,000 to 10% (e)	125,000	10,000 (g, m)

(a) Excludes states shown in table on page 213 which levy an estate tax, in addition to their inheritance taxes, to assure a full absorption of the Federal credit.

(b) The rates generally are in addition to graduated absolute amounts.

(c) Maximum Federal credit allowed under the 1954 code for state estate taxes paid is expressed as a percentage of the taxable estate (after \$60,000 exemption) in excess of \$40,000, plus a graduated absolute amount.

(d) A tax on nonresident estates is imposed on the proportionate share of the net estate which the property located in the state bears to the entire estate wherever situated.

(e) An additional estate tax is imposed to assure full absorption of the Federal credit.

(f) Insurance receives special treatment.

(g) Transfers to religious, charitable, educational, and municipal corporations are fully exempt. Limited in Mississippi to those located in

U. S.; does not extend to governmental (municipal) corporations in North Dakota.

(h) On net estate before exemption.

(i) The specific exemptions (\$20,000 of the net estate transferred to spouse and \$5,000 to lineal ancestors and descendants and certain other named relatives) are taken out of the first bracket which is fixed at \$50,000. Net estates which do not exceed \$2,000, after deducting the applicable exemptions, are not taxed.

(j) A marital deduction of 50% of adjusted gross estate is allowed instead, if larger. Exemption for a lineal descendant, if a minor, is \$5,000; for other lineal descendants and ancestors, \$2,000.

(k) Property is exempt to the extent transferred to surviving spouse not exceeding \$20,000; for a child under 21, \$7,000 and for each child over 21, \$3,000.

(l) An estate valued at \$100 or less is exempt.

(m) Transfers not exceeding \$40,000, if made to surviving spouse or children, are exempt from tax.

Corporation Taxes

Normal Tax: The normal tax rate on all net income is 22%.

Surtax: Surtax net income tax rate on net income over \$25,000 is 26%.

Surcharge: A tax equal to 10% of the normal tax and surtax is imposed on corporations for the period Jan. 1, 1968 to July 1, 1969.

Pay-as-you-go Tax: Corporations which expect to pay over \$75,600 tax must file an estimated tax

report by Apr. 15, June 15, Sept. 15, and Jan. 15, depending on when they first meet the requirements, while those on a fiscal-year basis must file a report on the 15th day of their 4th, 6th, 9th and 12th month. In 1968 the tax liability is 25% of the tax in excess of \$75,600 during each quarter.

Net operating losses may be applied against profits for 8 years. The carry-back provision allows losses to be carried back to 3 preceding years and forward to 5 succeeding years. Tax Foundation.

State Inheritance Tax Rates and Exemptions

(a) In addition to an inheritance tax all states listed also levy an estate tax, generally to assure full absorption of the Federal credit. Exceptions are Oregon, South Dakota and West Virginia. See page 212 for taxes not listed here.

(b) Rates generally apply to excess above graduated absolute amounts.

(c) Generally, transfers to governments or to solely charitable (educational, scientific, religious, literary, public, and other similar organizations in the United States are wholly exempt. Some states grant additional exemptions either for insurance, homestead, joint deposits, support allowance, disinherited minor children, orphaned, incompetent or blind children, and for previously or later taxed transfers. In many states, exemptions are deducted from the first bracket only. Adopted children generally receive the same consideration as natural children.

(d) Exemption for child is (in thousands): \$10 in South Dakota and \$15 in Iowa. Exemption for minor child is (in thousands): \$12 in California; \$10 in Idaho; \$5 in Indiana; \$10 in Kentucky; \$15 in Colorado and Minnesota; \$10 in Ohio, and \$5 in North Carolina.

(e) Community property state in which, in general, either all community property to the surviving spouse is exempt or only one-half of the community property is taxable on the death of either spouse.

(f) Exemption is \$300.

(g) Additional tax: Colorado—10% on the amount of tax computed at above rates; Massachusetts—20% of inheritance tax of decedents dying before July 1, 1967, and a second tax of 3% of inheritance tax.

(h) Exemption for widower differs in the following states (thousands): Colorado, \$10; Idaho, \$4; Kentucky, \$5; Minnesota, \$6; Montana, \$10; North Carolina, \$2; Wisconsin, \$5.

(i) No exemption if share exceeds amount stated.

(j) On estates of decedents dying on or after June 8, 1961 an additional inheritance tax equal to 30% of the basic tax is imposed.

(k) Maximum rate applies above \$100,000 for other than husband, wife, lineal descendants or ancestors, wife or widow of son, and husband or widow of daughter.

(l) Estates over \$3,000,000 are not subject to the inheritance tax but are subject to an estate tax equal to the amount of the Federal credit.

(m) Entire share.

(n) No exemption if share exceeds amount stated except that the tax shall not reduce the share below the amount of the exemption. In addition there are certain exemptions to spouse for home.

(o) Transfers of real estate are taxable at 75% of specified rates.

(p) Maximum tax is 35% of value of transfer in excess of exemption.

(q) In addition, an exemption of one-half decedent's estate or one-third if decedent is survived by lineal descendants.

(r) Entirely exempt.

(s) An additional tax of 1.5-3% is also applied depending upon beneficiary.

(t) Only one exemption is allowed upon aggregate of property passing to each class of beneficiaries: \$10,000 for parents, spouse, lineal descendants, brothers, and sisters; \$500 for all others. Amount of exemption for each class is proportionate to the respective shares of the estate and shared proportionately by the beneficiaries within the class.

(u) An additional tax of 1-20% is also levied. The exemptions apply to the additional tax only.

(v) A single exemption of \$10,000 is granted against that portion of the estate distributed to the spouse, children, lineal ancestors and lineal descendants. A single exemption of \$1,000 is granted to that portion of the estate distributed to all other beneficiaries.

(w) An additional tax of 30% on the amount of tax computed at rates shown is imposed; however, there is a statutory limitation that the total tax shall not exceed 15% of property transferred to the beneficiary.

(x) In the absence of a spouse, the children may claim the \$1,000 exemption.

State Individual Income Taxes; Rates, Exemptions

¹A standard deduction and an optional tax table are provided. ²A standard deduction is allowed. ³Personal exemptions and credits for dependents are allowed in the form of tax credits which are deductible from the amount of tax. With personal exemptions, the sum in parentheses is the exemption equivalent of the tax credit assuming that the exemption is deducted from the lowest brackets. With respect to the credits for dependents, the sum in parentheses is the amount by which the first dependent raises the level at which a married couple becomes taxable. ⁴A \$5,000 exemption for blindness is allowed in lieu of the personal exemption. ⁵The tax applies only to interest and dividends. ⁶Exemptions are made for age (over 65) and/or blindness. ⁷Community property state in which, in general, one-half of the community income is taxable to each spouse. ⁸A limited tax credit is allowed for sales taxes; for property taxes on homesteads of the elderly in Minn. and Wisc.; for property taxes and city income taxes in Mich.; for personal property taxes in Md. ⁹In addition to exemption deductions, a sales tax credit or cash rebate is provided.

State Sales Taxes; Types and Rates

Source: Analysis Staff, Tax Division, Treasury Dept. Data as of July 1, 1968

State	Type of tax ¹	Rates on retail sales				Rates on other services and nonretail businesses
		Tangible pers'l prop.	Admissions	Rest. meals	Public utilities	
Alabama ⁵	Retail sales	24%	4%	4%		Gross receipts of amusement operators, 4%. Agriculture machinery and equipment and milking and manufacturing machinery, farm machines, 1.5%; transient lodging, 4%; closed circuit TV, 10%.

Wisconsin.....	[Retail services.....]	3	3	3		Lease or rental of tangible personal property, laundry, dry cleaning, repair services, photography, transient lodging, 3%.
Wyoming.....	[Retail sales.....]	3	3	3	3	Lease or rental of tangible personal property, laundry, drycleaning, fabricating, repairing, altering, printing, garage, other services, 3%.
Dist. of Col.....	[Retail sales.....]	24		4	4	Transient lodging, 5%; food for off-premises consumption, 1%. leasing, renting, producing, fabricating, printing 4%.

¹All but a few states levy sales taxes of the single-stage retail type. Hawaii and Mississippi, levy multiple-stage sales taxes. The New Mexico and South Dakota taxes have broad bases with respect to taxable services but they are not multiple-stage taxes. Washington and West Virginia levy gross receipts taxes on all businesses, distinct from their sales taxes. Alaska also levies a gross receipts tax on businesses. The rates applicable to retailers (with exceptions) under these gross receipts taxes are as follows: Alaska, ½%, on gross receipts of \$20,000-\$100,000 and ¼% on gross receipts in excess of \$100,000; Washington, 44/100%; and West Virginia, ½%. In Indiana, an additional tax of ½% is imposed on retailers under the gross income tax. New Jersey imposes a tax of 1/20 of 1% on retail stores with income in excess of \$150,000.

²Motor vehicles are taxed at the general sales tax rates with the following exemptions. Alabama 1½%; Florida 3%; Mississippi 3% and North Carolina 1½% (\$120 maximum). The following states exempt motor vehicles from their general sales and use taxes but are taxed under motor vehicle tax laws: Maryland 3%; New Mexico 1½%; North Dakota 3%; Oklahoma 2%; South Dakota 3%; Texas and Virginia 2%; West Virginia and the District of Columbia 3%.

³Ariz. and Miss. also tax the transportation of oil and gas by pipeline. Ga., Okla. and Utah do not tax transportation of property. Miss. taxes taxicabs transportation 2%.

⁴In addition to the state tax, sales taxes are also levied by certain cities and/or counties.

⁵Restaurant meals below a specified price are exempt; Connecticut, Maryland and New York, less than \$1; Pennsylvania 10 cents or less.

⁶Rooms which rent for \$2 a day or less are exempt.

Liqueurs and cordials				Tobacco-small cigarettes weighing less than 3 lbs. per thousand, \$4.00 per thousand.			
				Air travel tickets.....	5%		

Federal Gift Tax

Any citizen or resident who within the calendar year makes gifts in excess of \$3,000 to any one individual, or any gift of a future interest regardless of value, must file a gift tax return on or before April 15 of the following year. In addition to the annual \$3,000 exclusion for each person to whom gifts are made, each donor also has a specific lifetime exemption of \$30,000, and this may be

taken all at one time or spread over years.

When a husband or wife transfers by gift an interest in property to his or her spouse a deduction in computing gift tax will be allowed to the extent of one-half of the value of the gift. Also gifts to a third party by either husband or wife may be treated as made one-half by each. Tax Foundation

If the taxable gifts are:				The tax will be:			
Not over \$5,000.....				2½% of the taxable gifts			
Over \$5,000 but not over \$10,000.....	\$10,000			\$112.50, plus 5¼% of excess over \$5,000		\$5,000	
Over \$10,000 but not over \$20,000.....	\$20,000			\$375, plus 8¼% of excess over \$10,000		\$10,000	
Over \$20,000 but not over \$30,000.....	\$30,000			\$1,200, plus 10½% of excess over \$20,000		\$20,000	
Over \$30,000 but not over \$40,000.....	\$40,000			\$2,250, plus 13½% of excess over \$30,000		\$30,000	
Over \$40,000 but not over \$50,000.....	\$50,000			\$3,600, plus 16½% of excess over \$40,000		\$40,000

RELIGIOUS INFORMATION

Census of Religious Bodies in the United States

Source: The WORLD ALMANAC Questionnaire and Yearbook of American Churches

The Yearbook of American Churches for 1969, Lauris B. Whitman, editor, published by Natl. Council of the Churches of Christ in the U. S. A., reports the following statistics compiled from figures, mainly for 1967, that were furnished by the religious bodies in the United States:

Religious Bodies Reporting—238. Total Membership—126,445,110 in the 50 states and the District of Columbia. Total membership exceeds that reported a year earlier by 666,454, a gain of .44%. There are 321,079 churches staffed by 360,092 clergymen. Church membership in the U. S. is 63.2% of the population.

Membership figures in the following table are the latest available. They come from different sources, and totals may be at variance with the figures quoted above. Some denominations submitted carefully compiled data while others approached the task more casually. Some membership figures were obtained by WORLD ALMANAC Questionnaire, others from the Yearbook of American Churches for 1968. The number of churches is given in parentheses.

Denomination	Members	Denomination	Members

World Council of Christian Education—Gen. Sec., Rev. Ralph Mould, 150 Route de Ferney, 1211 Geneva 20, Switzerland.

World Council of Churches, U. S. Conference for the—Chmn., Dr. John Coventry Smith. Exec. Sec., Dr. Eugene L. Smith, 475 Riverside Dr., New York, N. Y. 10027.

The World Council of Churches

The World Council of Churches is a fellowship of 232 Protestant, Anglican, Orthodox and Old Catholic churches from 90 countries and territories throughout the world. It was founded in Amsterdam in 1948 and stresses evangelical projects, the study of Christian doctrine and inter-church co-operation in philanthropic undertakings such as aid and service to refugees. The Council has no judicial powers over its member churches. Denominations belonging to the Council have an estimated 400,000,000 members. The Roman Catholic Church

is not a Council member. Every 5 or 6 years a world Assembly of member churches is held. The Fourth Assembly was held in Uppsala, Sweden, July 4-20, 1968. The Central Committee, policy making body of the WCC between assemblies, will meet in Kent, England, Aug. 12-23, 1969. World headquarters of the Council are in Geneva, Switzerland where the offices of General Secy. Dr. Eugene Blake are located. The Council's New York office is located at 475 Riverside Drive, New York, N. Y. 10027.

Leading Protestant Bodies in the United States

Baptists

The Baptist church was formed in Europe during the Protestant Reformation.

The first Baptist Church in America was founded in 1638 in Providence, R. I., by Roger Williams. National Organization began in 1814, and a Missionary Convention was formed to permit followers to express themselves in terms of missionary activities. Baptist bodies throughout the United States have a membership of 26,386,262.

American Baptist Convention (formerly Northern Baptist Convention) was organized in 1907. Renamed in 1950. Churches, 6,085; membership, 1,555,460. Headquarters at Valley Forge, Pa. 19481, with regional offices at 475 Riverside Dr., New York, N. Y. 10027, and 2855 Telegraph Ave., Berkeley, Calif. 94705. Agencies operating under this convention of Baptists include the American Baptist Foreign Mission Society, American Baptist Board of Education and Publication, and Ministers and Missionaries Benefit Board, all at Valley Forge, Pa. 19431.

National Baptist Convention of America, org. 1880. Churches, 11,398; membership, 2,668,799. The General Organization and 11 others. Pres., Dr. C. D. Pettaaway, 714 West 10th St., Little Rock, Ark.

National Baptist Convention, U. S. A., Inc., founded in 1880, in Montgomery, Alabama, is the oldest and parent convention of Negro Baptists. Churches, 27,369; membership, 6,410,017. Pres. Dr. J. H. Jackson; Gen. Sec., Dr. T. J. Jemison, 915 Spain St., Baton Rouge, La. 70802.

Southern Baptist Convention. In 1845 Southern Baptists withdrew from the General Missionary Convention over the question of slavery and other matters and formed the Southern Baptist Convention, largest of Baptist bodies. Churches in all 50 states are related to the Convention, 2,277 missionaries serve in 66 countries. Churches, 34,147; membership, 11,142,726. Executive Committee, 460 James Robertson Parkway, Nashville, Tenn. 37219. Exec. Sec., Dr. Porter Routh. Boards include Sunday School Board, Nashville, Tenn.; Foreign Mission Board, Richmond, Va.; Home Mission Board, Atlanta, Ga.; Annuity Board, Dallas, Tex.

Church of Christ, Scientist

First organized in 1879, under the direction of Mary Baker Eddy, the Christian Science Church took its present form in 1892 as the Mother Church, the First Church of Christ, Scientist, in Boston, Mass. Today there are 3,272 branches in 58 countries. There are 2,438 Christian Science churches in the United States. Christian Science regards the Bible as its ultimate authority and includes spiritual healing as part of its teachings.

The denomination supports radio and television programs, charitable institutions, and a worldwide Board of Lectureship. It also maintains the Christian Science Publishing Society which publishes the Christian Science Monitor and various religious periodicals. The affairs of the denomination are administered by the Christian Science Board of Directors, 107 Falmouth St., Boston, Mass. 02115. Pres., Mrs. Beatrice Thayer Pittman.

Disciples of Christ

The Christian Churches (Disciples of Christ) is an American communion arising out of a concern for Christian unity expressed by Barton W. Stone in 1804 and by Thomas Campbell and his son Alexander, in 1809. The first churches were Cane Ridge in Ky. and Brush Run near Washington, Pa. The "Christians" of Kentucky and the "Disciples" of Pennsylvania and Virginia united in 1832. The first General Convention was held in 1849. A missionary society was formed. The movement is congregational in government. Churches in the United States and Canada number 8,046; membership is 1,883,263. The communion is served by the International Convention, 16 member bodies, 40 state societies and 34 educational institutions. Exec. Sec., Dr. A. Dale Fiers, 221 Ohmer Ave., Indianapolis, Ind. 46219.

Evangelical Churches

The Evangelical and Reformed Church. See *United Church of Christ*.

The Evangelical United Brethren Church. See *United Methodist Church*.

Lutherans

The church was started in Europe during the Protestant Reformation by the followers of Martin Luther.

Lutheranism was introduced into the United States by Dutch colonists on Manhattan, later by Swedes on the Delaware, by Palatines in Pennsylvania and New York and by Salzburger in Georgia.

The American Lutheran Church was organized during a constituting convention at Minneapolis, Minn., in April 1960, merging the American Lutheran Church, The Evangelical Lutheran Church, and United Evangelical Lutheran Church. The merger brought together Lutherans of Danish, German and Norwegian heritage. A fourth body, The Lutheran Free Church, joined with The American Lutheran Church in February 1963. The American Lutheran Church has 2,576,027 members. Headquarters at 422 So. 5th St., Minneapolis. Dr. F. A. Schlotz is president. Regional offices in Chicago, Dallas, Minneapolis, Palo Alto and Washington, D. C. The 4,906 congregations are divided territorially into 18 districts in the U. S. The foreign mission program involves 670 missionaries (including wives) on 12 fields in South America, Africa and Asia. The church's Board of Publication operates the Augsburg Publishing House, 426 So. 5th St., Minneapolis 55415.

Augustana Evangelical Lutheran Church. See *The Lutheran Church in America*.

The Lutheran Church-Missouri Synod was organized in 1847. It is the leader in the conservative group among the Lutherans with 6,774 churches and a membership of 3,009,169. The Synod is divided into 37 districts (32 in the U. S.; 3 in Canada; 2 in South America). The Synod conducts a worldwide mission program and fosters a system of ministerial and teacher training to staff its congregations and its 1,326 parochial schools. Affiliated are the Lutheran Laymen's League, Lutheran Women's Missionary League, and Walther League (a young people's organization). Valparaiso University, Valparaiso, Ind., is supported and controlled by the Lutheran University Assn. Headq. for the Synod; 210 No. Broadway, St. Louis, Mo.

The Lutheran Church in America was organized June 28, 1962 by the consolidation of the American Evangelical Lutheran Church, the Augustana Evangelical Lutheran Church, the Finnish Evangelical Lutheran Church and The United Lutheran Church in America. With 3,288,037 baptized members, the new body is the largest of the Lutheran churches in the United States. The Lutheran Church in America has 6,242 congregations, organized in 33 constituent synods. The headquarters of the denomination is at 231 Madison Ave., New York, N. Y. 10016, and principal agencies are located at 2900 Queen Lane, Philadelphia, Pa., 327 South LaSalle St., Chicago, Ill., and the Pillsbury Building, Minneapolis, Minn.

Wisconsin Evangelical Lutheran Synod, organized in 1850. It has 908 congregations, 368,000 members. Formerly the second largest body of the Synodical Conference, Wisconsin withdrew from the Conference in August 1963.

Methodists

The name Methodist was originally given to Charles and John Wesley and several other Oxford students, in 1729. It is thought that the term was selected due to the exact and "methodical" manner in which they performed various engagements which a sense of Christian duty induced them to undertake. The Methodist movement was carried to America in 1760 by emigrants from Ireland. Methodist bodies in the United States (20) have a membership of 13,273,417.

The United Methodist Church has 42,165 churches and 11,035,313 members. The present organization of The United Methodist Church was formed Apr. 23, 1968, in Dallas, Tex., by the union of The Methodist Church and The Evangelical United Brethren Church. The two churches shared a common historical and spiritual heritage. The Methodist Church resulted in 1939 from the unification of three branches of Methodism—the Methodist Episcopal Church, the Methodist Episcopal Church, South, and the Methodist Protestant Church. The Methodist movement began in 18th Century England under the preaching of John Wesley, but the

so-called Christmas Conference of 1784 in Baltimore is regarded as the date on which the organized Methodist Church was founded as an ecclesiastical organization. It was there that Francis Asbury was elected the first bishop in this country. The Evangelical United Brethren Church was formed in 1946 with the merger of the Evangelical Church and the Church of the United Brethren in Christ, both of which had their beginnings in Pennsylvania in the evangelistic movement of the 18th and early 19th centuries. Philip William Otterbein and Jacob Albright were early leaders of this movement among German-speaking settlers of the Middle Colonies.

The supreme policy-making body of The United Methodist Church is the quadrennial General Conference. Principal agencies are in the following cities: New York, N. Y., Evanston, Ill., Nashville, Tenn., Washington, D. C., Dayton, O., and Lake Junaluska, N. C.

African Methodist Episcopal Church, incorporated 1816 under Pennsylvania laws, is second largest of the Methodist bodies. Churches, 6,105, membership, 1,405,000. President, Council of Bishops, Bishop H. Thomas Frimm, 1724 Villa Place, Nashville, Tenn.

Presbyterians

Presbyterianism is a system of representative church government by presbyters, or elders. John Calvin (1509-1564) has been regarded as the founder of Presbyterianism. Presbyterians were among the earliest colonists of America. Their first church was established about 1640 and the first presbytery in 1706. Nine Presbyterian bodies in the United States have a membership of 4,410,000.

The **United Presbyterian Church in the U.S.A.**, largest of the Presbyterian bodies, was formed on May 28, 1958 by a merger of the Presbyterian Church in the U.S.A. and the United Presbyterian Church of North America. It has 8,877 churches and 3,268,761 members. Offices of the General Assembly, Board of Christian Education and Board of Pensions, Witherspoon Bldg., Philadelphia, Pa. 19107. Offices of the General Council, Board of Nat'l. Missions, Commission on Ecumenical Mission and Relations and Council on Theological Education, 475 Riverside Dr., New York, N. Y. 10027.

Presbyterian Church in the United States, which established a separate existence in 1861, is sometimes mislabeled the Southern Church. Churches, 3,987, membership, 960,776. Office of the Gen. Assembly, 341 Ponce de Leon Ave., N.E., Atlanta, Ga. 30308. Moderator, Rev. Dr. Patrick D. Miller; Stated Clerk, Rev. Dr. James A. Millard, Jr.

Protestant Episcopal Church

An American religious denomination directly descended from the Church of England. Brought to America by the Jamestown colonists in 1607. Separated from English church and adopted present name in 1789. Constitutional amendment to recognize "The Episcopal Church" as an alternative name was adopted in 1967. Churches, 7,546; membership, 3,588,435. Headquarters of the Exec. Council, 815 Second Ave., N. Y., N. Y. Presiding Bishop, Rt. Rev. John E. Hines; Sec. of Gen. Convention and Exec. Council, Rev. Canon Charles M. Guilbert.

United Church of Christ

Formed in 1957 by a union of the General Council of the Congregational Christian Church and the Evangelical and Reformed Church. It is the first union in the United States of churches with different forms of church government—congregational and modified presbyterian—and different historical backgrounds. Congregationalism was brought to America by both the Pilgrims of the "Mayflower" and the Puritans of the Mass. Bay Colony. Eventually it became the dominant form of church organization in New England. The Evangelical and Reformed Church was started in 1934 with the union of the Evangelical Synod of North America and the Reformed Church in the U. S.

A constitution for the United Church of Christ was declared in force in July, 1961. The denomination has 2,052,857 members in 6,909 local congregations. The United Church Board for World Ministries has 450 missionaries and other personnel at work in 30 countries. In the United States, the United Church of Christ is active in Christian education, church extension, health and welfare, mass communication, race relations, and social action. Headquarters of United Church of Christ, 297 Park Ave. So., New York, N. Y. 10010; Office of Communication, 289 Park Ave. So., New York, N. Y. United Church Board for Homeland Ministries, 287 Park Ave. So. United Church Board for World Ministries, 475 Riverside Dr., New York, N. Y. 10027.

Latter-Day Saints

The churches of the Latter-Day Saints do not consider themselves Protestants because they had no part in the 16th century Protestant Reformation.

The **Church of Jesus Christ of Latter-Day Saints**, often called the "Mormon" church, regards the Bible, the Book of Mormon, the Doctrine and Covenants, and the Pearl of Great Price as the word of God. The church was organized Apr. 6, 1830, at Fayette, Seneca Co., N. Y., by Joseph Smith, first president. After settling in Kirtland, O., and Independence, Mo., the members located in Nauvoo, Ill., in 1839 to escape persecution. Attacks by a mob led to the fatal shooting of Joseph Smith and his brother Hyrum while they were in the Carthage, Ill., jail for protection from the mob, June 27, 1844. Beginning in 1847 many members under the leadership of Brigham Young, moved by covered wagons across the Plains to Utah.

The church is divided into stakes, wards, branches and missions. Highest authority is the First Presidency, consisting of the President and 5 counselors, assisted by 12 apostles. David O. McKay is the 9th and current President. Total membership, 2,614,340. Headq. at 47 East South Temple St., Salt Lake City, Utah.

Following the death of Joseph Smith in 1844, the scattered congregations that did not leave for the Far West formed the **Reorganized Church of Jesus Christ of Latter-Day Saints**, with the founder's son, Joseph Smith, as president. Churches, 1,100 (U. S. and Canada); membership, 196,512 (U. S., Canada and 18 foreign missions). Hq., the Auditorium, Independence, Mo. 64051.

Religious Population of the World

The three Missionary Districts of Central, Southern, and Southwestern Brazil became an independent branch of the Anglican Communion in 1965 fulfilling the action of the General Convention of 1964.

Catholics, Protestants Prepare for a Common Bible

A major step toward publication of a common Christian Bible was taken in 1968 by the Roman Catholic Church and the United Bible Societies, a mostly Protestant organization.

Experts of the two bodies culminated nearly 5 years of work with publication on June 1 of a set of guiding principles for interfaith cooperation in translating the Bible.

The document prepared the way for a Bible which will include new translations of ancient basic texts with analyses, to be published in all the world's languages and dialects.

The project followed a decision of the United Bible Societies to produce Bibles which would meet the canonical requirements of all churches, and a recommendation by the Ecumenical Council Vatican II, for considering cooperation with other Christians in a new Bible translation.

Protestant Episcopal Calendar and Altar Colors

White—From the First Service (First Vespers) of Christmas Day to the Octave of Epiphany, inclusive (except on the Feasts of Martyrs); on Maundy Thursday (for the celebration); from the First Service of Easter Day to the Vigil of Pentecost (except on Feasts of Martyrs and Rogation Days); on Trinity Sunday, Conversion of St. Paul, Purification, Annunciation, St. John Baptist, St. Michael, All Saints, Saints not Martyrs, and Patron Saints (Transfiguration and Dedication of Church).

Red—From First Vespers of Pentecost to the First Vespers of Trinity Sunday (which includes Ember Days); Holy Innocents, and Feasts of all Martyrs, Apostles and Evangelists.

Violet—From Septuagesima to Maundy Thursday; Easter Even; Advent Sunday to Christmas Eve, Vigils, Ember Days (except in Whitsun Week); and Rogation Days.

An alternate Lenten color scheme: **Violet**—from Septuagesima to the Tuesday before Ash Wednesday; **Lenten White**—from Ash Wednesday to the Saturday after Fourth Lent; and **Crimson**—from Passion Sunday (Fifth Lent) to Easter Even (all inclusive).

Black—Good Friday and at funerals. **Green**—All other days.

In the Protestant Episcopal Church the days of fasting are Ash Wednesday and Good Friday. Other days of abstinence are the 40 days of Lent, the Ember Days, and all Fridays of the year except Christmas Day and the Epiphany and any Friday which may fall between them. Ember Days (12 annually at about the beginning of the four seasons) are days of abstinence and prayer for ordnands and the increase of the ministry. They fall on the Wednesday, Friday, and Saturday after the first Sunday in Lent, the Feast of Pentecost (Whitsunday), September 14, and December 13. Rogation Days are the three days from Rogation Sunday (the fifth after Easter) to Ascension Day, and are days of solemn supplication for God's blessing upon the fields and harvests of the world.

Islamic (Moslem) Calendar 1969-1970

The Islamic calendar, often referred to as Mohammedan, is a lunar reckoning from the year of the hejira, 622 A.D., when Mohammed fled from Mecca. It runs in cycles of 30 years, of which the second, 5th, 7th, 10th, 13th, 16th, 18th, 21st, 24th, 26th and 29th are leap years. Common years have 354 days, leap years 355, the extra day being added to the last month, Zu'hijjah. Except for this case, the 12 months beginning with Muharram have alternately 30 and 29 days. The month begins at sunset on the day before that given in the tables. *Leap year, 30 days.

Year	Name of the Month	Month Begins	Year	Name of the Month	Month Begins
1388	Zu'lkadab...	Jan. 20, 1969	1389	Rajab	Sept. 13, 1969
1388	Zu'hijjah...	Feb. 19, 1969	1389	Shaban	Oct. 13, 1969
1389	Muharram (New Year)...	Mar. 20, 1969	1389	Ramadan	Nov. 11, 1969
1389	Safar	Apr. 19, 1969	1389	Shawal	Dec. 11, 1969
1389	Rabia I	May 18, 1969	1389	Zu'lkadab	Jan. 9, 1970
1389	Rabia II	June 17, 1969	1389	Zu'hijjah	Feb. 8, 1970
1389	Jumada I	July 16, 1969	1390	Muharram (New Year)...	Mar. 9, 1970
1389	Jumada II	Aug. 15, 1969			

Chronological List of Popes

Source: *Annuario Pontificio*. Table lists year of consecration of each Pope.

The Roman Catholic Church names the Apostle Peter as founder of the Church in Rome. He arrived there c. 42, was martyred there c. 67, and raised to sainthood.

The Pope's temporal title is: Sovereign of the State of Vatican City.

The Pope's spiritual title is: Bishop of Rome, Vicar of Jesus Christ, Successor of St. Peter, Prince of the Apostles, Supreme Pontiff of the Universal Church, Patriarch of the West, Primate of Italy, Archbishop and Metropolitan of the Roman Province and Sovereign of the State of Vatican City.

Anti-Popes are in *Italics*. Anti-Popes were illegitimate claimants of or pretenders to the papal throne.

Roman Catholic Days of Obligation, Fast and Abstinence, 1969

Days of Obligation in the United States are Octave of the Birth of Our Lord, January 1; Ascension Day, May 15; Assumption of the Blessed Virgin Mary, August 15; All Saints' Day, November 1; Immaculate Conception of the Blessed Virgin Mary, December 8; Christmas Day, December 25. Also all Sundays.

Days of Fast: Ash Wednesday, Feb. 19, and Good Friday, April 4. The law binds Catholics from the completion of their 21st year to the beginning of their 60th; i.e., from the ages of 21 to 59.

Days of Abstinence: Ash Wednesday, Good Friday and other Fridays in Lent. The law binds Catholics 14 years of age and older.

Roman Catholic Hierarchy

The Ten Commandments

The Ten Commandments are an integral part of the Judaean-Christian ethical system and represent the divine law, engraved on two stone tablets and given to Moses by God atop Mt. Sinai. Two varying versions of the Ten Commandments, or Decalogue, appear in the Bible. One is in Exodus 20, the other in Deuteronomy 5. The numbering of the Commandments differs in various religions. The following text is that of Exodus 20 as it appears in the Holy Bible, Revised Standard Version:

1—I am the Lord your God, who brought you out of the land of Egypt, out of the house of bondage. You shall have no other gods before me.

2—You shall not make for yourself a graven image, or any likeness of anything that is in heaven above, or that is in the earth beneath, or that is in the water under the earth; you shall not bow down to them or serve them; for I the Lord your God am a jealous God, visiting the iniquity of the fathers upon the children to the third and the fourth generation of those who hate me, but showing steadfast love to thousands of those who love me and keep my commandments.

3—You shall not take the name of the Lord your God in vain; for the Lord will not hold him guiltless who takes his name in vain.

4—Remember the sabbath day, to keep it holy. Six days you shall labor, and do all your work; but the seventh day is a

sabbath to the Lord your God; in it you shall not do any work, you, or your son, or your daughter, your manservant, or your maidservant, or your cattle, or the sojourner who is within your gates; for in six days the Lord made heaven and earth, the sea, and all that is in them, and rested the seventh day; therefore the Lord blessed the sabbath day and hallowed it.

5—Honor your father and your mother, that your days may be long in the land which the Lord your God gives you.

6—You shall not kill.

7—You shall not commit adultery.

8—You shall not steal.

9—You shall not bear false witness against your neighbor.

10—You shall not covet your neighbor's house; you shall not covet your neighbor's wife, or his manservant, or his maidservant, or his ox, or his ass, or anything that is your neighbor's.

*Archdiocese of New York includes the boroughs of Manhattan, Bronx and Richmond, and 7 counties of eastern New York. Cities and dioceses of the same name do not have the same areas and in some cases the population of the diocese is greater than that of the city because of its greater area.

**Military Ordinariate under jurisdiction of His Excellency Archbishop Cooke (N. Y.) as Military Vicar.

The first 29 dioceses are archdioceses; there are 125 other dioceses.

Cardinals 6 (Baltimore, Boston, Chicago, Los Angeles, Philadelphia, and Washington). Archbishops 26, Bishops 235, Abbots 53, Priests 59,803, Brothers 12,261, Sisters 176,341, and 18,064 parishes with 17,500 pastors. There are 437 religious order seminaries with 39,838 seminarians; 305 colleges with 433,960 students; 1,407 high schools with 694,996 students; 868 private high schools with 394,276 students; 10,375 elementary schools with 4,089,826 students; 382 private elementary schools with 75,678 students; 103 protective institutes with 8,110 students; full time teachers 206,959; 239 orphanages and infant asylums with 46,425 dependent children; 788 general hospitals, 142 special hospitals, 19,180,735 patients treated annually; 420 homes for the aged. Converts (1967) 110,717.

A lengthy dispute over the date for the celebration of Easter was settled by the first Council of the Christian Churches at Nicea, in Asia Minor, in 325 A.D. The council ruled that Easter would be observed on the first Sunday following the 14th day of the Paschal Moon, referred to as the Paschal Full Moon. The Paschal Moon is the first moon whose 14th day comes on or after March 21. Dates of the Paschal Full Moon, which are not necessarily the same as those of the real or astronomical full moon, are listed in the table below with an explanation of how to compute the date of Easter.

If the Paschal Full Moon falls on a Sunday, then Easter is the following Sunday. The earliest date on which Easter can fall is March 22; it fell on that date in 1761 and 1818 but will not do so in any year in the 20th Century. The latest possible date for Easter is April 25; it fell on that date in 1943 and will do so next in 2038.

Lent begins on Ash Wednesday, which comes 40 days previous to Easter Sunday, not counting

Sundays. Originally it was a period of but 40 hours. Later it comprised 30 days of fasting, omitting all the Sundays and also all the Saturdays except one. Pope Gregory added Ash Wednesday to the fast, together with the remainder of that week.

The last seven days of Lent constitute Holy Week, beginning with Palm Sunday. Passion Week precedes Holy Week. The last Thursday—Maundy Thursday—commemorates the institution of the Eucharist.

The following day, Good Friday, commemorates the day of the crucifixion. Mohammedans celebrate Friday as the day of Adam's creation.

Easter is the chief festival of the Christian year, commemorating the resurrection of Christ. It occurs about the same time as the ancient heathen Roman celebration of the Vernal Equinox, the arrival of Spring. In the second century, A.D., Easter Day was among Christians in Asia Minor, the 14th of Nisan, the seventh month of the Jewish calendar. The Christians in Europe observed the nearest Sunday.

Date of Paschal Full Moon, 1900-2199

The Golden Number, used in table, is greater by unity (one) than the remainder obtained upon dividing the given year by 19; for example: 13 is the Golden Number for the year 1969, from the table the date of Paschal Full Moon is Apr. 2 and this being Wednesday, Easter Sunday is on Apr. 6.

Golden Number	Date	Golden Number	Date	Golden Number	Date	Golden Number	Date
1	April 14	6	April 18	11	Mar. 25	16	Mar. 30
2	April 3	7	April 8	12	April 13	17	April 17
3	Mar. 23	8	Mar. 28	13	April 2	18	April 7
4	April 11	9	April 16	14	Mar. 22	19	Mar. 27
5	Mar. 31	10	April 5	15	April 10		

National Council of Churches

The National Council of the Churches of Christ in the U. S. A. is a cooperative federation of 33 Protestant and Orthodox churches which seeks to advance programs and policies of mutual interest to its members. The NCC was formed in 1950 by the merger of 12 inter-denominational agencies. The Council's member churches now have an aggregate congregation totaling approximately 42,000,000. The NCC is not a governing body and has no control over the policies or operations of any

church belonging to it. The Southern Baptist Convention and the Lutheran Church-Missouri Synod have chosen not to join the NCC. The work of the Council is divided into 4 Divisions—Christian Life and Mission, Christian Education, Overseas Ministries and Christian Unity. The chief administrative officer of the NCC is Dr. R. H. Edwin Espy. The president is Dr. Arthur S. Flemming. The main office is located at 475 Riverside Drive, New York, N. Y. 10027.

Greek Orthodox Church Calendar, 1969

Date	Holy Days	Date	Holy Days
Jan. 1	The Circumcision of Christ—The Feastday of St. Basil New Year's Day	June 29	Feastday of Saints Peter and Paul
Jan. 6	The Epiphany, The Baptism of Jesus Christ The Sanctification of the Waters	June 30	Feastday of the Twelve Holy Apostles
Jan. 7	Feastday of St. John the Baptist	Aug. 6	The Transfiguration
Jan. 30	Feastday of Three Hierarchs: St. Basil, St. Gregory and St. John Chrysostom	Aug. 15	The Dormition of the Virgin Mary
Feb. 24	Beginning of Easter lenten period	Aug. 29	Beheading of St. John the Baptist
Mar. 25	The Annunciation of the Virgin Mary	Sept. 1	Beginning of the Church Year
Apr. 6	Easter Sunday	Sept. 8	Nativity of the Virgin Mary
Apr. 7-13	Holy Easter Week	Sept. 14	The Elevation of the Holy Cross
Apr. 11	Holy Friday—The Burial of Christ	Oct. 23	The Feast of St. James (Iakovos)
Apr. 13	Easter Sunday—The Resurrection of Christ	Nov. 15	The beginning of the Christmas Lent
May 22	The Ascension	Nov. 21	Presentation of Blessed Virgin Mary
June 1	Pentecost Sunday	Nov. 30	The Feast of St. Andrew, Founder Ecumenical Patriarchate of Constantinople.
		Dec. 25	Christmas Day: The Birth of Jesus Christ.

The dates above are according to the Gregorian calendar, adopted by the Greek Church in 1923. First Greek Orthodox church in U. S. founded 1864, in New Orleans, La.

Jewish Holidays, Festivals and Fasts

The months of the Jewish year are: 1 Tishri; 2 Chesvan (Also Marchesvan); 3 Kislev; 4 Tebet (Also Tebeth); 5 Sebat (Also Shebat); 6 Adar; 6a, added month some years, Adar Shenii (II); 7 Nisan; 8 Iyar; 9 Sivan; 10 Tammuz; 11 Av (also Abh); 12 Elul.

Lunar Calendar, Chinese New Year's, Vietnamese Tet

The ancient Chinese lunar calendar is divided into 12 months of either 29 or 30 days (compensating for the fact that the mean duration of the lunar month is 29 days, 12 hrs., 44.06 mins.). Every 30 months the calendar is further adjusted by the addition of an extra month.

The Chinese calendar runs on a sexagenary cycle, i.e., 60 years. The cycles 1864-1923 and 1924-1983, with the years grouped under their 12 animal designations, are printed below. The year 1969 is found in the 10th column, under Fowl or Chicken, and is known as a "Year of the Chicken." Similarly, readers can find the animal name for the year of their birth, marriage, etc., in the same chart.

The lunar calendar is still used to set the dates for traditional festivals in the Republic of China (Taiwan), in Chinese communities around the world, and also in Vietnam where the old Chinese calendar was in use for many centuries.

The Chinese New Year, Hsin Nien, and the 3-day Vietnamese New Year festival, Tet, begin at the first new moon after the sun enters Aquarius. The day may fall, therefore, between Jan. 21 and Feb. 19 of the Gregorian calendar. The old-style Chinese year 4667 begins Feb. 17, 1969. The year 4668 begins Feb. 6, 1970. (The date is fixed according to the date of the new moon in Taiwan and Vietnam. Since both are west of the International Date Line, the date may be one day later than that of the new moon in New York.)

Except for marking such traditional festivals, both Vietnam and the Republic of China use the western, Gregorian calendar.

Procedures for Adopting a Child

The United States Government has published factual reports on procedures for adopting a child. They are entitled *The Physician's Part in Adoption*; *The Social Worker's Part in Adoption*; *The Attorney's Part in Adoption*; *Social Workers Look at Adoption and Manual on Intercountry Adoption*; *When You Adopt a Child*; *Legislative Guides for the Termination of Parental Rights and Responsibilities and the Adoption of Children*. The Supt. of Documents, Government Printing Office, Washington, D. C. 20402, supplies information on how to procure these issues.

AWARDS—MEDALS—PRIZES

The Alfred B. Nobel Prize Winners

Alfred B. Nobel, inventor of dynamite, who died Dec. 10, 1896, bequeathed \$9,000,000, the interest to be distributed yearly to those who had most benefited mankind during the preceding year.

Awards for physics and chemistry are made by the Swedish Academy of Science; medicine or physiology by the Stockholm Faculty of Medicine; literature by the Swedish Academy of Literature; peace by five persons elected by the Norwegian Parliament (Storting). The Fund is managed by a board of directors, the head of which is appointed by the Swedish Government.

Pulitzer Prizes in Journalism, Letters and Music

The Pulitzer Prizes were endowed by Joseph Pulitzer (1847-1911), publisher of The World, New York, N. Y., in a bequest to Columbia University, New York, N. Y., and are awarded annually by the trustees of the university on recommendation of the Advisory Board on Pulitzer Prizes for work done during the preceding year. Secretary of the Advisory Board is John Hohenberg of Columbia Univ.

Prizes in Journalism are \$1,000 (originally \$500) in each category, except Meritorious Public Service for which a gold medal is given. Prizes in Letters, in each category, and Prize in Music are \$500.

No awards given for years omitted.

PULITZER PRIZES IN JOURNALISM

MERITORIOUS PUBLIC SERVICE

For disinterested and meritorious public service by a United States newspaper.

- 1918—The New York Times. Also special award to Minna Lewinson and Henry Beetle Hough.

- 1957—Chicago Daily News.
- 1958—Arkansas Gazette, Little Rock.
- 1959—Utica (N. Y.) Observer-Dispatch and Utica Daily Press.
- 1960—Los Angeles Times.
- 1961—Amarillo (Tex.) Globe-Times.
- 1962—Panama City (Fla.) News-Herald.
- 1963—Chicago Daily News.
- 1964—St. Petersburg (Fla.) Times.
- 1965—The Hutchinson (Kans.) News.
- 1966—Boston Globe.
- 1967—The Louisville Courier-Journal and The Milwaukee Journal.
- 1968—The Riverside (Calif.) Press-Enterprise.

REPORTING

This category originally embraced all fields, local, national, and international. Later separate categories were created for the different fields of reporting.

- 1917—Herbert Bayard Swope, The World, N. Y.
- 1918—Harold A. Littlefield, New York Evening Post.
- 1920—John J. Leary, Jr., The World, New York.
- 1921—Louis Seibold, The World, New York.
- 1922—Kirke L. Simpson, Associated Press.
- 1923—Alva Johnston, New York Times.
- 1924—Magner White, San Diego (Calif.) Sun.
- 1925—James W. Mulroy and Alvin H. Goldstein, Chicago Daily News.
- 1926—William Burke Miller, Louisville Courier-Journal.
- 1927—John T. Rogers, St. Louis Post-Dispatch.
- 1929—Paul Y. Anderson, St. Louis Post-Dispatch.
- 1930—Russell D. Owens, New York Times. Also \$500 to W. O. Dapping, Auburn (N. Y.) Citizen.
- 1931—A. B. MacDonald, Kansas City (Mo.) Star.
- 1932—W. C. Richards, D. D. Martin, J. S. Pooler, F. D. Webb, J. N. W. Sloan, Detroit Free Press.
- 1933—Francis A. Jamieson, Associated Press.
- 1934—Rovee Brier, San Francisco Chronicle.
- 1935—William H. Taylor, New York Herald Tribune.
- 1936—Lauren C. Lyman, New York Times.
- 1937—John J. C. Neill, N. Y. Herald Tribune; William L. Laurence, N. Y. Times; Howard W. Blakeslee, A. P.; Gobind Behari Lal, Universal Service and David Dietz, Scripps-Howard Newspapers.
- 1938—Raymond Sprigle, Pittsburgh Post-Gazette.
- 1939—Thomas L. Stokes, Scripps-Howard Newspaper Alliance.
- 1940—S. Burton Heath, New York World-Telegram.
- 1941—Westbrook Pegler, New York World-Telegram.
- 1942—Stanton Delaplane, San Francisco Chronicle.

1943—George Weller, Chicago Daily News.

1944—Paul Schoenstein, N. Y. Journal-American.

1945—Jack S. McDowell, San Francisco Call-Bulletin.

1946—William L. Laurence, New York Times.

1947—Frederick Woltman, N. Y. World-Telegram.

1948—George E. Goodwin, Atlanta (Ga.) Journal.

1949—Malcolm Johnson, The Sun, New York.

1950—Meyer Berger, New York Times.

1951—Edward S. Montgomery, San Francisco Examiner.

1952—Geo. de Carvalho, San Francisco Chronicle.

Since 1953 two prizes are given for local reporting: (1) to meet a deadline; (2) free of deadline.

1953—(1) Providence (R. I.) Journal and Evening Bulletin; (2) Edward J. Mowery, N. Y. World-Telegram & Sun.

1954—(1) Vicksburg (Miss.) Sunday Post-Herald;

(2) Alvin Scott McCoy, Kansas City (Mo.) Star.

1955—(1) Mrs. Caro Brown, Alice (Tex.) Daily Echo; (2) Roland K. Towery, Cuero (Tex.) Record.

1956—(1) Lee Hills, Detroit Free Press; (2) Arthur Daley, New York Times.

1957—(1) Salt Lake Tribune, Salt Lake City, Utah; (2) Wallace Turner and William Lambert, Portland Oregonian (\$1,000 each).

1958—(1) Fargo (N. D.) Forum; (2) George

Beveridge, Evening Star, Washington, D. C.

1959—(1) Miss Mary Lou Werner, Evening Star, Washington, D. C.; (2) John Harold Brislin, Scranton (Pa.) Tribune and The Scrantonian.

1960—(1) Jack Nelson, Atlanta (Ga.) Constitution; (2) Miriam Ottenberg, Evening Star, Washington, D. C.

1961—(1) Sanche de Granont, N. Y. Herald Tribune; (2) Edgar May, Buffalo Evening News.

1962—(1) Robert D. Mullins, Desert News, Salt Lake City; (2) George Bliss, Chicago Tribune.

1963—(1) Shared by Sylvan Fox, William Longgood, and Anthony Shannon, N. Y. World-Telegram & Sun; (2) Oscar Griffin, Jr., Pecos (Tex.) Independent and Enterprise.

1964—(1) Norm L. C. Miller, Wall Street Journal; (2) Shared by James V. Magee, Albert V. Gaudiosi, and Frederick A. Meyer, Philadelphia Bulletin.

1965—(1) Melvin H. Ruder, Hungry Horse News (Columbia Falls, Mont.); (2) Gene Goltz, Houston, Post.

1966—(1) Los Angeles Times staff; (2) John A. Frasca, Tampa (Fla.) Tribune.

1967—(1) Robert V. Cox, Chambersburg (Pa.) Public Opinion; (2) Gene Miller, Miami Herald.

1968—Detroit Free Press; (2) J. Anthony Lukas, N. Y. Times.

NATIONAL REPORTING

1942—Louis Stark, New York Times.

1944—Dewey L. Fleming, Baltimore Sun.

1945—James B. Reston, New York Times.

1946—Edward A. Harris, St. Louis Post-Dispatch.

1947—Edward T. Foillard, Washington Post.

1948—Bert Andrews, New York Herald Tribune;

Nat S. Finney, Minneapolis Tribune.

1949—Charles P. Trussell, New York Times.

1950—Edwin O. Guthman, Seattle (Wash.) Times.

1952—Anthony Leviero, New York Times.

1953—Don Whitehead, Associated Press.

1954—Richard Wilson, Cowles Newspapers.

1955—Anthony Lewis, Washington Daily News.

1956—Charles L. Bartlett, Chattanooga Times.

1957—James Reston, New York Times.

1958—Reiman Morin, A. P.; Clark Mollenhoff, Des Moines Register & Tribune (\$1,000 each).

1959—Howard Van Smith, Miami (Fla.) News.

1960—Vance Trimble, Scripps-Howard, Washington, D. C.

1961—Edward R. Cony, Wall Street Journal.

1962—Nathan G. Caldwell and Gene S. Graham, Nashville Tennessean.

1963—Anthony Lewis, New York Times.

1964—Merriman Smith, U.P.

1965—Louis M. Kohlmeier, Wall Street Journal.

1966—Haynes Johnson, Evening Star, Washington, D. C.

1967—Monroe W. Karmin and Stanley W. Penn, Wall Street Journal.

1968—Howard James, Christian Science Monitor; Nathan K. Kotz, Des Moines Register.

INTERNATIONAL REPORTING

1942—Laurence Edmund Allen, Associated Press

1943—Ira Wolfert, No. Am. Newspaper Alliance.

1944—Daniel DeLuce, Associated Press.

1945—Mark S. Watson, Baltimore Sun.

- 1946—Homer W. Bigart, New York Herald Tribune.
 1947—Eddy Gilmore, Associated Press.
 1948—Paul W. Ward, Baltimore Sun.
 1949—Price Day, Baltimore Sun.
 1950—Edmund Stevens, Christian Science Monitor.
 1951—Keyes Beech, Chicago Daily News; Homer Bigart and Marguerite Higgins, New York Herald Tribune; Reiman Morin and Don Whitehead, A. P.; Fred Sparks, Chicago Daily News.

Sylvanus Thayer Medal, by the Association of Graduates, U. S. Military Academy: Bob Hope, for outstanding service to the nation.

Thomas D. White National Defense Award, by the Air Force Academy for contribution to the national defense and security of the country: Gen. Carl Spaatz.

Miss America Pageant of Atlantic City, N. J.

The Miss America Pageant of Atlantic City, N. J., is a resort-promotion device developed since 1921, attracting thousands of visitors and getting national newspaper, radio and television coverage. Miss Ruth McCandless is Executive Secretary. Local and state contestants are chosen by civic, educational and service organizations. A contestant must have a high school education and may come from any of the 50 states. The Scholarship Foundation, supported by industrial leaders, supplies \$58,000 at the national finals, while \$500,000 is awarded at 3,500 local and state pageants leading up to the finals. The 1968 finals were held at Atlantic City Sept. 2-8.

MISS AMERICA PAGEANT CONTESTANTS

MISS AMERICA OF 1969 (\$10,000 Scholarship)

Miss Illinois—Judith Anne Ford, Belvidere.

RUNNERS UP

Miss Massachusetts—Catherine Monroe, Lynnfield, 1st—\$6,000 scholarship.

Miss Iowa—Susan Alane Thompson, Des Moines, 2nd—\$3,000 scholarship.

Miss Oregon—Marjean Kay Langley, Milton-Freewater, 3rd—\$2,500 scholarship.

Miss Indiana—Katherine Virginia Field, Indianapolis, 4th—\$2,000 scholarship.

SEMI-FINALISTS (\$1,500 Scholarship)

Miss Alabama—Dellynne Cole Catching, Birmingham.

Miss Florida—Linda Fitts, Panama City.

Miss New York—Patricia Joy Burmeister, Portville.

Miss Tennessee—Brenda Joan Seal, Kingsport.

Miss Virginia—Cherie Suzanne Davis, Clifton Forge.

TALENT AWARDS (\$1,000 Scholarship)

Most Talented in All Other Fields—Miss California, Sharon Kay Terrill, Torrance.

Most Talented Classical Singer—Miss Connecticut, Gunnell L. Ragone, West Hartford.

Most Talented Popular Singer—Miss North Carolina, Elisa Annette Johnson, New Bern.

Most Talented Actress (Serious)—Miss South Dakota, Charlotte Ann McKay, Vermillion.

Most Talented Dancer—Miss Vermont, Elizabeth Ann Sackler, Putney.

Most Talented Musician—Miss Wyoming, Carol Ann Ross, Burns.

Miss Congeniality—Miss New Mexico, Karen Jan Maciolek, Albuquerque.

Judges Special Award—Miss Idaho, Karen Renee Ryder, Weiser.

Preliminary Talent Winners—Misses Florida, Illinois and Virginia.

Preliminary Swimsuit Winners—Misses Alabama, Illinois and Iowa.

ALL OTHER CONTESTANTS

(\$500.00 Scholarships)

Miss Alaska—Jane Allison Haycraft, Fairbanks.

Miss Arizona—Linda Johnson, Warren.

Miss Arkansas—Helen Rose Gennings, Batesville.

Miss Colorado—Pamela Sue Kerker, Sterling.

Miss Delaware—Gayle Freeman, Wilmington.

Miss Georgia—Burma Ann Davis, Warner Robbins.

Miss Hawaii—Deborah Ynez Gima, Kailua, Oahu.

Miss Kansas—Jane Kathryn Bair, Parsons.

Miss Kentucky—Janet Sue Hatfield, Jeffersonton.

Miss Louisiana—Susanne Gail Saunders, Shreveport.

Miss Maine—Brenda Renee Verceles, Bangor.

Miss Maryland—Karen Ann Hansen, College Park.

Miss Michigan—Darlene Joyce Kurant, Muskegon.

Miss Minnesota—Mary Louise Williams, Minneapolis.

Miss Mississippi—Mary Linda Mills, Hattiesburg.

Miss Missouri—Kathleen Paulette Goff, DeSoto.

Miss Montana—Karen Sue Frank, Park City.

Miss Nebraska—Diane Lorraine Boldt, Omaha.

Miss Nevada—Sharon Jane Davis, Reno.

Miss New Hampshire—Michelle Sharon Godfrey, Pease A.F.B.

Miss New Jersey—Linda Ann Wilmer, Laurel Springs.

Miss North Dakota—Virginia Lee Hansen, Bismark.

Miss Ohio—Leslyn Anita Hipple, Louisville.

Miss Oklahoma—Beverly Jeanne Drew, Harrah.

Miss Pennsylvania—Susan Robinson, Hershey.

Miss Rhode Island—Arlene Lois Pinto, Warwick.

Miss South Carolina—Rebecca Louise Smith, Clover.

Miss Texas—Shirley Diane Huggins, Tyler.

Miss Utah—Kathleen Frances Wood, Salt Lake City.

Miss Washington—Joyce Kay Stepanek, Issaquah.

Miss West Virginia—Charlotte Delana Warwick, Charleston.

Miss Wisconsin—Marilyn Kay Brahmsteadt, Wisc. Rapids.

AVIATION

Huge Aviation Increase by 1979 Forecast by Federal Agency

The Federal Aviation Administration, in its latest multiyear projections, forecast a doubling, tripling, and even quadrupling of major indicators of aviation activity in the United States by 1979.

According to the FAA, airline passengers will more than triple, from 126,000,000 in fiscal 1967 to 444,000,000 in 1979. Revenue passenger miles flown by the airlines will nearly quadruple, from 86 billion in 1967 to 342 billion in 1979. The airline fleet will increase from 2,272 aircraft to 3,860.

General aviation (non-airline) flying will show similar increases. The general aviation fleet will almost double from 104,706 aircraft as of Jan. 1, 1967, to 203,000 at the beginning of 1979. General aviation flying hours will increase from 21,900,000 hours to 40,500,000.

Use of jet fuel and aviation gasoline in the United States will more than triple, increasing from a total of 5.403 billion gallons in 1967 to 17.7 billion gallons in 1979. Jet fuel consumption will increase from 4.697 billion gallons to 16.890 billion. Use of aviation gasoline will increase from 706,000,000 gallons to 810,000,000.

Civil aircraft production will more than double from 15,171 aircraft in 1967 to 32,480 in 1979. Airline transport production will decrease from 372 to 280 aircraft, while general aviation aircraft production will increase from 14,799 aircraft to 32,200 by 1979. Aircraft engine production will increase from 20,812 units to 46,300 in the same time period.

Busiest Control Towers

The 10 busiest FAA control towers all reported more than 400,000 operations during 1967. The top 10 were: O'Hare International, Chicago—643,787 operations; Opa Locka, Fla.—634,799; Van Nuys, Calif.—496,564; Ft. Lauderdale, Fla.—495,874; Long Beach, Calif.—484,863; Los Angeles International—482,774; Kennedy International—481,458; Miami International—446,867; Denver International (Stapleton)—444,910; San Jose Municipal (Calif.)—410,311.

The annual FAA Air Traffic Activity report, released in 1968, showed that flying nearly doubled during the 1957-1967 period, with yearly increases varying from 2% to 19%. In 1967 the FAA's 313 airport traffic control towers (108 more than in 1957) reported a record 49,900,000 takeoffs and landings, nearly twice as many as the 25,100,000 operations reported by 205 FAA towers in 1957. IFR (instrument flight rules) aircraft handled by FAA air route traffic control centers jumped from 8,000,000 in 1957 to 16,600,000 in 1967.

By 1979, according to FAA projections, landings and takeoffs at airports with FAA air traffic control towers are expected to more than triple, jumping to 167,000,000. Part of the huge gain will stem from increased airline and general aviation flying and part from installation of more airport traffic control towers. Cur-

rently there are 311 control towers in operation.

Domestic Air Traffic Increases

During the first half of 1968, scheduled domestic airline passenger traffic increased 17.4% compared with the corresponding period in 1967, according to the Air Transport Assn. of America. The 11 trunk, 10 local service and 3 helicopter airlines flew 41,385,618,000 revenue passenger miles compared with the 35,262,945,000 flown in the same part of 1967. Available seat miles flown totaled 77,909,621,000, up 25.6% from the 62,027,938,000 of 1967's corresponding period. Passenger load factor (percentage of available seats sold) was 53.1%, down from the 56.9% of the first 6 months of the previous year.

Domestic air cargo carried by U. S. scheduled airlines gained 21.9% during the first half of 1968, compared with the corresponding period of 1967. The 11 trunk, 10 local service and 3 all-cargo carriers carried 1,077,614,000 revenue ton miles of air freight, mail and express service compared with their total of 883,803,000 during the first half of 1967 (a ton mile is one ton flown one mile).

Record Number of U. S. Airports

At the beginning of 1968, U. S. airports numbered a record 9,276, an increase of almost 400 over the total of a year earlier, according to the Federal Aviation Administration. In addition, 452 heliports and 398 seaplane bases brought the total number of landing facilities to a record 10,126. Included were 19 airports in Puerto Rico, 3 in the Virgin Islands, and 5 in the South Pacific. Over 62% of the national total were privately owned.

Texas continued to lead all the states with 900 landing facilities, followed by California with 684. Alaska 626, Pennsylvania 443, Illinois 433, Ohio 397, New York 338, Florida 281, Kansas 266, and Missouri 265. Of the total, 3,149 airports had lighted runways and 3,109 paved runways.

In 1968 the FAA presented its Air Traffic Facility of the Year Awards to the Washington National Airport Tower, the Denver Flight Service Station, and the Oakland Air Route Traffic Control Center for exhibiting "the highest degree of operational efficiency in rendering professional air traffic services" during 1967. The FAA's Director of Air Traffic Service, William M. Fleener, said the winning facilities had made important contributions to operational efficiency, community relations and training of personnel, as well as meeting the agency's high standards of air safety.

50th Anniversary of U. S. Air Mail

The 50th anniversary of the beginning of United States Air Mail service was commemorated in Washington, D. C., May 15, 1968. A new 10¢ air mail stamp was issued that day to mark the anniversary. The stamp depicted a Curtiss "Jenny," the same plane pictured on the first air mail stamp of 1918, a 24-cent denomination stamp, 10 cents of the charge being for special delivery.

Notable Ocean and Intercontinental Flights

Joan Merriam (24)	Oakland, Calif.	Oakland, Calif.	27,750	56d	Mr. 17-Mar. 12/64

Notable first flights: 1. Atlantic aerial round trip. 2. Non-stop transatlantic flight. 3. Polar flight. 4. Solo transatlantic flight in the Ryan monoplane the "Spirit of St. Louis." 5. Transatlantic passenger flight. 6. East-West transatlantic crossing. 7. U. S. to Australia flight. 8. Trans-Arctic flight. 9. South Pole flight. 10. Non-stop Pacific flight. 11. Woman's transoceanic solo flight. 12. Westbound transatlantic solo flight. 13. Pacific airmail and U. S. to Philippines crossing. 14. Non-stop jet transatlantic flight. 15. Solo across North Pole. 16. Transatlantic helicopter flight. 17. Non-stop jet Pacific flight. 18. Transatlantic round trip on same day. 19. Non-stop between New York and Athens, carried 59 persons. 20. Non-stop London to San Francisco via polar route, carried 32 passengers. 21. Non-stop jet flight from Tokyo to Honolulu. 22. Non-stop between Moscow and New York. 23. First woman pilot to circle globe; first woman to fly both North Atlantic and Pacific. 24. Followed route Amelia Earhart partly completed in 1937.

Fastest Trips Around the World

Fast circuits of the earth have been a subject of wide interest since Jules Verne, French novelist, described an imaginary trip by Phileas Fogg in *Around the World in 80 Days*, assertedly occurring Oct. 2 to Dec. 20, 1872. Notable actual such events follow:

Craft, pilot	Terminal	(Mi.)	Time	Date
Nelle Elv	New York, N. Y.		72d 6h 11m	1889
George I. Francis Train	New York, N. Y.		67d 12h 03m	1890
James Fitzmaurice	Chicago		60d 13h 29m	1901
J. W. Willis Sayre	Seattle		54d 09h 42m	1903
Henry Frederick	Seattle		54d 07h 02m	1903
Col. Burnley-Campbell			40d 19h 30m	1907
Andre Jaeger-Schmidt			39d 19h 42m 38s	1911
John Henry Mears			35d 21h 36m	1913
Two U. S. Army airplanes	Seattle (57 hops, 21 countries)	26,103	35d 11h 11m	1924
Edward S. Evans and Linton Wells (New York World) (1)	New York	18,400	28d 14h 36m 05s	June 16-19, 1926
John H. Mears and Capt. C. B. D. Collyer	New York		23d 15h 21m 03s	June 29-July 2, 1928
Graf Zeppelin	Friedrichshafen, Ger. via Tokyo, Los Angeles, Lakehurst, N. J.	21,700	20d 04h	Aug. 14-Sept. 4, 1929
Wiley Post and Harold Gatty (Monoplane Winnie Mae)	Roosevelt Field, via Arctic Circle	15,474	8d 15h 51m	June 23, 1931
Wiley Post (Monoplane Winnie Mae) (2)	Floyd Bennett Field, via Arctic Circle	15,596	115h 36m 30s	July 15-22, 1933
H. R. Ekins (Scripps-Howard Newspapers in race) (Zeppelin)	Lakehurst, N. J., via Frankfort, Ger.	25,654	18d 11h 14m 33s	Sept. 30-Oct. 19, 1936
Howard Hughes and 4 assistants	New York, Paris, Moscow, Siberia, Fairbanks, Alaska	14,824	3d 19h 08m 10s	July 10-13, 1938
Mrs. Clara Adams (Pan American Clipper)	Port Washington, N. Y., ret. Newark, N. J.		16d 19h 04m	July 28-July 15, 1939
Globeaster, U. S. Air Transport Command	Washington, D. C.	23,279	149h 44m	Sept. 4, 1945
Capt. William P. Odom (A-26 Reynolds Bombshell)	New York, via Paris, Cairo, Tokyo, Alaska	20,000	78h 55m 12s	Oct. 4, 1945
America, Pan American 4-engine Lockheed Constellation (3)	New York, eastward	22,219	101h 32m	Apr. 12-16, 1947
Col. Edward P. F. Eagan	New York	20,559	147h 15m	Dec. 13, 1948
USAF B-50, Lucky Lady II (Capt. James Gallagher) (4)	Fort Worth, Texas	23,452	94h 01m	Feb. 26-Mar. 2, 1949
Thos. G. Lapphler, Jr.	New York	22,180	119h 47m	Dec. 2-7, 1949
Jean-Marie Audibert	Paris		4d 19h 38m	Dec. 11-15, 1952
Horace C. Boren	Newlid Airport, New York		99h 16m	July 15, 1953
Faustina Martin	Midway Airport, Chicago, via Castle AFB, Merced, Calif., via Nfld., Morocco, Saudi Arabia, India, Ceylon, P. I., Guam, Riverside, Calif.	24,325	45h 19m	Dec. 21-25, 1953
Three USAF B-52 Stratofortresses (5)	Cleveland, Ohio		89h 13m 37s	Dec. 5-8, 1953
Joseph Cavoli	Tokyo, via Bangkok, Karachi, Rome, Anchorage	18,580	73h 9m	Jan. 15-18, 1957
Miss K. Kanetake	San Francisco	22,800	29d	Jan. 31-Feb. 4, 1958
Peter Gluckmann (solo)	San Francisco		51h 45m 22s	July 28-31, 1958
Milton Reynolds	San Francisco		62h 59m	Aug. 22-Sept. 20, 1959
Sue Snyder	Chicago	21,219	82h 59m	Jan. 12-14, 1960
Max Conrad (solo)	Miami, Fla.	25,946	8d 18h 35m 57s	Jan. 22-24, 1960
Sam Miller & Louis Fodor	New York		46h 28m	Feb. 28-Mar. 8, 1961
Henry G. Beard	Wichita, Kans.	22,992	65h 38m 49s	Aug. 3-4, 1963
Robert & Joan Wallick (6)	Manila, Philippines	23,557	5d 6h 17m 10s	May 23-26, 1966
Arthur Godfrey, Richard Merrill, Fred Austin, Karl Keller	New York	23,333	86h 9m 1s	June 1-7, 1966

1. Mileage by train and auto, 4,100; by plane, 6,300; by steamship, 8,000. 2. First to fly solo around northern circumference of the world, also first to fly twice around the world. 3. Inception of regular commercial global air service. 4. First non-stop round-the-world flight, refueled 4 times in flight. 5. First non-stop global flight by jet planes; refueled in flight by KC-97 aerial tankers; average speed, approx. 525 m.p.h. 6. Official world record for light planes.

INTERNATIONAL AERONAUTICAL RECORDS

Source: The National Aeronautics Association, 806 15th St., N.W., Washington, D.C. 20005, representative in the United States of the Federation Aéronautique Internationale, certifying agency for world aviation and space records. The International Aeronautical Federation was formed in 1905 by representatives from Belgium, France, Germany, Great Britain, Spain, Italy, Switzerland and the United States, with headquarters in Paris. Regulations for the control of official records were signed Oct. 14, 1905. World records are defined as maximum performance, regardless of class or type of aircraft used. Records to Nov. 1, 1965.

WORLD AIR RECORDS—MAXIMUM PERFORMANCE IN ANY CLASS

Speed Over a Straight Course—3,331.507 km.p.h. (2,070.101 m.p.h.)—Col. R. L. Stephens, USAF, United States; Lockheed YF-12A; Edwards Air Force Base, Calif., May 1, 1965.

Speed Over a Closed Circuit—2,981.5 km.p.m. (1,850.61 m.p.h.)—Mikhail Komarov, USSR; E-266 Jet; Oct. 5, 1967.

Distance in a Straight Line—20,168.75 kms. (12,532.28 mi.)—Maj. Clyde P. Evely, USAF, United States; Boeing B52-H; Kadena, Okinawa, to Madrid, Spain, Jan. 11, 1962.

Distance Over a Closed Circuit—18,245.5 kms. (11,336.92 mi.)—Capt. William Stevenson, USAF, United States; Boeing B52-H; Seymour-Johnson, N. C.; Kindley, Bermuda; Sondrestrom, Greenland; Anchorage, Alaska; March AFB, Calif.; Key West, Fla.; Seymour-Johnson, N. C., June 6-7, 1962.

Altitude—95,935.99 meters (314,750 feet)—Maj. Robert M. White, USAF, United States; North American X-15-1; Edwards AFB, Calif., July 17, 1962.

Altitude in Horizontal Flight—24,462.596 meters (80,257.86 ft.)—Col. R. L. Stephens, USAF, United States; Lockheed YF-12A; Edwards Air Force Base, Calif., May 1, 1965.

MANNED SPACE CRAFT

Duration With Earth Orbit—330 hrs. 35 mins. 00 secs.—Lt. Col. Frank Borman, USAF and Cdr. James A. Lovell, Jr., USN, United States; Spacecraft Gemini 7; Dec. 4-18, 1965.

Distance With Earth Orbit—9,204,575 kms. (5,719,457 miles)—Lt. Col. Frank Borman, USAF and Cdr. James A. Lovell, Jr., USN, United States; Spacecraft Gemini 7; Dec. 4-18, 1965.

Greatest Altitude With Earth Orbit—1,369 kms. (850.65 miles)—Cdr. Charles Conrad Jr. and Lt. Cdr. Richard Gordon, United States; Spacecraft Gemini 11; Sept. 13-15, 1966.

Greatest Mass Lifted With Earth Orbit—5,320 kgs. (11,728.59 lbs.)—V. M. Komarov and K. P. Feoktistov, USSR; Spacecraft "Voskhod"; Oct. 12-13, 1964.

Greatest Altitude Without Earth Orbit—187.5 kms. (116.5 mi.)—Comdr. Alan B. Shepard, USN, United States; McDonnell Spacecraft Freedom 7; Cape Kennedy, Fla., to 27° 13' 7" N., 75° 51' 14" W., May 5, 1961.

Greatest Mass Lifted Without Earth Orbit—1,832.51 kgs. (4,040 lbs.)—Comdr. Alan B. Shepard, USN, United States; McDonnell Spacecraft Freedom 7; Cape Kennedy, Fla., to 27° 13' 7" N., 75° 51' 14" W., May 5, 1961.

All other records, international in scope, are termed World "Class" records and are divided into classes: Airships, free balloons, airplanes, seaplanes, amphibians, gliders, and rotorplanes. Airplanes (Class C) are sub-divided into four groups: Group I—Piston Engine Aircraft, Group II—Turbo-prop Aircraft, Group III—Jet Aircraft, Group IV—Rocket Powered Aircraft. A partial listing of world records follows:

WORLD "CLASS" RECORDS

AIRPLANES (Class C, Group I—Piston Engine)

Distance, Closed Circuit—14,249.656 kms. (8,854.308 miles)—Lt. Col. O. F. Lassiter, USAF, United States; Boeing B-29; Tampa, Fla., Aug. 1, 1947.

Distance, Airline (International)—18,081.990 kms. (11,235.6 miles)—Comdr. Thomas D. Davies, USN; Comdr. Eugene P. Rankin, USN; Comdr. Walter S. Reid, USN, and Lt. Comdr. Ray A. Tabelling, USN; United States; Lockheed P2V-1; from Pearce Field, Perth, Australia, to Port Columbus, Columbus, Ohio, Sept. 29-Oct. 1, 1946. (United States)—same.

Maximum speed over 3-kilometer measured course (International)—755.138 km.p.h. (469.220 m.p.h.)—Fritz Wendel, Germany, Messerschmitt B. F. 109R, Augsburg, April 26, 1939. (United States)—663.054 km.p.h. (412.002 m.p.h.)—Jacqueline Cochran, United States; North American F-51, Thermal, Calif., Dec. 17, 1947.

Speed 100 kilometers (62.137 miles) without payload (International)—755.668 km.p.h. (469.549 m.p.h.)—Jacqueline Cochran, United States; North American F-51, Coachella Valley, Calif., Dec. 10, 1947. (United States)—same.

Speed for 1,000 Kilometers (621.369 miles) without payload—693.78 km.p.h. (431.09 m.p.h.)—Jacqueline Cochran, United States; North American P-51; Santa Rosasummit, Calif.—Flagstaff, Arizona course, May 24, 1948.

Speed for 5,000 Kilometers (3,106.849 miles) without payload—544.59 km.p.h. (338.39 m.p.h.)—Capt. James Bauer, USAF, United States; Boeing B-29; Dayton, Ohio, June 28, 1946.

Speed Around the World—300.20 km.p.h. (186.53 m.p.h.)—Robert Wallick and Joan Wallick, United States; Beechcraft Baron C55, 2 Continental 10-520 engines; Manila, Philippines; June 2-7, 1966. Distance: 23,129.23 miles. Time: 5 days 6 hours 17 min. 10 sec.

AIRPLANES (Class C, Group II—Turbo-prop)

Altitude—13,513 meters (44,334 ft.)—Loubov Ulanova, USSR; IL-18 Aircraft; Oct. 20, 1967.

Speed for 1,000 kilometers (621.369 miles) without payload (International)—871.38 km.p.h. (541.449 m.p.h.)—Ivan Soukhomline, Boris Timochok and crew, USSR; TU-114 Swept Wing Monoplane, 4 turbo-prop TB-12 engines; Sternberg course, Mar. 24, 1960.

Speed for 5,000 Kilometers (3,106.849 miles) without payload (International)—877.212 km.p.h. (545.072 m.p.h.)—Ivan Soukhomline, K. Sapiekin and crew, USSR; TU-114 Swept Wing Monoplane, 4 turbo-prop TB-12 engines; Sternberg-Svierdlovsk-Sebastopol-Sternberg, Apr. 9, 1960.

AIRPLANES (Class C, Group III—Jet-powered)

Distance in a Straight Line—20,168.78 kms. (12,532.28 mi.)—Maj. Clyde P. Evely, USAF, United States; Boeing B52-H, 8 Pratt & Whitney TF-33P-3 engines; Kadena, Okinawa, to Madrid, Spain, Jan. 10-11, 1962.

Distance in a Closed Circuit—18,245.05 kms. (11,336.92 miles)—Capt. William Stevenson, USAF, United States; Boeing B52-H, 8 Pratt & Whitney TF-33P-3 engines; terminal: Seymour-Johnson, N. C., June 6-7, 1962.

Altitude—34,714 meters (113,890.848 feet)—Gueorgui Mossolov, USSR; E-66A jet monoplane, triangular wing, T.R.D. and G.R.D. engines; Podmoskovnoe, USSR, Apr. 28, 1961.

Speed Over a 3-Kilometer Course—1,452.777 km.p.h. (902.769 m.p.h.)—Lt. Hunt Hardisty, USN, United States; McDonnell F4H Phantom, 2 GE J-79 jet engines; White Sands, N. M., Aug. 29, 1961.

Speed over 15-25 Kilometer Course—3,331.507 km.p.h. (2,070.101 m.p.h.)—Col. R. L. Stephens, USAF, United States; Lockheed YF-12A; Edwards Air Force Base, Calif., May 1, 1965.

Speed for 100 Kilometers—2,401 km.p.h. (1,491.9 m.p.h.)—A. Fedotov, USSR; triangular-wing aircraft, P-166 jet engine; Sidorovo Course, USSR; Oct. 7, 1961.

Speed for 500 Kilometers in a Closed Circuit—2,981.5 km.p.h. (1,852.61 m.p.h.)—Mikhail Komarov, USSR; E-266 Airplane, 2 RD jet engines; Oct. 5, 1967.

Speed for 1,000 Kilometers in a Closed Circuit—2,920.67 km.p.h. (1,814.81 m.p.h.)—Pyotr Ostapenko, USSR; E-266 Airplane, 2 RD jet engines; Oct. 27, 1967.

Speed for 2,000 Kilometers in Closed Circuit—1,703.817 km.p.h. (1,061.808 m.p.h.)—Maj. H. J. Deutchendorf, Jr., USAF, United States; Convaair B-58 Hustler Bomber; Desert, Stoval, Boundary, Morris, Desert, Edwards AFB, Calif. Course; Jan. 12, 1961.

LIGHT AIRPLANES—Class C-1.d

Distance Airline (International)—12,341.26 kms. (7,668.48 miles)—Max Conrad, United States; Piper Comanche 250, Lycoming 0-540-A1A 250 hp.; Casablanca, Morocco to Los Angeles, June 2-4, 1959.

Speed for 100 Kilometers (62.137 miles) in a Closed Circuit (International)—519.480 km.p.h. (322.789 m.p.h.)—Miss R. M. Sharpe, Great Britain; Vickers Supermarine Spitfire 5-B; Wolvehampton, June 17, 1950.

GLIDERS (Class D—Single-place)

Distance, Straight Line—1,041.52 kms. (647.17 miles)—Alvin Parker, United States; SISU 1-A sailplane; Odessa, Texas, to Kimball, Nebr., July 31, 1964.

Altitude above sea level—14,102 meters (46,267 feet)—Paul F. Bikle, United States; Sailplane Schweizer SGS 123E; Mojave, Lancaster, Calif., Feb. 25, 1961.

HELICOPTERS (Class E-1)

Distance in a Straight Line 3,561.55 kms. (2,213.04 miles)—Robert G. Ferry, United States; Hughes YO-H-6A Helicopter; Culver City, Calif., to Daytona, Fla., Apr. 6-7, 1966.

Speed Over 3-Km. Course—341.23 km.p.h. (212.029 m.p.h.)—Jean Boulet, France; Superfrelon SA 3210/01 helicopter; Istres Airport, France, July 19, 1963.

FREE BALLOONS (Tenth category, 4001 cu. meters or more)

Altitude—34,668 meters (113,739.9 feet)—Cmdr. Malcolm D. Ross, USSR, United States; Lee Lewis Memorial Winzen Research Balloon; Gulf of Mexico, May 4, 1961.

F. A. I. COURSE RECORDS

Los Angeles to New York—1,954.79 km.p.h. (1,214.65 m.p.h.)—Capt. Robert G. Sowers, USAF, United States; Convaiv B-58 Hustler, 4 GE-J-79-5B engines. Elapsed time: 2 hrs. 58.71 secs., Mar. 5, 1962.

New York to Los Angeles—1,741 km.p.h. (1,081.8 m.p.h.)—Capt. Robert G. Sowers, USAF, United States; Convaiv B-58 Hustler. Elapsed time: 2 hrs. 15 min. 50.08 sec., Mar. 5, 1962.

Los Angeles-New York-Los Angeles—1,681.71 km.p.h. (1,044.46 m.p.h.) Capt. Robert G. Sowers, USAF, United States; Convaiv B-58 Hustler; Elapsed time: 4 hrs. 41 min. 14.98 sec., Mar. 5, 1962.

New York to Paris—1,753.068 km.p.h. (1,089.36 m.p.h.)—Maj. W. R. Payne, United States; Convaiv B58 Hustler; elapsed time, 3 hrs. 10 min. 58 sec., May 26, 1961.

Anchorage to Chicago—843.49 km.p.h. (524.12 m.p.h.)—Lt. Col. G. A. Andrews, USAF, United States; Convaiv B-58A Hustler. Elapsed time: 5 hours 26 minutes 33.9 seconds, Oct. 16, 1963.

Anchorage to London—1,330.80 km.p.h. (826.91 m.p.h.)—Maj. S. J. Kubesch, USAF, United States; Convaiv B-58A Hustler. Elapsed time: 5 hours 24 minutes 54 seconds, Oct. 16, 1963.

New York to London: (International)—1,014.248 km.p.h. (630.223 m.p.h.)—Maj. Burl B. Davenport, Lt. James J. Jones, and crew, USAF, Boeing KC-135 Stratotanker, 4 Pratt & Whitney J-57-P-43W turbo-jet engines; Idlewild International Airport, Long Island, to London International Airport, June 27, 1958. Elapsed time: 5 hours 29 minutes 14.64 seconds.

London to New York (International)—945.423 km.p.h. (587.457 m.p.h.)—Maj. Burl B. Davenport, Lt. James J. Jones, and crew USAF, United States; Boeing KC-135 Stratotanker; London International Airport to Idlewild International Airport, Long Island, June 27, 1958. Elapsed time: 5 hours 29 minutes 14.64 seconds.

Baltimore to Moscow, USSR—906.64 km.p.h. (563.36 m.p.h.)—Col. James B. Swindal, USAF, United States; Boeing VC-137 (707). Elapsed time: 8 hours 33 minutes 45.4 seconds.

Moscow to Washington, D. C.—768.67 km.p.h. (490.06 m.p.h.)—Col. James B. Swindal, USAF, United States; Boeing VC-137 (707). Elapsed time: 9 hrs. 54 min., 48.5 sec. May 20-21, 1963.

Belfast to Gander, Newfoundland (International)—774.255 km.p.h. (481.099 m.p.h.)—Wing Commander R. P. Beaumont and crew, Great Britain; Canberra bomber, two Rolls-Royce turbo-jet engines. Aug. 31, 1951. Elapsed time: 4 hours 18 minutes 24.4 seconds.

Aviation Hall of Fame

The Aviation Hall of Fame at Dayton, Ohio, is dedicated to honoring aviation's outstanding pioneers. It operates as a non-profit, privately supported organization under a charter granted in 1964 by the Congress of the United States.

1962

Orville Wright and Wilbur Wright for co-invention of the first successful man-carrying airplane and for the first powered flights in Dec., 1903.

1963

Octave Chanute, for successful man-carrying glider flights and experiments; Samuel Pierpont Langley, for studies of air and space and demonstrations of practicability of mechanical flight; Frank Purdy Lahm, first Army airplane and dirigible pilot; and Benjamin Delahauf Foulis, first Army Signal Corps pilot.

1964

Thomas Scott Baldwin, early balloon and dirigible builder and pilot; Theodore Gordon Ellyson, first U. S. Navy pilot, pilot of first plane successfully launched by catapult; Henry W. Walden, inventor of first American monoplane; Glenn Hammond Curtiss, holder of first pilot's license issued by Aero Club of America (1911), inventor, builder; Calbraith Perry Rodgers, pilot of first transcontinental flight, New York to Pasadena, Calif., Sept. 17-Nov., 1911; and John J. Montgomery, maker of first American glider flight (1884).

1965

Alexander Graham Bell, inventor of the telephone, for research on aerodynamic lift, propulsion and control; Alfred Austell Cunningham, first Marine Corps aviator; Albert Cushing Read, a participant in first successful transatlantic flight; Eugene Burton Ely, pilot of first plane to fly from a ship, whose work led to practical use of aircraft carriers; A. Roy Knabenshue, pioneer in building and flying steerable balloons; Thomas Etholen Selfridge, first American killed testing an experimental aircraft; Charles Edward Taylor, builder of engine for first successful airplane; and Edward Vernon Rickenbacker, World War I ace and later president of Eastern Airlines.

1966

Lincoln Beachey, early dirigible and airplane exhibitionist, who made the first inside loop in America; William Edward Boeing, developer of first airline network and producer of vitally important military and commercial aircraft; Robert Hutchings Goddard, pioneer in rocket technology who laid the foundation for space travel; Glenn Luther Martin, pioneer in aircraft design and mass manufacturing techniques; William "Billy" Mitchell, visionary proponent of an independent air force and a martyr to the cause of airpower; John Henry Towers, pioneering naval aviator who promoted airpower as a vital naval doctrine.

1967

Henry Harley "Hap" Arnold, student of Wright Brothers who later became first five-star general of Air Force; James Harold Doolittle, who performed first outside loop, made first blind landing, and led famous Tokyo raid in World War II; Charles Augustus Lindbergh, who made first solo trans-Atlantic flight and promoted many facets of aviation; and Carl A. Spaatz, World War I pilot, air commander of World War II, and first Chief of Staff of Independent Air Force.

1968

Richard Evelyn Byrd, naval aviator who developed aerial navigation instruments, made flight over North Pole 1926, transatlantic flight 1927, and flight over South Pole in 1929; Amelia Earhart, first woman to fly across Atlantic as passenger, later made solo flight across Atlantic, holder of many records, disappeared on flight across Pacific; John A. MacReady, Army Air Service pilot who made pioneering high altitude and endurance flights in 1920s, participated in first nonstop transcontinental flight 1923; and Igor I. Sikorsky, for development of long-range flying boats in 1930s that opened commercial transoceanic flights, and successful development of the helicopter in 1939.

Consolidated Airline Traffic

	1966	1967	1967 (6 mo.)	1968 (6 mo.)
Revenue passenger miles*	79,889,246,000	98,746,641,000	45,793,552,000	53,620,183,000
Revenue ton-miles traffic:				
Passenger	7,736,469,000	9,560,623,000	4,434,233,000	5,183,183,000
U. S. Mail (priority)	542,772,000	507,728,000	271,416,000	261,121,000
U. S. Mail (non-priority)	207,746,000	407,746,000	148,729,000	345,902,000
Express	99,690,000	2,351,108,000	49,287,000	1,302,930,000
Freight	2,050,735,000	98,883,000	1,128,402,000	48,788,000
Charter	1,754,930,000	2,648,005,000	1,245,103,000	1,411,201,000
Excess baggage & foreign mail	48,514,000	49,132,000	22,800,000	28,852,000
Total revenue ton-miles	12,440,836,000	15,683,236,000	7,299,980,000	8,560,577,000

Air Line Distances Between Principal Cities of the World

Air Line Distances Between Principal Cities in the United States

Source: Coast and Geodetic Survey, U. S. Dept. of Commerce (Statute Miles)

Distances are measured from a central point in each city.

ASTRONOMY AND CALENDAR

Edited by James S. Pickering

ASTRONOMER EMERITUS, AMERICAN MUSEUM-HAYDEN PLANETARIUM

Celestial Events for 1969

Since the planets of the solar system are in constant motion about the sun and thus change their positions continually in the sky, they cannot be shown on conventional star charts. The locations of these planets during 1969 are given in the paragraphs below, either by the constellations which are the backgrounds for their positions or by the time they rise or set with relation to the sun. Also given below are other predictable astronomical phenomena such as meteor showers, phases of the moon, eclipses and the dates of the beginnings of the seasons.

PLANETS AND THE SUN

The planets of the solar system, in order of their distance from the sun are Mercury, Venus, Earth, Mars, Jupiter, Saturn, Uranus, Neptune and Pluto. Uranus, Neptune and Pluto are not included in the celestial list because they are too faint to be seen without optical aid. Both Uranus and Neptune are visible through good field glasses, but Pluto is so distant and so small that only large telescopes or long exposure photographs can make it visible.

Since Mercury and Venus are nearer to the sun than is the earth, their motions about the sun are seen from the earth as wide swings first to one side of the sun and then to the other, although they are both passing continuously around the sun in orbits that are almost but not quite circular. When their passage takes them either between the earth and the sun, or beyond the sun as seen from the earth, they are invisible to us. Because of the laws which govern the motions of planets about the sun, both Mercury and Venus require much less time to pass between the earth and the sun than around the far side of the sun, so their periods of invisibility are unequal.

The planets that lie farther from the sun than does the earth may be seen for longer periods of time and are invisible only when they are so located in our sky that they rise and set about the same time as the sun when, of course, they are overwhelmed by the sun's great brilliance. None of the planets have any light or exterior heat of their own and shine only by reflecting sunlight from their surfaces. Mercury and Venus, because they are between the earth and the sun, show phases very much as the moon does. The planets farther from the sun are always seen as full, although Mars does occasionally present a slightly gibbous phase—like the moon when not quite full.

The planets move rapidly among the stars because they are very much nearer to us than the stars are. The stars are also in motion, some of them at tremendous speeds, but they are so far away that their motion does not change their apparent positions in the heavens sufficiently for anyone to perceive that change in a single lifetime. The very nearest star is more than 7,000 times as far away as the most distant planet.

January

Mercury reaches greatest angular distance east of the sun—greatest eastern elongation—on Jan. 13 and may be seen in the southwest for about an hour after sunset. It moves rapidly toward interior conjunction—between the earth and the sun—on Jan. 19, when it cannot be seen.

Venus is in the western sky after sunset, farther north than Mercury. It reaches greatest eastern elongation Jan. 26, and sets about 3 hours after the sun. On Jan. 21, the crescent moon after new passes 1 degree below Venus, causing an occultation of Venus in Australia and South Africa.

Mars rises from 5 to 6 hours before the sun in the southeast in Virgo. On Jan. 12, the last quarter moon passes 5 degrees below Mars early in the morning.

Jupiter rises before midnight and is visible most of the night in Virgo, near Mars. On Jan. 10, the moon, approaching last quarter, passes 2 degrees below Jupiter.

Saturn is just east of the meridian at sunset and sets about midnight in Pisces. On Jan. 24, the moon, nearly at first quarter, passes 4 degrees above Saturn.

Moon—Full moon, Jan. 3; last quarter, Jan. 11, new moon, Jan. 17; first quarter, Jan. 25. Moon at apogee, Jan. 1, at perigee, Jan. 16; again at apogee, Jan. 28. The moon is said to be at perigee when it passes nearest to the earth for the month, and at apogee when it is most distant from the earth. The nearest possible approach of the moon to the earth is 221,463 miles, and the greatest possible distance between the moon and the earth is 252,710 miles. The moon does not reach these extreme distances each month. Note that the moon reaches apogee twice during January. The period between successive returns of the moon to either perigee or apogee is the anomalistic month, which is a few hours shorter than 28 days. Thus, if a perigee or apogee passage occurs during the first days of a calendar month, a second may occur before the end of the month. Because of its proximity to the earth, the moon has a strong tidal effect on the earth which increases as the distance between the earth and the moon

decreases. The gravitational pull of the sun also affects the tides, and when the sun and the moon are in line with the earth, as at new moon or full moon, their tide-raising effects are combined and produce spring tides—higher and lower than average. The combination of a perigee position of the full or new moon may produce unusually high and low tides for a short time. The moon reaches perigee this month one day before new moon Jan. 17. This year, the moon passes close before several planets and bright stars, causing occultations of these objects as seen from the earth. When these conjunctions and occultations involve the planets, they are discussed under the heading for that planet. Conjunctions and occultations of the invisible planets and bright stars are mentioned under the heading of the moon.

Jan. 10. The moon, nearly at last quarter, passes 1 degree below the planet Uranus. This causes an occultation of Uranus in South America. Uranus is just below naked-eye visibility and may be seen with binoculars. This conjunction at 4 a.m., EST, will help to locate Uranus. Jan. 11, the last quarter moon passes close above the bright star Spica in Virgo. This conjunction occurs during daylight, but will bring Spica close west of the moon in the early morning sky. This is an occultation of Spica over eastern Asia. Jan. 14, at 2 a.m., EST, the moon passes 6 degrees below the planet Neptune. Neptune is only one-fifth as bright as Uranus and a small telescope may be required to make it visible. On the evening of Jan. 14, at 7 p.m., EST, the moon passes close below the red star Antares in Scorpius. This causes an occultation of Antares over southern Asia and Australia and brings the crescent moon before new close west of Antares in the morning sky.

Jan. 3. The earth reaches perihelion, that point in its orbit when it is nearest the sun for the year. This brings the earth to slightly more than 91,000,000 miles from the sun, about 3,000,000 nearer than in July when it reaches aphelion, its greatest distance from the sun.

February

Mercury is now in the morning sky. It reaches greatest western elongation Feb. 23, when it rises

about 1½ hours before the sun.

Venus sets about 4 hours after the sun in Pisces, increasing slightly in brilliance during the month.

Mars rises about 1 a.m. in Libra. On Feb. 10, the last quarter moon passes 6 degrees below Mars. On Feb. 22, Mars passes close below the planet Neptune, but a small telescope will be needed to see Neptune.

Jupiter rises late in the evening in Virgo. On Feb. 6, the moon, nearing first quarter, passes below Jupiter.

Saturn sets a few hours after the sun in Pisces. On Feb. 20, the crescent moon after new passes 5 degrees above Saturn.

Moon—Full moon, Feb. 2; last quarter, Feb. 9; new moon, Feb. 16; first quarter, Feb. 23. Moon at perigee, Feb. 13; at apogee, Feb. 25. On Feb. 6 the moon, 4 days past full, is in conjunction with Uranus at 8 a.m. EST. This causes an occultation of Uranus in New Zealand and Antarctica. Observers in the U. S. may see Uranus with binoculars to the west of the moon that evening. On Feb. 7, the moon is in close conjunction with Spica in Virgo. This produces an occultation of Spica in southeast Europe, north Africa, Asia Minor and Australia. On Feb. 11 at 2 a.m. the moon is in close conjunction with Antares in Scorpius, causing an occultation of Antares over South America and south Africa.

March

Mercury is in the morning sky, rising about 1½ hours before the sun early in the month. It is moving toward superior conjunction—beyond the sun from the earth—later in the month when it will no longer be visible. On Mar. 16 at 11 p.m., the moon occults Mercury over western Africa and South America.

Venus sets about 3 hours after the sun. It reaches its greatest brilliancy Mar. 3, when it is about 15 times as bright as Sirius, the brightest star. On Mar. 20, Venus and the crescent moon are near each other in the evening sky.

Mars rises about midnight in Scorpius and is visible for the last half of the night. On Mar. 10 the moon, nearly at last quarter, passes 6 degrees below Mars.

Jupiter reaches opposition on Mar. 21, rising as the sun sets, and is visible in the sky all night in Virgo. On Mar. 5, the moon passes 2 degrees below Jupiter. On Mar. 15, Jupiter will reveal the position of Uranus as the two planets are in conjunction at 6 p.m. Uranus may be seen with binoculars close west of Jupiter.

Saturn is approaching conjunction with the sun in Pisces and is far to the west at sunset.

Moon—Full moon, Mar. 4; last quarter, Mar. 11; new moon, Mar. 17; first quarter, Mar. 25. Moon at perigee, Mar. 12; at apogee, Mar. 25. At midnight between Mar. 6 and 7, the moon, 3 days past full, occults Spica in Virgo. This occultation is visible in North and South America. On Mar. 10, the moon is in close conjunction with Antares in Scorpius. This occurs by daylight in North America, but causes an occultation of Antares in South America.

Mar. 18. An annular eclipse of the sun is visible over the Indian Ocean and Indonesia.

Mar. 20. At 2:08 p.m. EST, the sun appears to cross the equator on its way north. This crossing is at the vernal equinox and spring begins in the northern hemisphere while autumn commences south of the equator.

April

Mercury reaches superior conjunction Apr. 8, beyond the sun from the earth, and moves into the evening sky, where it sets about an hour after the sun by the end of the month.

Venus reaches inferior conjunction, between the earth and the sun, also Apr. 8 and moves into the morning sky, but is too much in line with the sun to be seen.

Mars rises late in the evening in Scorpius. On Apr. 7, the gibbous moon passes 6 degrees below Mars at 11 p.m. EST.

Jupiter is in the eastern sky at sunset in Virgo. On Apr. 1, the moon nearing full phase, passes 2 degrees below Jupiter and again Apr. 28, the waning crescent moon is 1 degree below Jupiter.

Saturn reaches conjunction with the sun in Pisces Apr. 18 and moves into the morning sky, but is too much in line with the sun all month to be seen.

Moon—Full moon, Apr. 2; last quarter, Apr. 9; new moon, Apr. 16; first quarter, Apr. 24. Moon at perigee, Apr. 6; at apogee, Apr. 22. On Apr. 3, the moon is again in close conjunction with Spica in Virgo at 9 p.m. EST. This causes an occultation of Spica over southeast Asia. On Apr. 6, the moon is in close conjunction with Antares in Scorpius. This conjunction occurs during daylight in North America but causes an occultation of Antares over Australia. On Apr. 29, the moon passes 1 degree below Uranus, which may be seen close east of the moon during the evening. On Apr. 30, the moon again occults Spica in Virgo for observers in west and south Africa. This may be seen as an extremely close conjunction early in the evening from the U. S.

Apr. 2. The full moon passes through the outer region of the earth's shadow. This eclipse occurs during daylight over North America, but a penumbral eclipse cannot be easily observed without special equipment.

Apr. 23. The Lyrid meteor shower occurs. The moon sets early in the evening and does not interfere with observation of the few more than normal number of meteors this shower produces.

May

Mercury reaches greatest eastern elongation May 5 and sets about 1½ hours after the sun. It may be seen in the northwest during the first half of the month. On May 11, Mercury will be near the red star Aldebaran in Taurus, but will rapidly fade from view into inferior conjunction between the earth and the sun May 29.

Venus rises from 2 to 3 hours before the sun and reaches greatest brilliancy May 14. On May 12, the waning crescent moon is in conjunction with Venus. This causes an occultation of Venus over eastern Europe and Asia, and brings Venus close west of the moon in the U. S. in the early morning hours.

Mars reaches opposition on May 31, rising as the sun sets and visible in the sky all night in Ophiuchus. On May 4, the moon, two days past full, passes close below Mars and on May 31, the full moon is 2 degrees below Mars at 9 p.m. EST.

Jupiter is well up in the east at sunset before the stars of Virgo.

Saturn is too much in line beyond the sun to be seen, in Pisces.

Moon—Full moon, May 2; last quarter, May 8; new moon, May 16; first quarter, May 24; full moon, May 31. Note that the moon reaches full phase twice in May. The period of time for the moon to progress from any given phase to the corresponding phase in its next cycle—in this case, from full moon to the next full moon—is the synodical month, which is slightly more than 29 days. Hence, when a given phase occurs on the 1st or 2nd day of most months, that phase may be reached again before the end of the calendar month. Moon at perigee, May 4; at apogee May 20. The moon passes through two close conjunctions with Antares in Scorpius this month. On May 3, the conjunction occults Antares over South America and southern Africa. On May 31, the conjunction occults Antares over Indonesia and Australasia. On May 28, the moon is in close conjunction with Spica in Virgo, occulting Spica over New Zealand.

May 1-4. The Eta Aquarid meteor shower reaches its climax about midnight May 4. The moon, just past full, makes observation of the meteors of this shower difficult.

June

Mercury emerges from inferior conjunction and moves into the morning sky where it reaches greatest western elongation June 23, rising about 1½ hours before the sun.

Venus reaches greatest western elongation June 17, rising about 3 hours before the sun and about 1½ hours before Mercury. Venus will be to the south and west of Mercury and near Saturn during the first part of the month. Venus and Saturn are in close conjunction during daylight June 11 and the waning crescent moon passes close above both that morning.

Mars, just past opposition, is up in the east in Scorpius and Ophiuchus. On June 3, Mars is 2 degrees above Antares in Scorpius. The name Antares is Greek for "The Rival of Mars," and this conjunction of Mars and the red star will demonstrate the origin of the star's name. On June 8, Mars reaches that point in its orbit near-

est the earth for this passage, bringing it slightly more than 43,000,000 miles from the earth. On June 27, the nearly full moon passes 2 degrees below Mars at 9 p.m. EST.

Jupiter is east of the meridian at sunset and is in the sky for the first half of the night in Virgo. On June 18 at 1 a.m. EST, Jupiter is in close conjunction with Uranus, which may be seen with good binoculars.

Saturn is in the morning sky near Venus and Mercury. On June 8, the waning crescent moon passes 6 degrees above Saturn.

Moon—Last quarter, June 6; new moon, June 14; first quarter, June 22; full moon, June 29. Moon at perigee, June 1; at apogee, June 16; at perigee, June 29. The combination of perigee full moon on June 29 may produce extreme tides. Note that the moon returns to perigee twice in June, which occurs when the first perigee falls on the 1st or 2nd day of the month. See notes for January. On June 24, the moon's close conjunction with Spica, the seventh such conjunction this year, occults Spica over South America and south Africa. On June 17, the moon also reaches its seventh close conjunction with Antares in Scorpius. This is also an occultation over South America and south Africa.

June 21. At 8:55 a.m., EST (9:55 a.m. EDT) the summer solstice occurs. The earth reaches that point in its orbit where, because of the inclination of the earth's axis, the sun appears highest in the northern sky and summer begins. For the southern hemisphere, this is the beginning of winter.

July

Mercury moves toward superior conjunction July 22 when it changes from the morning to the evening sky, but is too much in line with the sun to be seen.

Venus rises from 3 to 4 hours before the sun and is bright in the morning sky. On July 10, the waning crescent moon passes near Venus.

Mars is near the meridian at sunset and is visible for the first half of the night in Scorpius. On July 24, the waxing crescent moon passes 2 degrees below Mars at 7 p.m. EST.

Jupiter is far to the west at sunset in Virgo. On July 20, the moon, nearly at first quarter, passes Jupiter after setting from the U. S. and appears east of the planet the following evening.

Saturn is in the morning sky rising about midnight ahead of Venus in Aries. On July 8, Saturn is close south and west of the waning crescent moon.

Moon—Last quarter, July 6; new moon, July 14; first quarter, July 22; full moon, July 28. Moon at apogee, July 13; at perigee, July 28. The combination of perigee and full moon could cause extreme tides at this time. On July 21, the moon near first quarter occults Spica in Virgo for the eighth time this year. This occultation is over New Zealand and South America. On July 25, Antares in Scorpius is occulted for the eighth time this year. This occultation occurs over Indonesia and Australasia.

July 5. The earth reaches aphelion, that point in its orbit which brings it farthest from the sun for the year. The earth is now about 3,000,000 miles more distant from the sun than it was at perihelion in January.

July 29. The Delta Aquarid meteor shower begins and provides more than the average number of meteors for about 3 weeks. This annual summer display is strikingly augmented by the August Perseid shower whose forerunners may begin to appear late this month. The full moon will handicap observers of this shower for the first few nights.

August

Mercury is too much in line with the sun to be visible this month.

Venus rises 3 to 4 hours ahead of the sun. On Aug. 9 the waning crescent moon is near Venus, and Aug. 24 Venus is below the star Pollux in Gemini.

Mars is on the meridian at sunset in Ophiuchus and is visible for the first half of the night. On Aug. 11, Mars and Antares, in Scorpius, are again in close association. On Aug. 21 the moon, just past first quarter, passes 2 degrees below Mars at 7 p.m. EST.

Jupiter sets from 3 to 2 hours after the sun

in Virgo. On Aug. 16, the early crescent moon passes 3 degrees below Jupiter at 5 p.m., just above the western horizon.

Saturn rises about 10 p.m. in Aries.

Moon—Last quarter, Aug. 4; new moon, Aug. 13; first quarter, Aug. 20; full moon, Aug. 27. Moon at apogee, Aug. 9; at perigee, Aug. 25. On Aug. 18, the moon again occults Spica in Virgo for the ninth consecutive time this year, but this occultation cannot be seen from North America. On Aug. 21, Antares is occulted by the moon, also for the ninth time this year. This occultation occurs over southwest Australia and South America.

Aug. 11-12. The Perseid meteor shower reaches its climax after midnight between these two dates. This is the most dependable and one of the most spectacular meteor showers and there is no interference by the moon with observation of the 50 or more meteors an hour which one observer may see.

Aug. 27. The full moon passes through the penumbra, the outer fringe of the earth's shadow. This part of the shadow is faint and makes little or no impression to the casual observer.

September

Mercury reaches greatest eastern elongation Sept. 3 and sets about 1½ hours after the sun during the first part of the month. It moves rapidly to inferior conjunction—between the earth and the sun—on Sept. 29 and is not then visible.

Venus is in the morning sky, rising 2 to 3 hours before the sun in Cancer and Leo. On Sept. 8, the waning crescent moon passes 3 degrees above Venus as the moon and planet rise. On Sept. 22, Venus is near the bright star Regulus in Leo.

Mars is far to the west at sunset and sets about 3 hours after the sun in Ophiuchus and Sagittarius. On Sept. 19, Mars is close north of the first quarter moon.

Jupiter is moving toward conjunction with the sun in early October and is too much in line with the sun to be seen easily. On Sept. 7, Jupiter and Mercury are near each other in the western sky, with Jupiter the more northern and brighter of the two planets.

Saturn rises early in the evening in Aries, and is in the sky most of the night. On Sept. 1 the moon, just past full, passes above Saturn; it repeats this performance Sept. 28.

Moon—Last quarter, Sept. 3; new moon, Sept. 11; first quarter, Sept. 18; full moon, Sept. 25. Moon at apogee, Sept. 6; at perigee, Sept. 22. On Sept. 14, the moon continues its monthly occultation of Spica in Virgo. This occurs at 8 p.m. EST and is not visible from North America. On Sept. 17, the moon again occults Antares in Scorpius, but this occultation is also invisible from North America.

Sept. 11. There is an annular eclipse of the sun, visible over the Pacific Ocean west of North America and over the western portion of South America. The eclipse is partial over all but the northeastern U. S. In an annular eclipse, the moon, at central eclipse, does not completely cover the sun and there is a narrow ring of sun visible around the black silhouette of the moon.

Sept. 23. At 12:07 a.m. EST (1:07 a.m. EDT), the sun crosses the equator at the autumnal equinox on its apparent journey south. Autumn commences in the northern hemisphere and spring begins south of the equator.

Sept. 25. The full moon passes through the outer fringe of the earth's shadow, causing a penumbral eclipse of the moon. This eclipse, which is not visible except with special methods, affects only the extreme northeast part of North America.

October

Mercury reaches greatest western elongation on Oct. 14, and is visible for a few mornings near that date in the eastern sky for about an hour before sunrise.

Venus is also in the eastern sky at sunrise. Venus rises ahead of Mercury and is much the brighter of the two. On Oct. 9, the moon passes close below Venus at 2 a.m., but the moon is so near new that it is difficult to see.

Mars sets about 3 hours after the sun in Sagittarius, and is difficult to see.

Jupiter reaches conjunction with the sun Oct. 9 and cannot be seen.

Saturn is in opposition on Oct. 28, rising as

the sun sets and in the sky all night before the stars of Aries. On Oct. 25, the full moon passes 7 degrees above Saturn as the two objects rise.

Moon—Last quarter, Oct. 3; new moon, Oct. 11; first quarter, Oct. 18; full moon, Oct. 25. Moon at apogee, Oct. 4; at perigee Oct. 17. Consistent with its performance this year, the moon again occults Antares in Scorpius. This occultation occurs at 11 p.m. EST Oct. 18 and is over Australasia. There is no occultation of Spica in Virgo this month.

Oct. 18-23. The Orionid meteor shower occurs, reaching a climax in the early morning hours of Oct. 20. The moon, past first quarter and far to the west, will not interfere greatly with observation.

November

Mercury reaches superior conjunction, beyond the sun from the earth, Nov. 11, and is not visible.

Venus rises about an hour before the sun in Virgo and may be seen during morning twilight.

Mars sets soon after the sun in Capricornus and is not easy to see close above the western horizon.

Jupiter is in the morning sky not far from Venus. The two planets are in conjunction about $\frac{1}{2}$ a degree apart before they rise on Nov. 4. Both planets are near Spica in Virgo.

Saturn, just past opposition in Aries, is in the east at sunset. On Nov. 21, the nearly full moon passes above Saturn.

Moon—Last quarter, Nov. 2; new moon, Nov. 9; first quarter, Nov. 16; full moon, Nov. 23. Moon at apogee, Nov. 1; at perigee, Nov. 12; at apogee, Nov. 29. For explanation of the moon's return to apogee, see notes for January. On Nov. 8, the moon, less than 2 days before new, occults Spica in Virgo, but this occultation occurs during daylight. On Nov. 11, the moon occults Antares in Scorpius, but this occultation also occurs during daylight.

Nov. 16. The Leonid meteor shower occurs. This shower has produced spectacular displays in the

past and should be watched. Look to the northeast from 10 p.m. on. The first quarter moon will not interfere with observation.

December

Mercury reaches greatest eastern elongation Dec. 27, but is still too much in line with the sun to be seen easily.

Venus is also too much in line with the sun to be seen.

Mars is far to the west, setting soon after the sun in Sagittarius. On Oct. 14, the moon occults Mars, but this occultation is not visible from North America.

Jupiter rises about 5 hours before the sun in Virgo.

Saturn, in Aries, is west of the meridian at sunset and is in the sky for the first part of the night. On Dec. 18 at 11 P.M. EST, the gibbous moon passes above Saturn.

Moon—Last quarter, Dec. 1; new moon, Dec. 9; first quarter, Dec. 15; full moon, Dec. 23; last quarter, Dec. 31. For explanation of the recurrence of the last quarter moon, see note for May. Moon at perigee, Dec. 10; at apogee, Dec. 26. The perigee new moon of Dec. 9-10 may cause extreme tides. On Dec. 1 at 1 a.m. EST, the moon is in close conjunction with the bright star Regulus in Leo, causing occultation of Regulus over eastern Europe. Again on Dec. 28, the moon occults Regulus, but this occultation occurs during daylight in North America. The moon occults Spica in Virgo for the 12th time this year on Dec. 5, but this is also a daylight occultation.

Dec. 13. The Geminid meteor shower occurs. This shower has produced many bright meteors and fireballs in the past. The moon, not yet at first quarter, will not interfere with observation.

Dec. 21. At 7:44 p.m. EST, the sun reaches its lowest point in northern skies. This is the winter solstice and marks the beginning of winter in the northern hemisphere and of summer south of the equator.

COMET TABLE 1969

Name	Due to Return	Period in Years	Year of Disc.	Perihelion Dist.	Aphelion Dist.	Inclination to Ecliptic	Long. of Asc. Node on Ecliptic	From Asc. Node to Perihelion
						Degree	Degree	Degree
Perrine	Jan. 1969	6.58	1896	1.19	4.59	16	242	167

Morning and Evening Stars of 1969

MORNING

Mercury—Jan. 29-Apr. 8; May 29-July 22; Sept. 29-Nov. 16.
 Venus—Apr. 8-Dec. 31.
 Mars—Jan. 1-May 31.
 Jupiter—Jan. 1-Mar. 21; Oct. 9-Dec. 31.
 Saturn—Apr. 18-Oct. 29.

EVENING

Mercury—Jan. 1-Jan. 29; Apr. 8-May 29; Jul. 22-Sept. 29; Nov. 16-Dec. 31.
 Venus—Jan. 1-Apr. 8.
 Mars—May 31-Dec. 31.
 Jupiter—Mar. 21-Oct. 9.
 Saturn—Jan. 1-Apr. 18; Oct. 29-Dec. 31.

Astronomical Signs and Symbols

☉ The Sun.	♁ The Earth.	♅ Uranus.	☐ Quadrature.
☾ The Moon.	♂ Mars.	♆ Neptune.	♄ Opposition.
☿ Mercury.	♂ Jupiter.	♇ Pluto.	♊ Ascending Node.
♀ Venus.	♄ Saturn.	♈ Conjunction.	♋ Descending Node.

Two heavenly bodies are in "conjunction" (♈) when they have the same Right Ascension, or are on the same meridian, i.e., when one is due north or south of the other; if the bodies are near each other as seen from the earth, they will rise and set at the same time; they are in "opposition" (♄) when in opposite quarters of the heavens, or when one rises as the other is setting. "Quadrature" (☐) is half way between conjunction and opposition. By "greatest elongation" is meant the

greatest apparent angular distance from the sun, the planet is then generally most favorably situated for observation. Mercury can be seen with the naked eye only at this time. When a planet is in its "ascending" (♊) or "descending" (♋) node it is passing through the plane of the earth's orbit. The term "Perihelion" means nearest to the sun, and "Aphelion" farthest from the sun. An "occultation" of a planet or star is an eclipse of it by some other body, usually the moon.

Giant Telescopes Planned for Southern Hemisphere

For many years astronomers have been aware of a serious deficiency in optical observation. All of the world's larger telescopes are in the northern hemisphere and thus cannot be used to study southern skies. The 200-inch Hale reflector is at Mt. Palomar in California. The 120-inch reflector is at the Lick Observatory in California. Mt. Wilson in California and the Crimean Astrophysical Observatory in the USSR have telescopes with 100-inch and 104-inch mirrors, respectively, and Russia is constructing a reflector with a mirror 236 inches in diameter. The largest telescopes at present in the southern hemisphere, however, are 74-inch reflectors in Pretoria, South Africa and Mt. Stromlo, Australia.

Two telescopes are being planned for South America which will remedy this situation. The U. S. is erecting a 150-inch reflector at Cerro Tololo in Chile, and a 140-inch mirror at La Silla Mountain will be administered by the European Observatory Group. Australia is planning a telescope with an aperture of 150 inches at Siding Spring. Tremendous advances in the study of the central region of the Milky Way and of the Magellanic Clouds, as well as more detailed studies of many other regions hitherto unavailable to giant telescopes, will be made through the use of these planned instruments.

OPTICAL TELESCOPES

Optical astronomical telescopes are of two kinds, refracting and reflecting. In the first, light passes through a lens which brings the light rays to a focus, where the image may be examined after being magnified by a second lens, the eye-piece, or directly photographed.

The reflector consists of a concave parabolic mirror, generally of Pyrex, coated with silver or aluminum, which reflects the light rays back toward the upper end of the telescope, where they are either magnified and observed by the eye-piece or, as in the case of the refractors, photographed. In most reflecting telescopes, the light is reflected again by a secondary mirror and comes to a focus after passing through a hole in the side of the telescope, where the eye-piece or camera is located, or after passing through a hole in the center of the primary mirror.

The Schmidt Telescopes are strictly cameras and cannot be used for visual observation. Light enters the upper end of the telescope tube, is refracted slightly by a correcting lens and is then reflected from a spherical mirror with a short focus. A camera, placed inside the telescope at the focus of the mirror can photograph large areas of the sky without distortion at the edges of the photograph. The diameters of Schmidt telescopes are given in two figures; first, the diameter of the correcting lens, followed by the diameter of the mirror.

Major Planetariums in the United States

A planetarium projector is perhaps the most complicated instructional device ever made. The first modern planetarium projector was designed and built in 1923 by Walter Bauersfeld of the Zeiss Optical Company. Other instruments had been attempted with only fair success before this time and modern projectors have developed from this beginning. There are now several manufacturers who make elaborate planetarium projectors.

A typical projector for a large auditorium can project the images of nearly 9,000 stars against the reflective surface of a hemispherical dome. In addition, the Milky Way, star clusters, nebulae and other objects sufficiently bright to be seen under ideal conditions by the unaided eye are shown.

Planetarium projectors are usually in the form of two globes, one at either end of a latticed cylinder. The globes contain projectors for the stars, one for the northern hemisphere and the other for the south. In the latticed cylinder are projectors for the sun, the moon and the five planets visible to the eye. The motions of all of these objects are duplicated by the projector with amazing fidelity. First of all, the projector can be set in latitude so that it will produce the sky as it might be seen from any location on earth. The daily motion of the earth which moves the sky throughout the day and night is the first and simplest effect produced. Then there is annual motion, the progress of the sun, moon and planets through the year, including the phasing of the moon. Finally, the precession of the equinoxes, the slow swing of the poles

of the earth which is accomplished in 25,800 years and which slowly changes our view of the sky is also built into the complicated mechanism of these instruments.

The effects of the projector itself are usually supplemented by auxiliary projectors mounted around the edges of the auditorium to produce the color effects of sunrise and sunset, the aurora, clouds, rainbows, eclipses and many other phenomena. Most of the functions of the projector are controlled by the lecturer, who produces them from an array of switches and rheostats mounted in a control console usually situated near the north side of the auditorium. Appropriate music, pre-recorded on tape and played on signal adds to the dramatic effect of a planetarium presentation.

There are literally hundreds of small planetarium projectors in schools and museums in the United States and several planetariums whose auditoriums will seat hundreds. The major planetariums in the United States are listed below.

Academy Planetarium, U. S. Air Force Academy.
Adler Planetarium, Chicago, Ill.
American Museum-Hayden Planetarium, N. Y. C.
Buhl Planetarium, Pittsburgh, Pa.
Charles Hayden Planetarium, Boston, Mass.
Fels Planetarium, Philadelphia, Pa.
Griffith Planetarium, Los Angeles, Calif.
McDonnell Planetarium, St. Louis, Mo.
Morehead Planetarium, Chapel Hill, N. C.
Morrison Planetarium, San Francisco, Calif.
Robert T. Longway Planetarium, Flint, Mich.

Visible Planets of the Solar System

Mercury, Venus, Mars, Jupiter and Saturn

MERCURY

Mercury, nearest planet to the sun, is also the smallest of the nine planets known to be orbiting the sun. Its diameter is 3,100 miles and its mean distance from the sun is 39,000,000 miles.

Mercury moves with great speed in its journey about the sun, averaging about 30 miles a second to complete its circuit of the sun in 88 of our days. Radar observations of Mercury by the 1,000-foot radio telescope at Arecibo, Puerto Rico, disclosed that Mercury rotates upon its axis over a period of nearly 59 days, thus exposing all of its surface periodically to the sun. For nearly 100 years, astronomy had accepted a rotational period for Mercury of 88 earth-days, synchronous with its period of revolution. A synchronous rotation-revolution period would have caused the same side of Mercury to face the sun constantly and would have produced a temperature of between 750° and 1,000° on the sun-facing surface, while the perpetually dark side would have had a temperature of about -450° Fahrenheit.

Now, while it is believed that the surface passing before the sun may have a temperature of about 800° F., the temperature on the side turned temporarily away from the sun does not fall as low as might be expected. This night temperature has been described by Russian astronomers as "room temperature"—possibly about 70°. This would contradict the former belief that Mercury did not possess an atmosphere, for some sort of atmosphere would be needed to retain some of the fierce solar radiation that must strike Mercury at its small distance from the sun. A shallow but dense layer of carbon dioxide would produce the "greenhouse" effect in which heat accumulated during exposure to the sun, would not completely escape at night.

This uncertainty about conditions upon Mercury and its motion arise from its short angular distance from the sun as seen from the earth, for Mercury is always too much in line with the sun to be observed against a dark sky, but is always seen during either morning or evening twilight.

VENUS

Venus is slightly smaller than the earth. Its diameter is about 200 miles less than the earth's diameter. Venus moves about the sun at a mean distance of 67,000,000 miles in 225 of our days. Its synodical revolution—its return to the same relationship with the earth and the sun, which is a result of the combination of its own motion and that of the earth—is 584 days. Venus will, then, be nearer to the earth every 19 months than any of the other planets of the solar system. We have never been able to see the surface of Venus because the planet is covered with a dense, white cloudy atmosphere that conceals whatever is below it. This same cloud reflects sunlight efficiently so that when Venus is favorably situated, it is the third brightest object in the sky, exceeded only by the sun and the moon.

Telescopic observation of Venus has not been able to disclose the rate of rotation of the planet and, until late in 1962, there was nothing more than speculation about the temperatures on its surface, the nature of its atmosphere and the inclination of its axis of rotation which would produce seasonal changes there. Latest authorities now state that the polar axis of Venus is tilted away from the vertical by about 32°, so that Venus does have seasons. Opinions as to its period of rotation ranged from about the same as that of the earth—about 24 hours—to a longer intermediate period of about 30 earth days and then to one in which its period of rotation corresponded with its period of revolution, 225 days. This would keep the same side of Venus always facing the sun, and would produce high temperatures on that side. Observation appeared to confirm a high temperature on the sunlit face of Venus and the longer rotation period was generally accepted. Traces of what appeared to be carbon dioxide were found in the atmosphere and no water vapor or free oxygen appeared to exist there.

In 1959, a spectroscopic sent in a balloon to a height of about 100,000 feet did indicate the presence of both these commodities in the atmosphere of Venus and our conception of the planet underwent certain changes. Where Venus had earlier been considered a waterless desert, water

vapor and oxygen indicated a planet whose surface must be a steaming caldron because of a possible high temperature, at least upon the sunward side. Estimates of this temperature ran as high as 600° and seemed to inhibit the possibility of organic life on Venus and to support the theory that Venus rotated in the same period as it revolved.

In 1966, the Russian space probe, Venus 4, landed upon the surface of the planet and a few days later, the American space probe, Mariner V, made a close fly-by of Venus. Readings from the instruments of both these vehicles confirmed the 1962 findings of Mariner II, which then passed within 25,000 miles of Venus. The temperature on the surface of Venus, below its atmosphere, is extremely high—perhaps 800 degrees F. No breaks in the cloudy atmosphere were reported. The temperature on the upper surface of the clouds was about 30° below zero. An extremely weak magnetic field or none at all appeared to be indicated by other instruments in the space probe. This would indicate that Venus did not rotate at all or had an extremely slow rotation. Further studies of Venus by radio astronomy indicate a retrograde rotation—in the opposite direction to the rotation of the Earth, for example—with a period of 247 earth days. This, combined with the period of revolution of Venus of 225 earth days, would give a specific point on Venus a period of sunlight 118 earth days in length during which the sun would rise in what would be west on earth, move slowly eastward and set in the east.

Venus also appears to be subjected to fierce blasts of solar plasma which produce conditions dangerous to living organisms in its vicinity. The mysteries of Venus have only been intensified by the knowledge we have recently gained about it.

MARS

Mars is the first planet beyond the earth, away from the sun. Mars's diameter is about 4,200 miles, although a determination of the radius and mass of Mars by the space-probe, Mariner IV, which flew by Mars on July 14, 1965 at a distance of less than 6,000 miles, indicated that these dimensions were slightly larger than had been previously estimated. While Mars's orbit is also nearly circular, it is not as nearly centered on the sun as are the orbits of many of the other planets, and Mars is more than 30 million miles farther from the sun in some parts of its year than it is at others. Mars takes 687 of our days to make one circuit of the sun, traveling at about 15 miles a second. Mars rotates upon its axis in almost the same period of time that the earth does—24 hours and 37 minutes. Mars's mean distance from the sun is 141 million miles, so that the temperature on Mars would be lower than that on the earth even if Mars's atmosphere were about the same as ours. This is far from being the case, however, for Mariner IV reported that atmospheric pressure on Mars as between 1% and 2% of the earth's atmospheric pressure. This thin atmosphere appears to be largely carbon dioxide with traces of nitrogen and argon. No evidence of free water was found.

There appears to be no magnetic field about Mars. This would eliminate the previous conception of a dangerous radiation belt around Mars similar to the Van Allen Belt around the earth. The same lack of a magnetic field would expose the surface of Mars to an influx of cosmic radiation about 100 times as intense as that on earth.

Five-eighths of the surface of Mars is a desert of reddish rock, sand and soil. The rest of Mars is covered by irregular patches that appear generally green in hues that change through the Martian year. These were formerly held to be some sort of primitive vegetation, but with the findings of Mariner IV of a complete lack of water and oxygen, such growth does not appear possible. The nature of the green areas is now unknown, but two theories about them have been advanced. They may be regions covered with volcanic salts whose color changes with changing temperatures and atmospheric conditions, or they may be gray, rather than green. Optical experiments show that when large gray areas are placed beside large red areas, the gray areas will

appear green to the eye.

Mars is inclined from a vertical to the plane of its orbit about the sun by about 25° and therefore has seasons as does the earth, except that the Martian seasons are longer because Mars's year is longer. White caps form about the winter pole of Mars, growing through the winter and shrinking in summer. These polar caps were thought to be frozen water which when it melted, nourished the green areas. In view of the negative findings of Mariner IV, however, the caps are thought to be carbon dioxide.

The canals of Mars have become more of a mystery than they were before the voyage of Mariner IV. Markings forming a network of fine lines crossing much of the surface of Mars have been seen there by men who have devoted much of their professional time to the study of the planet, but no canals have shown clearly enough upon previous photographs to be universally accepted. A few of the 21 photographs sent back to earth by Mariner IV covered areas crossed by canals. The pictures show faint, ill-defined, broad, dark markings, but no positive identification of the nature of the markings has been made. The photographs show that the surface of Mars bears a marked resemblance to the surface of the moon. There are craters in most of the pictures, which appear identical with lunar craters.

Mars's position in its orbit and its speed around that orbit in relation to the earth's position and speed bring Mars fairly close to the earth on two occasions about two years apart and then move Mars and the earth too far apart for accurate observation and photography for about 15 years. In September, 1956, Mars paid the second of the current series of close visits to the earth, when it came to a little more than 35 million miles from us. It had not been as close as this since 1924 and it will be even closer in 1971.

When Mars is favorably situated it is brighter than most of the stars and is definitely red and not difficult to locate. The polar caps may be seen with a small telescope under good conditions and the differences in color of the various regions of the surface can sometimes be perceived. To bring out any surface detail, however, requires a large instrument and the cooperation of the atmosphere of the earth and Mars.

Mars has two satellites. They are small, about 5 and 10 miles in diameter. They were discovered in 1877 by Asaph Hall. The outer satellite is named Deimos and it revolves around Mars in about 31 hours. The inner satellite, Phobos, whips around Mars in a little more than 7 hours, making three trips around the planet each Martian day. While these tiny satellites were not discovered until 1877, they were described with uncanny accuracy by Johnathan Swift in "Gulliver's Travels," published in 1726.

JUPITER

Jupiter is the largest of the planets. Its equatorial diameter is 88,000 miles, 11 times the diameter of the earth. Its polar diameter is about 6,000 miles shorter. This is caused by the almost fluid condition of its atmosphere and its extremely rapid rate of rotation. Jupiter's day is just under 10 hours long. For a planet of this size, this rotational speed is amazing, and it carries a point on Jupiter's equator along at a speed of 22,000 miles an hour, as compared with 1,000 miles an hour for a point on the earth's equator. Jupiter is at an average distance of 480 million miles from the sun and takes almost 12 of our years to make one complete circuit of the sun. This makes its apparent motion through our skies very slow. Jupiter moves through one of the 12 zodiacal constellations in about a year.

Much of Jupiter's diameter is atmosphere. The question of whether or not the giant planet has any solid core at all has recently been re-opened, but the current widely accepted picture of the planet provides a small, heavy, solid center, covered with a sheath of ice about 10,000 miles thick. This all lies at the bottom of an atmosphere about 25,000 miles deep. This atmosphere is made up of hydrogen, helium, methane and ammonia and, since the temperature on the surface of Jupiter is about 200° below zero F., these gases must be of the consistency of slush. Jupiter's cloudy atmosphere is a fairly good reflector of sunlight and makes it far brighter than any of the stars among which it wanders. An extremely heavy radioactive belt has also been discovered

surrounding Jupiter, similar to the earth's Van Allen Belt.

Jupiter has 12 satellites. Four of these are large and bright, rivaling our own moon and the planet Mercury in diameter, and may be seen through a field glass. They move rapidly around Jupiter and their change of position from night to night is extremely interesting to watch. The eight additional satellites are much smaller and, in all but one instance, much farther from Jupiter, and cannot be seen except through powerful telescopes. The 4 outermost satellites are revolving around Jupiter from east to west, contrary to the motions of the great majority of the satellites in the solar system and to the direction of revolution of the planets around the sun. The reason for this retrograde motion is not known, but one theory is that Jupiter's tremendous gravitational power may have captured 4 of the minor planets or asteroids, that move about the sun between Mars and Jupiter, and that these 4 may be running backwards. Jupiter's mass is more than twice the mass of all the other planets put together, and accounts for Jupiter's tremendous gravitational field and so, probably, for its numerous satellites and its dense atmosphere.

SATURN

Saturn, last of the planets visible to the unaided eye, is almost twice as far from the sun as is Jupiter, almost 900 million miles. It is second in size to Jupiter but its mass is much smaller. Saturn's specific gravity is less than that of water, and if an ocean big enough could be found, Saturn would float in it. Its diameter is about 71,000 miles at the equator; its rotational speed spins it completely around in a little more than 10 hours, and its atmosphere is much like that of Jupiter, except that at its greater distance from the sun, its temperature is at least 100° colder. At about 300° F. below zero, the ammonia would be frozen out of Saturn's clouds. The theoretical construction of Saturn resembles that of Jupiter, it is either all gas, or it has a small heavy center surrounded by a layer of ice and a deep atmosphere.

Saturn has ten satellites, the 10th having been discovered by the French astronomer Audouin Dollfus in December, 1966. The newly found satellite is a few thousand miles outside of the edge of Saturn's ring system and its discovery was made possible by the edge-on presentation of the rings which is caused by the inclinations of the polar axes of Saturn and the earth. At such times, the rings virtually disappear to observers on earth. This aspect of the rings reduces their brilliance and would permit the hitherto unknown satellite to be seen.

Saturn's ring system begins about 7,000 miles above the visible disk of Saturn, lying above its equator and is a flat ring that extends about 35,000 miles into space around the planet. Although the diameter of the ring system, including Saturn itself, is about 170,000 miles, the rings are estimated to be no more than 10 miles in depth—from top to bottom. This makes them among the flattest things in nature, considering depth in proportion to width. The rings are probably made of billions of tiny particles, undoubtedly including ice, each of which follows its own individual orbit about Saturn. One theory of the origin of this system is that the material in it was once consolidated into an eleventh satellite which, because of some gravitational aberration ages ago, was drawn so close to Saturn that the great planet's gravitational stresses shattered it to bits, scattering the fragments as rings around the destroying planet.

The rings cannot be seen except in a telescope of at least 3-inch aperture. Because of Saturn's inclination, as stated above, there are two periods during Saturn's journey around the sun when the rings are presented to us edge-on. At these times, the rings disappear. Nothing that is only 10 miles wide can be seen from a distance of nearly 900 million miles. The rings are not now in a favorable position to be seen. They were edge-on in 1966 and will reach maximum visibility again in 1973, when we will see the lower or southern face of the rings.

Saturn takes 29½ years to go around the sun. It thus moves very slowly among the constellations of the zodiac, remaining in each one for more than two years.

The Earth; Size; Computation of Time; Seasons

SIZE AND DIMENSIONS

The earth is the fifth largest planet and the third from the sun. Its mass is 6 sextillion, 538 quintillion short tons. Using the parameter of an ellipsoid adopted by the International Astronomical Union in 1964 and recognized by the International Union of Geodesy and Geophysics in 1967, the length of the equator is 24,901.55 miles, the length of a meridian is 24,859.82 miles, the equatorial diameter is 7,926.41 miles, and the area of this reference ellipsoid is approximately 196,938,800 square miles.

The earth is considered a solid, rigid mass with a dense core of magnetic, probably metallic material. The outer part of the core is probably liquid. Around the core is a thick shell or mantle of heavy crystalline rock which in turn is covered by a thin crust forming the solid granite and basalt base of the continents and ocean basins. Over broad areas of the earth's surface the crust has a thin cover of sedimentary rock such as sandstone, shale, and limestone formed by weathering of the earth's surface and deposition of sands, clays, and plant and animal remains.

The temperature in the earth increases about 1°F. with every 100 to 200 feet in depth, in the upper 100 kilometers of the earth, and the temperature near the core is believed to be near the melting point of the core materials under the conditions at that depth. The heat of the earth is believed to be derived from radioactivity in the rocks, pressures developed within the earth, and original heat (if the earth in fact was formed at high temperature).

ATMOSPHERE OF THE EARTH

The earth's atmosphere is a blanket composed of gases and some water vapor. The principal gases are nitrogen, oxygen and argon, in amounts of about 78, 21 and 1% by volume. Also present in minute quantities are carbon dioxide, hydrogen, neon, helium, krypton and xenon.

Water vapor occupies space independent of other gases and varies from nearly zero to about 4% by volume. The height of the ozone layer varies from approximately 12 to 21 miles above the earth. Traces exist as low as 6 miles and as high as 35 miles. Bits of methane have been found.

The atmosphere rests on the earth's surface with the weight equivalent to a layer of water 34 ft. deep. For about 300,000 ft. upward the gases remain in the proportions stated. Gravity holds the gases to the earth. The weight of the air compresses it at the bottom, so that the greatest density is at the earth's surface. Pressure, as well as density, decreases as height increases because the weight pressing upon any layer is always less than that pressing upon the layers below.

The temperature of the air drops with increased height, until the tropopause is reached. This may vary from 25,000 to 60,000 ft. The atmosphere below the tropopause is the **troposphere**; the atmosphere for about twenty miles above the tropopause is the **stratosphere**, where the temperature generally increases with height except at high latitudes in winter. A temperature maximum near the 30-mile level is called the **stratopause**. Above this boundary is the **mesosphere** where the temperature decreases with height to a minimum, the **mesopause**, at a height of 50 miles. Extending above the mesosphere to the outer fringes of the atmosphere is the **thermosphere**, a region where temperature increases with height to a value measured in thousands of degrees Fahrenheit. The lower portion of this region, extending from 50 to about 400 miles in altitude, is characterized by a high ion density, and is thus called the **ionosphere**. The outer region is called **exosphere**, this is the region where gas molecules traveling at high speed may escape into outer space. Above 600 miles.

LATITUDE, LONGITUDE

Position on the globe is measured by means of meridians and parallels. Meridians, which are imaginary lines drawn around the earth through the poles, determine **longitude**. The meridian running through Greenwich, England, is the **prime meridian** of longitude, and all others are either east or west. Parallels, which are imaginary circles parallel with the equator, determine **latitude**. The length of a degree of longitude varies as the cosine of the latitude. At the equator a degree is 69.171 statute miles; this is gradually reduced toward the poles. Value of a longitude degree at the poles is zero.

Latitude is reckoned by the number of degrees north or south of the equator, an imaginary circle on the earth's surface everywhere equidistant

between the two poles. According to the IAU Ellipsoid of 1964, the length of a degree of latitude is 68.708 statute miles at the equator and varies slightly north and south because of the oblate form of the globe; at the poles it is 69.403 statute miles.

COMPUTATION OF TIME

The earth rotates on its axis and follows an elliptical orbit around the sun. The rotation makes the sun appear to move across the sky from East to West. It determines day and night and the complete rotation, in relation to the sun, is called the **apparent** or **true solar day**. This varies but an average determines the **mean solar day** of 24 hours.

The mean solar day is in universal use for civil purposes. It may be obtained from apparent solar time by correcting observations of the sun for the equation of time, but when high precision is required, the mean solar time is calculated from its relation to sidereal time.

Sidereal time is the measure of time defined by the diurnal motion of the vernal equinox, and is determined from observation of the meridian transits of stars. One complete rotation of the earth relative to the equinox is called the **sidereal day**. The mean sidereal day is 23 hours, 56 minutes, 4.091 seconds of mean solar time.

The **Calendar Year** begins at 12 o'clock precisely local clock time, on the night of Dec. 31-Jan. 1. The day and the calendar month also begin at midnight by the clock. The interval required for the earth to make one absolute revolution around the sun is a **sidereal year**; it consists of 365 days, 6 hours, 9 minutes, and 9.5 seconds in 1900, and is increasing at the rate of 0.0001 second annually.

The **Tropical Year**, on which the return of the seasons depends, is the interval between two consecutive returns of the sun to the vernal equinox. The tropical year consisted of 365 days, 5 hours, 48 minutes, and 46 seconds. It is decreasing at the rate of 0.530 seconds per century.

In 1956 the unit of time interval was defined to be identical with the second of **Ephemeris Time**, 1/31,556,925.9747 of the tropical year for 1900 January 0d 12th hour E. T. A physical definition of the second based on a quantum transition of cesium (atomic second) was adopted in 1964. The atomic second is equal to 8,192,631,770 cycles of the emitted radiation. In 1967 this atomic second was adopted as the unit of time interval for the Intern'l System of units.

THE ZONES AND SEASONS

The five zones of the earth's surface are the **Torrid**, lying between the Tropics of Cancer and Capricorn; **North Temperate**, between Cancer and the Arctic Circle; **South Temperate**, between Capricorn and the Antarctic Circle; the **Frigid Zones**, between the polar Circles and the Poles.

The inclination or tilt of the earth's axis with respect to the sun determines the seasons. These are best marked in the North Temperate Zone, where spring begins at the vernal equinox, summer at the summer solstice, autumn at the autumnal equinox and winter at the winter solstice.

In the South Temperate Zone, the seasons are reversed. Spring begins at the autumnal equinox, summer at the winter solstice, etc.

If the earth's axis were perpendicular to the plane of the earth's orbit around the sun there would be no change of seasons. Day and night would be of equal length and there would be equable conditions of temperature. But the axis is tilted 23° 27' away from a perpendicular to the orbit and only in March and September is the axis at right angles to the sun.

The points at which the sun crosses the equator are the equinoxes, when day and night are most nearly equal. The points at which the sun is at a maximum distance from the equator are the solstices. Days and nights are then most unequal.

In June the North Pole is tilted 23° 27' toward the sun and the days in the northern hemisphere are longer than the nights, while the days in the southern hemisphere are shorter than the nights. In December the North Pole is tilted 23° 27' away from the sun and the situation is reversed.

THE SEASONS IN 1969

In 1969 the 4 seasons will begin as follows according to EST; add one hour for Atlantic Time; subtract one hour for Central, two hours for Mountain, 3 hours for Pacific; 4 hours for Yukon; 5 hours for Alaska-Hawaii and 6 hours for Bering Time.

Vernal Equinox	(Spring)	March 20, 2:08 p.m.
Summer Solstice	(Summer)	June 21, 8:55 a.m.
Autumnal Equinox	(Autumn)	Sept. 23, 12:07 a.m.
Winter Solstice	(Winter)	Dec. 21, 7:44 p.m.

Poles and Rotation of the Earth

POLES OF THE EARTH

Source: Coast and Geodetic Survey, ESSA

The geographic (rotation) poles, or points where the earth's axis of rotation cuts the surface, are not absolutely fixed in the body of the earth. The pole of rotation describes an irregular curve about its mean position.

Two periods have been detected in this motion: (1) an annual period due to seasonal changes in barometric pressure, load of ice and snow on the surface and to other phenomena of seasonal character; (2) a period of about 14 months due to the shape and constitution of the Earth.

In addition there are small but as yet unpredictable irregularities. The whole motion is so small that the actual pole at any time remains within a circle of 30 or 40 feet in radius centered at the mean position of the pole.

The pole of rotation for the time being is of course the pole having a latitude of 90° and an indeterminate longitude.

MAGNETIC POLES

The north magnetic pole of the earth is that region where the magnetic force is vertically downward and the south magnetic pole that region where the magnetic force is vertically upward. A compass placed at the magnetic poles experiences no directive force.

There are slow changes in the distribution of the earth's magnetic field. These changes were at one time attributed in part to a periodic movement of the magnetic poles around the geographical poles, but later evidence refutes this theory and points, rather, to a slow migration of "disturbance" foci over the earth.

There appear shifts in position of the magnetic poles due to the changes in the earth's magnetic field. The center of the area designated as the north magnetic pole was estimated to be in about latitude 70.5° N and longitude 96° W in 1905; from recent nearby measurements and studies of the secular changes, the position in 1965 is estimated as latitude 75.5° N and longitude 100.5° W. Improved data rather than actual motion account for at least part of the change.

The position of the south magnetic pole in 1912 was near 71° S and longitude 150° E; the position in 1965 is estimated at latitude 66.5° S. and longitude 139.9° E.

The direction of the horizontal components of the magnetic field at any point is known as magnetic north at that point, and the angle by which it deviates east or west of true north is known as

the magnetic declination, or in the mariner's terminology the variation of the compass.

A compass without error points in the direction of magnetic north. (In general this is not the direction of the magnetic north pole.) If one follows the direction indicated by the north end of the compass, he will travel along a rather irregular curve which eventually reaches the north magnetic pole (though not usually by a great-circle route). However, the action of the compass should not be thought of as due to any influence of the distant pole, but simply as an indication of the distribution of the earth's magnetism at the place of observation.

ROTATION OF THE EARTH

Source: U. S. Naval Observatory

The speed of rotation of the earth about its axis has been found to be slightly variable. The variations may be classified as:

(a) **Secular.** Tidal friction acts as a brake on the rotation and causes a slow secular increase in the length of the day, about 1 millisecond per century.

(b) **Irregular.** The speed of rotation may increase for a number of years, about 5 to 10, and then start decreasing. The maximum difference from the mean in the length of the day during a century is about 5 milliseconds. The accumulated difference in time has amounted to approximately 40 seconds since 1900. The cause is probably turbulent motion in the core of the earth.

(c) **Periodic.** Seasonal variations exist with periods of one year and six months. The cumulative effect is such that each year the earth is late about 30 milliseconds near June 1 and is ahead about 30 milliseconds near Oct. 1. The maximum seasonal variation in the length of the day is about 0.5 millisecond. It is believed that the principal cause of the annual variation is the seasonal change in the wind patterns of the Northern and Southern Hemispheres. The semi-annual variation is due chiefly to tidal action of the sun, which distorts the shape of the earth slightly.

The secular and irregular variations were discovered by comparing time based on the rotation of the earth with time based on the orbital motion of the moon about the earth and of the planets about the sun. The periodic variation was determined largely with the aid of quartz-crystal clocks. The introduction of the cesium-beam atomic clock in 1955 made it possible to determine in greater detail than before the nature of the irregular and periodic variations.

Five Eclipses in 1969

The time used in these tables is Eastern Standard Time. To obtain Central Standard Time, subtract 1 hour; Mountain Standard Time, subtract 2 hours; Pacific Standard Time, subtract 3 hours. A.M. light figures; P.M. black; 0 designates midnight, 12 designates noon.

FIRST ECLIPSE

An Annular Eclipse of the Sun, March 17-18, 1969. The eclipse is visible over the Indian Ocean, the Malay Peninsula, Indonesia, the Philippines, part of Southeast Asia and Japan, Australia, the western Pacific Ocean, and part of Antarctica.

CIRCUMSTANCES OF THE ECLIPSE

	d	h	m
Eclipse begins	March 17	09	06.5
Central eclipse begins	March 17	10	08.7
at local apparent noon	March 17	11	37.8
Central eclipse ends	March 18	01	40.2
Eclipse ends	March 18	02	42.4

SECOND ECLIPSE

A Penumbra Eclipse of the Moon, April 2, 1969. The beginning of the eclipse is visible in the western part of the Pacific Ocean, Asia, eastern Europe, the eastern half of Africa, the Indian Ocean, Australia, New Zealand, and Antarctica; the end of the eclipse is visible in Asia except the extreme northeastern part, most of Australia, the Indian Ocean, Africa, Europe, the Atlantic Ocean except the western part, and Antarctica.

CIRCUMSTANCES OF THE ECLIPSE

	d	h	m
Moon enters penumbra	April 2	11	38.4
Middle of the eclipse	April 2	01	32.5
Moon leaves penumbra	April 2	03	26.6
Penumbra magnitude of the eclipse			0.728

THIRD ECLIPSE

A Penumbra Eclipse of the Moon, August 27, 1969. The beginning of the eclipse is visible in North America except the extreme northeastern part, the western half of South America, the

Pacific Ocean, the northeastern coast of Asia, Australia, New Zealand, and Antarctica; the end visible in North America except the northeastern part, the Pacific Ocean, the east coast of Asia, New Zealand and Antarctica.

CIRCUMSTANCES OF THE ECLIPSE

	d	h	m
Moon enters penumbra	August 27	05	21.0
Middle of the eclipse	August 27	05	47.7
Moon leaves penumbra	August 27	06	14.7
Penumbra magnitude of the eclipse			0.038

FOURTH ECLIPSE

An Annular Eclipse of the Sun, September 11, 1969. The eclipse is visible over the central Pacific Ocean and the western half of South America.

CIRCUMSTANCES OF THE ECLIPSE

	d	h	m
Eclipse begins	September 11	12	01.5
Central eclipse begins	September 11	01	06.7
Central eclipse at local apparent noon	September 11	02	44.6
Central eclipse ends	September 11	04	50.1
Eclipse ends	September 11	05	55.1

FIFTH ECLIPSE

A Penumbra Eclipse of the Moon, September 25, 1969. The beginning of the eclipse is visible in Asia, the western Pacific Ocean, Australia, New Zealand, the Indian Ocean, Africa except the western part, Europe except the western part, and the Arctic regions; the end is visible in Asia except the eastern part, the Indian Ocean, Africa, Europe, the Atlantic Ocean, South America except the western part, the extreme northeastern part of North America and the Arctic regions.

CIRCUMSTANCES OF THE ECLIPSE

	d	h	m
Moon enters penumbra	September 25	01	05.0
Middle of the eclipse	September 25	03	09.7
Moon leaves penumbra	September 25	05	14.3
Penumbra magnitude of the eclipse			0.926

Meteor Showers Are Numerous Every Year

About a dozen meteor showers occur each year and the dates on which they take place may be found in the Calendar of Celestial Events. These showers are caused by the earth's passage through streams of meteoroids left in space by comets, of which they were a part. The meteoroids orbit the sun along the path originally followed by the comet and are encountered annually by the earth as it moves about the sun.

Canadian and American researchers have found evidence that the earth has been subjected to heavy bombardment from space on several occasions from 34,000,000 to 700,000 years ago.

The oldest of these catastrophes covered the eastern half of North America, the Atlantic Ocean and the northern half of Africa. Scars in the form of circular pits, sometimes a score of yards in diameter and often filled with water, have been located in northern Quebec, and fragments of metallic, stony and glassy objects define the area.

Central Europe received a fall of similar objects about 15,000,000 years ago and the most recent fall, about 700,000 years ago, struck the region including Australia and southeastern Asia.

The stony-metallic fragments are thought to originate in the asteroid belt, a region in space roughly between Mars and Jupiter in which travel thousands of minor planets ranging in size from 480 miles in diameter down to flying mountains a few miles across. Gravitational upheavals and collisions among asteroids are believed to provide fragments, some of which may reach the earth.

The glassy fragments, called tektites, are thought to be material resulting from collisions of large objects with the earth or the moon, scattered originally in liquid form and cooling after impact into drop-shaped, glassy particles.

METEORS

Meteoroids are celestial bodies, possibly associated with comets, that move through space with velocities up to 40 miles per second. Upon reaching the earth's atmosphere, they are vaporized by the heat of the friction of their passage into the atmosphere and are seen as meteors. An unusual number in a short period of time is

called a meteor shower. Meteors are popularly known as falling stars or shooting stars. While most of them are consumed, a few fall to earth as fused metal or stone, and are called meteorites.

Many meteorites have been picked up in the United States, most of them small. A huge meteorite may be embedded in the earth at Meteor Crater on U. S. 6 near Canyon Diablo in Arizona. The crater is 1 mi. in diameter at the surface and over 500 feet deep, and is surrounded by a wall of earth filled with pyrites presumably originating with the meteor. A lake in the Ungava region of northern Quebec fills the Chubb Crater, discovered 1943, which is $7\frac{1}{2}$ mi. around. Vast destruction of timber was caused by a meteorite that hit in the vicinity of Lake Baikal, in Siberia, June 30, 1908. A large meteor that split into fragments of 80 to 820 pounds fell Feb. 17, 1930, 14 mi. sw of Paragould, Ark.

On display in the American Museum-Hayden Planetarium, New York, N. Y., are three meteorites: a 34-lb. 88-pound iron-nickel meteorite and another 3-ton one brought from Cape York, Greenland, by Robert E. Peary in 1907 and a $14\frac{1}{2}$ -ton meteorite found in the Willamette region of Oregon in 1902.

COMETS

The origin of comets is not known. Dr. Jan Oort, a Dutch astronomer, presents the hypothesis that there is a wide, irregular cloud of comets around the outskirts of the solar system. From this cloud single comets may be drawn, from time to time, by the gravitational pull of one of the large outer planets and started on journeys through the solar system on long elliptical orbits about the sun.

Comets sufficiently bright to be seen without a telescope are rare. In October and November, 1965, a new comet, Ikeya-Seki, was visible in the morning skies before sunrise as the most spectacular comet since Halley's in 1910. Barring the unexpected appearance of an as yet unknown bright comet, possible at any time, the next certain bright comet due to appear is Halley's Comet, expected in 1986.

On page 256 are listed a few of the short-period comets that make fairly regular visits to the region of the earth.

Landing Sites for Apollo Exploration of Moon Chosen

From a series of unmanned explorations, the National Aeronautics and Space Administration has selected 5 possible landing sites for the first manned mission to the moon. This choice may be reduced to 3 by the time the 3-man Apollo Space Craft is ready for launching.

All 5 landing sites are in relatively smooth areas, which, nevertheless, contain features of scientific interest such as small craters, rilles, faults, ray material and ridges. All the sites are near the lunar equator on the side of the moon that perpetually faces the earth.

One is almost in the center of the visible side of the moon, in the Sinus Medii, "The Central Bay." It is south of the small crater Bruce. Two are in the Oceanus Procellarum, "The Ocean of Storms," the great plain that covers half of the west side of the moon. One of these is near the bright crater Kepler, north and west of the great crater Copernicus. The other is farther east, near the crater Flamsteed.

The remaining two sites are on the lunar east, not far from each other, in the Mare Tranquillitatis, "The Sea of Tranquility." The first of these is north of the small crater Moltke, and the other farther east near the crater Censorius.

The location of these sites on the face of the moon visible from the earth makes continuous radio communication possible, although the two members of the Apollo team on the moon will be able to communicate with the third member, in orbit about the moon, only when the command module of the Apollo is above their horizon.

United States space probes, in both hard and soft landings on the moon, and other U. S. space vehicles orbiting the moon have found valuable new material for studies of the lunar surface.

During 1964 and 1965, three successful landings on the moon were made by moon probes of the Ranger series, designed to photograph the surface of the moon at close range. These three Ranger vehicles sent back nearly 18,000 pictures of the surface of the moon before crashing. These pictures were taken at distances ranging from 300 miles to less than 2,000 feet from the moon.

On June 2, 1966, the first of the Surveyor vehicles made a soft landing on the moon near the

crater Flamsteed in the Oceanus Procellarum, on the eastern side of the moon slightly north of the lunar equator. Its cameras took photographs from a height of about four feet.

Surveyor III duplicated this feat on April 19, 1967, by landing gently on the moon after some heart-stopping bounces which evidently did no damage to its instruments. It landed in the Oceanus Procellarum, not far from Surveyor I, apparently on the slope of a shallow crater so that its cameras saw the moon at a slight angle.

Meanwhile, three Lunar Orbiters are revolving about the moon, securing and transmitting photographs of much of the moon's surface in order to find the best landing place for the manned Apollo flight to take place in the future. Orbiter II is placed at a much greater distance from the moon than its two orbiting companions so that its cameras can secure pictures of large areas for making detailed lunar maps.

The Ranger vehicles revealed that there is hardly any of the moon's surface unmarked by craters, from the enormous depression visible in telescopes from the earth to tiny holes inches across. There does not appear to be any overall cover of dust on the moon. The pictures sent back by Surveyor I show the surface strewn with small, loose rocks and rubble and the instruments on the vehicle registered a temperature of 280 degrees below zero, Fahrenheit, during the two-week lunar night through which it passed before its communication systems ceased to operate. One of the Orbiter pictures shows Surveyor I on the moon.

Surveyor III was equipped with a small metal claw with which it could dig into the surface material of the moon. The amount of current required to move this claw through the surface gave a measure of the density of this material and its composition. It appears to be dry and fine-grained, resembling silt or closely packed sand. Surveyor III took photographs during an eclipse of the moon which showed the reverse of that phenomenon from the lunar viewpoint—an eclipse of the sun by the earth. Its instruments registered a 400-degree temperature drop as the moon passed through the earth's shadow.

Standard Time Calendar for U. S. Cities

How to find the ordinary clock time (STANDARD TIME) in various U. S. cities corresponding to the LOCAL MEAN TIME on daily calendar of each month, pages 263-276.

Example: To find time of sunrise at New York City Jan. 1, 1969, see page 263, column headed 40° N. Latitude, where sunrise on that date is 7:22 a.m., Local Mean Time. Now turn to page 277, which you are now reading.

In the 40° column below you find New York City sub 4Ea. This means to subtract 4 minutes, the result being 7:18 a.m. The "E" means Eastern Standard Time. The small "a" means that a correction for latitude is advisable. In the table at the bottom of this page under the column headed by small "a" you find that between Jan. 1 and Jan. 16 you should add 2 minutes. Thus sunrise at New York City Jan. 1, 1969, is at 7:20 a.m. EST. A conversion to Standard Time must also be made for sunset, etc.

A similar procedure is followed for other cities, but the Correction for Latitude table is used only where a small letter appears with that city. Example below: Springfield, Ill., "sub 1C." Sunrise there on Jan. 1, 1969, is at 7:21 a.m. CST; no further correction is needed.

E designates Eastern Standard Time, C Central, M Mountain, and P Pacific.

CORRECTION FOR LATITUDE

For cities with which a small letter appears, greater accuracy can be obtained by using the corresponding table below. The directions below are for corrections to sunrise; for sunset the figures should be used in the opposite way, subtracted instead of added and vice versa.

Standard Time, Daylight Saving Time and Others

Source: U. S. Naval Oceanographic Office; Department of Transportation; National Bureau of Standards and U. S. Naval Observatory

STANDARD TIME

Standard time is reckoned from Greenwich, England, recognized as the Prime Meridian of Longitude. The world is divided into 24 zones, each 15° of arc, or one hour in time apart. The meridian of Greenwich (0°) extends through the center of the initial zone, and the zones to the eastward are numbered from 1 to 12 with the prefix "minus" indicating the number of hours to be subtracted to obtain Greenwich Time.

Zones westward are similarly numbered, but prefixed "plus" showing the number of hours that must be added to get Greenwich time. While these zones apply generally to sea areas, it should be noted that the Standard Time maintained in many countries does not coincide with zone time. A graphical representation of the zones is shown on the Standard Time Chart of the World (Chart 5192) published by the U. S. Naval Oceanographic Office, Washington, D. C.

The United States and possessions are divided into eight Standard Time zones, as set forth by the Uniform Time Act of 1966, which also provides for the use of Daylight Saving Time therein. Each zone is approximately 15° of longitude in width. All places in each zone use, instead of their own local time, the time counted from the transit of the "mean sun" across the Standard Time meridian which passes near the middle of that zone.

These time zones are designated as Atlantic, Eastern, Central, Mountain, Pacific, Yukon, Alaska-Hawaii, and Bering and the time in these zones is basically reckoned from the 60th, 75th, 90th, 105th, 137th, 141st, 157th meridians west of Greenwich. The line wanders to conform to local geographical reasons. The time in the various zones is slower than Greenwich Time by 4, 5, 6, 7, 8, 9, 10, and 11 hours respectively.

High Precision Time and Frequency are broadcast by U. S. Navy Stations which are maintained on frequency with the aid of Atomic Clocks (Cesium beam and atomic hydrogen masers). The stations are as follows: NBA: NSS: NLK/NPG. NAA: NPM: Omega.

Loran-C navigational transmissions at 100 KC/S of the East Coast, Hawaiian, North Atlantic, North Pacific and the Norwegian sea chains may be used for time and frequency comparisons. These can be made to one microsecond.

STANDARD FREQUENCY STATIONS

The National Bureau of Standards' radio stations WWV at Fort Collins, Colo., and WWVH on the island of Maui, Hawaii, broadcast six technical services continuously night and day. The services are: (1) standard radio frequencies, 2.5, 5, 10, 15, 20 and 25 MHz (WWV) and 2.5, 5, 10 and 15 MHz (WWVH), (2) standard audio frequencies 440 and 600 cycles per second (3) standard musical pitch, A above middle C (4) standard time intervals of 1 second, 1 minute and longer (5) time signals in voice and telegraphic code each 5 minutes (6) radio propagation forecasts, in telegraph code, every 5 minutes from WWV just preceding the voice announcement for the North Atlantic Area.

WWV is interrupted for about 4 minutes each hour commencing at approximately 45 minutes past the hour. . . . WWVH broadcast is interrupted about four minutes each hour commencing

approximately 15 minutes past the hour.

WWV and WWVH have no tone modulation during the last two minutes of each five-minute period commencing on the hour. During the third minute of each five-minute period, except the first and tenth, WWV transmits a special 36-bit, binary coded, 100-pulse/sec. time code, carried on 1,000 c/s modulation which contains time-of-year information (Universal Time) in seconds, minutes, hours, and day of year.

WWVL (20kHz), Fort Collins, Colo., and WWVB (60kHz), Fort Collins, Colo., also transmit standard frequency signals that provide accuracies one to three parts better than is possible at HF (WWV/WWVH).

The reference standard for the broadcast is the frequency provided by a carefully built and tested atomic beam machine (atomic clock) whose accuracy is plus or minus 1.1 parts in 100,000 million. Inquiries concerning WWV, WWVH, WWVL and WWVB should be addressed Frequency-Time Broadcast Services, National Bureau of Standards, Boulder, Colo.

DAYLIGHT SAVING TIME

Under the Uniform Time Act, which became effective in 1967, all states, the District of Columbia and U. S. possessions must observe Daylight Saving Time beginning at 2 a.m. on the last Sunday in April and ending at 2 a.m. on the last Sunday in October. Any state, by legislative action, can exempt itself from the law; Hawaii did so in 1967 and Arizona in 1968. The Dept. of Transportation, which oversees the act, is planning to modify some boundaries due to local problems. Daylight Saving Time is achieved by advancing the clock one hour.

Since 1916 the British had moved their clocks ahead an hour in the spring for British summer time and back an hour in the fall for Greenwich Mean Time. On Feb. 18, 1968, however, the British moved their clocks ahead an hour to stay permanently. Thus what was British summer time will extend throughout the year and be known as British standard time. Greenwich Mean Time will live on only as a standard for navigators, geographers and astronomers.

24-HOUR TIME

24-hour time is widely used in scientific work throughout the world. In the United States it is used also in operations of the Armed Forces. In Europe it is used in preference to the 12-hour a.m. and p.m. system. With the 24-hour system the day begins at midnight and hours are numbered consecutively through 24. Thus 8 a.m. is 0800, and 8:25 a.m. is 0825; 4 p.m. is 1600, and 7:52 p.m. is 1952, or 19 hours and 52 minutes past midnight.

DATE LINE

The Date Line is a zig-zag line that approximately coincides with the 180th meridian, and it is where each calendar day begins. The date must be advanced one day when crossing in a westerly direction and set back one day when crossing in an easterly direction. The line is deflected between north latitude 45° and 80°, so that all Asia lies to the west of it and all North America, including the Aleutian Islands, to the east; between south latitude 12° and 56° the line is deflected so that Chatham Island and the Tonga group lie to the west.

Chronological Eras, 1969

The year 1969 of the Christian Era comprises the latter part of the 193rd and the beginning of the 194th year of the independence of the United States of America.

Corresponding years of various ancient chronological eras are shown in the table below, together with the date in 1969 on which each year begins according to the Gregorian calendar.

Era	Year	Begins in 1969	Era	Year	Begins in 1969
Byzantine	7478	Sept. 14	Grecian (Seleucidæ)	2281	Sept. 14
Jewish	5730	Sept. 13			or Oct. 14
Olympiads	2745	July 1			(different sects)
(First year of Olympiad 687)			Indian (Saka)	1891	Mar. 22
Roman (Ab Urbe Condita)	2722	Jan. 14	Diocletian	1686	Sept. 11
Nabonassar (Babylonian)	2718	May 1	Mohammedan (Hegira)	1389	Mar. 20
Japanese (44th year of Showa)	2629	Jan. 1

Standard Time Differences—Foreign Cities

Source: U. S. Naval Oceanographic Office

By government decree or proclamation Great Britain, Ireland, Spain, France, Netherlands, and Belgium have advanced their time from the standard meridian by one hour throughout the year. The time indicated in table is fixed by law and is called the legal time, or, more generally, Standard Time.

At 12 o'clock noon Eastern Standard Time, the standard time in foreign cities is as follows:

Alexandria.....	7.00 P.M.	Copenhagen.....	6.00 P.M.	Liverpool.....	6.00 P.M.	Seoul.....	2.00 A.M.*
Amsterdam.....	6.00 P.M.	Dawson.....	8.00 P.M.	London.....	6.00 P.M.	Shanghai.....	1.00 A.M.*

Julian and Gregorian Calendars; Leap Year

Calendars based on the movements of sun and moon have been used since ancient times, but none has been perfect. The Julian calendar, under which western nations measured time until 1582 A. D., was authorized by Julius Caesar in 46 B.C., the year 709 of Rome. His expert was a Greek, Sosigenes. The Julian calendar, on the assumption that the true year was 365 $\frac{1}{4}$ days long, gave every fourth year 366 days. The Venerable Bede, an Anglo-Saxon monk, announced in 730 A.D. that the 365 $\frac{1}{4}$ -day Julian year was 11 min. 14 sec. too long, making a cumulative error of about a day every 128 years, but nothing was done about it for over 800 years.

By 1582 the accumulated error was estimated to have amounted to 10 days. In that year Pope Gregory XIII decreed that the day following Oct. 4, 1582, should be called Oct. 15, thus dropping 10 days.

However, with common years 365 days and a 366-day leap year every fourth year, the error in the length of the year would have recurred at the rate of a little more than 3 days every 400 years. So 3 of every 4 centesimal years (ending in 00) were made common years, not leap years. Thus 1600 was a leap year, 1700 was not. Leap years are those divisible by 4 except centesimal years, which are common unless divisible by 400.

The Gregorian calendar was adopted at once by most predominantly Roman Catholic countries, but many Protestant countries did not accept it until the 18th Century.

The British Government imposed the Gregorian calendar on all its possessions, including the American colonies, in 1752. The British decreed that the day following Sept. 2, 1752, should be called Sept. 14, a loss of 11 days. All dates preceding were marked O.S., for Old Style. George Washington was born Feb. 11, 1732, O.S., and after 1752 his birthday fell on Feb. 22.

In 1793 the French Revolutionary Government adopted a calendar of 12 months of 30 days each, with 5 extra days in September of each common year and a 6th extra day every 4th year. Napoleon reinstated the Gregorian calendar in 1806.

Japan adopted the Gregorian calendar in 1873, the Chinese Republic in 1912, Greece and Greek Orthodox communities in 1924, and Turkey (predominantly Moslem) in 1927.

To change from the Julian calendar to the Gregorian calendar, add 10 days to dates Oct. 5, 1582, through Feb. 28, 1700; 11 days from Feb. 29, 1700, through Feb. 28, 1800; 12 days from Feb. 29, 1800, through Feb. 28, 1900; and 13 days from Feb. 29, 1900, through Feb. 28, 2100.

Astronomical Constants; Speed of Light

The following astronomical constants were adopted in 1968, in accordance with the resolutions and recommendations of the International Astronomical Union (Hamburg 1964): Velocity of light, 299,792.5 kilometers per second, or about 186,282 statute miles per second; solar parallax, 8".794; constant of nutation, 9".210; and constant of aberration, 20".496.

The Sun; Project Stratoscope Adds to Knowledge

SPHERES AND CORONA

Telescopic cameras have been sent to heights between 80,000 and 100,000 feet above the surface of the earth to photograph the sun without interference from the densest level of the earth's atmosphere. This was called Project Stratoscope. Many photographs were thus obtained which are the clearest and best ever taken of the detail of the sun's surface. These pictures showed plainly the complicated and turbulent structure of the sun's surface, where small islands of superheated gases, called granules, rise from the interior, radiate their energy into space, cool and sink. These granules, only a few hundred miles in diameter, have lifetimes of only a few minutes. They are surrounded by cooler borders and where several granules touch each other, these borders form more extensive cooler areas called oases. Much was also learned about the appearance and structure of sun-spots, although the causes of sun-spots is still not certainly known.

The sun, the controlling body of our solar system, is a star whose dimensions cause it to be classified among stars as average in size, temperature and brightness. Its proximity to the earth makes it appear to us as tremendously large and bright, and a series of thermo-nuclear reactions involving the atoms of the elements of which it is composed produces the heat and light that make life possible on the earth.

The sun has a diameter of 864,000 miles and is distant, on the average, 92,900,000 miles from the earth. It is 1.41 times as dense as water. The light of the sun reaches the earth in 498.6 seconds or slightly more than 8 minutes. The average solar surface temperature has been measured by several indirect methods which agree closely on a value of 6,000° Centigrade or about 10,000° Fahrenheit. The interior temperature of the sun is about 35,000,000° Fahrenheit.

When sunlight is analyzed with a spectroscope, it is found to consist of a continuous spectrum composed of all the colors of the rainbow in order, crossed by many dark lines. The "absorption lines" are produced by gaseous materials in the atmosphere of the sun. Of these materials, almost all have been identified. More than 60 of the natural terrestrial elements have been thus identified in the sun, all in vaporous form because of the intense heat of the sun.

The radiating surface of the sun is called the photosphere, and just above it is the chromosphere, which is a layer of solar atmosphere in a constant state of agitation as if stirred by spouting gases. The chromosphere is visible to the naked eye only at times of total solar eclipses, appearing then to be a pinkish-violet layer with great, swiftly-moving spoutings called prominences projecting above its general level. With proper instruments the chromosphere can be seen or photographed whenever the sun is visible without waiting for a total eclipse. Above the chromosphere is the corona, also visible to the naked eye only at times of total eclipse. Instruments also permit the brighter portions of the corona to be studied whenever conditions are favorable. The pearly light of the corona surges millions of miles from the sun. Iron, nickel and calcium are believed to be principal contributors to the composition of the corona, all in a state of extreme attenuation and high excitation that indicates temperatures on the order of a million degrees, Fahrenheit.

SUN SPOTS

There is an intimate connection between sunspots and the corona. At times of low sunspot activity, the fine streamers of the corona will be much longer above the sun's equator than over the polar regions of the sun, while during high sunspot activity, the corona extends fairly evenly outward from all regions of the sun, but to a much greater distance in space. Sunspots are dark, irregularly-shaped regions whose diameters may reach hundreds of thousands of miles. The average life of a sunspot group is from two to three weeks, but there have been spots that have lasted for more than a year, being carried repeatedly around as the sun rotated upon its axis. The record for the duration of a sunspot is 18 months. Sunspots reach a low point every 11.3 years, with a peak of activity occurring irregularly between two successive minima.

The sun is 400,000 times as bright as the full moon and gives the earth 6 million times as much light as do all the other stars put together. Actually, most of the stars that can be easily seen on any clear night are brighter than the sun.

The Zodiac

The sun's apparent yearly path among the stars is known as the ecliptic. The zone 16° wide, 8° on each side of the ecliptic, is known as the zodiac. Inside of this zone are the apparent paths of the sun, moon, earth and major planets. Beginning at the point on the ecliptic which marks the position of the sun at the vernal equinox, and thence proceeding eastward, the zodiac is divided into twelve signs of 30° each, as shown herewith.

These signs are named from the twelve constella-

- | | |
|------------------|-------------------------|
| Spring
Signs. | 1. ♈ Aries. The Ram. |
| | 2. ♉ Taurus. The Bull. |
| | 3. ♊ Gemini. The Twins. |
| Summer
Signs. | 4. ♋ Cancer. The Crab. |
| | 5. ♌ Leo. The Lion. |
| | 6. ♍ Virgo. The Virgin. |

tions of the zodiac with which the signs coincided in the time of the astronomer Hipparchus, about 2,000 years ago. Owing to the precession of the equinoxes, that is to say, to the retrograde motion of the equinoxes along the ecliptic, each sign in the zodiac has, in the course of 2,000 years, moved backward 30° into the constellation west of it; so that the sign Aries is now in the constellation Pisces, and so on. The signs of the zodiac with their Latin and English names are as follows:

- | | |
|------------------|-----------------------------------|
| Autumn
Signs. | 7. ♎ Libra. The Balance. |
| | 8. ♏ Scorpius. The Scorpion. |
| | 9. ♐ Sagittarius. The Archer. |
| Winter
Signs. | 10. ♑ Capricornus. The Goat. |
| | 11. ♒ Aquarius. The Water Bearer. |
| | 12. ♓ Pisces. The Fishes. |

The Moon

The moon completes a circuit around the earth in a period whose mean or average duration is 27 days 7 hours 43.2 minutes. This is the moon's sidereal period. Because of the motion of the moon in common with the earth around the sun, the mean duration of the lunar month—the period from one new moon to the next new moon—is 29 days 12 hours 44.05 minutes. This is the moon's synodical period.

The mean distance of the moon from the earth according to the American Ephemeris is 238,857 miles. Because the orbit of the moon about the earth is not circular but elliptical, however, the maximum distance from the earth that the moon may reach is 252,710 miles and the least distance is 221,463 miles.

All distances are from the center of one object to the center of the other. The moon's diameter is 2,160 miles. If we deduct the radius of the moon, 1,080 miles, and the radius of the earth, 3,963 miles from the minimum distance, or perigee, given above, we shall have for the nearest approach of the bodies' surfaces 216,420 miles.

The moon rotates on its axis in a period of

time exactly equal to its sidereal revolution about the earth—27.321666 days. The moon's revolution about the earth is irregular because of its elliptical orbit. The moon's rotation, however, is regular and this produces what is called "libration in longitude" which permits us to see first farther around the east side and then farther around the west side of the moon. The moon's variation in altitude from season to season permits us to see farther over first one pole and then the other of the moon and this is "libration in latitude." These two libration effects permit us to see a total of about 60% of the moon's surface over a period of time. The hidden side of the moon was photographed in 1959 by the Soviet space vehicle Lunik III. Since then many excellent pictures of this portion of the moon's surface have been transmitted to earth by Lunar Orbiters launched by the U. S.

The tides are caused mainly by the moon, because of its proximity to the earth. The ratio of the tide-raising power of the moon to that of the sun is 11 to 5.

Each month the Moon is said to be in perigee when nearest to the Earth and in apogee when farthest from the Earth. The average time from perigee to perigee or from apogee to apogee is 27d. 13h. 18m. 33s., known as the anomalistic month.

Aurora Borealis and Aurora Australis

The Aurora Borealis, also called the Northern Lights, is a broad display of rather faint light in the northern skies at night. The Aurora Australis, a similar phenomenon, appears at the same time in southern skies. The aurora appears in a wide variety of forms. Sometimes it is seen as a quiet glow, almost foglike in character; sometimes as vertical streamers in which there may be considerable motion; sometimes as a luminous series of expanding arcs. There are many colors, with white, yellow and red predominating.

The auroras are most vivid and most frequently seen at about 20 degrees from the magnetic poles, along the northern coast of the North American continent and the eastern part of the northern coast of Europe. They have been seen as far south as Key West and as far north as Australia and New Zealand, but such occasions are rare.

While the cause of the auroras is not known beyond question, there does seem to be a definite correlation between auroral displays and the sunspot activity. Is it thought that atomic or sub-

atomic particles expelled from the sun by the forces that cause solar flares speed through space at velocities of 400 to 600 miles per second. If and when such streams of particles reach the earth, their impact upon the atmosphere excites the gases in the upper regions of the atmosphere into the activity we see as the aurora. The earth is a tiny target as compared to the sun and receives only a minute fraction of the material thus expelled. These particles are deflected from their original course by the lines of force of the earth's magnetic field and are guided around the earth in such a way as to account for their appearance. They are most vivid where these lines of forces converge near the magnetic poles.

The auroral displays appear at heights ranging from 50 to about 600 miles and have given us a means of estimating the extent of the earth's atmosphere.

The auroras are often accompanied by magnetic storms whose forces, also guided by the lines of force of the earth's magnetic field, cut across and disrupt electric and radio communication.

Star Tables, 1969

These tables include stars of visual magnitude 2.5 and brighter. Co-ordinates are for the epoch June 28.0, 1969. Where no parallax figures are given, the trigonometric parallax figure is smaller and the margin for error and the distance given is obtained by indirect methods. Stars of variable magnitude designated by var.

To find the time when star is on meridian, subtract R. A. M. S. of the sun table on page 285 from the star's right ascension, first adding 24h to the latter, if necessary; mark this result P. M., if less than 12h, but if greater than 12h subtract 12h and mark the remainder A. M.

Upper transit of Polaris occurs, on the average, 3m. 56s. earlier each day. The interval between lower and upper transit of Polaris is 11h. 58m. 2s. The greatest Eastern elongation of Polaris occurs 5h. 56m. before upper transit and 6h. 2m. after lower transit, while the greatest Western elongation occurs 5h. 56m. after upper transit and 6h. 2m. before lower transit.

The planet Pluto was located by C. W. Tombaugh of Lowell Observatory March 13, 1930. Its mass is about 0.06 of the mass of the earth. Its average distance from the sun is 3,664,000 miles. On June 1, 1969, its predicted position in the sky will be 12 hours 06 minutes 30 seconds of astronomic right ascension and +16 degrees 18 minutes astronomic declination, in Leo. (R) Venus is in retrograde motion, rotating in opposite direction from other planets.

New Astronomical Enigma Found by Radio Astronomy

Radio telescopes in recent years have picked up signals from space of such a nature that the forces producing them from stellar distances must have been incredibly powerful. In photographs obtained by optical telescopes these objects appear to be ordinary stars. Because they produce energy impossible in ordinary stars they are called "quasi-stellar objects," or "quasars." They remain a puzzle.

More recently, another baffling phenomenon has been added to the many unknowns of astronomy. British radio astronomers have detected 4 sources of radiation of such a nature that they were first thought to be signals originating in highly advanced civilizations on planets around stars other than the sun at vast distances. One of these sources has been examined by the 1,000-foot radio telescope at Arecibo in Puerto Rico. The radio emanations from this object occur at intervals measured at 1.337 seconds, continue for about one minute and then vanish for about 3 minutes. This source is in the small constellation of Vulpecula, The Little Fox, in late summer. These objects have been named "pulsars" in analogy to quasars.

The first theory of artificially produced radiation is not fully accepted because of the tremendous power which would be needed to broadcast such signals. They were also believed to come from

stars in the final stages of stellar evolution. When the hydrogen content of a star is virtually exhausted, internal pressure ceases. It is this internal pressure which combats the never-ceasing force of gravity and maintains the volume of the stars, keeping them distended sometimes to hundreds of times the volume of the sun. When internal pressure ceases, the star collapses to the smallest possible compass, ending its career as an object smaller than a planet, so condensed that one cubic inch of its material would weigh thousands of tons. The sub-atomic particles of such a star would be smashed together until only neutrons were left. This could produce the strange pulsations.

Astronomers also believe that the pulsars may be neutron stars, tiny bodies of densely packed neutrons which are atomic particles having no electrical charge. They are planet size and seem to be as close as 50 to 400 light years.

Both quasars and pulsars, together with other so-called "radio stars," emit x-radiation—energy in waves far shorter than ultra-violet radiation. Quasars radiate incredible energy from objects which appear to be relatively small. Pulsars, smaller than the earth, are keeping time in a sort of synchopation with their radio pulses and their light. Astronomers declare that it will be hard to make any theory of physics and cosmology fill the bill.

U. S. Weather Bureau: Environmental Science Services Administration

The Weather Bureau is now a component of the Environmental Science Services Administration (ESSA), an agency of the U. S. Department of Commerce. Created in 1965 by merging the Weather Bureau, the Coast and Geodetic Survey, and the Central Radio Propagation Laboratory, ESSA provides a single focus for national efforts to describe, understand, and predict man's natural environment.

Some former Weather Bureau activities have been transferred to other parts of ESSA, but the Weather Bureau continues to provide meteorological service to the nation.

Weather service for the public safety, welfare, recreation, and convenience consists of current weather information, warnings of hurricanes, tornadoes, winter storms, and other weather hazards, regularly scheduled weather forecasts up to 48 hours, extended forecasts up to five days, and outlook for 30 days. This information reaches the general public through the cooperation of radio, television, and the newspapers. *See also Weather Bureau Watches and Warnings, page 289.*

The River and Flood Forecasting Service is conducted through 82 river district offices and 11 river forecasting centers and issues river stage and flood warnings for all the principal rivers and tributaries of the United States. The Water Supply Forecasting Service is conducted through 6 Water Supply Forecasting Centers for the Western and Northeastern United States on a water year or seasonal basis. Rainfall studies conducted in cooperation with the Army Corps of Engineers and the Department of Agriculture Soil Conservation Service assist in planning engineering works for flood control, water utilization, water-shed protection and local drainage design.

Weather Service to aviation involves the responsibilities of providing current measurements and of forecasting conditions pertinent to conducting safe and efficient flight operations at airport terminals and along flight routes. Aviation weather forecasts and briefings are provided for transoceanic and domestic operations extending upward from the surface to include operational levels of civil jet aircraft.

The agricultural weather service program pro-

vides weather observations from representative agricultural areas, specialized forecasts of weather factors directly affecting agricultural production and a teletypewriter network for rapid and efficient dissemination of weather information to the farmers. In addition, technical studies of the influence of weather on agriculture are coordinated jointly with agricultural experiment station personnel.

U. S. Department of Agriculture and the Weather Bureau cooperate in issuing local weather-crop bulletins on an area basis.

The Fruit-frost Service provides detailed and localized forecasts and warnings to fruit growers on a cooperative basis in those states where winter and spring fruit and vegetable production is a major activity. The Fire-Weather Service warns against atmospheric conditions conducive to disastrous fires in the forest areas of the nation.

The marine weather service provides specialized weather forecasts, warnings, and data essential to the conduct of marine operations on the high seas and on coastal and inland waterways. In addition, it supplies forecasts for related phenomena, such as seiches and storm surges, for the protection of life and property.

The Weather Bureau also provides weather support for the U. S. manned space flight program and assists in the weather support to the Nation's other space programs.

The climatological service for the United States, Puerto Rico, and the oceans, is managed by the ESSA Environmental Data Service. In the field, climatologists are responsible for applications of climatology to problems of the national economy in their geographical areas. This work is supported in each state by State Climatologists who (a) direct liaison with state interests and (b) carry out certain state responsibilities such as those of Crop-Weather Services and severe storm investigation. The work depends basically on observations taken at about 12,000 substations (mostly manned by unpaid cooperative observers) and about 300 regular Weather Bureau stations. The facilities for all American weather records and repositories for large-scale tabulation, processing, and publication are maintained in the National Weather Records Center, Asheville, N. C.

(Wind speeds greater than 40 mph have little additional chilling effect)

How Cold is Cold? Temperature and wind both affect the heat loss from the surface of the body. The effect of these two factors is expressed as an still-air temperature which would have the same combination. For example, from the table above, with a temperature of 20°F. and a wind of 20 mph., the effect on exposed flesh is the same as -9°F. with no wind.

Dew Point Explained

The dew point is the temperature to which air must be cooled to become saturated. When this temperature is below freezing, it is sometimes called the frost point.

The higher the air temperature, the more water vapor air can hold before saturation is reached and condensation occurs (fog, snow or rain). Thus,

unsaturated air containing a given amount of water vapor will become saturated if its temperature decreases sufficiently.

The difference between the actual air temperature and the dew point temperature is an indication of how close the air is to saturation. Relative humidity increases as this difference decreases, reaching 100% when the spread is zero degrees.

Temperature-Humidity Index

The purpose of the temperature-humidity index (THI) is to measure or estimate human discomfort in the summertime resulting from the combined effects of temperature and humidity. The THI is calculated by adding wet bulb and dry bulb temperature readings, multiplying the sum by 0.4 and adding 15. The theory is that more than half the people will be uncomfortable when the THI passes 75. Almost all will be uncomfortable when it reaches 80 or above, and many will be miserable.

Weather Bureau Watches and Warnings

Weather Bureau forecasters issue a **TORNADO WATCH** for a specific area where it is reasonably possible that tornadoes may occur during the next several hours. A **WATCH** is to alert people to watch for tornado activity and listen for a **TORNADO WARNING**. A **TORNADO WARNING** means that a tornado has been sighted and that safety precautions should be taken at once. The terms **HURRICANE WATCH** and **HURRICANE WARNING** are used similarly during hurricane season.

Definitions

Tornado—A violent rotating column of air pendant from a thundercloud, usually recognized as a funnel-shaped vortex accompanied by a loud roar. With rotating winds est. over 200 mph., it is the most destructive storm. Tornado paths have varied in length from a few feet to nearly 300 miles (avg. 13 mi.); diameter 9 feet to over a mile (avg. 250 yds.); forward speed up to 68 mph. (avg. 25-40 mph.). Persisting from a few minutes to a few hours, they usually move from SW to NE, but can come from any direction.

Cyclone—An atmospheric circulation of winds rotating counterclockwise in the northern hemisphere and clockwise in the southern hemisphere. Tornadoes, hurricanes and the **LOWS** shown on weather maps are all examples of cyclones having various sizes and intensities. Cyclones are usually accompanied by precipitation or stormy weather.

Hurricane—A severe cyclone originating over

tropical ocean waters and having winds over 73 miles an hour. (In the western Pacific, such storms are known as typhoons.) The area of strong winds takes the form of a circle or an oval, sometimes as much as 500 miles in diameter. Hurricanes usually move toward the west or northwest at 10 to 15 m.p.h. When the center approaches 25° to 30° North Latitude, direction of motion often changes to northeast, with increased forward speed.

Blizzard—A severe weather condition characterized by low temperatures and by strong winds bearing a great amount of snow (mostly fine, dry snow picked up from the ground). The U. S. Weather Bureau specifies, for blizzard, a wind of 35 miles an hour or higher, low temperatures, and sufficient snow in the air to reduce visibility to less than 500 feet; and for "severe blizzard" wind speeds of 45 miles an hour or more, temperature near or below 10°F., and visibility reduced by snow to near zero.

Monsoon—A name for seasonal winds (derived from Arabic "mausim," a season). It was first applied to the winds over the Arabian Sea, which blow for six months from northeast and six months from southwest, but it has been extended to similar winds in other parts of the world. The monsoons are strongest on the southern and eastern sides of Asia.

Flood—The condition that occurs when water overflows the natural or artificial confines of a stream or other body of water, or accumulates by drainage over low-lying areas.

Weather Bureau Coastal Warnings

Source: Weather Bureau, National Weather Records, ESSA; Dept. of Commerce

Small Craft Warning: One red pennant displayed by day and a red light over a white light at night to indicate winds up to 33 knots and/or sea conditions dangerous to small craft are forecast.

Gale Warning: Two red pennants displayed by day and a white light above a red light at night to indicate that winds ranging from 34 to 47 knots are forecast for the area.

Storm Warning: A single square red flag with a black center displayed during daytime and two red lights at night to indicate that winds above 48 knots are forecast for the area.

Hurricane Warning: Two square red flags with black centers displayed by day and a white light between two red lights at night to indicate that winds 64 knots and above are forecast for the area.

Speed of Winds in the United States

Miles per hour—Average thru 1967. High thru 1967.

WINDS, THEIR FORCE AND OFFICIAL DESIGNATIONS

Designation	Miles per hour	Designation	Miles per hour	Designation	Miles per hour	Designation	Miles per hour
Calm.	Less than 1	Moderate breeze.	13 to 18	Near gale.	32 to 38	Storm.	55 to 63
Light air.	1 to 3	Fresh breeze.	19 to 24	Gale.	39 to 46	Violent storm.	64 to 73
Light breeze.	4 to 7	Strong breeze.	25 to 31	Strong gale.	47 to 54	Hurricane.	74 and above
Gentle breeze.	8 to 12						

Explanation of Normal Temperatures

Normal temperatures listed in the tables on pages 291 and 292 are based on records of the Weather Bureau for the 30-year period from 1931 to 1960 inclusive.

To obtain the average maximum temperature for any month, the daily maximum temperatures are added; the total is then divided by the number of days in that month. The average minimum temperature for the month is obtained by adding the daily minimum temperatures during that month and dividing by the number of days in that month.

The normal maximum temperature for January, for example, is obtained by adding the average

maximums for January, 1931, January 1932, etc., through January, 1960. The total is then divided by 30. The normal minimum temperature is obtained in a similar manner by adding the average minimums for each January in the 30-year period and dividing by 30. The normal temperature for January is one-half of the sum of the normal maximum and minimum temperatures for that month.

The mean temperature for any one day is one-half the total of the maximum and minimum temperatures for that day.

Annual Climatological Data

Monthly Normal Temperature and Precipitation

Source: Weather Bureau, United States Department of Commerce

These normals are based on records for the thirty-year period 1931 to 1960 inclusive. See explanation on page 289. For stations that did not have continuous records from the same instrument site for the entire 30 years, the means have been adjusted to the record at the present site.

AP indicates airport station; those not so marked are city office stations.

T, Temperature in Fahrenheit; P, precipitation in inches; L, less than .05 inch.

Normal Temperatures, Highs, Lows; Precipitation

Source: National Weather Records, ESSA, Dept. of Commerce

These normals are based on records for the thirty-year period 1931 to 1960 inclusive. See explanation on page 289.

Extreme temperatures are based on records for the present and prior locations thru 1967. If the station is now at an airport, one or both extremes may have occurred at other than the airport location.

AP indicates airport station; those not so marked are city office stations.

The minus (—) sign indicates temperatures below zero. Fahrenheit thermometer registration.

Mean Annual Snowfall (Inches) based on record thru 1967—Denver, Colo. (AP) 58.3; Boston, Mass. (AP) 42.4; Sault Ste. Marie, Mich. (AP) 103.6; Minn.-St. Paul, Minn. (AP) 43.3; Albany, N. Y. (AP) 63.3; Rochester, N. Y. (AP) 81.9; Cleveland, Ohio (AP) 50.5; Burlington, Vt. (AP) 70.9; Cheyenne, Wyo. (AP) 52.6; Juneau, Alaska (AP) 103.0.

Wettest Spot: Mount Waialeale, Hawaii, on the island of Kauai, is the rainiest place in the world, according to the National Geographic Society, with an average annual rainfall of 471.68 inches.

Highest Temperature: A temperature of 136° F. observed at Azizia, Tripolitania in Northern Africa on Sept. 13, 1922 is generally accepted as the world's highest temperature recorded under standard conditions.

The record high in the United States was 134° in Death Valley, Calif., July 10, 1913.

Lowest Temperature: A record low temperature of -128.9°F (-88.3°C.) was recorded at the Soviet Antarctic station Vostok on Aug. 24, 1960.

The record low in the United States was -76° at Tanana, Alaska, Jan. 1886.

The lowest official temperature on the North American continent was recorded at 81 degrees below zero in February, 1947, at a lonely airport in the Yukon called Snag.

These are the meteorological champions—the official temperature extremes—but there are plenty of other claimants to thermometer fame. However, sun readings are unofficial records, since meteorological data to qualify officially must be taken on instruments in sheltered and ventilated location.

Low and High Temperature Records of U. S. Weather Bureau

Tides and Their Causes

Source: U. S. Coast and Geodetic Survey, ESSA
See index for tide tables

The tides are a natural phenomenon involving the alternating rise and fall in the large fluid bodies of the earth caused by the combined gravitational attraction of the sun and moon. The combination of these two variable force influences, as modified by certain factors such as depth of the water, configuration of the shoreline, and geographic location, produce the complex recurrent cycle of the tides. Tides may occur in both oceans and seas, to a limited extent in large lakes, the atmosphere, and, to a very minute degree, in the earth itself. The period between succeeding tides varies as the result of many factors and force influences.

The tide-generating force represents the difference between (1) the centrifugal force produced by the revolution of the earth around the common center-of-gravity of the earth-moon system and (2) the gravitational attraction of the moon acting upon the earth's overlying waters. Similar tide-producing forces exist in the earth-sun system. Since, on the average, the moon is only 238,857 miles from the earth compared with the sun's much greater distance of 93,000,000 miles, this closer distance outranks the much smaller mass of the moon compared with that of the sun, and the moon's tide-raising force is, accordingly, $2\frac{1}{2}$ times that of the sun.

The effect of the tide-generating forces of the moon and sun acting tangentially to the earth's surface (the so-called "tractive force"), tends to cause a maximum accumulation of the waters of the oceans at two diametrically opposite positions on the surface of the earth and to withdraw compensating amounts of water from all points 90° removed from the positions of these tidal bulges. The presence of the continents, as well as other factors, prevent the total free movement of water. However, as the earth rotates beneath the maxima and minima of these tide-generating forces, a sequence of two high tides, separated by two low tides, ideally is produced each day.

Twice in each lunar month, when the sun, moon, and earth are directly aligned, with the

moon between the earth and the sun (at new moon) or on the opposite side of the earth from the sun (at full moon), the sun and the moon exert their gravitational force in a mutual or additive fashion. Higher high tides and lower low tides are produced. These are called *spring tides*. At two positions 90° in between, the gravitational forces of moon and sun—imposed at right angles—tend to counteract each other to the greatest extent, and the range between high and low tides is reduced. These are called *neap tides*. This semi-monthly variation between the spring and neap tides is called the *phase inequality*.

The inclination of the moon's orbit to the equator also produces a difference in the height of succeeding high tides and in the extent of depression of succeeding low tides which is known as the *diurnal inequality*. In extreme cases, this phenomenon can result in only one high tide and one low tide each day. The changing distance of the moon from the earth in each lunar month due to the elliptical orbit of the moon, produces a difference in the height of the tides known as the *lunar parallax inequality*. The changing distance of the earth from the sun during the earth's annual revolution around the sun similarly introduces the *solar parallax inequality*.

The actual amount of uplift of the waters in the deep ocean may amount to only one or two feet. However, as this tide approaches shoal waters and its effects are augmented, the tidal range may be greatly increased. In Nova Scotia, along the narrow channel of the Bay of Fundy, the range of tides, or difference between high and low waters, may reach 43½ feet or more (under spring tide conditions) due to resonant amplification.

At New Orleans, the periodic rise and fall of the tide varies with the stage of the Mississippi River being about 10 inches at low river stage and zero at high river stage. The Canadian Tide Tables for 1968 give a maximum range of nearly 50 feet at Leaf Basin, Ungava Bay, Canada. The mean range at Calais, Maine, is 20 feet but a range in excess of 23 feet can be expected each month.

U. S. Weather Satellite System Views Entire Globe Daily

Source: Environmental Science Services Administration

Since the successful launching of ESSA 1 and ESSA 2 (Environmental Survey Satellites) in Feb. 1966, the United States has had an operational weather satellite system providing both global and local cloud-cover pictures at least once every day. The TOS (TIROS Operational Satellite) system is composed of two ESSA spacecraft, one with automatic-picture-transmission capability and one with picture-storage capability. These satellites are similar to the earlier TIROS spacecraft, but are redesigned so that all pictures are taken when the camera is looking directly at the earth. They view the entire earth at least once every 24 hours.

Additional spacecraft are launched as needed to maintain the operational capability of the system. Picture-storage satellites ESSA 1 (Feb. 1, 1966), ESSA 3 (Oct. 2, 1966), and ESSA 5 (Apr. 20, 1967) record photographs for transmission to a major command and data acquisition station. These global pictures are used in preparing charts for transmission by facsimile, teletypewriter, and radio to weather stations in the United States and other nations. Automatic-picture-transmission (APT) spacecraft ESSA 2 (Feb. 28, 1966), ESSA 4 (Jan. 26, 1967) and ESSA 6 (Nov. 10, 1967) carry special cameras which send pictures within seconds after they are taken directly to simple receiving stations on the ground. More than 400 APT ground stations are in operation around the world. The TOS system is managed and operated by the National Environmental Satellite Center of the Environmental Science Service Admin. The space-

craft are launched by National Aeronautics & Space Admin.

The era of weather observation by satellite was inaugurated on April 1, 1960, with the successful launching and operation of the 270-lb. TIROS I. This satellite, equipped with two television cameras, obtained many thousand pictures of the cloud cover over large portions of the earth, including oceans and sparsely settled land regions where there are few fixed observation stations. TIROS I was followed by nine more equally successful satellites: TIROS II launched in November 1960, TIROS III in July 1961; IV in February 1962, V in June 1962, VI in September 1962, VII in June 1963, VIII in December 1963, IX in January 1965, and X in July 1965. Larger and more complex meteorological satellites, Nimbus I and Nimbus II, were launched by NASA on August 28, 1964 and May 15, 1966, respectively, as research and development experiments.

The Applications Technology Satellites, ATS I and III, launched respectively by NASA on Dec. 6, 1966, and November 5, 1967, carried experimental cloud cameras that can photograph a circular area of the earth 3600 nautical miles in radius. These cameras can take a picture once every 24 minutes from their geostationary location 22,300 miles above a point on the equator. These pictures, received on the ground by a television system, can be made into time-lapse motion pictures from which cloud motions and wind information can be extracted.

Hurricanes' Names in 1969-70

The Weather Bureau has used girls' names to identify hurricanes in the Atlantic, Caribbean and Gulf of Mexico since 1953. A semi-permanent list of 4 sets of names in alphabetical order was established in 1960. Hurricane season begins June 1.

Names assigned to potential hurricanes: 1969—Anna, Blanche, Carol, Debbie, Eve, Francella, Gerda, Holly, Inga, Jenny, Kara, Laurie, Martha, Netty, Orva, Peggy, Rhoda, Sadie, Tanya, Virgy, Wenda. 1970—Alma, Becky, Celia, Dorothy, Ella, Felice, Greta, Hallie, Inez, Judith, Kendra, Lois,

Marsha, Noreen, Orpha, Patty, Rena, Sherry, Thora, Vicki and Wilna.

Hurricanes and typhoons in the Eastern North Pacific (U. S. West Coast) are also identified by girls' names. Names assigned are: 1969—Ava, Bernice, Claudia, Doreen, Emily, Florence, Glenda, Hazel, Irah, Jennifer, Katherine, Lillian, Mona, Natalie, Odessa, Prudence, Roslyn, Sylvia, Tillie, Victoria, Wallie. 1970—Adele, Bianca, Celine, Dolores, Eileen, Francesca, Gretchen, Helga, Ione, Joyce, Kirsten, Lorraine, Maggie, Norma, Oriene, Patricia, Rosalie, Selma, Toni, Vivian and Winona.

MEMORABLE DATES

Consult also Chronology, Aviation Records, Polar Explorations, Fast Ocean Passages, Train Records, Marine Disasters, Political Assassinations, Earthquakes, Tornadoes, Amendments to the Constitution, Noted Personalities, Astronomical Data, Sporting Records and other classifications.

B. C.

3000

Indus Valley Civilization, sites at Mohenjo-Daro and Harappa in West Pakistan. Civilization had complex form of government, elaborate irrigation and drainage system, writing, well laid out streets, and houses of several stories. End came about 1500 B.C.

Pyramids begun by kings of Egypt at Sakkarah. Cheops built great pyramid at Giza; Chephren second largest. Sphinx built about 2900 B.C.

c. 1792-1750

Hammurabi ruled west Semitic kingdom of Babylon; wrote great code of laws. Ruled Canaan in days of Abraham.

1450

Moses led the Israelites out of Egypt (approx.).

1360

Ikhnoton introduced monotheistic worship of Aten, or sun, in Egypt. A successor, Tutankhamen revived polytheistic orthodox. 1350 B.C. Tutankhamen buried at Thebes, 1344 B.C., tomb opened by Howard Carter and Lord Carnarvon, 1923-24 A.D.

1184

Troy fell to Greeks after 10-year siege, according to Homer. While poem is legendary, numerous battles were waged on site at northwest corner of Asia Minor, three miles from Hellespont (Dardanelles). Later town of Ilium was visited by Xerxes and exploited by Alexander the Great. Romans, glorifying their legendary descent from Aeneas, who escaped from Troy, built up Ilium.

In 1871 A.D. Henry Schliemann, German archaeologist, excavated site of Troy on hill of Hissarlik and found deposits of seven cities. Dorpfeld found two more. Schliemann identified second city with Homer's Troy, but objects found in sixth city correspond better with Greek remains of 1200 to 1100 B.C. found at Agamemnon's Mycenae.

1000

On death of King Saul, c. 1000 B. C., David became king of Israel but ruled only the southern kingdom of Judah. Thereafter he ruled all Israel, made Jerusalem capital. Solomon, son of David and Bathsheba, ruled c. 973-933 B.C.

753

Romulus founded Rome, according to legend. Hitties occupied for centuries by Indo-Europeans and Sabines, sheep herders. 613

Babylonians destroyed Nineveh, Assyrian capital. Nebuchadnezzar's Babylonians defeated Egyptians at Carchemish 605 B. C. Built hanging gardens. Destroyed Solomon's temple. 589 B.C.

563

Gautama (Sakyamuni) Buddha, "the Enlightened," born near Himalayas; died 483 B.C., aged 80. Taught that painful life is caused by desire. End desire to end pain in life.

551

Confucius (Latinized form of K'ung-fu-tze) Chinese social philosopher, born; died 478 B.C. Taught: "Do not do to others what you do not wish done to you."

490

King Darius' Persian army landed at Marathon to march on Athens. Athenian infantry numbering 10,000 routed 30,000 Persians.

481-480

Persian King Xerxes assembled a great host at Sardis to invade Greece. His Phoenicians and Egyptians built two ship bridges across Hellespont from Abydos (Nagara) to Sestos, 2,000 yards long. One bridge of planks and darts rested on 360 ships; the other on 314. Herodotus says army crossed for seven days and seven nights.

At Thermopylae, 480 B. C., Leonidas and 300 Spartans, supported by 700 Thespians and 400 Thebans, held off Persians in pass until overcome. Persians took Athens and Attica. Athenians under Themistocles destroyed Persian fleet at Salamis under eyes of Xerxes, won land battle. Rallying about 70,000 from Greek states, they routed Persians at Platea 479 B. C.

438

Parthenon completed at Athens, 101'4" by 228'2". Doric columns 33' tall, roof height 60'. Ictinus and Callicrates, designers; Phidias, chief sculptor.

431

Peloponnesian War began between Athens and Sparta. War ended 404 B.C. with Sparta victorious.

399

Socrates, Greek philosopher, condemned by Athenian state, drank hemlock (dropwort). Plato, his disciple, recorded 35 dialogues, great philosophical work Dialogues recommended: Gorgias, Apology, Crito, Phaedo, Republic, Phaedrus, Banquet. Xenophon, another disciple, recorded memorabilia.

Alexander "the Great" of Macedon, born. Ruthless and energetic military leader, defeated Persians at Granicus, Issus, Arbela; conquered Asia Minor and Egypt, burned Persian capital, Persepolis, carried war to the Punjab. Founder of Alexandria. Died of fever at Babylon, 323 B. C.

323

Aristotle, Greek philosopher with scientific mind, disciple of Plato, died. 62. Demosthenes, Greek statesman, died.

300

Invention of Mayan calendar in Yucatan—approximate date—giving solar year 365.24 days and lunar month 29.52 days. Considered more exact than older calendars of Babylon, Assyria, Egypt, Greece.

264

Rome began first Punic war against Carthage, rich commercial seaport on Bay of Tunis. In 241 B.C., Carthage ceded Sicily and Lipari islands; in 239 B.C., Rome annexed Sardinia and Corsica.

218-146

Hannibal, young Carthaginian, started a campaign against Rome during the Second Punic War. Crossed from Spain to Italy via Mount Genevre in Alps with 20,000 infantry, 6,000 cavalry, and elephants. Defeated Romans at Lake Trasimene, 217 B.C., and Cannae, 216 B.C. Victories nullified by Fabius, "the delayer," hence "Fabian retreat." War closed with defeat of Carthage in Africa by Publius Scipio 202 B.C. Hannibal, after career in Asia Minor, committed suicide in Bithynia upon betrayal to Romans, c. 183 B.C.

Third Punic war, 149-146 B. C., ended with total destruction of Carthage. Later Roman colony built there; city eventually destroyed by Saracens, 698 A. D.

60-27

Julius Caesar formed first triumvirate with Pompey and Crassus 60 B. C.; defeated Helvetii, Belgae 58-57 B. C.; entered Britain 55 and 54 B. C. Crossed river Rubicon to fight Pompey, defeated him at Pharsalus 48 B. C. Defeated Pharnaces at Zela, Asia Minor, 47 B. C., sent "veni, vidi, vici" message: "I came, I saw, I conquered," to Roman Senate. Lived with Cleopatra, queen of Egypt, in Rome 46-44 B. C. Was dictator but refused crown.

Caesar assassinated in Roman Senate by group led by Cassius and Brutus, 44 B. C. Caesar's will made his grand-nephew, Gaius Octavius, successor; he formed new triumvirate, Octavius ruling West, Mark Antony East and Lepidus Africa. At Philippi, 42 B. C., Antony defeated Cassius and Brutus; both committed suicide. Antony joined Cleopatra in Alexandria; they had 3 sons. Octavius defeated their fleet at Actium, 31 B. C.; they committed suicide. Octavius received title of Augustus (venerated) 27 B. C., called first Roman emperor. Pax Romana began. Romans victorious until 9 A.D., when Germans under Arminius defeated Varus. Augustus died 14 A.D.

1

Birth of Jesus Christ in Bethlehem.

1 B. C. and 1 A. D.

The year 1 B. C. is the first year before the beginning of the Christian era. The year 1 A. D. is the first year of the Christian Era. Jan. 1, 1 B. C. is just one year before Jan. 1, 1 A. D. The elapsed number of years between a date B. C. and the same date A. D. is one less than the sum of the years. The Christian era was calculated by the monk Dionysius Exiguus in the 6th century after Christ. He placed Jesus' birth on Dec. 25 in the year 753 of Rome, and decided 754 should be the first year of the Christian era. Biblical scholars find his calculations in error and place the birth of Jesus at 4 B. C. or earlier.

A. D.

THE CHRISTIAN ERA

29

Crucifixion of Jesus in reign of Roman emperor, Tiberius; Pontius Pilate procurator in Judea. The Roman Catholic church gives the date of the crucifixion as April 7, 30 A. D.

43

Roman Emperor Claudius subdued Britons; occupation of 300 years begun.

64

Persecution of Christians by Nero; burning of Rome. Apostles Paul and Peter martyred, c. 67.

70

Jerusalem destroyed by Titus, Christians persecuted, worship in catacombs of Rome.

79

Pompeii, Herculaneum, Stabii, destroyed by eruption of Mt. Vesuvius.

180
Death of Marcus Aurelius: onset of Roman decline. 311

Emperor Galerius, on deathbed, agreed to tolerance of Christians, Emperor Constantine, 313 promulgated Edict of Milan, made Christianity legal. 325

Council of Nicaea called by Constantine in Bithynia, Asia Minor, to get churchmen to define orthodox Christian belief, Divinity of Christ and Holy Trinity endorsed; minority view of Arius rejected. 330

Constantine dedicated Byzantium capital of Eastern Empire, henceforth called Constantinople, now Istanbul. Baptized a Christian on his deathbed by Eusebius, 337 A.D. 380

Theodosius, Roman emperor, made Christianity based on Nicene creed official religion, banned pagan gods. 410

Rome sacked by Alaric, the Goth; by Genseric, the Vandal, 455. 432

Bishop Patrick, native of Severn valley, sent as missionary to Ireland; labored 30 years, converting natives to Christianity. In 563 Columba founded church on Iona. In 597 Augustine arrived, founded church at Canterbury. All three were canonized. 449

Anglo-Saxon migrations from continent to Britain begin at Dover. 483

Justinian I, Byzantine emperor, born; died 565. During reign had Tribonian prepare Justinian Code (Corpus Juris Civilis) which became basic Roman law used later as a model by many modern European states. Santa Sophia built. 570

Mohammed, born in Mecca; Hegira, flight from Mecca, 622. Year 1 of Moslem calendar. Saracens crossed to Spain 711, established Moorish kingdom, lasted until 1492. 731

Great period of Mayan empire began, closed 987. 732

Charles Martel, Frankish ruler, defeated 90,000 Moors at Tours, France; highwater mark of Moslem invasion of Western Europe. 800

Charlemagne, king of Franks, proclaimed Holy Roman Emperor by Pope Leo III on Christmas Day in St. Peter's. Charlemagne fought Saxons, Lombards, Saracens 30 years to Christianize them; extended empire from Atlantic to eastern boundaries of Hungary. Died 814, aged 72, was buried in his cathedral at Aix. His empire broke apart. 1000

Leif Ericsson's Norsemen reach Vinland, land of grape vines. Various identified as Labrador, New England coast and Martha's Vineyard. 1014

Brian Boru, Irish king, defeated Danes at Clontarf. 1027

New empire of Mayas extended north to Mexico. Disintegration accelerated by pestilence, 1480. Destruction of Tayasal, Guatemala, Itza capital, by Spanish governor of Yucatan, 1697, ended Mayan millennium. 1054

Final break between Eastern (Orthodox) and Western (Roman) church came when Pope Leo IX excommunicated Michael Cerularius and his followers. Eastern Orthodox Church became established religion of Russia under the Czars. Russian patriarchate formed 1589. 1066

William of Normandy conquered England at Hastings, Oct. 14; Harold II, last Saxon king of England, slain. 1096

First crusade, preached by Peter of Amiens, supported by Pope Urban II, raised 100,000 men. Captured Jerusalem, 1099. Acre, 1104. Second, 1146, lost Jerusalem to Saladin. Third, 1189, Richard I of England took Jaffa. Fourth, 1200, besieged Constantinople, 1204. Fifth, 1216, achieved 10-year truce. Sixth, 1238, lost ground. Seventh, 1245, led by Louis IX (St. Louis) of France, who was captured, 1250. Eighth, 1270, led by Louis, who died near Tunis, 1270. Children's crusade, 1212, 50,000 children (est.) disbanded in Italy or lost. 1162

Genghis Khan, Mongol chief, born; died 1227. Captured Peking, 1215, defeated Russians, 1223, conquered most of Central Asia, and massacred population of Herat, Afghanistan. By 1241, Mongols under Batu had burned Moscow and Kiev and invaded Poland, Hungary, and the Danube Valley. 1215

Magna Carta, the great charter of England, signed by King John at Runnymede at insistence of 2,000 English barons who refused to fight on foreign

soil and demanded end of illegal levies by king. Charter guaranteed privileges of nobility, church free from secular interference, right of freemen to legal protection. Freemen were privileged class; common people were villein farmers, practically serfs. But 400 years later Edward Coke and Puritans demanded protection for the common people under these rights of freemen. Also invoked Clause 39, out of which trial by jury developed. It reads: No freeman shall be taken or imprisoned, or disseised, or outlawed, or banished, or in any way destroyed, nor will we go upon him, nor send upon him, except by the legal judgment of his peers or by the law of the land. 1271

Marco Polo started with father and uncle for Cathay (China) Mongol kingdom of Kublai Khan. Served under Khan, returned to Venice 1295. Wrote Travels. 1272

Thomas Aquinas, greatest scholastic philosopher, died. 1300

Dante and Giotto flourished: Dawn of Renaissance. 1309

Clement V, French pope, made Avignon seat of church; Urban V returned to Rome, 1367, abandoned it; Gregory XI finally reentered St. Peter's, 1377. During the Great Schism, 1378-1417, French and Italian factions chose popes for Avignon and Rome; breach healed by Martin V, 1417. 1346

Battle of Crecy (Dept. of Somme, France) Aug. 26, Edward III of England defeated Philip VI of France. Possibly first use of cannon. 1348

Black Death (bubonic plague) hit Venice, rapidly spreading to rest of Europe by 1349. An estimated one-fourth of European population killed. 1382

John Wycliffe, Oxford forerunner of Reformation, (1320-1384) directed translation of Vulgate Bible into English vernacular. Supported bill in parliament declaring it sinful for clergy to hold property. By elevating Scriptures above church authority he anticipated Lutheran doctrine by 150 years. 1415

John Huss, Bohemian preacher, follower of Wycliffe, agitator of ecclesiastic reforms, burned at stake in Constance July 6 for heresy after German Emperor Sigismund revoked his safe-conduct. 1429

Joan of Arc, maid of Domremy, France, obeying voices of her saints, rallied French against English, raised siege of Orleans, effected coronation of Charles VII at Reims. Through carelessness or treachery she was captured by Burgundians May 24, 1430, and sold to English for 10,000 livres. Placed on trial before Bishop of Beauvais at Rouen for (1) magic, (2) disobeying parents, (3) wearing male attire, and (4) heresy, she admitted all after 14 days to escape perjury, was given life imprisonment. Tricked to resume male attire, she was condemned to death and burned at Rouen by English May 30, 1431. Sentence revoked 25 years later. Joan has been canonized as saint. 1453

Constantinople captured by Ottoman Turks. End of 100-years' war between England and France, begun 1338. England lost all except Calais, which French captured 1558. 1456

Johann Gutenberg (Gansfleisch) completed first Bible printed from movable type; 2 vols., folio, 42 lines 2 columns to page. Printing took five years. Date established by note in Mazarin copy. 1457

Johann Fust and Peter Schoeffer produced first book printed in colors, and having printers' name, date and place, a Psalter. 1475

William Caxton printed first book in English, translation of a French history of Troy, at Bruges, Belgium. He moved to Westminster, London, printed first book in England, 1477. 1492

Christopher Columbus, Genoese navigator, after years of agitation in Spain gained support of Queen Isabella for westward voyage. Left Palos Aug. 3 with Santa Maria, 100 tons, 52 men; Pinta, 50 tons, 18 men; Nina, 40 tons, 18 men. On Oct. 12 at 2 a.m., Rodrigo de Triana on Pinta discovered land. Columbus landed on Guanahani, Bahamas, called it San Salvador. Discovered Cuba and Hispaniola (Haiti or San Domingo); built first fort, La Navidad, there. Made Admiral of the Ocean Sea. For later voyages see index. 1497

John Cabot, Venetian employed by English, reached Canada. His son Sebastian joined second voyage, 1498. English claim to Canada based on their discoveries.

Amerigo Vespucci, Italian-born Spanish navigator, asserted he reached American mainland (New World) year before Columbus. Martin Waldsee-

muller of St. Die in book, 1507, asked land be called America "because Americus discovered it."

1498

Savonarola, preacher against luxury and power of clergy, burned as heretic in Florence, May 23.

Vasco da Gama, Portuguese navigator, reached India, discovered all sea route from W. Europe.

1506

Pope Julius II (della Rovere) started new St. Peter's; employed Michelangelo, Bramante, Raphael.

1509

Henry VIII became king of England. Defeated Scots at Flodden Field, 1513. Named defender of the Faith by Pope Leo X for attacking Luther, 1521. When pope refused to annul his marriage to Catherine of Aragon for lack of male issue, Henry divorced Catherine, married Anne Boleyn, 1533. Act of Supremacy abrogated pope's authority, made king head of church in England, 1534. He ordered monasteries closed, 1536.

Queen Anne Boleyn was tried for adultery on order of Henry VIII in 1536 and beheaded. Henry married Jane Seymour, who died 1537, after giving birth to son who became Edward VI. Henry married Anne of Cleves, divorced her 1540. Next Catherine Howard, beheaded 1542. Next, Catherine Parr, 1543, who survived him.

1513

Juan Ponce de Leon, veteran of one Columbus voyage, searched for Bimini, found and named Florida. Died in Cuba, 1521.

Vasco Nunez de Balboa left Spanish town of Santa Maria la Antigua del Darien on isthmus of Panama, discovered South Sea, later called Pacific by Magellan.

1517

Martin Luther, Augustinian monk, preaching faith over works, attacked abuse of selling papal indulgences by posting 95 theses (propositions) on Wittenberg church-door, Oct. 31. Diet of Worms, under Charles V, January, 1521, ordered recantation. Luther, backed by German princes, refused; put Scriptures above papal authority. Defended stand in Rome. Translated Greek New Testament into German, 1522. Became head of German evangelical movement, broke with Rome, married. Augsburg Confession, basic Lutheran creed, presented to Diet there by Melancthon, 1530.

1519

Hernando Cortes began conquest of Mexico.

1520

Fernando Magellan discovered Strait of Magellan. Tierra del Fuego, Ladrones, and Philippines, 1521, for Spain.

1524

Giovanni da Verrazano, Italian employed by French, explored New England coast, probably New York bay.

1526

William Tyndale produced in Cologne first printed version of New Testament in English, suppressed in England. Tyndale executed for heresy, Oct. 6, 1536, at Vilvorde, near Brussels, Belgium.

1529

Turks failed in siege of Vienna: Apex of Ottoman European expansion.

1531-35

Francisco Pizarro conquered Peru for Spain.

1534

John Calvin, French-born religious reformer, published his Institutes of the Christian Religion, influential Protestant doctrine. Rejected Lutheran doctrine of consubstantiation; believed in religious base of citizenship, original sin, infant damnation. Influence extended to Scotch Presbyterians, English Puritans and Puritan New England.

Jacques Cartier, sent by Francis I of France, in two voyages (1534-36) discovered St. Lawrence, reached site of Montreal. Third voyage 1541. Basis of French claims to Canada.

1535

Miles Coverdale published first complete Bible in English. Also worked on first authorized Bible, "the Great Bible," completed 1539. Other editions: Whittingham's New Testament, with Calvin's introduction, 1557; Geneva Bible, 1560; Bishops' Bible, 1568.

1540

Francisco Coronado, searching for gold and "Seven cities of Cibola," explored Southwest north of Rio Grande with 70 horse, 30 foot soldiers. Hernando de Alarcon discovered Colorado river. Don Garcia Lopez de Cardenas discovered Grand Canyon.

1541

Hernando de Soto discovered Mississippi River.

1545

Council of Trent, in Austrian Tyrol, urged on Pope Paul III by Emperor Charles V, to define Catholic dogma and remedy ecclesiastical abuses, opened Dec. 13; continued intermittently until 1563; reiterated supreme papal authority, outlined faith.

1555

Bishops Ridley and Latimer burned at Oxford, Oct. 16; Archbishop Cranmer of Canterbury burned Mar. 21, 1556; 277 other religious leaders

burned in attempt of Queen Mary Tudor to restore Catholic authority. Elizabeth became queen, 1558, made Anglican communion official church.

1560

1200 Huguenots hanged at Amboise. Catherine de Medici, Regent of France for son, Charles IX, by Edict of January, 1562, granted Huguenots right to worship outside walled towns. Infraction of edict led to massacre of Huguenots at Vassy, Mar. 1, 1562, beginning of eight wars of religion. Massacre of St. Bartholomew, Aug. 24, 1572, encouraged by Charles IX on marriage of sister, Marguerite de Valois to Henry of Navarre (non-Catholic). Henry III caused assassination of Catholic leaders, Duc de Guise and Cardinal of Lorraine, was himself murdered Aug. 1, 1589. Henry IV (of Navarre) first Bourbon king, promulgated Edict of Nantes, April 13, 1598, giving Huguenots and Catholics equality before law. Henry converted to Catholicism, assassinated, May 14, 1609. Revocation of edict by Louis XIV, Oct. 23, 1685, led to large Huguenot emigration to England and America.

1564

William Shakespeare born; traditional date. Apr. 23; baptismal record, Apr. 26.

1565

St. Augustine, Florida, founded by Menendez Spaniard. Attacked by Sir Francis Drake, 1586.

1566

Duke of Alva persecuted Protestants in Netherlands.

1568

Ivan the Terrible of Russia executed hundreds accused of plot to kill crown prince.

1579

Sir Francis Drake claimed west coast (California) for Queen Elizabeth. Left metal plate, found in Marin county, 1936.

1582

First Catholic New Testament in English issued at Reims: Old Testament translated at Douai, 1609.

1587

Mary, Queen of Scots, executed for treason; actually, threat to throne of Queen Elizabeth.

Virginia Dare, first child born of English parents in the New World, on Roanoke Isl., N. C., Aug. 18, 7 days after Sir Walter Raleigh's second expedition with 117 persons, landed. (First, 1585 returned to England 1586.) By 1590 all trace of settlement had vanished except for a tree inscribed enigmatically "Croatatan."

1588

Spanish Armada, 132 ships, 33,000 soldiers and crews, sent by Philip II of Spain against England, destroyed by Drake's attacks and storms. July 21-29. Only 50 ships returned to Spain. Fading of Spanish power; flourishing of Elizabethan England.

1590

Edmund Spenser began The Faerie Queen. First Shakespeare poem, Venus and Adonis, registered 1593. First play to appear in quarto, Titus Andronicus, registered 1594. Romeo and Juliet performed, 1597.

1600

Shakespeare's most productive decade opened. Included Henry V, Midsummer Night's Dream, Twelfth Night, Merry Wives of Windsor, Hamlet, Othello, Macbeth, King Lear, Tempest, etc. Shakespeare retired to Stratford 1610; died Apr. 23, 1616, the same date that Cervantes died. First folio of 36 plays published 1623; second, 1632; third, 1663; fourth, 1675.

1602

Capt. Bartholomew Gosnold, English navigator, landed on Cape Cod, to which he gave the name it still bears.

1605

Gunpowder Plot of Guy Fawkes to blow up King James I and parliament foiled when 36 barrels of gunpowder were found in cellar under Parliament, Nov. 4.

1607

Capt. John Smith and 105 cavaliers in 3 ships landed at Virginia and started first permanent English settlement in New World at Jamestown, May 13. Virginia was first of the 13 colonies.

1609

Henry Hudson, English explorer of Northwest Passage, employed by Dutch East India Co.; sailed sloop Half Moon into New York harbor, Sept., and up river to Albany. In 1610, in English ship Discovery, 55 tons, explored Hudson Bay. On return, 1611, was put into open boat with his son and 8 others by mutinous sailors. All were lost. Spaniards settled Santa Fe, erected presidio.

1611

King James version (authorized version) of English Bible published; ordered by James I in 1604, it reconciled earlier versions and became basic Protestant Bible.

1618

Thirty Years' War opened in Bohemia between Catholic and Protestant armies; ended 1648 with Peace of Westphalia. Alsace given to France.

Holland and Switzerland received independence.

Sir Walter Raleigh, convicted of conspiring in 1603 to remove James I.; beheaded Oct. 29.

1619

House of Burgesses, first representative legislature, elected by popular vote at Jamestown, established principle of self-government for royal colony.

First Negro slaves in English N. American colonies, landed by Dutch at Jamestown, August.

1620

Plymouth Pilgrims, Puritan separatists from Church of England, some living in Leyden, Holland, since 1609, left Plymouth, England, Sept. 16, in Mayflower, 101 passengers, 48 crew. Original destination Virginia, they reached Cape Cod Nov. 9-19, explored coast, landed Dec. 21 (Dec. 11, Old Style) at Plymouth, so named for Plymouth Co. on map made 1614 by Capt. John Smith. Mayflower Compact, signed on shipboard, was agreement to form a local government and abide by its laws. Started first common house, Dec. 25. Half of colony perished during hard winter.

Gov. Bradford's comment, "They knew they were pilgrims" (on religious journey), later led them to be called Pilgrims, as distinct from Puritans of Massachusetts Bay Colony (1630).

1624

Dutch landed eight men from ship, New Netherland, on Manhattan, May. Proceeded to Albany.

1626

Peter Minuit bought Manhattan from Indians May 6 for trinkets worth \$24.

1636

Harvard College founded Oct. 28.

1637

Colonials destroyed Pequot fort at Mystic, Conn., killed 600 Indians, June 5.

1638

Peter Minuit landed two shiploads of Swedes and Finns at site of Wilmington, Del.

1642

King Charles I of England started war against Puritan parliament at York, Aug. 22. His tax exactions and attempts to force Anglican ceremonies on Scotch and Puritan clergy had wrecked his regime. Called first parliament in 11 years, 1640.

Oliver Cromwell led army of Roundheads for parliament, defeated Charles' Cavaliers at Marston Moor, 1644, and Naseby, 1645. Charles was delivered to parliament by the Scots, 1648.

Galileo died, Newton was born, 100 years after

Copernicus published heliocentric theory. Galileo defended theory: "Holy Spirit intended to teach us in the Bible how to go to Heaven, not how the heavens go." But in 1616 the Inquisition at Rome declared the assertion of earth's motion to be heretical and placed works of Copernicus, Kepler and Galileo on the Index until 1822.

1648

Taj Mahal outside Agra, India, completed by Mogul Emperor Shah Jahan for his wife. 20,000 workers used in construction.

1649

Charles I condemned by House of Commons, sitting as High Court; beheaded Jan. 30.

Commonwealth ruled by Commons and Council of State (John Milton, Latin secretary) with Cromwell at head. Cromwell annihilated Scots at Worcester, 1651. Cromwell made protector for life, actually dictator, 1653. Admiral Blake took Jamaica from Spain, 1655.

Cromwell died 1658. His son, Richard, resigned rule. Puritan government collapsed and parliament called Charles II.

1656

Anne Hibbins hanged as witch in Salem, Mass.

1660

John Bunyan, a tinker, imprisoned at Bedford, England, Nov., for unlawful preaching, released 1672, after writing part of Pilgrim's Progress.

Restoration under Charles II, "Merry Monarch." Charles' Cavalier parliament restored Anglican church and refused freedom of worship to dissenters, promised by King in Declaration of Breda.

1664

King Charles II ordered Col. Nicolls and 300 men to seize New Netherland (Manhattan and environs) from Dutch, granted territory to his brother James, Duke of York. Petrus Stuyvesant, Dutch Director General, yielded peacefully; province of New Netherland and city of New Amsterdam became New York. The Dutch recaptured both Aug. 9, 1673; ceded all by treaty to Britain Nov. 10, 1674.

1665

Great Plague in London killed 68,000. In 1666 great fire destroyed 13,200 houses, 89 churches.

1676

Nathaniel Bacon led planters, oppressed by taxes, against Gov. Berkeley at Jamestown; burned town, Bacon died suddenly; 23 followers executed.

Bloody Indian war in New England ended Aug. 12. King Philip, Wampanog chief, and many Narragansett Indians killed.

American Revolution and War of Independence;

Great Britain, after acquiring Canada from France in 1763, tightened up colonial administration in North America. The Thirteen Colonies, used to self-government, resented duties on commerce and objected to paying for troops now quartered on them. The Sugar Act, 1764, placed duties on lumber, foodstuffs, molasses and rum. The Stamp Act, 1765, required revenue stamps to help defray cost of royal troops. The colonists formed Sons of Liberty groups and rejected British goods. Nine colonies, led by New York and Massachusetts at Stamp Act Congress in New York Oct. 7-25, 1765, adopted Declaration of Rights, opposing taxation without representation in parliament and trial without jury by admiralty courts. In the Virginia House of Burgesses Patrick Henry warned King George III of consequences, with "If this be treason make the most of it." Parliament repealed Stamp Act Mar. 17, 1766.

Townshend Acts, 1767, levied taxes on glass, painter's lead, paper and tea imports. In 1770 all duties except tax on tea were repealed, but principle of right to levy was maintained. British troops fired into a mob Mar. 5, 1770, killed 5 including Crispus Attucks, reportedly a Negro leader of the group; it was called the Boston Massacre. Tea ships of East India Co. turned back at Boston, New York, Philadelphia, May, 1773. Cargo ship burned at Annapolis, Oct. 14. Cargo thrown overboard at Boston Tea Party, Dec. 16. Parliament ordered port closed until tea was paid for, sent 4 regiments to Boston, suppressed town meetings and elective representation in Massachusetts.

Samuel Adams, Boston, began untiring patriot leaders by Committees of Correspondence, Virginia called for first Continental Congress, Philadelphia, Sept. 5-Oct. 26, 1774. On Mar. 23, 1775, Patrick Henry addressed revolutionary convention, Richmond, Va., with famous speech: "Give me liberty or give me death!"

BATTLES OF 1775

Paul Revere and Wm. Dawes, on night of Apr. 18 on horseback aroused Sam Adams and John Hancock at Lexington and others that 700 British were on way to Concord to destroy arms. At Lexington, Apr. 19, Minutemen lost 8 killed, 10 wounded. On return from Concord the harassed British lost 273.

Col. Ethan Allen (joined by Col. Benedict

Arnold) captured Ft. Ticonderoga, May 10; also Crown Point. Colonials headed for Bunker Hill, fortified Breed's Hill, Charlestown, repulsed British under Gen. Wm. Howe twice before retreating June 17; British casualties 1,000; called Battle of Bunker Hill. Continental Congress June 15 named Gen. Washington commander-in-chief; he took command in Cambridge July 3. Maj. Gen. Richard Montgomery led troops against Canada via New York, Col. Arnold marched via Maine wilderness; captured Montreal Nov. 13, attacked Quebec Dec. 30-31; Montgomery killed. Colonials returned to New York state June, 1776.

Mecklenburg Declaration of Independence adopted at Charlotte, Mecklenburg County, N.C., May 20 (a disputed tradition).

DECLARATION OF INDEPENDENCE

Virginia voted for independence May 15. In Continental Congress June 7, 1776, Richard Henry Lee (Va.) moved "that these united colonies are and of right ought to be free and independent states." Resolutions adopted July 2. Declaration of Independence July 4. See article.

Col. Moultrie's batteries at Charleston, S. C. repulsed British sea attack June 28. Washington, with 10,000 lost Battle of Long Island to Howe and Gen. Sir Henry Clinton with 15,000 Aug. 27, evacuated New York.

Nathan Hale, executed as spy by British Sept. 22, said: "I regret that I have but one life to lose for my country."

Washington repulsed Howe at Harlem Heights Sept. 16, retreated to White Plains, N. Y. Brig. Gen. Arnold's Lake Champlain fleet was defeated at Valcour Oct. 11, but British returned to Canada. Howe failed to destroy Washington's army at White Plains Oct. 28. Hessians captured Ft. Washington, Manhattan, and 3,000 Nov. 16; Ft. Lee, N. J., Nov. 18.

Washington in New Jersey recrossed Delaware River Dec. 25-26, defeated 1,400 Hessians at Trenton N. J., Dec. 26.

BRANDYWINE AND SARATOGA, 1777

Washington defeated Lord Cornwallis at Princeton Jan. 3. Continental Congress adopted Stars and Stripes June 14. See article on Flag. Maj. Gen. John Burgoyne with 8,000 from Canada captured Ft. Ticonderoga June 27. Brig. Gen. Nicholas Herkimer, to raise St. Leger's siege of Ft.

1682
Robert Caveller, Sieur de la Salle, took lower Mississippi river country for Louis XIV. called it Louisiana, Apr. 9. Had built French outposts in Illinois. Established fort at Lavaca, Texas, 1684. with 400 men. Was killed by his own men on Trinity river, Texas Mar. 19, 1687.

1683
William Penn signed treaty with Indians.

1689
King William's War, British in America vs. French and Indians. Ended 1697.

1692
Witchcraft delusion at Salem, Mass., inspired by preaching: 19 persons hanged, 1 man crushed to death. Executions in Europe of women for witchcraft between 1484 and 1782 believed to have reached 300,000. Last in England 1716; in Scotland, 1722.

1696
Capt. William Kidd, American, hired by British king and nobles to fight pirates and take booty, became pirate. Returned to New York with treasure, 1698, buried it on Gardiner's Island. Arrested by Earl of Bellamont, governor of province, and sent to England for trial, he was hanged, 1701, for killing sailor. Treasure of gold and gems given Bellamont by Lord of Gardiner's island.

1704
Indians attacked Deerfield, Mass., Feb. 28-29, killed 40, carried off 100.

Gibraltar taken by England from Spain, July 24; formally ceded by Treaty of Utrecht, 1713.

Boston News Letter, first regular newspaper, started by John Campbell, postmaster. (Publick Occurrences, 1690, was suppressed after one issue.)

1709
British-Colonial troops captured French fort, Fort Royal, Nova Scotia, in Queen Anne's War (1701-1713). France yielded Nova Scotia by treaty, 1713.

1712
Slaves revolted in New York April 6. Six committed suicide, 21 were executed. Second rising, 1741; 13 slaves hanged, 13 burned, 71 transported.

1720
"Mississippi Bubble," John Law, Scot, compottor of finance in France, issued paper currency without security to back trading scheme. Shares reached \$4,000 before collapse. Many ruined; France assumed debt of \$340,000,000.

Origins, Battles, Results, 1763-1783

Stanwix, routed Indians at Oriskany, N. Y. Aug. 6. Burgoyne's Hessians defeated by Brig. Gen. John Stark and the Green Mountain Boys at Bennington, Vt., Aug. 16. Arnold raised siege of Ft. Stanwix.

Howe defeated Washington at Chad's Ford on the Brandywine (Pa.) Sept. 11 and occupied Philadelphia. Congress moved to Lancaster, Pa. Inconclusive battle of Germantown, Pa., Oct. 4. Washington's army wintered at Valley Forge.

Americans massed at Bemis Heights on Hudson under Maj. Gen. Horatio Gates, attacked by Burgoyne Sept. 19. At Freeman's Farm. Gen. Arnold and Col. Daniel Morgan's riflemen repulsed British, inflicting great loss. Gen. Clinton took Ft. Clinton and Montgomery below West Point Oct. 6, but did not support Burgoyne. Americans beat back Burgoyne at Bemis Heights Oct. 7 and cut off British escape route. Burgoyne surrendered 5,000 at Saratoga Oct. 17.

Marquis de la Fayette (Lafayette), aged 20, made major general.

Articles of Confederation and Perpetual Union adopted by Continental Congress Nov. 15.

HELP FROM FRANCE

France recognized independence of 13 Colonies, signed treaty of aid with Benj. Franklin, Silas Deane, Arthur Lee, Feb. 6, 1778. Sent fleet under Adm. d'Estaing. British evacuated Philadelphia in consequence, June 18. Washington harassed British at Monmouth, N. J., June 28. Indian massacre at Wyoming, Pa., July 3. British overran Georgia, December.

George Rogers Clark, who took Cahokia and Kaskaskia, (Ill.) 1778, took Vincennes Feb., 1779. Maj. Gen. Anthony Wayne, July 15, stormed Stony Point, on Hudson, but withdrew after victory.

John Paul Jones in Bonhomme Richard defeated Serapis on the Atlantic Sept. 23, 1779. French fleet and Maj. Gen. Benj. Lincoln's men were repulsed at Savannah Oct. 9.

BENEDICT ARNOLD'S TREASON

Three Continental soldiers, Paulding, Williams and Van Wart, captured Major John Andre, adjutant general of the British army, in disguise at Tarrytown, N. Y., Sept. 23, 1780, finding papers betraying West Point, signed by Gen. Arnold, in his socks. He had lost way after rendezvous with Arnold at Haverstraw, N. Y. Arnold, informed of

1728
Pennsylvania Gazette, founded by Samuel Kellmer, Philadelphia. Benj. Franklin bought interest, 1729.

1735
Freedom of the press recognized in New York by acquittal of John Peter Zenger, editor Weekly Journal, on charge of libelling British governor, Cosby, by criticizing conduct in office.

1740-1741
Capt. Vitus Bering, Dane employed by Russians, discovered Alaska.

1743
King George's War. British and American colonials vs. French. Siege of Louisbourg, Cape Breton Isl. led by Gov. Wm. Shirley of Mass. Surrendered to British June 17, 1745. Returned to France by Treaty of Aix la Chapelle 1748.

1746
English defeated Scots at Culloden, April 16, routing Stuart pretender, Prince Charles.

1751
Publication of the Encyclopédie began in France, great popularizer of the Enlightenment.

1752
Benjamin Franklin, flying kite in thunderstorm, proved lightning is electricity June 15.

Gregorian calendar adopted by Great Britain and American colonies, dropping 11 days after Sept. 2; next day Sept. 14.

1754
French and Indian War started after French occupied uncompleted British post, called it Ft. Duquesne (site of Pittsburgh). Col. Geo. Washington with Virginia troops clashed with French at Great Meadows, dug in at Ft. Necessity; capitulated and withdrew July 3, 1754. Boston's 3,000 provincial troops took Nova Scotia. French forts June 16, 1755. French and Indians ambushed Gen. Wm. Braddock's expedition 10 mi. from Ft. Duquesne (now Braddock, Pa.) July 9; Washington helped retreat; Braddock fatally wounded, 714 killed. Gen. Sir Wm. Johnson defeated French and Indians under Baron Dieskau at Lake George Sept. 8. British moved Acadian French out of Canada. Nov. Britain formally declared war May 18, 1756. Surrendered Ft. Wm. Henry (Lake George) to Montcalm; Indians massacred many unarmed British, Jan. 1, 1757. Montcalm at Ft. Ticonderoga repulsed 17,000 British July 8. French gave up Louisburg, Ft. Frontenac, Ft. Duquesne, 1758; Niagara,

Andre's capture, escaped from headquarters in Highlands, near present Garrison, N. Y., by barge to British sloop Vulture off Verplanck's Point.

Andre was found guilty by board of American officers at Tappan, N. Y., hanged as spy Oct. 2. Washington refused to intercede. Arnold made brigadier general in British army. Burned New London, Conn., 1781. His wife, Peggy Shippen of Philadelphia adjudged innocent by Washington, since proved implicated. Arnold died in London. Andre's body removed to Westminster Abbey, 1821.

ROAD TO YORKTOWN

Charleston fell to the British May 12, 1780, but a segment of Lord Cornwallis's forces led by Maj. Patrick Ferguson was defeated near Kings Mountain, N. C. Oct. 7 by militiamen commanded by Colo. John Sevier, Isaac Shelby, Wm. Campbell and Benj. Cleveland. Operations in South under Cornwallis and Col. B. Tarleton in 1781 were checked by Maj. Gen. Nathanael Greene and Brig. Gen. Daniel Morgan. Cowpens, S. C., Jan. 17, was a victory, but Guilford Court House, N. C., Mar. 15 was a British gain. Greene's harassments caused Cornwallis to retire to Wilmington, N. C., and thence to Yorktown, Va.

While Lafayette waited near Yorktown, Adm. De Grasse defeated 3,000 French and stopped Adm. Thos. Graves's British fleet in Hampton Roads. Adm. Barras joined De Grasse. Washington and Rochambeau joined forces and leaving 2,000 to mislead Sir Henry Clinton in New York, marched to Annapolis and took boats to James River near Williamsburg, arriving Sept. 26. When siege of Cornwallis began Oct. 6, British had 6,000, Americans 8,846. French 7,800. Clinton decided too late to relieve Cornwallis. Graves sailed from New York with 7,000 Oct. 17, too late to reach Cornwallis, who surrendered Oct. 19, 1781.

INDEPENDENCE, 1782
